Proceedings of
**1998 Powder Metallurgy World Congress
& Exhibition**

Granada, Spain, October 18-22, 1998

CONTENTS

Hard Materials

Measurements of Fracture Toughness in a Micrograined Tungsten Carbide using two Different Methods	2
<i>L G Rosa, J C Fernandes</i>	
Fracture Toughness-Microstructure Relationships in Ultrafine Tungsten Carbide-Cobalt Alloys	8
<i>N Sacks, C Allen, I Northrop</i>	
Reliability Characteristics of Hardmetals	15
<i>Dr H Reshetnyak, Dr J Kùbarsepp</i>	
A New Method of Evaluation on the Quality of Cemented Carbides in Cyclic Contact Compression Loading	21
<i>L I Alexandrova, V P Bondarenko, M G Loshak</i>	
Comparison of Plastic and Elastic Behaviour of Submicron and Micron-sized WC-Co Grades at Temperatures between 20 to 1000°C	27
<i>Prof S Luyckx, I T Northrop, Yu V Milman, V A Goncharuck</i>	
Preparation of Ultra Fine TiC Dispersed Ni-based Cermet by Mechanical Alloying	40
<i>Dr A Sugiyama, Dr K Kobayashi, D K Ozaki</i>	
Synthesis of TiC-Ni(-Mo) Cermet via Mechanical Alloying	45
<i>C J Choi, B G Moon, W W Park</i>	
Use of Computer Simulation in the Measurement of WC Grain Size	51
<i>Dr B Roebuck, N McCormick</i>	
Development of the Microstructure in Cemented Carbides between 25-1000°C and the Relationship to their Properties in Technical Applications	57
<i>P Kindermann, Dr U Schleinkofer, H-G Sockel, W Heinrich, K Gorting</i>	
Influence of the Manufacture Process to obtain WC+Co Thermal Spraying Powders. Effects on the Powder Characteristics and Coating Properties	63
<i>Prof J M Guilemany, J M P Sanchez</i>	
Non-Destructive Phase Composition and Cutting Properties Control of Cemented Carbide Tool Inserts	69
<i>E Dudkin, A Plotnikov, M Diperstain</i>	
Features of Wear of TiC-Base Hardmetals	75
<i>J Kùbarsepp, H Reshetnyak, J Pirso, H Annuka</i>	

Progress in Cost Reduction for Sintering and Overpressure Sintering of Hardmetals.....	80
<i>Dieter Ermel</i>	
Factors Affecting Performance of Cemented Carbide Tools in Printed Circuit Board Drilling	86
<i>J Aucote, A Grearson</i>	
Oxidation of (Ti, Mo)C Carbide	93
<i>Dr V Voitovich</i>	
Mechanisms of Hardmetal Solid and Liquid Phase Sintering	99
<i>Dr A G Pereira da Silva, W-D Schubert, B Lux</i>	
Properties and Composition of the TiC-NbC Based Cemented Carbides	105
<i>Dr L Bodrova, V A Lazarjuk, Dr H M Kramar</i>	
Carbide Titanium and Vanadium Alloys for Cutting Tools	110
<i>Dr L Bodrova</i>	
Physicochemical Bases of Forming Nanostructures in the Binding Phase of Cemented Carbides	115
<i>A F Lisovsky</i>	
Investigation of Thermal Conductivity of Hexanite-R by Solving of Ill-Defined Problems	119
<i>Dr K Isayev, A Bloschanevich, A Bochko, A Lapteva, N Kuziu</i>	
Wear Resistance of PVD Coated PM Materials Cutting Tools	124
<i>K Musialek, A B Smith, M Ciskal, I Pofelska-Filip, A Narolski</i>	
Pressure Development inside Extruder Nozzles as a Function of the Temperature and the Plasticity of Press Masses when Extruding Carbide Rods before Sintering	132
<i>Dr K Friedrichs</i>	
Microstructure and Properties of Various Cermets Strengthened by Ultra-fine Shock-wave Particles	140
<i>Dr Y Gordeev, Dr A Bucaemsky, G Zeer, S Teremov, A Pusyr</i>	
Distribution of Cr and V in the Phases of Cemented Carbides WC-Co	146
<i>Ms V Chabretou, O Lavergne, S Lay, C Allibert, L Pontonnier</i>	
Comparison of the Properties of Ultrafine and Conventional Hardmetals.....	152
<i>Prof W Missol, T Karwata, J Krajzel, J Bujok</i>	
Interface Aspects in Cobalt-based Diamond Cutting Tool Segments	158
<i>D A Akyüz, H Hofmann</i>	
Microwave Enhanced Reactive Sintering of Composites on BN-SiC Base	164
<i>Dr V Brozek, V Dufek, M Hajek</i>	
Preparation of Tungsten Carbonitride Powder by Heating Tungsten Powder in Nitrogen Gas	168
<i>N Asaka, T Igarashi, Y Doi, K Hayashi</i>	
Formation of very Fine Crystal Nucleus into WC Particle by Inhibitor Addition Technique	173
<i>Y Yoshiharu, Y Doi, S Honkawa, N Asada</i>	
Structural Characterisation of WC+Co-Cr Sintered and Crushed Powders	179
<i>Prof J M Guilemany, J S Molino</i>	
Diamond-like Carbon Films on Sintered Carbides - Technology and Wear Resistance Evaluation.....	185
<i>J Richter, I M Hutchings, T W Clyne, X Peng, J Krajzel</i>	

Effect of Coated Whiskers on the Mechanical Properties of SiC Whisker Reinforced Silicon Nitride Ceramic Composite	191
<i>Prof W-S Cho, B I Kyung, K W lung</i>	
Quantification of the cBN - hBN Transformation and Production of cBN Based Cermets by HIP	197
<i>E J Otegui, Dr I ñigo Iturriza, V Ayala, J Martin, F Castro</i>	
Preparation of Niobium Carbide from an Organometallic Precursor	203
<i>C P Souza, F F P Medeiros, U Umbelino Gomes, C Ciaravino, P Satre, M Roubin</i>	
Characterisation of Hot Pressing Behaviour of Diamond Cutting Tools	208
<i>Prof S Karagöz, M Zeren</i>	
Effects of Various CuSn-Alloying Systems as Selected Bonding Material in Hot Pressing Processing Diamond Tools	213
<i>J-M Borel, B Gartner</i>	
Processing and Properties of Metal-Bonded Coated Diamond Composites	217
<i>Dr J Karwan-Baczewska, D I Gotman, Prof E Y Gutmamas</i>	
Features of Structure and Mechanical Properties of Hardmetal produced by Low-Temperature Pressing of Submicron WC/Ni Powder	223
<i>Dr A Laptev, Dr S S Ponomarev</i>	
Hot Pressed Binder-Diamond Type Composites	229
<i>J Vukoman, R Curcic, G Djurkovic, P Zivanovic, D Uskokovic</i>	
Surface Processing of Ultrahard Materials used for Embedding in Resin or Metallic Matrices	234
<i>M Musu-Coman, M Fecioru, Gh Baluta, N Arnici</i>	
Application of Pressure Swing Granulation to Hardmetal Granulation Process	240
<i>K Nishii, H Sonoda, H Kamiya, M Horio</i>	

Tribology/Friction

Tribology of High Speed Steel Base Composites	247
<i>Dr M Oliveira, I M Martins, J D Bolton, C Jouanny-Trésy</i>	
Wear Behaviour of M3/2 High Speed Steel Reinforced with NbC and TaC	253
<i>E Gordo, N Antón, N Candela, J M Ruiz-Prieto, J M Torralba</i>	
Development of a Powder Metal Stainless Steel for High Temperature Tribological Applications	259
<i>I Whitaker, P Maulik, C G Purnell</i>	
Tribological Investigations of PM Stainless Steels mixed with HCX23 against Al ₂ O ₃ & SiC	265
<i>P Kjeldsteen</i>	
Wear/Corrosion Behaviour of Reactively Hot Pressed Nickel Aluminides	284
<i>Prof D J Stephenson, J H Jin</i>	
Pseudo-Pitting Process in Powder Metallurgy Materials	290
<i>Dr B Kubicki, M J Kubicki</i>	
Tribological Behaviour and Characteristics of Sintered Iron Based Composites with Additions of Cu ₃ P and Ceramic Particles	296
<i>Dr C Peytour-Chansac</i>	

New Approach to the Manufacture of Metallic Fibre	300
<i>D Mason</i>	
Influence of the Carbon Fibre Additions into a PM Friction Metallo-ceramic Composite on its Physico-Mechanical and Tribological Characteristics	304
<i>M Corban, C Novac, P Nita</i>	
Low Cost Alternative to MoS ₂ as Solid Lubricant for Bronze Bearing	307
<i>K Murali, S Ashok, C Krishna</i>	
Layered Niobium and Tantalum Sulphide Carbides (Nb, Ta) ₂ S ₂ C - Prospective New Solid Lubricants	312
<i>Prof H O Boller</i>	
Engineering Properties of Fe-MoS ₂ Powder Mixtures	316
<i>Dr B Sustarsic, Prof L Kosec</i>	
Research Regarding the Obtaining of a New Kind of Metallic Matrix Friction Material	322
<i>Dr S Gavrilu, E Critescu, E Enescu, E Soptea</i>	
Effect of Different Iron Powder on the Friction Properties of Sintered Friction Materials based on Iron	328
<i>N M Talijan, D S Trifunovic, D D Trifunovic</i>	
Mechanical Alloying of Fe-Based Solid Lubricant Composite Powders	334
<i>D Ernst, H Weiss, R Reichardt, H Zoz</i>	
Sinters Assigned for Performance in High-Duty Friction Pairs	344
<i>Dr M Sorochtej, Dr A Tabor</i>	
Characterisation of Nickel Bronze Graphite Composites for Friction Applications	349
<i>L E G Cambroner, J Pous, B Vera, J M Ruiz-Roman, J M Ruiz-Prieto</i>	
Study of Copper Alloy Fine Powder Effect on Steel Surface Subjected to Friction	355
<i>Prof I V Frishberg, N V Kishkoparov, L V Zolotukhina, V V Kharlamov</i>	

Testing/Measuring/Control

Influence of Mean Stress on the Fatigue Behaviour of Sintered Steel	362
<i>A Piotrowski, G Biallas</i>	
Longitudinal Vibrations Tests Applied to Sintered Parts	368
<i>Prof G Arghir, Prof M Arghir, E Abrudan</i>	
Dimensional Control in the Production of Thin-Walled PM Gerotors	374
<i>K Karthikeyan, S Srinivasan</i>	
Higher Tolerances by Improved Materials and Processes	379
<i>M Larsson, J Rasmus</i>	
High Density PM Parts - Detection and Prevention of Microcracks	385
<i>Dr I C Krezalek</i>	
Segregation in Metal Powder Mixes and How to Counteract it	391
<i>P Lindskog, J Arvidsson, P Beiss, V Braun</i>	
Use of Organic Binders in Powder Mixes to Improve Dimensional Stability of Sintered Steels	404
<i>M A Teixeira de Carvalho, R Pegorer, D Rodrigues</i>	

Characterisation of the Inner Volume of PM Parts by Micro Computer Tomography	409
<i>Dr K Pischang, Dr J Goebbels, Dr B Illerhaus</i>	
Direct Current Potential Drop Method Applied to Green Compacts	415
<i>P Luukkonen, T Ericsson</i>	
Application of Ultrasonics to Metal Powder Separation	421
<i>R Usherwood</i>	
Bulk Calibration Standards by Powder Metallurgy for ICP-AES-Analysis	427
<i>Dr C Edtmaier, P Lehrner, Dr J Zbiral, Dr J Disam</i>	
New Recommendations for the Particle Size Testing of Powders and the Homogenisation of Powder Mixtures	431
<i>Prof S Domsa, Prof I Vida-Simiti</i>	
Non-Homogeneous Density Distribution within Pressed Iron Samples	437
<i>S Prokic, B Zivanovic</i>	
Methodics to Correct the Data of Mercury Porosimetry	443
<i>V V Maziuk, L P Pilinevich, A L Rak</i>	
Research of Iron Powders Behaviour in Magnetovibrating Layer	448
<i>Y A Gordin</i>	
Resonant Separation of Grinding Slimes	453
<i>Y A Gordin, Y M Vergnigorov</i>	
Specific Control of Impurity Inclusions in Powder Materials	458
<i>G S Burkhanov, V M Kirillova</i>	
Utilisation of Powder Metallurgy for Standards Preparation	465
<i>Prof I Spiridonova</i>	
Porosity of Aluminium Powder Green Compacts	468
<i>R A Tolosa, J Diaz, H Parra</i>	

Superhard/Refractory Metals

Sintering/HIPing of Cobalt Powders for Diamond Tools	475
<i>M del Villar, J Echeberria, I Iturriza, F Castro</i>	
Densification of Diamond Tools with Co, Ni and Fe Based Metallic Binders	481
<i>Dr R G Ojeda, M del Villar, P Muro, I Iturriza, F Castro</i>	
Coated Powder Approach for Tungsten Alloys	487
<i>A Bose, A J Sherman, A Biswas</i>	
Morphological Effect of Grains on Deformation Mechanism Maps of PM Tungsten Fine Wires	492
<i>K Tanoue</i>	
Work Hardening of Powder Sintered Mo-Re Alloys	498
<i>J L Garin, R L Mannheim</i>	
Bohemian Wolframite and Tungsten Discovery	504
<i>Dr V Dufek, P Mitrov, J Palme, L Sarman</i>	
Sintering of Ternary Mo-W-Re Alloys at Medium Temperatures	509
<i>Prof R Mannheim, J L Garin</i>	

Fracture Toughness of Tungsten Heavy Alloys	515
<i>Z Ludynski, J J Bucki</i>	
Microstructural Control of Mechanically Alloyed Tungsten Heavy Alloy by Two Step Sintering	520
<i>H J Ryu, S H Hong, W H Baek</i>	
Low-Temperature Oxidation of Industrial Molybdenum Surfaces	526
<i>A Schintlmeister, H P Martinez, P Wilhartitz, F P Netzer</i>	
Research into Tungsten Powder Processing	532
<i>I Pascu, D Tarata</i>	
Tantalum Silicide Sputtering Target Material for Amorphous Ta-Si-N Layers	537
<i>Dr E Ivanov</i>	

Coatings

New Developments of Powder Metallurgy Research Institute in the Field of Composite Materials, Products, Coatings and Production Technologies	544
<i>Dr G Kletsko, P A Vityaz, E V Zvonarev</i>	
Effect of the Physical Characteristics and Properties of Powder Particles on the Structural and Mechanical Characterisation of Cr ₃ C ₂ -NiCr Coatings obtained by HVOF	548
<i>Prof J M Guilemany, J A Calero, V V Sobolev</i>	
Production of Coatings containing selected Diamond, Nitrides and Carbides by APS and UPS Processes	554
<i>A Ilyuschenko</i>	
Production of Productive Coatings and Discrete Structure	560
<i>V Ivashko, A F Ilyuschenko, E A Doroshkevich, V A Okovity</i>	
Thermal and Mechanical Treatment of Self-Fluxing Alloys	565
<i>A Ilyuschenko, E A Doroshkevich, V A Ivashko, A I Shevtsov, V A Okovity</i>	
Thermal Coatings from New Iron-Base Alloys	570
<i>Dr S A Revun, Dr E L Muraviova</i>	
Interaction between Components under Thermal Spraying Fusion and Welding of Composite Coatings	572
<i>Dr E L Muraviova, Dr S Revun</i>	
Formation of Thin-Film Tribological Coatings by Electro-Contact Sintering of Powder Composites	577
<i>Dr V A Kovtun, Y M Pleskachevsky</i>	
Effect of Technological Parameters of Laser Fusion and Chemical Composition on Structure and Properties of Ni-Cr-B-Si-C Powder Coatings	583
<i>M Kardapolova, O Devoino, N Spiridonov</i>	
Improvement of Antifriction Properties of Bronze Powder Coatings by Chemical and Thermal Treatment	587
<i>Dr O Devoino, M Kardapolova, G Panich, A Rak</i>	
Wear Resistant and Graded Powder Coatings produced by Vacuum Electron-Beam Facing	591
<i>Dr G Pribitkov, V Panin, S Beljuk, V Durakov</i>	
Formation of Coating at the Plasma Alloying	596
<i>Prof I Spiridonova, Dr T Svetlana</i>	

Experience in Development and Commercial Implementation of New Zinc-Rich Coatings for Protection of Steel against Corrosion	600
<i>Prof I Frishberg, L P Yurkina, O Y Subbotina, N V Kishkoparov, V Nicolay</i>
