Vexilar Wear

Product Guide

A tradition of excellence and innovation for a better fishing experience.

For over half a century, anglers have started many great fishing adventures by turning on a Vexilar. Now with over half a million Vexilar units in use today, it's no wonder serious anglers proudly state that "they will never go fishing without their Vexilar!" Few companies can lay claim to a history characterized by a passion for quality and performance in every product.

1960 - Vexilar was founded by John Uldrich and Robert Knutson. The first product was a small range-finder device for determining vertical distances for golfers.

1968 - The Model 104 "Deptherm"™ was introduced, Vexilar's first venture into the sport fishing industry. It has remained in the Vexilar product line for over 50 years.

1969 - The company officially became Vexilar Engineering, Inc. Vexilar then introduced their first sonar device, the Model 120 S.O.S. (Sound Off Sonar). It was the first of its kind to offer an audible alarm when a fish or minimum depth is detected.

1970 - Vexilar introduced the first straight-line paper graph to the sport fishing industry. The model 155A forever changed the way anglers expected to see the underwater world.

1975 - Vexilar introduced the model 660, the first CRT (Cathode Ray Tube) display sonar device. This model was well accepted and was followed by the 330 and 990.

1982 - Vexilar introduced the first Liquid Crystal Display depth sounder, the model 480. This innovation would change the shape of sport fishing sonar to this day.

1987 - Vexilar developed the first digital fish weigh scale. The device was sold as the Normark Weigh-in Scale.

1989 - Vexilar discovered the classic FL-8™, a three-color spinning wheel flasher. The live-action, real-time response of the FL-8™ was the ideal tool for winter fishing. This understanding of what the FL-8™ could do that no other sonar has ever done, sparked the modern ice fishing revolution.

1995 - With the popularity of Vexilar FL-8™ flashers increasing each year, cross-talk interference became a major issue. In response, the FL-8™SLT (SiLenT) was introduced with the first interference rejection system. This effectively knocked out the problematic signals in both units.

1997 - Vexilar was issued a patent for the "Ice-Ducer"™ transducer, a sonar transducer designed specifically for ice fishing.

2001 - Vexilar advanced flasher sonar technology with the FL-18™ which delivers a target ID of under ½ inch and became the world's first split-screen zoom flasher sonar. Vexilar also pioneered the concept of a pre-packed system for the winter angler, combining the flasher unit, Ice-Ducer™ transducer, and battery in a handy carrying case.

2013 - Vexilar set a new bar for performance with the FLX-28™. This is the first flasher to use magnetic data transfer technology to the spinning wheel to permit auto depth ranging, digital depth display, and a five color palette.

2013 - For the first time, anglers were able to download a free app to their smart phone or tablet and turn it into the best HD quality, touch screen sonar in the world for a fraction of the cost of conventional sonar. Vexilar launched the ultra-portable SonarPhone™ SP100 and the SP200 for permanent boat installation which can integrate with Navionics to allow for sonar/GPS display and the ability to make sonar charts live. **(2017)** - Vexilar's WiFi sonar technology has now been patented.

2014 - Vexilar introduced a digital depth display which works with all flashers made in the last 30 years. Simply attaching the DD-100 between the transducer and head unit allows anglers to get exact depth readings. Battery status can also be indicated with the touch of a button.

2015 - Vexilar is inducted into the Minnesota Fishing Museum Hall of Fame. "The name Vexilar is synonymous with the ice-fishing market's dynamic growth in recent years. Talk ice fishing and a common topic is what anglers see on 'the Vexilar.' Legendary for its electronics innovations, the Bloomington-based firm boasts a history dating to 1960."

2017 - Vexilar unveiled the next generation FLX-12™ and FLX-20™ flashers, which feature its pioneering brushless data transfer technology.

2020 - Vexilar reached the 60-year mark and continues to help generations of anglers catch more and bigger fish.

2020 - Vexilar's FLX-30™^{BB} brings broad band sonar capability of 160 kHz to 300 kHz to deliver interference-free performance with unmatched signal clarity and sharpness.

VEXILAR WEAR

FL-series FLASHERS/FISH-FINDERS

Engineered with Vexilar's proprietary Brushless Data Transfer technology for the brightest, sharpest, longest lasting flasher display on the market today.

■ FLX-30™ BB

VEXILAR HAS DELIVERED ON THE DREAM of developing a broad band flasher sonar with unmatched interference rejection and signal clarity. Based on the same easy to use, auto-ranging performance platform as the FLX-28, the FLX-30 offers the angler seven frequencies from which to choose, and with 20 IR settings, 140 combinations are available to kill interference once and for all! The magic begins with the world's first broad band Ice-Ducer™ made from an array of dozens of small crystals. They deliver a wide sonar frequency band from a 19-degree beam at 160 kHz to an 8-degree at 300 kHz. Anglers can fine-tune the display to knock-out interference and sharpen target ID down to ¼". The FLX-30 features night mode, *three* power level settings, *three* zoom zones, three manual depth setting ranges to 300 feet and five color palette choices. With Vexilar's legendary sunlight-readable, 525-segment resolution display now enhanced with broad band technology, it is safe to say you will never look at ice fishing the same way again!

■ FLX-28™

FEATURES, PERFORMANCE AND EASE OF USE make fishing with the highly advanced, yet very user-friendly FLX-28 a pure joy. Based on Vexilar's exclusive brushless data transfer technology, the FLX-28 delivers the industry's finest display. The sunlight-readable display offers five different color palettes and shows digital depth. The magic of the FLX-28 is the auto feature. Simply place the Ice-Ducer transducer in the water, turn the system on and start fishing! The unit automatically selects the proper interference rejection and depth range to give you maximum display resolution down to 300 feet. The FLX-28 is packed with additional features such as weed mode, night mode and auto zoom that make it one of the most popular sonar systems on the ice today.

■ FLX-20™

VERSATILITY IS THE KEY TO SUCCESS and the FLX-20 delivers! With *two* Auto Zoom zone options, one for the zooming in on the bottom six feet and one for the bottom twelve feet, there is nowhere those bottom loving fish can hide. From the 300 foot max depth range to the night mode for easy viewing in low light conditions, nothing rivals the FLX-20 for superior, multi-use performance, shallow or deep, day or night.

■ FL-18™

RELIABILITY AND GREAT PERFORMANCE in all weather conditions make the FL-18 a true winner with hard-core anglers. The FL-18 is the world's first flasher/fish finder with Auto Zoom and Bottom Lock. Auto Zoom allows you to closely examine the bottom six foot column of water. Bottom Lock for summer fishing allows you to stay locked in on the bottom regardless of the boat's motion.

■ FLX-12™

THE STREAMLINED, FLAT surface of the FLX-12 delivers a larger display that won't trap rain or snow. This design also allows for increased viewing angle. The simple to operate system only requires two control knobs. The FLX-12 offers a 20' Low Power range setting option for use in shallow water or thick weeds and a night viewing mode.

■ FL-8™ SE

THE CLASSIC VEXILAR FLASHER is truly legendary. The world's most popular three-color sonar flasher, the FL-8SE is still one of the best all-around flasher/sonar designs. The hallmark three-color display shows weak targets in green, medium strength targets in orange and strong bottom targets in red. The FL-8SE features ten interference rejection settings.

Flashers/Fish-Finders **FEATURES SUMMARY**

	FLX-30™^{BB}	FLX-28™	FLX-20™	FL-18™	FLX-12™	FL-8™^{SE}	
Display Type	Weatherproof, super-bright, 5-color LED (five color palettes)			Weatherproof, super-bright, 3-color LED (three color palettes)	Weatherproof, super-bright, 3-color LED (strong targets in red , medium targets in orange , weak targets in green)		
Display Face	Flat screen with super wide viewing – more than one angler can see the display – and from farther away or from the sides			Backlit scale decal with light trap design	Flat screen backlit scale and super wide viewing	Backlit scale decal w/light trap design	
Flasher Technology	Effective in 2020, All Vexilar Flashers are being produced using Vexilar's proprietary <i>brushless data transfer</i> technology to deliver a sunlight-readable display and less noise.

Ultra Pack FISHING SYSTEMS

The most impressive carry case system ever designed.

THE ULTRA PACK IS THE IDEAL NAME for the most feature packed ice fishing system ever offered by Vexilar. The innovative Ultra Pack System has a 12 volt, 9 amp-hour Vexilar Lithium battery enclosed inside the case, so you don't need to connect or disconnect your battery after each use. A master power switch powers up your unit, and additional power posts give anglers the option of running other accessories. The case comes with an adjustable rod holder, cable storage cleats, battery charger and even your own Vexilar tackle box! The super tough Ultra Pack will fit into a five gallon bucket. All Ultra Pack Systems are factory assembled and tested here in the USA.

▶ High profile for easy access to controls and great display visibility.

▶ Enclosed battery compartment with Vexilar Lithium 12 volt, 9 amp-hour battery. Includes digital charger.

▶ Quick charge jack plug for easy charging.

▶ Adjustable rod holder fits on either side.

▶ Ultra Pack fits in a five gallon bucket.

▶ Includes SP0007 soft pack carrying case.

▶ Available with the FLX-28 or FLX-30^{BB} flasher (shown) from Vexilar, the world leader in flasher sonar technology.

▶ Super strong handle with float holder.

▶ Tackle box holder with tackle box included.

▶ Holder for the Ice-Ducer™ transducer.

▶ Pre-drilled holes for optional accessories.

▶ Cable storage and holding grips.

▶ Ice-Ducer™ support eye-bolt has three pre-tapped mounting locations around base.

▶ External power posts for accessories.

▶ Master On/Off power switch.

▶ Non-slip bottom.

▶ The patented Ice-Ducer™ system is a self leveling transducer with float for accurate transducer positioning every time.

Pro Pack II FISHING SYSTEMS

The most reliable sonar systems in the world!

VEXILAR'S MOST POPULAR winter fishing system is the Pro Pack II. This system offers great performance features in a super durable case with a built-in gimbal bracket to support your flasher. The Pro Pack II System is offered with the FLX-28™, FLX-20™ and FL-18™ units. Standard features include a rod holder, tackle box, universal transducer holder, cable holding cleats and a 12 volt, 9 amp-hour SLA battery with charger. The Pro Pack II has been designed to fit into a five gallon bucket, and has an optional soft pack carrying case available (SP0007—included with FLX-28). Each system is factory assembled and tested in the USA.

- ▶ The Vexilar 12 volt, 9 amp-hour SLA battery delivers long lasting power. Each Pro Pack comes with the Vexilar V-410, automatic 1 amp digital charger.

- ▶ Quick charge jack plug for easy charging.

- ▶ PC-100 case fits inside a five gallon bucket.

- ▶ Easy access to included tackle box.

Ice Pro FISHING SYSTEM

Built on the same round case design of the popular Pro Pack II, the Ice Pro system **does not include** the Vexilar DD-100 Digital Depth Indicator with battery status gauge—but it can be added later! This system is available with the FLX-12™ unit.

- ▶ FL-18 and FLX-20 Pro Packs include the Vexilar DD-100 Digital Depth Indicator with battery status gauge. (The FLX-28 has this functionality built-in.)

- ▶ An FL/FLX series flasher from Vexilar, the world leader in flasher sonar technology (FLX-20 Pro Pack II shown).

- ▶ Pre-drilled holes for optional accessories.

- ▶ Two cable holding cleats.

- ▶ Adjustable rod holder with two possible mounting locations.

- ▶ Ice-Ducer™ float

- ▶ Pre-tapped transducer support eye-bolt hole.

- ▶ Transducer holder fits all sizes of Ice-Ducers.

- ▶ The patented Ice-Ducer™ system is a self leveling transducer with float for accurate transducer positioning every time.

Genz Pack FISHING SYSTEMS

You'll never go fishing without your Vexilar again!

YEARS IN THE MAKING, this classic design has been improved even more by ice fishing legend Dave Genz. Dave has made his "Blue Box" nearly indestructible so it will last for years of hard use. Genz redesigned the battery storage compartment and added a universal transducer holder system. The Blue Box can also accept the full line of Vexilar accessories like the DD-100 Digital Depth Indicator and battery status gauge, or the Vexilar FlexLight™. The Blue Box fits on top of a five gallon bucket for easy access and handling while fishing. Available with the Vexilar FLX-28™, FLX-20™, FL-18™, FLX-12™ or FL-8™ SE, each Genz Pack combo comes with a 12 volt, 9 amp-hour SLA battery with Vexilar V-410 automatic charger and Ice-Ducer™ transducer with float.

▶ Large cable storage compartment.

▶ Includes the Vexilar 12 volt, 9 amp-hour SLA battery and V-410 1 amp digital charger.

▶ Quick charge jack plug for easy charging.

▶ Pre-tapped transducer support eye-bolt hole.

▶ Specially designed base fits on top of a five gallon bucket.

"I never go fishing without my Vexilar. My Genz Pack is ready to use right out of the box!"

Dave Genz
"Mr. Ice Fishing"

▶ Available with FL-8se, FLX-12 (shown), FL-18, FLX-20 or FLX-28 unit.

▶ Pre-drilled holes for optional accessories.

▶ Ice-Ducer™ float

▶ Easy access semi-enclosed battery compartment.

▶ Built-in transducer holder fits all sizes of Ice-Ducers.

▶ The patented Ice-Ducer™ system is a self leveling transducer with float for accurate transducer positioning every time.

Fish-Scout™ UNDERWATER VIEWING SYSTEM

THE FISH-SCOUT™ FS-800IR is a complete underwater viewing system that consists of a color camera, 7" color LCD monitor, rigid carrying case with an enclosed 12 volt, 9 amp hour SLA battery, 1 amp digital charger and soft pack carrying case. The system comes fully assembled and ready to use directly out of the box. This system is energy efficient and can run for over nine hours on a single battery charge. Comes standard with a two year factory warranty.

Digital Video Recorder Available
VEXILAR'S DVR100

▶ Easy store cable wrap pouch holds 90 feet of super thin cable on a spool with handle.

▶ Durable soft pack carrying case with padded flap to protect monitor.

▶ Waterproof camera to monitor connection.

▶ Enclosed battery compartment with Vexilar 12 volt, 9 amp-hour SLA battery. Includes the fully automatic V-410, 1 amp charger.

▶ Includes independent, over-hole suspension arm for mounting camera away from the system.

Camera automatically switches between color and b&w

▶ Adjustable support elbow arm for mounting camera near system.

▶ Quick charge jack plug for easy charging.

▶ Two high intensity LED infrared lights.

▶ Multi-chamber waterproof camera housing with internal directional lights.

Monitor SPECS

- ▶ 7" 16:9 widescreen LCD color monitor
- ▶ a-Si TFT active matrix display
- ▶ Monitor resolution: 800 x 480 (W x H)
- ▶ Automatic light adjustment
- ▶ Superior cold weather performance with automatic monitor warming technology
- ▶ Auto backlight on controls
- ▶ Video out option

Camera SPECS

- ▶ 1/3" CMOS color/B&W sensor (switches automatically)
- ▶ Auto gain control
- ▶ Lux: Color 0.4, B&W 0.07
- ▶ 90 degree viewing angle
- ▶ 600 lines of resolution
- ▶ Cable length: 90 feet
- ▶ Depth marked every five feet of cable

Hand-held Depthfinder

FISHING / CANOEING / DIVING

A MUST FOR THE OUTDOOR ENTHUSIAST! Take the compact, lightweight **LPS-1** wherever you go: fly-in trips, ice fishing, canoe trips, remote mountain lakes, float tubing, scuba diving and more. Simply touch it to the surface of the water and push the ON button. The depth or distance is digitally displayed for ten seconds before automatically shutting off. For ice fishing, the signal will shoot through clear ice! Waterproof down to 150'.

SPECIFICATIONS

- ▶ Color: Nautical Yellow
- ▶ Weight: 7 oz.
- ▶ Length: 7.75"
- ▶ Voltage: 9 volt
- ▶ Max. Depth range: 200 feet

Vexilar Accessories

Vexilar Lithium Battery

LIGHTWEIGHT AND POWERFUL, the V-100L 12 Volt, 9 amp-hour Vexilar Lithium battery has been designed to replace any current Vexilar Flasher/Pack battery and still allow use of the 1 amp, fully-automatic Vexilar battery charger.

- ▶ Drop-in replacement for any current Vexilar Flasher/Pack battery
- ▶ LiFePO₄ technology
- ▶ Delivers twice the number of battery re-charging cycles over sealed lead-acid batteries
- ▶ 2.75 lbs (half the weight of the Vexilar SLA battery)
- ▶ Available as a combo with the Vexilar 1 amp charger: V-120L

Open Water 3-in-1 Universal Transducer Kit

THE TK-100 IS A 20 DEGREE TRANSDUCER KIT that quickly converts an ice fishing flasher into an open water depth finder. Includes everything needed to mount it externally for high speed use, mount it with a suction cup for portable use, or attach it to an electric trolling motor with a special bracket. Works on all models of Vexilar Flashers except the FLX-28.

GLO-RING

CHARGES A GLOW-PAINTED LURE in one second using UV LEDs. Can also be used as a rod holder!

- ▶ Includes mounts for any carry case or can be installed in a permanent house with access to a 12V DC power supply
- ▶ Connects directly to Vexilar's quick-connect jack or with alligator clips to your 12V battery.
- ▶ Draws only 140 mA of power
- ▶ Easy access ON / OFF switch

- ▶ Water resistant
- ▶ Cold weather tested to -40° F
- ▶ 50,000 hour LED lifetime
- ▶ 1-year warranty

Parts and Pack Accessories

SOFT PACKS

Protect your investment and stay more organized on the ice. The Pro/Ultra Soft Pack carrying case has a clear -20° below cold crack window and extra storage, while the Genz Pack Soft Pack is padded with a quick seal Velcro flap. (FL-unit not included).

SP0007

For Pro Pack II & Ultra Pack

SP0005

For Genz Pack

FLEXLIGHT

Super bright, flexible night light with adjustable intensity. Runs for at least five hours on a single AA battery (not included). Large wing nut makes it easy to mount on all Vexilar packs.

L-202

MAG SHIELD™

Fits over FL-18™ or FL-8™SE models. Mag Shield magnifies and protects viewing area.

MS0001

PROMOUNT QUICK RELEASE BRACKET

Comes with all mounting hardware and fits any sonar up to three pounds.

SMC001 Complete
SMB001 Base only

NEOPRENE COVER

Fits all Vexilar flat-screen flashers.

COV001

TACKLE TOTE

Three Vexilar tackle boxes in a semi-waterproof bag.

TT-100

TRANSDUCER SUPPORT ARM

Fits over rod holder (Ultra Pack/Pro Pack only) to give you a fold up and out transducer support arm.

TSA001

DIGITAL DEPTH INDICATOR

Delivers both digital depth and battery status with a touch of a button. Gives anglers what they have been asking for: "Digital Depth!" Works on all Vexilar FL series of flashers, including older FL-8 models of Hondex, Si-tex and Micronar. Easy to install and requires no special tools.

DD-100

BATTERY STATUS INDICATOR

Gives a digital readout on battery status during discharge. Works on any 12 volt system.

D-130

ROD HOLDER ADD-ONS

Get an additional rod holder or add a cup holder (fits inside rod holder - Ultra Pack / Pro Pack only).

RH-100
Rod Holder

CH-100
Cup Holder

GLO-RING

Charges a glow-painted lure in one second using UV LEDs. 12V power connectors and mounting bracket included. Also doubles as a rod holder.

VGR001

12V DC ADAPTERS

Run your FL/FLX-series flasher directly from the 12 volt power supply of your truck, ATV or snowmobile.

PCDCA1
FL-8, FL-18

PCDCA4
FL-12/20/22
FLX-12/20/28/30

PC0004C
FL-12/20/22
FLX-12/20/28/30

"S" CABLE

Cuts down output power of unit for superior performance in super shallow water or thick weeds. Fits all FL-series.

S-140

SUN HOOD

Easily attaches to FL-8 or FL-18 series flasher for increased visibility in sunlight.

S-240

TRANSDUCER SWITCH BOX

SB-100 1 unit/
2 transducers
SB-200 2 units/
1 transducer

TRANSDUCER EXTENSION CABLES

Add on transducer cable length. Signal strength safe for up to 60 feet.

CB0001 10 Feet
CB0002 20 Feet

ICE-DUCER™ TRANSDUCER OPTIONS

TB0050
19° - 1.5" dia., 6' cable
TB0051
Pro-View - 2.5" dia., 6' cable

TB0080
12° - 1.9" dia., 6' cable

TBB100
Broad Band - 2.6" dia., 6' cable (FLX-30bb only)

EYE BOLT

Replacement eye bolt for suspending transducer on Ultra/Pro Pack II/Genz Pack.

RB-100

FLOATS

Replacement float with stopper.

FT-100

FLOAT STOPPER

ST-100

2 pack

TACKLE BOX

Fits Ultra Pack and Pro Pack II systems.

TKB100

GIMBAL BRACKET

Gimbal bracket for FL/FLX-series

GB0001

BRACKET KNOBS

Bracket knob pair fits all FL/FLX-series gimbal flashers

GBK001

BATTERIES

12V, 9 amp-hour batteries. Compatible with all Vexilar ice fishing packs (except FishPhone and SonarPhone SP300)

V-100

Sealed Lead-Acid

V-100L

Vexilar Lithium

CHARGER

1 amp digital automatic charger with standby mode—will not overcharge your battery. Can be used for both SLA and Vexilar Lithium batteries.

V-410

Includes quick-connect jack

BATTERY AND CHARGER COMBOS

12 volt, 9 amp-hour batteries with V-410 charger. Charger has both a quick connect jack and alligator clips.

Summer Conversion Kits & Parts

FISH-SCOUT™ OPEN WATER KIT

Mount your Fish-Scout™ camera system in your boat. The monitor easily unplugs from its portable base. Comes with ProMount mounting bracket, all hardware, power leads and sun hood.

FSSK01

FISH-SCOUT™ DIGITAL VIDEO RECORDER

Record video and still images from any Fish-Scout™ camera. Uses a key fob wireless controller. Requires MiniSD memory card (not included).

DVR100

DEPTHM™

Quickly and accurately shows what the temperature is below your boat. You'll also know the maximum depth it is dropped down to. Comes with a fish species preferred temperature chart.

104

OPEN WATER UNIVERSAL TRANSDUCER KIT

A 3-in-1 kit that quickly converts an ice fishing flasher into an open water depth finder. Includes a 20° transducer, external high-speed bracket, suction cup mount for portable use, and electric trolling motor mount. Works with all Vexilar Flashers except FLX-28.

TK-100

FL/FLX SERIES TROLLING MOTOR/IN-HULL KITS

Includes puck-style transducer, gimbal bracket and power cord (25' cable).

TK-223

19° for FL-12/20/22/FLX-12/20

TK-287

12° FL-12/20/22/FLX-12/20

TK-227

9° for FL-12/20/22/FLX-12/20/28

19° for FL-8/FL-18

TK-184

12° for FL-8/FL-18

TK-130

9° for FL-8/FL-18

TRANSDUCER BRACKETS

BK0027

Suction cup mounting bracket fits the 9°, 12° and dual beam puck transducers.

BK0023

Comes with one suction cup for TB0023 transducer (transducer not included).

BK0044

Comes with two suction cups for high-speed transducers (transducer not included).

ALUMADUCER™

The world's only transducer designed to transmit through aluminum with zero signal loss. Comes with A.C.E.™ adhesive. Go to Vexilar.com for a sonar compatibility listing.

TB0021AU

50/200kHz, 45°/11°

TB0022AU

83/200kHz, 60°/20°

TB0023AU

200kHz, 19°

TB0023A

200kHz for Vexilar units

A.C.E.™ - ACOUSTICALLY CONDUCTIVE EPOXY

Install an in-hull transducer using Vexilar's special blend of marine epoxy. Good for in installation.

ACE001

HIGH-SPEED TRANSDUCER OPTIONS

25' cable, 2.6" wide.
