

Professional Providers

In 2005 USA Swimming's Facilities Development Department developed a network of proven professionals in the aquatics industry to assist our clubs in their quest for success. This includes pool and facility design, operation, and programming. These "**Professional Providers**" have offered to extend either preferred pricing and/or service to our USA Swimming Clubs, Total Aquatic Programming LLC, and their affiliates and partners. This assists our clubs and aquatic businesses in building and operating more effective and efficient facilities, and more successful profitable businesses.

Current types of assistance include:

- Design, Engineering, and Consulting Firms
- Building and Construction representatives
- Product Manufacturers
- Service suppliers
- Distributors

We are continually searching for competent firms/companies with a proven track record to increase service options for our clubs. There is no charge to be included as a Professional Provider unless you want to specifically be designated as a sponsor.

The USA Swimming Foundation

While there is no formal cost involved to become a Professional Provider, there are opportunities to increase your philanthropic profile and your company's visibility within the aquatic community by supporting the USA Swimming Foundation with a charitable donation.

The USA Swimming Foundation works to *save lives and build champions – in the pool and in life.*

By making a donation to the USA Swimming Foundation you help provide critical support to strengthen the sport by helping to equip children with the lifesaving skill of learn-to-swim, and you provide financial support to our heroes on the U.S. National Team.

Donations of \$1,000 and higher receive recognition in foundation publications and on the foundation website. Formal partnership opportunities are also available at higher levels. Please contact sue@totalaquatic.llc for more info or visit www.usaswimmingfoundation.org

The companies that make up our professionals providers list must meet our expectations for exemplary service, knowledge and quality of workmanship. They must also attend a USA Swimming Build a Pool conference at least once every 4 years. These providers are capable of coordinating all activities with us and support solution oriented innovation in the aquatics field. USA Swimming or TAP-LLC is not responsible for quality of products or services from any companies listed as professional providers. If there is a cost savings realized by using our professional providers, those savings are passed on directly to our members and clients involved in the project.

Providers who make or distribute a PRODUCT must have a minimum of 2 years of successful product use-statistics in the USA for a minimum of 15 aquatic centers in at least 5 states. The companies or organizations that are listed as professional providers may use the terminology:

“A professional provider for USA Swimming Facilities Development and Total Aquatic Programming LLC” in their literature or on their web page. They are not authorized to use or display the USA Swimming or TAP-LLC logo in any form on their web site or literature. For partnership, sponsorship, or other supporting opportunities please email mick@totalaquatic.llc
