

How To Find Profitable Affiliate Programs

That Works For
Your Website
& Audience

By Jamie Spencer

What Is Affiliate Marketing?

On the off chance you wound up here without knowing what affiliate marketing is, I can give you a run-down of what it's all about and why it's so important for bloggers.

In it's most basic form, affiliate marketing is being able to earn money from selling someone else's product.

Let's say that you love baking and use Kitchen Aid products. You use them every day and they make baking cakes and bread so easy in your house. You can arrange an affiliate partnership with Kitchen Aid so that when you tell your audience about Kitchen Aid and they make a purchase, you get a small percentage of that purchase. Kerching!!!!

Usually, this is done with a special tracking link. This is a super popular method of monetizing blogs. A blogger may have a following of people that read their blog but not have a product to sell. The blogger can sell the products of other companies and make an income without having a product of her own.

Even bloggers that sell their own products often use affiliate marketing. Even if your products are making a small fortune, likely there are complementary products out there that don't compete with yours that your audience would also love to know about.

How Lucrative is Affiliate Marketing?

Believe it or not, affiliate marketing is a HUGE business. It allows people to earn money online almost passively IF you have an audience to promote products and services to.

Affiliate marketing is what I do full time and it's my number one revenue stream. I make over **\$150,000 a month** through my network of affiliate websites. This isn't me boasting. I just want you to know that there is money to be made in this business IF you go hard at it and don't give up.

It's something that I have been working hard on for the past 10 years. It's not an overnight success. Far from it. It's taken a decade of hard work and persistence to get to this life changing level of income.

There are so many benefits to affiliate marketing! Here are a few of my favourites:

1. Predictable, stable income.
2. No fixed place of work. You can literally work from anywhere in the world.
3. No risk, no need to spend money in order to make money. You can get started with your own affiliate website for as little as \$2.95 per month.
4. Very little time spent to earn money, affiliate income is a mostly passive income stream.
5. A good affiliate partnership creates a trust with your audience. When they buy something you suggest and it works for them, they're more likely to buy something else from you or via your recommendation.
6. No Boss. No one to answer to.
7. Time freedom to do the things that you wouldn't be able to do if you had a normal 9 to 5 job.

4 Things To Look For In A Good Affiliate Program

Every single affiliate program that you partner with should meet each of these elements. They're the foundation of a successful affiliate partnership.

1. You love / like / respect / rate the product or service.
2. The product or service solves a problem for your target audience.
3. The affiliate program is well established with good tracking links and analytics.
4. The program has either a high commission or a low cost (\$5 for a free service or 40% on a \$500 product are better than 4% commission on clothing or \$10 per \$500 purchase)

Referral or Affiliate Programs

Some companies have referral programs in addition to or instead of an affiliate program. A referral program is usually meant for the company's customers.

You'll see something like **"refer your friends for \$25 store credit!"** Usually, you get credit or free products or services from the company. Occasionally, they give cash as well. I tend to stay away from these deals as I make more money using affiliate programs.

Referral programs usually also use special tracking links. While referral programs don't usually increase your income, they can relieve some of the burden on your household budget.

It's not uncommon for bloggers to have free clothes for a year, or free organic cleaning products all year.

Affiliate Networks

Affiliate networks are an umbrella network that handles the details of each individual affiliate program.

The most popular networks are Cj and Shareasale. Always choose an affiliate program based on the products and services that you want to partner with, regardless of the affiliate network they are signed to.

A lot of people sign up to a network and then find affiliate programs to join.

How To Find Affiliate Networks

If you enjoy a product, there is probably an affiliate program for it. Some companies even have their own affiliate systems just for their specific products.

And, there are also affiliate programs with hundreds, and sometimes thousands, of products listed in their network (these are called "affiliate networks").

There are many ways to find affiliate programs. These include:

- Searching online
- Affiliate networks
- Checking on company websites in the footer to see if there's an affiliate program.
- Directly through the company
- Asking companies and friends

THE BEST Affiliate Programs & Networks

Below I have listed what I feel are the best affiliate programs and networks in the niches that I am familiar with. Years and years of affiliate marketing experience has allowed me to collate a “Best Of List” when it comes to choosing the right offers for you and your audience.

If you know of any more that you feel would be a good addition to this list, then please do let me know by emailing me at hello@makeawebsitehub.com

**REMEMBER - YOU NEED A WEBSITE TO BE A SUCCESS
IN AFFILIATE MARKETING !!**

NOTE: To be accepted onto these affiliate programs, you will need a website or blog that's relevant to what offers you're signing up to. Please check out my guide on [How To Start A Blog](#) to help get you up and running with making money online via affiliate marketing.

HOW TO START A BLOG TO MAKE MONEY WITH AFFILIATE MARKETING

1. You need to buy a domain name and web hosting. Head over to either [Bluehost](#) or [Hostgator](#). Both offer hosting + email + free domain for under \$3 per month. For Bluehost use [this link](#). For Hostgator use [this link](#).
2. Install WordPress on your hosting account. This is done with just one-click. Go to my guide on [How To Start A Blog](#) and go through the simple step by step process.
3. Once you're live, think about the niche you want to target. Research content that you could create and what products you can review that your audience would love.
4. Sign up to the affiliate programs of the products you want to write about / promote. Amazon, [Share A Sale](#), [Awin](#) and CJ.com are some of the best networks that might be a good fit for you.
