PROJECT MEMORANDUM SCE TRANSMISSION PROJECTS, SEGMENTS 1 - 11

To: John Boccio, Project Manager, CPUC **From:** Vida Strong, Aspen Project Manager

Date: June 21, 2011

Subject: Weekly Report 175, May 29 to June 4, 2011

INTRODUCTION

This report provides a summary of the construction and compliance activities associated with the following SCE transmission projects:

- 1. Antelope-Pardee 500 kV Transmission Project, Segment 1, including Antelope Substation expansion;
- 2. Antelope Transmission Project, Segments 2, 3A and 3B, including the Windhub and Highwind Substations; and
- 3. Tehachapi Renewable Transmission Project, Segments 4 through 11, including Whirlwind Substation and the expansion of Vincent Substation.

A summary of the Notices to Proceed with construction and Variance Request activity are also provided (see Tables 1 and 2, respectively, near the end of this report). Finally, a summary of Temporary Extra Workspace and non-compliance activity are provided in Tables 3, 4, and 5, respectively.

CPUC/Aspen Environmental Monitors (EM): Jenny Slaughter, Stephanie Jayne, and Allison Roth

SEGMENTS 1-3: ANTELOPE-PARDEE AND ANTELOPE TRANSMISSION PROJECTS

Summary of Activity:

- 1. Construction of Segments 1, 2, and 3A have been completed. Construction of Segment 3B, from Windhub Substation to and including Highwind Substation, has not started and no schedule has been developed by SCE. Focused surveys for desert tortoise and Mohave ground squirrel are underway.
- 2. Construction activities at the Antelope Substation included installation of underground PVC into the reactors and cable pulling inside the MEER building.
- 3. No materials were stored in the laydown yard at the Antelope Substation during this reporting period. The spoil pile in front of the Antelope construction trailers remains active (i.e., soil from the expansion is being added to the pile) and is now being partially used to backfill the tower footing removal work on Segment 5. It may be potentially used as fill in the new Whirlwind Substation. An SCE office trailer for TRTP 4-11 has been installed adjacent to the spoil pile.
- 4. Construction activities at the Windhub Substation focused on steel and conductoring work. The 220 kV steel erection is almost complete. Transportation of materials to Whirlwind Substation is ongoing. Construction of the Coram Brody 66 kV project that is connecting into the substation will begin in June.
- 5. Material for Segment 3B and the future Whirlwind Substation is being stored at the Highwind Yard.
- 6. Restoration on Segment 1 has been recently completed, and is still being maintained. The annual report for Segment 1 has been submitted and is under review. Quarterly reports for the activity are also expected this year.

Agoura Hills ● San Francisco ● Sacramento ● Davis ● Inland Empire ● Las Vegas

7. Revegetation for Segments 2 and 3A started in mid-February and was completed in April. Ongoing maintenance activities will be documented in Quarterly reports to the CPUC.

Environmental Compliance:

- 1. SCE reported to the CPUC and CDFG that on June 2nd, a raven fledgling was discovered on the ground in the Antelope Substation. The raven fell out of the nest that was located 60 feet up in an A-frame structure. The nest contained four chicks. The fledgling was taken to the Palmdale Vet Hospital where it tested positive for West Nile virus. Later in the day, a second fledgling was discovered on the ground and the Los Angeles County Public Health & Safety Department requested possession of the second fledgling.
- 2. SCE has developed a solution for the channel incision that occurred immediately downstream of the riprapped stream channel at the Windhub Substation site for which an Addendum was approved by the CPUC. SCE is also reviewing the need for a modified Streambed Alteration Agreement for the effort.

No Non-Compliance Reports or Project Memoranda were issued for Segment 1-3 construction activities during the subject period. Non-Compliance activities for the project to date are summarized in Table 4.

AGENCY REPRESENTATIVES DURING CONSTRUCTION (OTHER THAN CPUC EMS):

None

TEHACHAPI RENEWABLE TRANSMISSION PROJECT (TRTP) SEGMENTS 4-11

The SCE Tehachapi Renewable Transmission Project was evaluated in accordance with the California Environmental Quality Act and a Certification of Public Convenience and Necessity (CPCN) was granted by the CPUC on December 17, 2009.

SEGMENTS 4, 5, AND 10 - ANTELOPE VALLEY

Summary of Activity

- 1. In the Vincent Substation expansion area, the civil and below grade work is 100% complete. Union completed the gate installation and demobilized. Inside the Substation, future foundation work will occur. The Midway to Vincent No. 2 outage continued this week for the 1X and 2X line relocation (see Figure 1). The Midway to Vincent No. 1 outage will occur in October.
- 2. Segment 4: KV Structures (drilling contractor) continued drilling, setting rebar cages using a spider jig for stub angle placement, and concrete pouring at Towers 15, 16, and M74-T1X. They started using Revert polymer during drilling operation of Tower M74-T1X due to unstable soils (see Figure 2). H&M steel crews continued tower assembly and erection work at various locations throughout the Segment. BMP's were maintained at various locations.
- 3. Segment 5: Woodward Brothers (drilling contractor) continued drilling, setting rebar cages, and concrete pouring at Tower 16, 18, 21, 24, 30, and 31. H&M steel crews continued tower assembly and erection work at various locations throughout the Segment. Tower pad re-contouring occurred at Towers 30 to 32. A few 220 kV towers remain standing between Godde Hill Road and Elizabeth Lake Road due to bird nests in the towers. Removal of old steel and existing foundations from the 220 kV towers continued.
- 4. Segment 10: KV Structures (drilling contractor) mobilized to and drilled Tower 81. Moore Fence Company continued tortoise fence installation and grading along General Petroleum Road and tower disturbance sites heading north toward Tower 61. BMP's were installed along spur roads and tower disturbance sites. H&H Grading is grubbing all disturbance sites and chipping the vegetation in the wire setup sites.

- 5. Segment 10 Telecom: Work continued on the 12 kV portion of the Segment from Whirlwind Substation to Gaskell Road. An SCE crew continued setting wood poles on the east side of 170th Street (see Figure 3). Tidwell Excavation continued excavating on the east side of 170th Street near Tower 5 on Segment 4. The crew also excavated and installed conduit coming out of the Whirlwind Substation on the west side of 170th Street.
- 6. Whirlwind Substation: Work included drilling disconnects and bus supports and grading in the 500 kV area. The 220 kV steel dead ends and disconnect switches are being erected by PAR crews. Conductor stringing occurred in the 220 kV area. Cattracs continued riprap placement in the trap channel and spreader. The southwest corner of the Spill Prevention, Countermeasure and Control (SPCC) pond is being worked on. Work continued on the roof and in the basement of the MEER building. Tidwell conducted boring for the station light and power into the substation.

Environmental Compliance:

- 1. The CPUC EM and Burns & McDonnell Environmental Coordinator (EC) verified staking of the disturbance sites and Environmentally Sensitive Area (ESA) resource flagging from Towers 60-44 on Segment 10. Approval for construction was provided to SCE.
- 2. The CPUC EM requested the Material Safety Data Sheet (MSDS) for the Revert Polymer that is being used in foundation drilling on Segment 4. The subcontractor is leaving the excess polymer (which is mixed with water and soil) on the ground in the disturbance site as opposed to hauling the material off site which is recommended in the MSDS guidelines.
- 3. The CPUC EM's were informed that three small obsidian flakes were found on Segment 5 access road. The cultural monitors recorded UTM locations and took photos.
- 4. The CPUC EM received notification from SCE that the last transformer was delivered to Whirlwind Substation on the morning of June 2nd instead of the morning of June 3rd as previously scheduled.
- 5. The CPUC EM observed Henkels & McCoy remove a bucket truck that got stuck on the Lane property access road that leads to Tower 26 on Segment 5 (see Figure 4).
- 6. On June 3rd, SCE submitted a summary list of implemented bird buffer reductions that occurred during the Memorial Holiday.
- 7. On June 3rd, SCE requested concurrence from CDFG to remove a partially built house finch nest from the Racetrack Yard.
- 8. SCE is to submit a memorandum to the CPUC explaining the need for a night patrolman in non-ITP areas of the project due to theft of steel parts from the right-of-way. The majority of Tower 34 on Segment 5 was stolen from the disturbance site. Patrols in areas covered under the ITP or Biological Opinion will be requested to both resource agencies since night work was not authorized under both permits.
- 9. The CPUC received a memorandum from SCE on April 11th in regards to topsoil salvage from temporary disturbance sites for restoration and visual requirements for Segments 4, 5 and 10. So far, there has been no salvaging of topsoil in project areas. In response to the memorandum, CPUC has requested that SCE document their topsoil salvaging plans by Project segment. In addition, in response to a May 26th site visit on Segments 7 and 8 regarding top soil salvaging, the HMMP for Segments 4, 5, and 10 will be revised to reflect the top soil salvaging protocols discussed during the site visit.
- 10. Special-status species observed during the subject period by Biological Monitors included loggerhead shrike, desert kit fox, American badger, LeConte's Thrasher, Swainson's hawk, long-eared owl, Northern harrier, and burrowing owl.

11. Twenty-four new nests discovered during the subject period included ravens, starlings, house finches, barn owls, California Towhee and California Thrasher. SCE received CDFG concurrence on buffer reductions for eight nests.

Six Level 1 SCE NCRs, three Level 2 NCR's, and one Level 3 NCR were issued during the subject period for TRTP Segment 4, 5 and 10 construction activities (see Table 4). No CPUC Project Memoranda or NCR's were issued for Segments 4, 5, and 10 during this reporting period. Non-Compliance activities for the project to date are summarized in Tables 4 and 5.

Agency Representatives during Construction (other than CPUC EMs):

None.

SEGMENTS 6 AND 11 - ANGELES NATIONAL FOREST

Summary of Activity

- 1. The Final EIS was released by the Angeles National Forest (ANF) on September 14, 2010. The ANF Record of Decision was issued on October 4, 2010, and the Special Use Permit is anticipated for release in September 2011. Subsequently, construction is expected to begin in September/October 2011.
- 2. Vincent North and South Material Yards: During the subject period, material delivery occurred.
- 3. Site preparation work continued at Material Yard 75 South.
- 4. Weed abatement activities continued on Segments 6 and 11. Approximately 25 acres of weed abatement has occurred to date.

Environmental Compliance

- 1. On May 31st, SCE reported to the CPUC and CDFG that a coast horned lizard was found dead in the Vincent South Material Yard. The lizard's head was caught in the bird deterrent netting. Horned lizard is a CA Species of Special Concern. SCE issued a Level 3 Non Compliance for this evert.
- 2. Watering for dust control occurred at the Vincent North and South Material Yards.

One Level 3 SCE non-compliance was issued during the subject period for TRTP Segment 6 and 11 construction activities. No CPUC Project Memoranda or NCR's were issued for Segments 6 and 11 during this reporting period. Non-Compliance activities for the project date are summarized in Tables 4 and 5.

SEGMENTS 7 AND 8 - LOS ANGELES AND SAN BERNARDINO COUNTIES

Summary of Activity

During the subject period, Wilson, DCX, Tri-State and SCE crews were on vacation starting Wednesday, May 25th and ending Wednesday, June 1st.

- 1. Segments 7 & 8, 66 kV: During the subject period, Wilson crews continued work on the overhead portion of the Rio Hondo-Amador-Jose-Mesa line. Crews continued transferring the 12 kV circuits and began transferring the 66 kV circuits. Additionally, Wilson continued the underground portion of the Rio Hondo-Anita No. 2 line from the Rio Hondo Substation under Interstate 605, trenching (see Figure 5). SCE crews continued pulling conduit along Durfee Avenue in the City of South El Monte.
- 2. Segment 7: Wilson removed wrecked out towers within the Duck Farm in the City of South El Monte. Additionally, Wilson continued assembly at two towers in the City of Duarte. DCX continued drilling at two towers and excavated tower foundations at five locations (see Figure 6). Additionally, Wilson crews mowed tower sites and wire setup sites to keep environmental surveys active.

- 3. Segment 8, Phase 1: Wilson crews mowed and installed BMPs at tower sites and wire setup sites to keep environmental surveys active. No tower construction occurred in Tonner Canyon, City of Industry, due to biological resource restrictions (see #1 below)
- 4. Segment 8, Phase 2: Wilson crews installed mid-span sleeves on the Chino–Mira Loma No. 1 line (see Figure 7).
- 5. Segment 8, Phase 3: No work occurred during the subject period.
- 6. Segment 8, Phase 4: Wilson Crews began assembly on a tower on the new double circuit 500 kV Mira Loma–Vincent line within the Puente Hills Landfill Native Habitat Authority land in the City of Hacienda Heights (see Figure 8). Also, Wilson crews installed one Shoofly pole at the 605 Shoofly. Additionally, SCE right-of-way clearance crews trimmed trees at Tower M48-T4.

Environmental Compliance:

- 1. The use of Tonner Canyon Road within Tonner Canyon, City of Industry (Segment 8, Phase 1), continues to be restricted for project access due to biological survey requirements in project permits conflicting with property rights and access constraints.
- 2. A juvenile coastal California gnatcatcher was observed by an SCE biologist on Wednesday, June 1st at the 605 Shoofly. A 300-foot buffer was implemented around the area where the individual was observed; the bird was not seen again during subsequent daily surveys at the site. It is believed that the bird was a dispersing individual. The work site was re-opened for work the week of June 9th.
- 3. ICF Biologists continue to collapse California ground squirrel burrows along Edison Avenue in the City of Chino as part of the CDFG approved burrowing owl relocation program that commenced on February 1st.
- 4. The CPUC EMs received nine preconstruction surveys and sweeps for construction on both Segments 7 and 8 during the subject period. All sites were approved for construction to commence once ESA buffers were established and tower disturbance areas were staked.
- 5. Special-status species observed during the week by Biological Monitors included coastal California gnatcatcher, yellow warbler and San Diego black-tailed jackrabbits.
- 6. Bird nesting clearance surveys are being conducted in advance of construction as required by adopted mitigation measures. Sixty-eight new nests discovered during the subject period on Segments 7 and 8 included: Cassin's kingbird nests, tree swallow nests, burrowing owl nests, bushtit nests, killdeer nests and house finch nests. CDFG provided concurrence of buffer reductions for all of the nests.

No SCE non-Compliance Reports were issued during the subject period (see Table 4). No CPUC Non-Compliances or Project Memoranda were issued during the subject period for Segment 7 and 8 construction activities. Non-Compliance activities for the project to date are summarized in Tables 4 and 5.

Agency Representatives during Construction (other than CPUC EMs):

None.
