## Overview

### Welcome to the World of Proteus

Thank you for purchasing the E-MU Proteus Rack. This sound set is a Kontakt library and requires the free Kontakt Player (<https://www.native-instruments.com/>) the full version of Kontakt, Komplete, or Maschine. Please see Getting Started for installation details.

The E-MU Proteus sound modules revolutionized the world of digital music performance and composition. The Proteus 2000 style product line was the second generation of the Proteus family with 128 voice polyphony, arpeggiator, solo mode, effects, and four sound ROM slots for a total 128 mb sounds

This Kontakt library was designed and produced by the original E-MU sound and graphic designers. Starting with the original waveforms, Kontakt instruments were mapped and programmed to match the hardware modules. The powerful script programming integrates the hardware functionality to the screen for the same great look and feel as the modules.

Proteus Rack is designed for Kontakt Player and the full version of Kontakt. The instruments are seamlessly integrated to be controlled by all Native Instruments NKS hardware.

Included are Proteus 2000, Mo' Phatt, Virtuoso, Xtreme Lead-1, Planet Earth, and Vintage Pro. Over 3,500 legacy sounds that will expand your imagination.

## Kontakt View

## Functionality

### Master Controls

Main Toggle Button - A/E/I - B/F/J - C/G/K - D/H/L 

The Main Panel includes a toggle button that controls what screen is active. The toggle advances between the A-D, E-H, & I-L controller groups.

The effects toggle button switches between the effect types. The green LED  indicates the active set of controls.

A-D Filter - Tone, Presence, Shape, Image

E-H Amplitude Envelope - Attack, Decay, Sustain, Release

I-L Keyboard/Effects – Dyn 1, Dyn 2, FX A, FX B

Volume Control 

The master volume of the instrument.

A-D Controls 

Tone - Filter - Filter cutoff amount

Presence - Resonance amount.

Shape - Filter Envelope Amount

Image - Stereo image

Effects Button 

Activates effects settings.

ARP Button 

Activates arpeggiator settings.

Solo Button 

Activates solo settings.

### Amplifier Envelope Panel

#### E-H Controls

- Attack - Amplifier attack time
- Decay - Amplifier decay time
- Sustain - Amplifier sustain time
- Release - Amplifier release time

### Keyboard/Effects Amount Panel

#### I-L Controls

- Dyn 1 - (Dynamic 1) Velocity to Amplifier
- Dyn 2 - (Dynamic 2) Velocity to Filter Cutoff
- FX A - Reverb Send
- FX B - Delay Send

## Effects Controls

### Effects Toggle Button

The effects toggle button switches between the effect types. The green LED  indicates the active set of controls.

Reverb: Predelay - Size - Stereo - Amount

Delay: Feedback - Time - Pan - Amount

Chorus: Depth - Speed - Unit - Amount

### Reverb Controls

Predelay - Time between the end of the initial sound and first reflections.

Size - Room size.

Stereo - Positioning of reverb reflections.

Amount - Amount of reverb signal.

### Delay Controls

Feedback - Delayed signal sent back to the delay line

Time – Tempo synced. Separates the frequency of delay signals.

Pan - Positioning of the delay signal

Amount - Amount of delay signal

## Effects Chorus Panel

### Chorus Controls

- Depth - Amount of pitch modulation
- Speed - Frequency of the pitch modulation
- Unit - Separation of the pitch modulation
- Amount - Amount of chorus signal

## Arpeggiator Controls

*Arpeggiator Panel 1*

### Arp Toggle Button

The Arp toggle button switches between the effect types. The green LED  indicates the active set of controls.

Arp 1: Mode - Duration - Rate - Swing

Arp 2: Octave - Strike - FX Rate - Velocity

### Arpeggiator 1 Controls

Mode: Selects between four modes.

<Off> Arpeggiator off.

<On> Arpeggiator on key down. Off on key up.

<Hold> Latch played keys - new played keys take priority.

<Hold+> Latch all played keys - new played keys will be added.

Duration: Modifies the duration of the arpeggiated MIDI notes in percent.

Rate: Tempo synced. Sets the step rate of the arpeggiator.

Swing: Offsets step values to swing or push the feel of the steps.

*Arpeggiator Panel 2*

### Arpeggiator 2 Controls

Octave: Sets the octave range upward or downward.

Strike: Sets the number or repeats for each note.

FX Rate: Controls the rate (time) parameter of the effect.

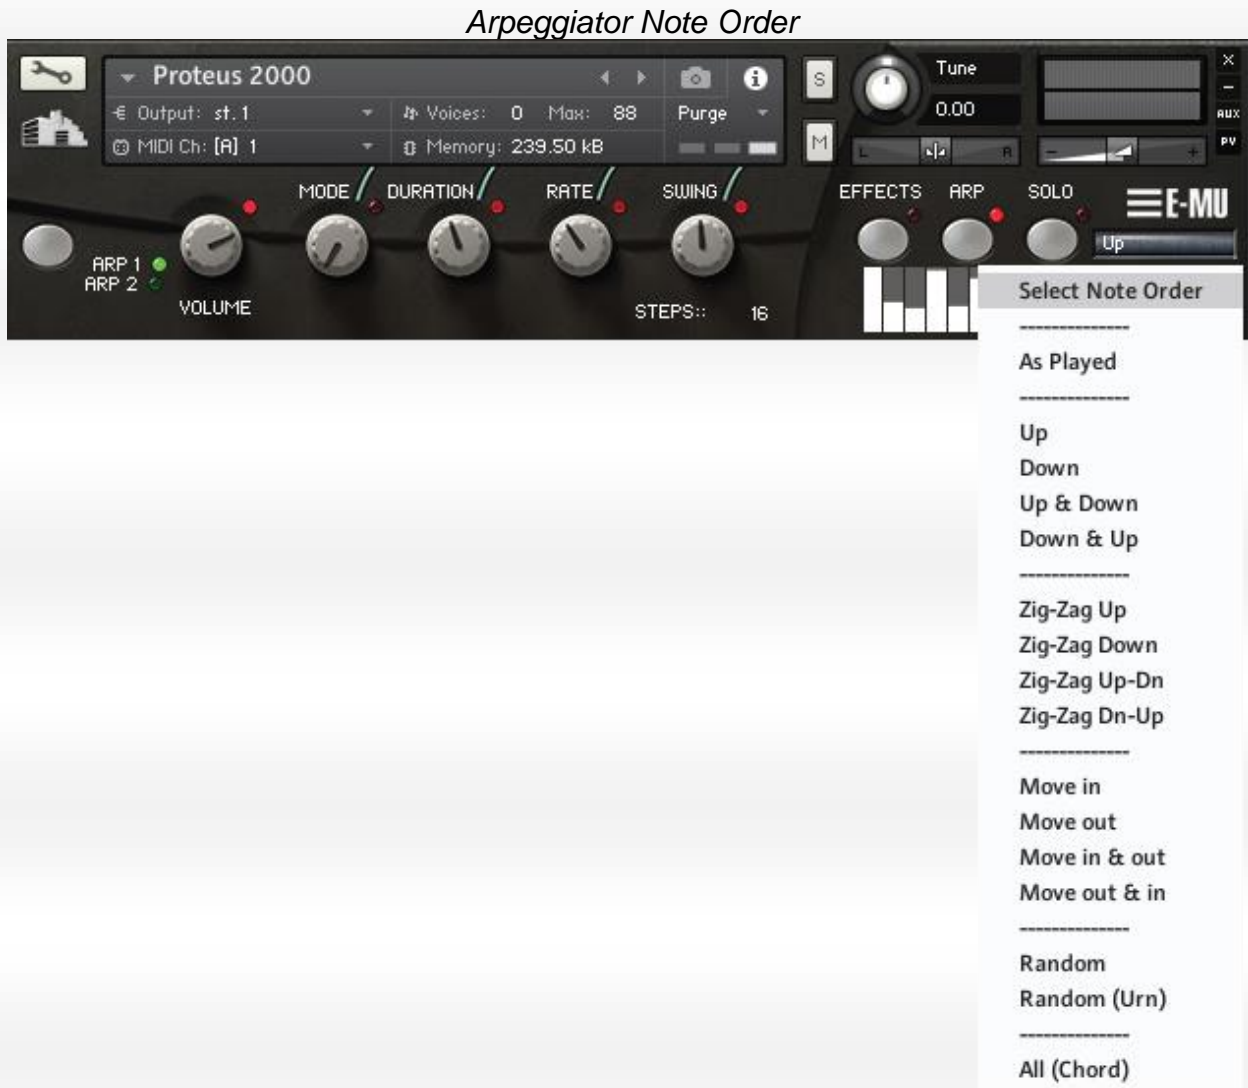

Velocity: Enabled - velocities derived from rhythmic grid. Deactivated - played velocities scaled by rhythmic grid.

## Steps

Controls the number (2 - 32) of steps of the rhythmic pattern.

## Rhythm Grid

The lower right-hand corner displays the amplitude amount of each step in the arpeggiator pattern. Step values are set with the mouse and can be returned to 0 using CTRL/Click.

## Select Note Order Menu

The menu contains 16 pattern choices. As Played will follow what is played. This works very nicely with <Hold> latch all played keys and <Hold+-> latch all played keys

## Solo Controls

## Solo Controls

- Solo - Solo mode off/on 
- Legato - Legato mode off/on 
- Glide - Glide off/on 
- Rate - Glide rate

## NKS Compatibility

### Designed for Komplete Kontrol Hardware and Software

The Proteus Rack library is designed to work with all NKS hardware enabled products. NKS seamlessly integrates the hardware and software allowing control in both directions. Software parameters are displayed on the hardware and mapped to the controllers. Sounds are tagged with category names to quickly locate the desired sound.

The Light Guide color indicates the module currently selected. Proteus 2000 - Cyan, Mo' Phatt - Purple, Planet Earth - Green, Virtuoso - Red, Xtreme Lead - Light Orange, and Vintage Pro - Blue.
