

## **MEDICAID FORMULARY**

Effective September 2021

*Provided by Elixir*

### ***Introduction***

The Total Health Care (THC) Medicaid Formulary was developed to serve as a guide for physicians, pharmacists, health care professionals and members in the selection of cost-effective drug therapy. Total Health Care recognizes that drug therapy is an integral part of effective health management.

In order to streamline drug coverage policies for Medicaid members and providers, the Michigan Department of Health and Human Services (MDHHS) has worked with Medicaid health plan providers, including Total Health Care, to create a formulary that is common across all contracted Medicaid Health. This is known as the Michigan Medicaid Managed Care Common Formulary.

Total Health Care continually reviews new and existing medications to ensure the Formulary remains responsive to the needs of our members and health professionals. Criteria used to evaluate drug selection for the formulary includes, but is not limited to: safety, efficacy and cost-effectiveness data, as well as comparison of relevant benefits of similar prescription or over-the counter (OTC) agents while minimizing potential duplications.

### ***Notice***

The information contained in this formulary is provided by THC, solely for the convenience of medical providers and members. THC does not warrant or assure accuracy of this information, nor is it intended to be comprehensive in nature.

This formulary is not intended to be a substitute for the knowledge, expertise, skill or judgment of the medical provider in their choice of prescription drugs. Total Health Care assumes no responsibility for the actions or omissions of any medical provider based upon reliance, in whole or in part, on the information contained herein. The medical provider should consult the drug manufacturer's product literature or standard references for more detailed information.

### ***How to Read the Formulary***

#### ***Drug Name***

All formulary drugs are listed either by their generic names (in lowercase) or by their brand names (in uppercase). Drugs are grouped together by their therapeutic drug category. Specific drug listings may be accessed by using the index, using the covered generic name or the covered brand name of the drug. The

brand names listed are for reference use only, and do not denote coverage, unless specifically noted. Any drug not found in this Formulary listing shall be considered a non-formulary drug.

***Requirements/Limits***

This field includes potential limitations to the formulary drug. It also may contain additional information about the coverage of the drug such as applicable quantity limits (QL). For certain agents within the Medicaid Formulary, a recommended prescribing guideline may apply.

**Prescribing Guidelines**

Prescribing guidelines may apply to select drugs on the THC formulary. Prescribing guidelines may vary by benefit design but may include:

Prior Authorization Required (PA)	Drug requires prior authorization through a specific physician request process.
Over the Counter Drugs (OTC)	Drug coverage is available for drugs that are available OTC with an authorized prescription from your provider.
Specialty Drugs (SP)	Drug requires processing through THC’s contracted specialty pharmacy, Elixir Specialty Pharmacy.
Quantity Limit (QL)	Drug coverage may be limited to specific quantities per prescription and/or time period.
Age Limit (AL)	Drug coverage may depend on patient age.
Gender Restriction (GR)	Drug coverage may depend on patient gender.
Step Therapy Required (ST)	Drug coverage requires that an alternative or trial of another drug be used before the medication is covered.
Custom (C)	Drug coverage has unique restrictions.

***Benefit Coverage and Limitations***

This formulary does not define benefit coverage and limitations. Members should contact Total Health Care at 1-800-826-2862 if they have questions regarding their coverage. Please note that the formulary process is evolutionary and changes can occur throughout the year.

**Prior Authorization (PA)**

Drugs indicated with a “PA” require Prior Authorization for coverage. A prescriber may complete a Prior Authorization form that can be found on the Total Health Care website at [www.THCmi.com](http://www.THCmi.com). You may also request a form by calling Total Health Care at 1-844-222-5584. Completed prior authorization forms should be faxed to 1-866-422-9119. Prior Authorization review of prescribing guidelines will be evaluated utilizing the established drug review criteria approved by Total Health Care. If the request does not meet the approved

criteria, the request will not be approved and alternative therapy may be recommended along with the proper course of alternative action. The requesting provider will be provided written notification of Total Health Care review decisions. THC's website has a contact link where members can contact THC's Pharmacy Department to ask for an exception request.

### **Non-Formulary Agents**

Drugs not found on the Total Health Care Medicaid Formulary, or any updates published by Total Health Care, shall be considered a non-formulary drug. Requests for coverage of non-formulary agents may be requested by the health professional depending on specific coverage parameters. Review for non-formulary drug requests will require a Prior Authorization request with documentation of medical necessity. Generally, the following basic medical necessity guidelines are used in conducting a review:

- The patient has failed an appropriate trial of formulary or preferred agents.
- The use of preferred or formulary agent is contraindicated in the patient.
- The formulary drug or preferred agents are not suited for the present patient care need, and the drug selected is required for patient safety.

If the request does not meet the established guidelines request, it will not be approved and alternative therapy may be recommended along with the proper course of alternative action.

### **Common Drug Exclusions**

The member's plan design may exclude certain drug classes. Prior authorization is generally not available for drugs that are specifically excluded by benefit design. Common excluded coverage may include, but are not limited to:

- Drug products used for cosmetic purposes.
- Drug products for sexual dysfunction.
- Drug products for infertility treatment.
- Experimental drug products or any drug product used in an experimental manner.
- Drug products identified by the Drug Efficacy Study Implementation (DESI) as being category 5 (less-than-effective for all indications) or category 6 (removed from the market).
- Foreign drugs or drugs not approved by the United States Food & Drug Administration (FDA).

### **Medicaid Fee-For-Service Carve Out List**

The State of Michigan has a carve-out list for the Medicaid formulary. The carve-out drugs include mental health, HIV/AIDS, Oncology, Hemophilia and other miscellaneous drugs that have been added to the State's 100% carve-out list. These drugs must be billed directly by the pharmacies at point-of-sale to the Michigan Department of Community Health's contracted Pharmacy Benefits Manager (PBM). A list of the carve-out drugs can be found at <https://michigan.fhsc.com/Providers/DrugInfo.asp>.

### **Mandated Generic Substitution**

Total Health Care advocates the use of cost-effective generic drugs where FDA- approved generic equivalent drugs are available. Generic products are listed in the Formulary and noted as "generic" wherever an FDA- approved generic drug product is available. The brand names listed in the formulary are for reference only.

## ***Total Health Care Pharmacy and Therapeutics (P&T) Committee***

Total Health Care's Pharmacy & Therapeutics Committee meets quarterly to review and recommend medications for formulary consideration. The Committee considers clinical information on drugs that are new to the market and drugs that are typically included in an outpatient pharmacy benefit. This assures that the formulary remains responsive to patient and physician needs. The Committee is composed of physicians, pharmacists, and health care professionals. The Committee also uses reference materials from our Pharmacy Benefits Manager's Pharmacy and Therapeutics Advisory Panel.

### ***Product Selection Criteria***

The primary goal of the THC Pharmacy & Therapeutics Committee is to maintain and update the formulary based upon an objective analysis of the safety, efficacy, approved indications, adverse effects, contraindications, patient administration/compliance considerations and cost effectiveness of available drugs. When a drug is considered for formulary inclusion, it will be reviewed relative to similar drugs including those currently in the THC Formulary. Physicians may request a copy of THC's drug criteria by calling the Pharmacy Department at 1-800-826-2862.

### ***Diabetic Testing Supplies***

Total Health Care works with J&B Medical Supply to provide diabetic testing supplies to our members. Covered diabetic testing supplies include Glucocard Vital glucometer, Glucocard Expression glucometer, and SD Biosensor GlucoNavii glucometer, Glucocard Vital test strips, Glucocard Expression test strips, SD Biosensor GlucoNavii test strips, lancets, insulin syringes, alcohol swabs and ketone strips. These supplies are to be filled through J&B Medical Supply. If you have any questions about our diabetic supply program, please contact J&B Medical Supply at 1-844-236-7933.

### ***Specialty Bio-Pharmaceutical Pharmacy Program***

Total Health Care works with Elixir Specialty Pharmacy to provide Specialty Bio-Pharmaceutical Pharmacy products to our members. These medications are to be filled exclusively through Elixir Specialty Pharmacy.

A Specialty Drug Prior Authorization Request form must be completed and faxed to Elixir at 1-866-422-9119 with supporting documentation and the prescription. A prescriber may obtain a Specialty Drug Prior Authorization Request form found on the Total Health Care website at [www.THCMi.com](http://www.THCMi.com).

Once the order is received, Elixir obtains authorization from Total Health Care. If the specialty prior authorization is approved, Total Health Care notifies Elixir Specialty Pharmacy. Then, Elixir Specialty Pharmacy staff ships the medication directly to the physician's office or the patient's home. All packages are individually marked for each patient and refrigerated items are shipped in insulated containers. Where appropriate, each shipment includes needles, syringes and alcohol swabs. If you have any questions about our Specialty Bio-Pharmaceutical Pharmacy program, please contact Elixir at 1-844-222-5584 or Elixir Specialty Pharmacy at 1-877-437-9012.

### ***Contact Information***

The Total Health Care Medicaid formulary is designed to assist physicians, members and other health care professionals in the selection of cost-effective agents. Total Health Care encourages your input and feedback on how we can assist in improving this document and the formulary management process. You may contact THC at 1-800-826-2862.

## *Medication Limitations*

### **Quantity Limitations**

Quantity Limitations are on medications throughout the formulary and are indicated with a "QL" notation. These are medications that have a daily dose restriction, quantity/days' supply limitation, and/or a limitation on the duration of therapy.

### **Age Limitations**

Age Limitations are on medications throughout the formulary and are indicated with an "AL" notation. Coverage for a medication is indicated by the age limitation. This could be a minimum age, maximum age, and/or the combination of a minimum and maximum age edit.

### **Gender Restrictions**

Gender restrictions are indicated with a "GR" on the formulary and require the member to be a specific gender for coverage.

### **Step Therapy Criteria**

Step Therapy medications are indicated with a "ST" on the formulary and require that an alternative, first line medication be tried and failed before the requested medication can be covered. The online claims adjudication system will automatically allow for the requested medication to be filled based on electronic claims history indicating that the first line medication was filled.

#### Step-Therapy Criteria

<b>Therapy Class</b>	<b>First Line</b>	<b>Second Line</b>	<b>Step Therapy Criteria</b>
Acne Therapy Topical – Retinoids & Derivatives	DIFFERIN 0.1% OVER-THE-COUNTER GEL	<i>tretinoin 0.025% cream</i>	Requires prior trial and failure of 2 fills in the last 90 days.
Antianginal – Coronary Vasodilators - Nitrates	<i>nitroglycerine 0.3mg Tablet sublingual</i>  <i>nitroglycerine 0.4mg Tablet sublingual</i>  <i>nitroglycerine 0.4mg Tablet sublingual</i>	<i>nitroglycerine 0.4mg spray</i>	Requires trial and failure of a 7 day supply of one of the following agents within the last 180 days.
Immunosuppressive – Inosine Monophosphate Dehydrogenase Inhibitors	<i>mycophenolate 250mg capsule</i>  <i>mycophenolate 500mg capsule</i>  <i>mycophenolate</i>	<i>Mycophenolic Acid DR 180mg tablet</i>  <i>Mycophenolic Acid DR 360mg tablet</i>	Requires trial and failure of one of the following agents within the last 180 days

Therapy Class	First Line	Second Line	Step Therapy Criteria
	<i>200mg/mL suspension</i>		
Non-Steroidal Anti-Inflammatory – COX II Inhibitors	<i>Ibuprofen 400mg tablet</i> <i>diclofenac Sod DR 75mg tablet</i>	<b>Preferred Drug:</b> <i>celecoxib</i>  <b>Non-Preferred Drug (PA required):</b>  CELEBREX	Requires prior trial and failure of a 30-day supply each with 2 or more NSAIDS covered on the Common Formulary in the last 180 days.
Scabicide & Pediculicide Single Agents	<i>permethrin 1% lotion</i>	<i>malathion 0.5% lotion</i>  SPINOSAD 0.9% SUSPENSION	Requires trial and failure of OTC Permethrin 1% within the last 180 days.

\*Formulary Disclaimer: Coverage for some drugs may be limited to specific dosage forms and/or strengths. The benefit design determines what is covered. The medications listed on this formulary are subject to change pursuant to the formulary management activities of Elixir. The presence of a medication on this formulary list does not guarantee coverage.
