# PUTTING LANGUAGE AND DATA STANDARDS AND BEST PRACTICES INTO ACTION: THE FREME FRAMEWORK

META-FORUM, 5 JULY 2016

[www.freme-project.eu](http://www.freme-project.eu)

Presented by Felix Sasaki (DFKI / W3C Fellow)  
On behalf of the FREME consortium

# THE FREME PROJECT

- Two year H2020 Innovation action; start February 2015
- Industry partners leading four business cases around digital content and (linked) data
- Technology development & transfer bridging language and data
- Outreach and business modelling demonstrating monetization of the multilingual data value chain

**Imagine you want to develop a Web  
service**

Imagine you want to develop a Web service

**Would you implement a data transfer protocol yourself?**

Imagine you want to develop a Web service

Would you implement a data transfer protocol yourself?

**Hopefully not – you would rely on**

- **Standards: HTTP**
- **Existing (open source) implementations:  
e.g. Apache server**

## CLAIMS

- Language and data technologies are mature enough to benefit from a common multilingual & semantic interoperability layer
- Don't try to develop this layer on your own!
- Develop it in an open and distributed manner
- This will benefit your research and business too!

## A GOOD EXAMPLE TO REPLICATE

- European Data Innovator Award 2016, going to Ralf Klingenberg, Co-funder of Rapidminer
- Márta Nagy-Rothengass (EC) asking: “What is the secret of success?”
- Ralf: “I have shared core modules of R.M. 😊”

## A GOOD EXAMPLE TO REPLICATE

- European Data Innovator Award 2016, going to Ralf Klingenberg, Co-funder of Rapidminer
- Márta Nagy-Rothengass (EC) asking: “What is the secret of success?”
- Ralf: “I have shared core modules of R.M. 😊”
- **Important: right level of sharing**
  - **E.g.: Let’s have inline tag handling probably done 😊**

## A GOOD EXAMPLE TO REPLICATE

- European Data Innovator Award 2016, going to Ralf Klingenberg, Co-funder of Rapidminer
- Márta Nagy-Rothengass (EC) asking: “What is the secret of success?”
- Ralf: “I have shared core modules of R.M. 😊”
- Important: right level of sharing
- **Base your research and business on standards and open source**
- **Pledge for an open framework for LT and data**

# CURRENT STATE OF LT AND DATA SOLUTIONS

## GAPS THAT HINDER Deployment:

- Plethora of formats
- Adaptability and platform dependency
- No easy to use interfaces for LT and LT
- Usability “The right tool for the right person in given and new enterprises”

# FREME TO THE RESCUE

Machine translation, terminology annotation, ...

Linked data creation & processing

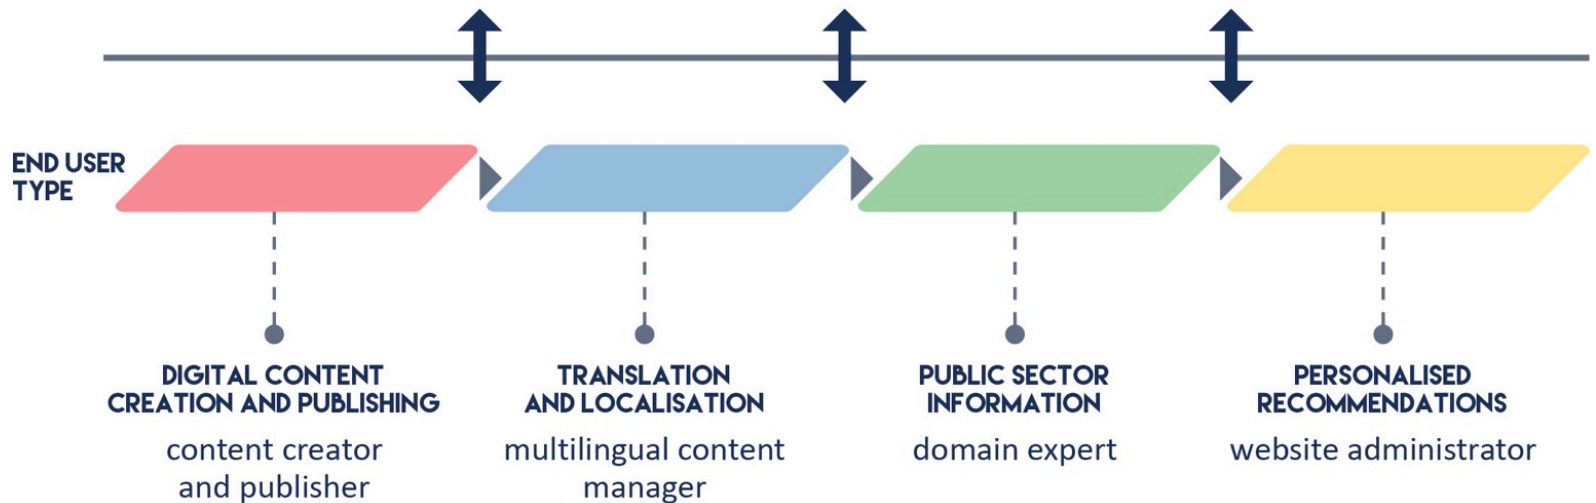

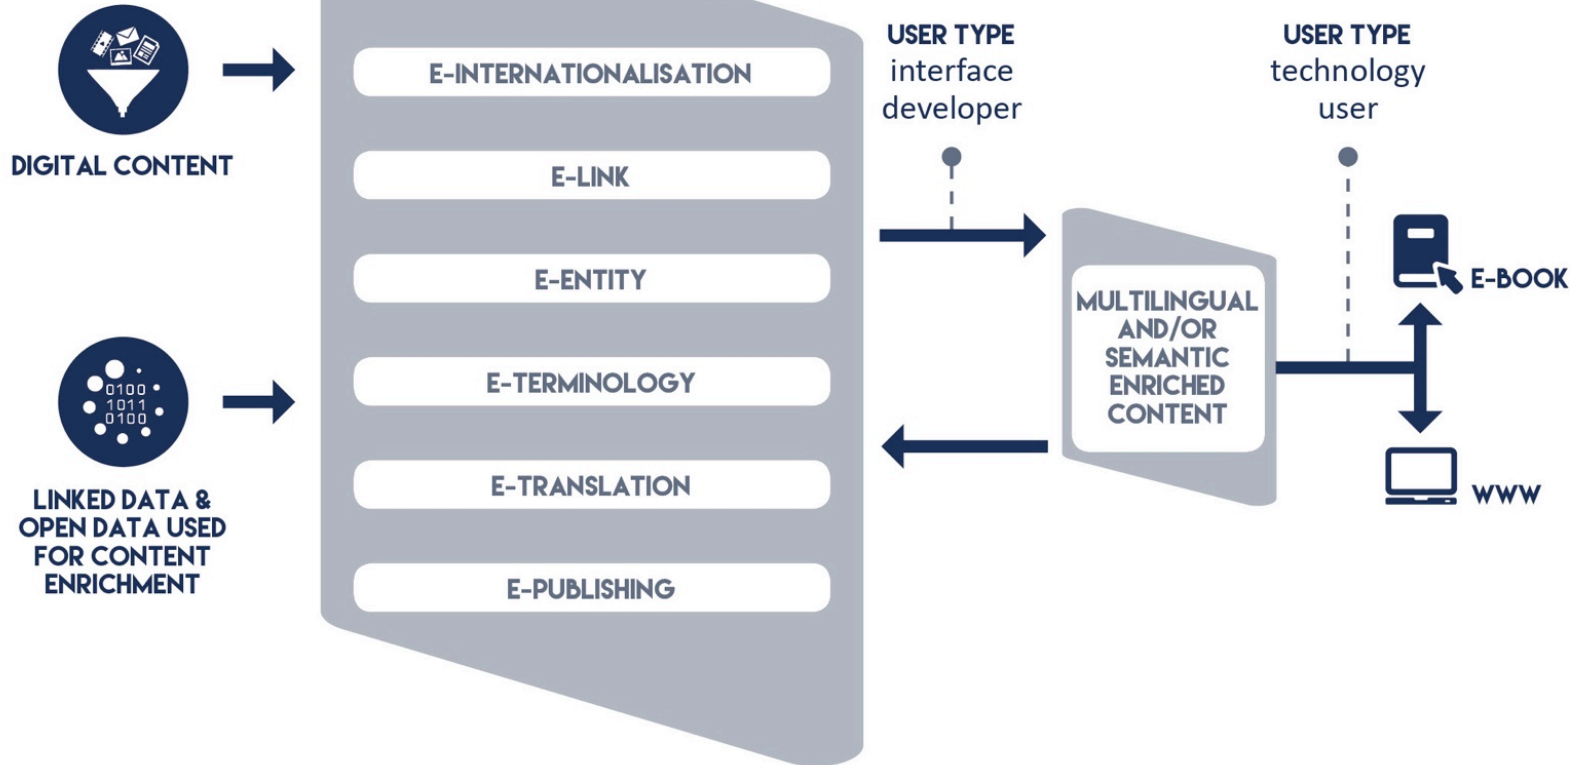

A SET OF INTERFACES\* - DESIGN DRIVEN BY BUSINESS CASES

- \* Graphical interfaces
- \* Software Interfaces

LT and LD as first class citizens on the Web

LT and LD for various user types: (application) developer, content architect, content author, ...

# FREME

# BASIS 1: STANDARDS, FORMATS, RESOURCES

## Standards deployed in FREME

### ITS 2.0

Metadata to integrate automated processing of human language into core Web technologies

### NIF 2.0

Format to achieve interoperability between NLP tools, language resources and annotations

### OntoLex / Lemon

Model to publish lexica or terminological data on the web as linked data

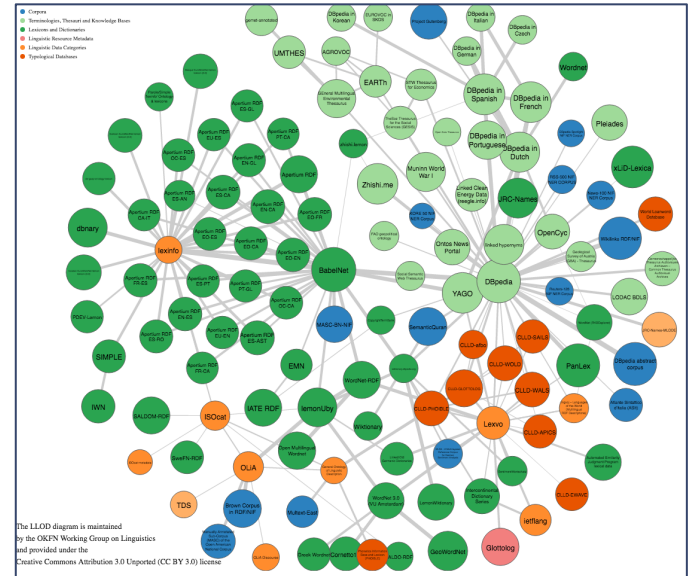

## Formats for FREME Enrichment

- **HTML5**
- **General XML**
- **Selected XML Vocabularies**
  - DocBook, TEI, XLIFF, ODF, ...
- **Linked Data** as turtle, json-ld etc
- **W3C Web Annotation**
- **More to come – depending on your needs!**
  - Processing of a growing set of formats via the **Okapi framework**
  - **Roundtripping** – storing enrichment in the original content

# BASIS 1: STANDARDS, FORMATS, RESOURCES

## Linguistic Linked Data Cloud

- Corpora
- Terminologies, Thesauri and Knowledge Bases
- Lexicons and Dictionaries
- Linguistic Resource Metadata
- Linguistic Data Categories
- Typological Databases

- Deploying FP7 project results from LIDER and FALCON: Standards, best practices, tooling, ...  
basis for decentralized data and language value chains
- Cf. presentation from Ian Wood on MixedEmotions

## BASIS 2: DEVELOPMENT GOING BEYOND THE PROJECT

Contributions to the framework – going beyond the project

Digitale  
Kuratierungs-  
technologien

Okapi  
Framework

You here: access via  
the framework to  
your R&D outcomes!

## BASIS 2: DEVELOPMENT GOING BEYOND THE PROJECT

Contributions to the framework – going beyond the project

Digitale  
Kuratierungs-  
technologien

Okapi  
Framework

**You here: access via  
the framework to  
your R&D outcomes!**

DKT content can be processed with FREME e-Services out of the box – and vice versa  
No hard wired integration needed

## BASIS 2: DEVELOPMENT GOING BEYOND THE PROJECT

Contributions to the framework – going beyond the project

Digitale  
Kuratierungs-  
technologien

Okapi  
Framework

You here: access via  
the framework to  
your R&D outcomes!

### Next steps within this year

- 1) Finalisation of FREME Beta = version 1.0
- 2) Gather feedback by hundreds of beta users
- 3) Foster multilingual interoperability topic in **BDVA group on standards and (upcoming) on**

# FREME FROM A TECHNICAL PERSPECTIVE

How to access FREME – several options:

- A life version 0.7 including documentation at <http://api.freme-project.eu/doc/current/>
- A development version at <http://api-dev.freme-project.eu/doc/>
- A Java / maven software package;  
see the documentation for installation instructions
- Source code in a GitHub project  
<https://github.com/freme-project/>
- The framework is available under Apache 2.0 license to ease commercial use
- Underlying services have various licensing conditions
