QA AT ELINEXT IN FIGURES

of Excellence

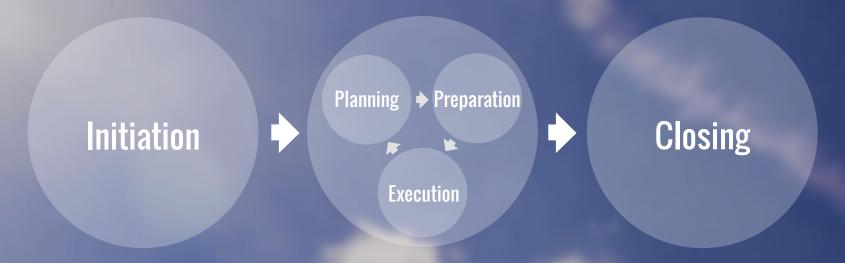

QA PROCESSES

We constantly monitor and control the processes during all 5 stages, because we believe this is the cornerstone of a successful project completion. This process includes progress reporting and corrective and preventive actions taken in order to keep the project in line with the test strategy and test plan.

CLIENT-ELINEXT COOPERATION MODEL

Client's responsibilities:

- Chair the meetings (Daily, Retrospective etc.)
- Escalate QA-related issues to the Manager
- Developing and adapting the product vision
- Writing new user stories
- Splitting big user stories
- Ordering the product backlog
- Doing release planning

Manager's responsibilities:

- Facilitate of inter-team communication across agile projects within organisation
- Being an escalation point for testers
- Presenting an aggregate view of testing utilization to high level management
- Providing technical expertise, e.g proper use of test techniques in appropriate cases
- Ensuring Scrum Teams implement and follow best practices to prevent defects

QA Team's responsibilities:

- Writing regression & acceptance tests
- Running regression tests
- Ensuring proper use of testing techniques and tools
- Configuring, using, and managing test environments and test data
- Reporting defects and working with the team to resolve them
- Coaching other team members in relevant aspects of testing

- Ensuring the appropriate testing tasks are scheduled during release and iteration planning
- Actively collaborating with developers and business stakeholders to clarify requirements, especially in terms of testability, consistency, and completeness
