Introduction

The owners of Angas Fencing Products have for many years manufactured a diverse range of wire products including:

- Hinged Joint
- Barbed Wire
- Max-Loc
- Wire Netting
- Fencing Wire

All Angas Fencing products are manufactured to comply with Australian Standards 2423-2002.

Production Equipment

We use specialised high production machines. These world class machines feature the best technology available for the manufacture of wire fencing products.

Wire Raw Materials

Angas Fencing source raw materials from wire mills locally and worldwide, ensuring continuity of supply and consistent quality. Our suppliers are the best in the world, only suppling raw materials that comply with Australian Standards AS 2423-2002 stringent quality assured standards.
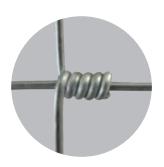

Testing

State of the art test equipment is used to ensure accurate tensility of every coil of wire used. This quality operating procedure combined with close attention to the detail of the manufacturing process confidently ensures Angas Fencing supplies a well-made, long lasting fence for the tough Australian conditions.

Availability

Angas Fencing, to ensure an adequate supply to the requirements of its resellers, warehouse finished manufactured stock at the Wetherill Park factory. Angas Fencing products are only distributed through Australian rural resellers. Angas Fencing does not supply to non bona fide resellers.

Notes: This product range is suitable for most rural fencing applications. If the products are exposed to strong chemicals, pollutants & or corrosion sources, the performance may be adversely affected. As these fencing products will be installed in widely varying situations, you must use diligence to ensure that what is selected is adequate for the purpose. We do not accept liability for loss, damage or consequences for claims based on using this fencing catalogue.
