QuarkXPress 2018 Known and Resolved Issues

Contents

Resolved issues: QuarkXPress 2018 - July 2020 Update (14.3.5)

Following is the list of issues resolved in QuarkXPress 2018 - July 2020 Update.

- **RESOLVED:** The last character of the inserted text gets omitted in the Redline tool tip for a deleted text if it contains a text deletion and text insertion. (117207)

- **RESOLVED:** Vector EPS images are imported with some shift or white gap is visible at the left/bottom of the image. (89680)

- **RESOLVED:** 'Update Missing Images' JavaScript sample does not scan sub-folders for missing images, and it does not work properly if a different page of the PDF file is imported. (104849)

- **RESOLVED:** Export as PDF fails if the hyperlink name consists of round parentheses. (124578)

- **RESOLVED:** Export as PDF fails if the hyperlink URL contains round parentheses. (45202)

- **RESOLVED:** Hyperlink applied to text in different font sizes gets applied to the entire page on output. (126664)

- **RESOLVED:** QuarkXPress crashes while generating PDF output if the document contains specific PDF files having math equations in TYPE 1 (CID) font type (139829)

- **RESOLVED:** All glyphs are not rendered on importing specific PDF files having OpenType CID fonts downloaded as OpenType Type 1 CID. (140462)

- **RESOLVED:** QuarkXPress crashes on opening some specific projects having corrupt font data. (145191)

Resolved issues: QuarkXPress 2018 - November 2019 Update (14.3.4)

Following is the list of issues resolved in QuarkXPress 2018 - November 2019 Update.

- **RESOLVED**: A thin black color outline is displayed around some picture boxes while zooming out a layout in specific projects. (30292)

- **RESOLVED**: EPS images of height less than 1.06 mm cannot be imported in QuarkXPress. (33810)

- **RESOLVED**: (*macOS 10.15 only*): QuarkXPress application does not resume after printing. (94143)

- **RESOLVED**: (*macOS 10.15 only*): QuarkXPress application hangs on creating a new print output style. (94542)

- **RESOLVED**: QuarkCopyDesk articles saved are not openable/importable in QuarkXPress. (95176)

- **RESOLVED**: (*macOS 10.15 only*): The icons in the page layout and colors palette appear corrupted on a MacBook Air machine. (99065)

- **RESOLVED**: (*macOS 10.15 only*): QuarkXPress crashes on closing a project after quitting, and relaunching the application once. (95057)

- **RESOLVED**: Style sheet keyboard equivalents get corrupted or are lost on opening Mac created projects on Windows. (48134)

- **RESOLVED**: (*Mac only*): Text highlight color cannot be changed. (61238)

- **RESOLVED**: Newly added Javascripts are incorrectly saved in the QuarkXPress 2019 folder instead of the QuarkXPress 2018 folder. (89257)

- **RESOLVED**: (*Windows only*): Many options under Item menu appear grayed out for multi-selected items in Finnish and Traditional Chinese language. (101950)

- **RESOLVED**: QuarkXPress projects having an EPS file are outputting partially on outputting immediately after opening the project. (90729)

- **RESOLVED**: QuarkXPress crashes on right-clicking in a selected table row when a picture cell is in focus. (96276)

- **RESOLVED**: (*Mac only*): Projects which are saved / downsaved via AppleScript cannot be opened in QuarkXPress. (89730)

- **RESOLVED**: (*Mac only*): Layers created using AppleScript have an extra junk text in the given name. (56462)

- **RESOLVED**: The *shirorekha* of the vowels: e (U+09c7), ai (U+09c8), o (U+09cb), au (U+09cc) are not joint to rest of the characters in the Bengali words when these characters are in the middle of the word. (59813)

- **RESOLVED**: The character shading offsets are not reset on applying character shading on multiple lines of text. (4985)

- **RESOLVED**: QuarkXPress hangs on dragging grouped items on the master page in specific projects. (21438)

- **RESOLVED**: Unable to search/ replace discretionary hyphen using Find/ Change. (52255)

- **RESOLVED**: Footnote text appears duplicated in specific projects. (55809)

- **RESOLVED**: Text runaround gets ignored if any item on the layout is duplicated using Option+ Drag. (61169)

- **RESOLVED**: (*Windows 10 - version 1809 only*): QuarkXPress crashes on inserting Indic text in TTC fonts; TTC fonts installed for the current user are not collected during Collect for Output. (88796, Introduced by Microsoft Windows 1809 update)

- **RESOLVED**: QuarkXPress crashes on downsaving a project to version 2017 in case the layout metadata contains more than 64 characters. (90098)

- **RESOLVED**: (*Windows only*): Telugu text gets deleted while typing via Lipika IME. (89439)

- **RESOLVED**: Text hyphenates at a horizontal ellipsis, a two-dot leader and a horizontal bar even when Auto Hyphenation is unchecked in Non-Unicode fonts in Indic languages. (93045)

- **RESOLVED**: Words containing either a discretionary hyphen, zero-width space or a word joiner cannot be searched using Find/ Change. (94579)

Resolved issues: QuarkXPress 2018 - July 2019 Update (14.3.2)

Following is a list of issues resolved in QuarkXPress 2018 - July 2019 Update. Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED**: *(Windows 10 - version 1809 only):* QuarkXPress crashes while inserting Indic text in Indic fonts if fonts are installed at user level. (52768)

- **RESOLVED**: *(Windows 10 - version 1809 only):* Unable to Collect TrueType fonts using Collect For Output if fonts are installed at user level. (53147)

- **RESOLVED**: *(Mac only):* AppleScripts placed in the Root Library folder are not displayed in the Script menu in QuarkXPress. (55312)

- **RESOLVED**: Marquee is not drawn correctly for the zoom in area, as a result an incorrect area gets zoomed in. (47539)

- **RESOLVED**: CMYK Colors applied with transparency are color managed and get converted to RGB while outputting in AsIs output setup in flattening mode.(32066)

- **RESOLVED**: *(Windows only):* Quark CEF Renderer does not quit when QuarkXPress crashes, as a result lot of CPU gets consumed. (58071)

- **RESOLVED**: *(Mac only):* Serial Number is not displayed for the installed QuarkXPress application in the Quark Update Preferences dialog. (85555)

- **RESOLVED**: *(Mac only):* Dot character in the project name is not saved in the EPS created by using AppleScript. (58809)

Resolved issues: QuarkXPress 2018 - January 2019 Update (14.2.1)

Following is a list of issues resolved in QuarkXPress 2018 - January 2019 Update. Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED**: Provide new PDF Output Styles for PDF/X and PDF/A Certification and Verification. (30323)

- **RESOLVED**: Underline is not being output on text in Print/ PDF if underline is applied on a soft return character. (48478)

- **RESOLVED**: *(App store only):* PPD information is not included in the PS, due to which printer features like Number of Copies, Duplex printing are not working while printing.(49599)

- **RESOLVED**: The Non-Breaking Character Set feature is not working in QuarkXPress 14.2. (49640)

Resolved issues: QuarkXPress 2018 - December update (14.2)

Following is a list of issues resolved in QuarkXPress 2018 - December Update. Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED**: The same font is applied to the entire text if multiple fonts having the same font family name, the same style name, and the same full name but different PS name are applied on the text. (19383)

- **RESOLVED**: The PDF Accessibility Check fails, if a table has headers. The error is: "Table header cell has no associated subcells". (29693)

- **RESOLVED**: Items anchored inside cells of header rows are tagged in the first instance only, causing an incorrect reading order. (30768)

- **RESOLVED**: A heading level (H1-H6) applied to text in Bullets and Numbering/Outline Style, is lost when exporting as Tagged Accessible PDF. (30813)

- **RESOLVED**: *(macOS only)*: Print to PS is not creating the PS file. (33301)

- **RESOLVED**: Items anchored inside table cells are not spoken during "Read Aloud" if another text box is also tagged in the reading order using the **Article** palette. (34475)

- **RESOLVED**: Third party XT's do not load from the default location for App Store build. (40197)

- **RESOLVED**: The PDF Accessibility Check fails, if a table has footer rows. The error is: "Invalid use of a TFoot structure element". (43536)

- **RESOLVED**: The ability to specify 'based on' and 'next style' attributes of style sheets in CSS. (44814)

- **RESOLVED**: QuarkXPress crashes when working with imported PDF files containing Device Gray objects. (44823)

- **RESOLVED**: Shade applied to multichannel images through The **Advanced Image Control/PSD Import** palette is not retained in the output. (45197)

- **RESOLVED**: An "Invalid use of a Sect structure element" error is shown if text boxes are present along with merged table cells in Accessible PDFs. (45242)

- **RESOLVED**: CMYK colors are also shown when you select DeviceN/InRIP output setup if the layout has a 1 Bit/Grayscale image. (45308)

- **RESOLVED**: PDF U/A metadata error in the PAC3 tool. (45382)

- **RESOLVED**: You cannot navigate from the text field of **Find What** to the text field of **Change To** with a single Tab click. (45401)

- **RESOLVED**: Performance issues while distilling the PS file with the Callas/Acrobat Distiller in DeviceN mode from QuarkXPress. (45735)

- **RESOLVED**: *(macOS only):* You cannot resize the **Import** dialog horizontally. (46695)

Resolved issues: QuarkXPress 2018 - October update (14.1)

Following is a list of issues resolved in QuarkXPress 2018 - October Update. Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED**: The user is unable to apply Item Styles when using the JavaScript Sample "Import Multiple Pages from PDF". (42662)

- **RESOLVED**: A PDF created from QuarkXPress with an embedded profile is not importing solid color fills correctly. (41805)

- **RESOLVED**: *(macOS 10.10,10.11,10.12 only):* Many fonts are not enumerated on the **Font** menu. (41693)

- **RESOLVED**: Text Styling is not showing in the Scroll Zone if **Export it with Page Stack** option is selected. (40955)

- **RESOLVED**: QuarkXPress crashes when modifying any setting in **Preferences** if the font style for an East Asian font in the **Specify Default Replacement** font field on the **Fonts** pane is blank. (39737)

- **RESOLVED**: Underline and strike-through are displaying for invisible characters during PDF/PS/EPS output. (39634)

- **RESOLVED**: An incorrect font style is applied when applying/removing Bold/Italic font face by clicking **Bold/Italic** font style buttons. (37201)

- **RESOLVED**: Previously defined attributes in the **Replace** field are applied during subsequent **Find/Change** operations even if those attributes are unchecked. (37009)

- **RESOLVED**: *(macOS only):* All fonts are listed twice in the **Font** menu if the **Style** menu is kept invoked and the **Font** menu is invoked twice. (35051)

- **RESOLVED**: PDF Accessibility Check fails, if PDF images are placed on the layout. The error is: "Figure element on a single page with no bounding box". (31343)

- **RESOLVED**: Faux Bold is applied when applying a stylesheet using the option 'Apply Style sheet & Retain Local Type Styles', even though bold face font is available in the font style menu. (31302)

- **RESOLVED**: Tagged/Accessible PDF validation fails, when hyperlinks are applied on Picture/Text/None Boxes. The error is: "The Link-OBJR is not nested" (ie the "Link" annotation is not nested inside a "Link" structure element). (30789)

- **RESOLVED**: Tagged/Accessible PDF validation fails. The error is: "Footnote/Endnote used" (ID missing in "Note" structure element, Non-standard structure type "Endnote" is neither mapped to a standard structure type nor to another non-standard structure type). (30787)

- **RESOLVED**: Font style name field goes blank when you apply a character style that has a different font style on selected text that has a locally applied font style; Faux Bold and Faux Italic styling is applied. (16438)

- **RESOLVED**: The **Glyph** palette closes and is automatically reinvoked in a detached state when activating or deactivating fonts. (6387)

- **RESOLVED**: PDF Accessibility Check fails, if underline/strikethrough is applied to hyphenated text. The error is: "Artifact present inside tagged content". (31163)

- **RESOLVED**: Hyperlinks are NOT tagged properly for accessibility standards in PDF Output. The error is: "Alternative description missing for an annotation". (30782)

- **RESOLVED**: LIST created TOC items are not tagged properly for Accessibility standards in PDF Output. The error is: "Alternative description missing for an annotation". (29571)

- **RESOLVED**: Reading order is incorrect for alternate text of Images imported to anchored picture boxes. (29432)

Resolved issues: QuarkXPress 2018 - July update (14.0.1)

Following is a list of issues resolved in QuarkXPress 2018 - July Update. Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED**: Videos are truncated in full screen mode in iBooks 1.10. (4749)

- **RESOLVED**: *(macOS only)*: Footnote text doesn't get calced when incrementing/decrementing character and paragraph attributes using a shortcut. (6099)

- **RESOLVED**: *(Windows only)*: WYSIWYG styling is not available for font styles in font menus. (24215)

- **RESOLVED**: Tables with merged (spanned) cells are exported wrong, missing RowSpan/ColSpan in tagged PDF. (28744)

- **RESOLVED**: The layout focus shifts to the first layout when updating any attributes on other layouts using qxml. (29253)

- **RESOLVED**: Long font names are not readable in the missing font dialog as the missing font column is not resizable. (29596)

- **RESOLVED**: *(Windows only)*: The user is unable to scroll through the font menus using the mouse scroll wheel. (29628)

- **RESOLVED**: Hyperlinks are exported with additional characters from the next line when creating tagged PDF, if an imported PDF already had hyperlinks. (30019)

- **RESOLVED**: Items anchored inside table cells are tagged in incorrect Reading Order. (30772)

- **RESOLVED**: JavaScript operations are slow in some cases. (31248)

- **RESOLVED**: Rotated table rendering is incorrect on the layout and shows without rotation in output. (31403)

- **RESOLVED**: Font styles are not mapped correctly when importing QuarkXPress 2017 or earlier versions Job Jacket tickets in QuarkXPress 2018. (31445)

- **RESOLVED**: "Find & Replace Text" JavaScript fails to perform a search if you have special characters ($, (), []) in the query string/term . (31589)

- **RESOLVED**: Rule Above/Rule Below does not honor the indent settings properly, the rule line is displayed in the indent area. (31707)

- **RESOLVED**: *(Windows only)*: The **Increase Baseline Shift** shortcut is not working. (31974)

- **RESOLVED**: *(Windows only)*: Some fonts are not displayed with WYSIWYG styling in the font family menu. (31984)

- **RESOLVED**: The same JavaScript "Find and Replace" should allow multiple search strings for replacement. (32170)

- **RESOLVED**: The user is unable to apply default attributes to the Caption Box in the "Picture Caption from IPTC Metadata.js" JavaScript Sample. (32610)

- **RESOLVED**: *(macOS only)*: A font style sub-menu is not provided within the font family menu in the Type style menu. (32644)

- **RESOLVED**: When modifying vertical alignment/Text Angle/Text Skew/multiple insets for multiple selected table cells, the modification is only applied to the first cell. (32685)

- **RESOLVED**: *(Windows 10 only)*: QuarkXPress crashes when typing with Korean IME. (33072)

- **RESOLVED**: The user is unable to move the **Measurements** palette using the **Move** option and QuarkXPress crashes when clicking the **Close** option from the context menu. (33104)

- **RESOLVED**: Japanese/ Korean/ Chinese font families and font styles display in English in the font menus on their respective localized OS. (33203)

- **RESOLVED**: The OpenType glyph substitution is not applied on the space character when applying a Stylistic Set in Frutiger DEMO Roman font. (33233)

- **RESOLVED**: Tab stops are not aligned if the justified alignment is applied on the text. (33641)

- **RESOLVED**: Many font style names are displayed incorrectly in the style sheet description while appending style sheets. (33717)

- **RESOLVED**: The shortcut to **Select Previous**/**Next** tool on the **Tools** palette is not working after a 2nd launch. (33868)

- **RESOLVED**: QuarkXPress hangs when spell checking stories containing new line characters in the text. (34188)

- **RESOLVED**: Boxes are not snapping with guides properly when aligning boxes to guides. (34319)

- **RESOLVED**: The user is unable to change the font style by typing its name in the font style menu. (35047)

- **RESOLVED**: The non-breaking property of a non-breaking space/dash is not honored between an anchored item and its superseding word; text reflows when opening legacy document. (35128)

- **RESOLVED**: Next style is not applied if the same paragraph style sheet defined as Next Style is the current paragraph style sheet while selecting 'Apply Using Next Style' command. (35829)

- **RESOLVED**: *(macOS only)*: Multiple images imported through Image Grid XT are not sorted by default for APFS type. (36080)

Resolved issues: QuarkXPress 2018 (14.0)

Following is a list of issues resolved in QuarkXPress 2018. Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED**: *(macOS High Sierra only):* Many fonts are not enumerated in the font menu. (8174)

- **RESOLVED**: The picture path is not appearing correctly in the **Usage** dialog, if the picture path is too long. (2589)

- **RESOLVED**: User cannot put items at the desired location in the library. (2594)

- **RESOLVED**: Endnote numbers do not display when scrolling down directly to the endnote page after saving and reopening a project. (2595)

- **RESOLVED**: A layout slideshow placed in a pop-up layout is not showing correctly in output. (2599)

- **RESOLVED**: A 1 Bit image outputted with CCITT Group 4 compression in many PDFs are not importing correctly and the same is outputting in native. (2604)

- **RESOLVED**: Shortcuts on the **Tools** palette are not working in Russian. (2608)

- **RESOLVED**: The **Convert to Graphic** option is unchecked when duplicating a print layout into a digital layout, if it contains text with drop shadow applied. (2609)

- **RESOLVED**: *(Windows only)*: The **File Open (or Import)** dialog locks the selected files, unable to delete/rename. (2612)

- **RESOLVED**: Crash occurs when you undo after applying color blend on items in a locked project. (2613)

- **RESOLVED**: Fixed layout ePub validation shows an **SVG hyperlinks should have a human-readable title** warning. (2614)

- **RESOLVED**: A PDF created from Microsoft Word containing a referenced TT Font with attributes like Bold, Bold Italics and Italics text, is outputting as junk. (2615)

- **RESOLVED**: The **Library** palette position is not retained after you reopen it. (2616)

- **RESOLVED**: Pictures with drop shadow are converted to static objects when you copy/paste across projects. (2622)

- **RESOLVED**: Picture Zoom applied to text/picture boxes are not showing in digital output. (2624)

- **RESOLVED**: Unable to accurately place the tab on the tab ruler. (2633)

- **RESOLVED**: Incorrect output when exporting a gradient frame with a clipping image in native path. (2635)

- **RESOLVED**: Text in flattened PDF files is not rendering properly on screen when **Lighten**, **Color Burn**, **Color Dodge** etc., blending mode is applied and N channel compositor is enabled. (2639)

- **RESOLVED**: *(macOS only)*: Raster images with spot colors/channels in Tiff and PSD is not rendering in CMYK document blending space. (2642)

- **RESOLVED**: Objects created on a hidden layer are visible when opening a saved project if the object is selected before closing. (2648)

- **RESOLVED**: *(macOS only)*: Shadings in CMYK color space applied to the text are not importing correctly. (2649)

- **RESOLVED**: Rulers flicker badly in CMYK/Grayscale N Channel while rendering two different pages partially if any of the pages contain an object with a blending mode applied. (2651)

- **RESOLVED**: PDF/EPS images are rendering in low resolution (pixelated) when the **Usage** dialog is invoked immediately after opening some projects. (2652)

- **RESOLVED**: *(macOS only)*: Color in a non-knockout transparency group PDF file is rendered incorrectly when importing into QuarkXPress. (2653)

- **RESOLVED**: Text calcing issue occurs when modifying paragraph attributes/font size/typing text in spanned column paragraph if there are two different span column blocks together or a span and split block together. (2656)

- **RESOLVED**: A PS error, **/UniqueID,** occurs during printing if both **Futura Bold** and **Futura Bold Oblique** fonts are used in the same layout. (2657)

- **RESOLVED**: Unable to increase or decrease the number of columns or gutter width of the parent text box on either the **Home** and **Text** tabs of the **Measurements** palette on *macOS,* or on the **Text** tab of the **Measurements** palette on *Window*s. (2658)

- **RESOLVED**: Text fill and stroke are honoring the bottom object blend mode in native output when the text box is at the top of the stack order. (2660)

- **RESOLVED**: A frame blend mode is applied to text and text stroking when text stroking and text box skew is applied. (2663)

- **RESOLVED**: Different results wen outputting a Gray PDF & a Gray Tiff image in flattened transparency path when images are using specific transparency blend modes. (2673)

- **RESOLVED**: Color burn works incorrectly with the white color of a CMYK image. (2674)

- **RESOLVED**: White color is not rendering properly when applying a blending mode to any object on the layout when the source setup is changed. (2675)

- **RESOLVED**: Rendering of a PDF changes drastically when a transparency blend mode is applied at a certain zoom level. (2676)

- **RESOLVED**: *(Windows only)*: The program language menu is disabled after invoking and closing Story Editor view. (2685)

- **RESOLVED**: The application crashes when you open the **Table Styles** palette twice on some machines. (2686)

- **RESOLVED**: The application crashes when you click the **Redline** option in **Preferences** on some machines. (2688)

- **RESOLVED**: An imported 1-Bit image renders corrupted after applying a blending mode if any of the attached RGB color profile is used at the source. (2692)

- **RESOLVED**: If two images have the same name, only one image will show in a digital layout. (2701)

- **RESOLVED**: Opening projects across machines in different time zones causes images to be in a modified state. (2703)

- **RESOLVED**: A mirror image of a line is created when applying **Flip Text** if a text blend mode is applied; the output is also affected. (2709)

- **RESOLVED**: Object with group opacity applied are outputting wrongly in flattened output if the layout contains any object with a blending mode applied to it. (2714)

- **RESOLVED**: QuarkXPress hangs when merging text boxes using **Top Down** and **Selection Order** text if track changes is enabled. (2716)

- **RESOLVED**: QuarkXPress crashes when you click **Accept All Changes** after merging text boxes based on selection order. (2718)

- **RESOLVED**: A Line Between applied to a column box disappears while placing a runaround item. (2721)

- **RESOLVED**: Images are re-importing as low resolution and rendering pixelated when a project is opened using a modifier key Command/Control. (2727)

- **RESOLVED**: *(Windows only)*: Many font names are not readable in WYSIWYG styling on the font menus. (2728)

- **RESOLVED**: OpenType substitution doesnt work correctly for the Ordinals feature in QuarkXPress. (2742)

- **RESOLVED**: OpenType substitution doesn't work for lower case **Eszett glyph (U+00DF)** and **Upper case Eszett glyph (U+1E9E)** when applying **OT Small Caps** and **OT All Small Caps** feature. (2860)

- **RESOLVED**: An applied table frame is not appearing in digital layouts. (2863)

- **RESOLVED**: Scaled pictures are exported at a smaller size in HTML if picture zoom interactivity is applied. (2880)

- **RESOLVED**: Text shading and frame are not clipped or soft and hard return. (4993)

- **RESOLVED**: Animation is not working in right spread pages for items originating from the pasteboard. (5893)

- **RESOLVED**: Tab stops slightly jump to the right when placing the tab stops by clicking on the tab ruler in the **Paragraph Style Sheet** dialog. (6121)

- **RESOLVED**: PSD images containing a layer mask with a decimal value in the feather property are not importing and throw a **Bad File Format** error. (6221)

- **RESOLVED**: The **Show Pop Up Position Offset** is not honored in digital output if we apply button interactivity on any anchored box. (6355)

- **RESOLVED**: QuarkXPress crashes when invoking te Story Editor if it is invoked on Monitor 1 while Monitor 2 is the main monitor. (7507)

- **RESOLVED**: Text is missing in a scroll zone placed in a pop up layout if the style sheet name contains "body". (9222)

- **RESOLVED**: Fraction glyphs are not substituted properly when applying OpenType Fractions. (17899)

- **RESOLVED**: The maximum character length of the URL field in the **New/Edit Hyperlink** dialog is 250. Longer links are truncated. (18871)

- **RESOLVED**: Unicode characters in hyperlink anchor names are not exported correctly to ePub/Kindle/App Studio/HTML. (29019)

- **RESOLVED**: The start position of the tab ruler is shifted in a multi column text box; as a result, the position of the tab in the text box doesn't match with the tab stop on the tab ruler. (30824)

- **RESOLVED**: Type style attribute is not applied to all the replaced instances when searching text and replacing with text and type style attribute. (22436)

Known issues as of QuarkXPress 2018

Following is a list of known issues in QuarkXPress® 2018

- Multi code point Emoji sequences are not inserted as a single character, nor do the individual characters in correct sequence combine to form a single emoji glyph. (4186)

- Spot colors are not added to the **Colors** palette and are not outputting in the exported PDF if the layout contains an EPS file with spot colors. (8140)

- **PICT** and **PCT** format images are not importing when opening IDML files in QuarkXPress 2018. (8351)

- Combined book always creates untagged PDF. (9372)

- **Fit Box To Text** does not work with Footnote Span. (11456)

- IDML Import might be slow for files with a large number of Bezier items. (11487)

- Text box content is not visible if the box size properly fits according to the content for projects created from IDML. (15829)

- *(Windows only)*: All font styles for a font family are not enumerated in font menu for some fonts. (17661)

- The tab position value is not honored for bullets and numbering for projects created from IDML files. (18925)

- Text Stroke does not work for color fonts. (19460)

- *(Windows only)*: Font family and font styles for Type1 fonts are not enumerated together. (19472)

- The **Tri State** option not available for OpenType features in **Find/Change**. (20406)

- *(macOS only)*: Fonts in suitcase format are replaced with Courier when exporting a PDF containing referenced fonts. (21885)

- There is no UI option in the **Glyphs** palette to access all the variants of a base emoji together. (22566)

- Font family and font style are not enumerated separately in some dialogs. (23549)

- Safari crashes during **Export as HTML5 Publication** if OpenType Numerator/Denominator/Ornaments style is applied with any other OpenType style. (23841)

- *(Windows only)*: An **Unable to Create PDF...** alert is shown when exporting a PDF if the installed path has Unicode or Umlaut characters. (23870)

- When using Pinch Zoom, sometimes, in addition to the content, the HTML5 reader also zooms and is being corrupted. (24479)

- Part of the heterogeneous box border is not rendering or rendering as transparent when a blend mode applied to any object in the spread. (24518)

- The HTML5 reader gets corrupted when the orientation is changed from landscape to portrait while a fullscreen video is playing on iOS 11. (27038)

- Some glyphs in OpenType **SVG** color fonts do not honor the specified color or transparency. (27684)

- OpenType **SVG** color fonts containing vector data render in low resolution. (27887)

- Color fonts are not rendering correctly for Reflow ePubs. (28530)

- Color fonts are not rendering correctly in fixed/reflow Kindle eBook output. (28532)

- Content inside table cells are overflowing in projects created from IDML files. (28808)

- Opacity applied to a **COLR** color font will not render and output correctly with flattened transparency. (28973)

- Verification fails when an imported PDF contains text downloaded in specific encoding (e.g. CID, Custom and built-in encoding). (29117)

- The **Set Tool Preferences From Selected Box** option does not honor a heterogeneous border. (29786)

- *(Windows only)*: There is no way to specify the multiple border defaults for boxes. (29787)

- (PDF/A-2u, PDF/A-2b and PDF/A-3b): Verification/certification fails when verifying a QuarkXPress project containing gradation and text. (29800)

- The distance between grouped lines with arrow heads increases when flipped. (29882)

- The size of the story editor becomes one-fourth of the screen size when using a dual monitor display. (29908)

- On iPads, the full screen button is disabled for YouTube, Viddler, and Vimeo videos, in HTML5 reader. (29951)

- An applied **Stylistic Alternate** Open Type feature does not map when creating a new project from an IDML file. (29976)

- Some of the glyphs inserted using the **Glyphs** palette do not map correctly when creating a new project from and IDML file, resulting in incorrect rendering of text. (30071)
