## Quick guide to editing Reading Lists @ LSE

This is a short version of how to edit your reading list. A comprehensive version starts below this short version.

### Set up for First time users

1. We strongly recommend using **Chrome** or **Firefox** browsers when editing your reading list. Microsoft Edge, IE, and Safari are not supported by Talis Aspire, and should be avoided if possible.
2. Contact [your departmental librarian](#) to be given editing rights for ReadingLists@LSE. You will receive a 'List publisher invite' email from 'noreply@taliaspire.com'. **Click the link in the email** to accept the role.
3. Log in to Reading Lists @ LSE using your **LSE username** and **password**. Click on the blank silhouette icon at the top right, and **create your profile**.
4. Go to the [Chrome Web Store](#) or [Firefox Add-Ons](#) and add the **Talis Aspire Reading Lists Bookmarking** extension to your browser. You should now see a small blue-green Talis button in  the top right of your browser. The first time you use it, you will be prompted to select your institution (**London School of Economics**)
5. Take a look at some pre-existing lists to get an idea of the structures and outlines used. There are two basic elements to a reading list:
  - **Sections**, which structure your list according to your needs, e.g., readings week by week. Sections can be nested together, and they can be used to organise **Resources** and **Paragraphs**. **Sections** must have a title, and optionally, a description. Descriptions should be kept to 1-2 lines; longer text should be added using **Paragraphs**
  - **Resources** are the items students will need to read/study; they can be books, chapters, article, or other things such as webpages or videos.
  - **Paragraphs** allow you to add a free-text field with basic formatting options; you can either edit this directly, or copy-paste in from another document.

### Editing an existing reading list

1. Search for the reading list, by **course code** or by **title**. If you cannot find an existing list, you might need to create a new reading list, please see this section. If you believe that a reading list existed for this course in past academic years, but now cannot find it, it may have been archived due to the course not running in the previous year. Please contact your department librarian.
2. **NB:** Once you begin editing your list, as described below, any changes will not be made 'live' or public until you **Publish** the list. Editing a list creates a private 'draft' version visible only to yourself and system admins. Students will not be affected by any changes made while editing. Therefore it is not necessary to make a copy of the list for editing purposes. Changes made to the 'draft' version will be saved as you work.

3. Once you have editing rights, when you scroll through a list, you should see options to “Add Resource / Add Paragraph / Add Section” appear on a blue line in the centre of the list. Clicking on the relevant ‘add’ option will add the item to the current location of the blue bar; you can add the item to the top or bottom of the list, between existing items, or within a pre-existing section.

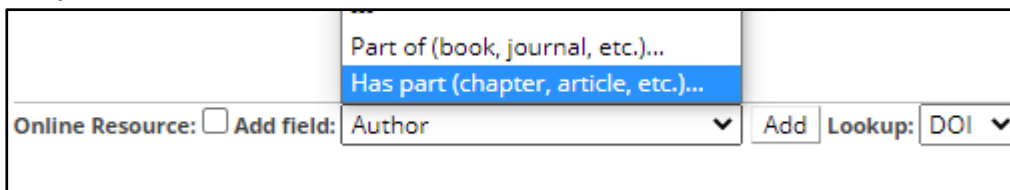

4. You can edit a pre-existing item, by using the ‘vertical ellipsis’ button to the right of the item. **Save** or **Cancel** your changes to exit editing of the item. You can also move a pre-existing item by clicking the double-headed arrow icon and dragging the item to the desired location within the list.

5. To add a new **Resource** to your list, you will need to create a **Bookmark** using the Bookmarking extension. Open another tab in the same browser, and search for the resource you want to add.
  - 5.1. Firstly, check [LSE Library Search](#), to find items already held by LSE Library. Search by title, author, ISBN, etc., and scroll through the results to locate the item you want to add. Click on the item title to bring up the full catalogue record details.
  - 5.2. Click on the extension button on your browser. This will open a **Bookmark** template with the details of the resource. Check that the details are correct, and amend if necessary.
  - 5.3. Click **Create & Add to list**. Use the **top of** or **bottom of** options and the drop-down menu to select where to add the item. You must select an **Importance** for the item; if your course uses different terminology, please choose the closest match. Optionally, you may add a **Note for student** regarding the resource. **Note for Library** is for internal use only and should not be used.
  - 5.4. Click **OK** to add the Bookmark to the list. It will also be saved to your **My Bookmarks** list. Refresh the Reading List tab to see the new bookmarks.
6. You can add items not currently available via Library Search, by a web search for a reference to the item. The Bookmarking extension works with many websites. We strongly recommend using [Google Books](#) for books, rather than publisher’s websites. Do check for, and remove, the **Web Address** field before creating the bookmark, as this should only be used to link directly to an available/accessible resource.
7. The Library Acquisitions team regularly check for newly added ‘book’ Bookmarks not currently available via the Library, and will acquire print and electronic versions, if available for purchase. **Essential** books will be prioritised, and multiple print copies, based on student numbers, will be purchased for the Course Collection.
8. **IMPORTANT:** If you require an **extract** from a printed Book to be **scanned/digitised**, follow the steps below:
  - 8.1. Use the browser extension to create a bookmark template, as above.
  - 8.2. **Before** clicking **Create & Add to list**, you will need to edit the bookmark template to include the chapter details.

- 8.3. Open the **Add field** drop-down at the bottom of the template, and select **Has Part (chapter, article etc....)** and the click **Add**.

- 8.4. This will create a new tab in the bookmark template. Select **Chapter** from the **Resource type** drop-down menu, and enter the **Title** of the chapter. If the chapter is untitled, please enter 'Chapter 1', 'Pages 30-40' or a similar useful description. you also need to use the **Add field** option to add **Pages** and specify the page range there (even if given in the title). Optionally, you may also add the **Author** of the chapter, if different from the main author(s).
- 8.5. Once you have added all the relevant details, click **Create & add to list** as described above. The new chapter will be automatically reported to the Acquisitions team, who will begin the process of producing a scan, if permissible. Please note that due to copyright restrictions, only **One Chapter** or **10%** of a work (whichever is greater) may be scanned. If you wish to add multiple chapters from the same work, in this case please use the **Note to Library** to specify which chapter should be scanned, with the phrase "Please scan this chapter".
- 8.6. This is important to do correctly if you want an extract digitised, as incorrect or missing information will cause the scan to be delayed. If you need help with it contact your librarian. There is more detail in this section on requesting items to be scanned, including articles
9. If you need to amend an existing bookmark, you can use the 'vertical ellipsis' edit button, e.g., to change the **Importance** or to add or amend a **Chapter** tab. If you are using the same item in multiple places on the list, you do not need to create a bookmark each time; use the blue bar to **Add Resource** to select a pre-existing bookmark from your **My Bookmarks** list. There are other options for creating bookmarks, such as adding both print and electronic resources to the same bookmark, bookmarking different types of resources, and manually creating bookmarks. Please see this section for more information on using Bookmarks in Reading Lists.
10. Once you have finished editing your reading list and it is fully updated, click the **Publish** button at the top-left of the list to make your changes 'live' and visible to students and other users.

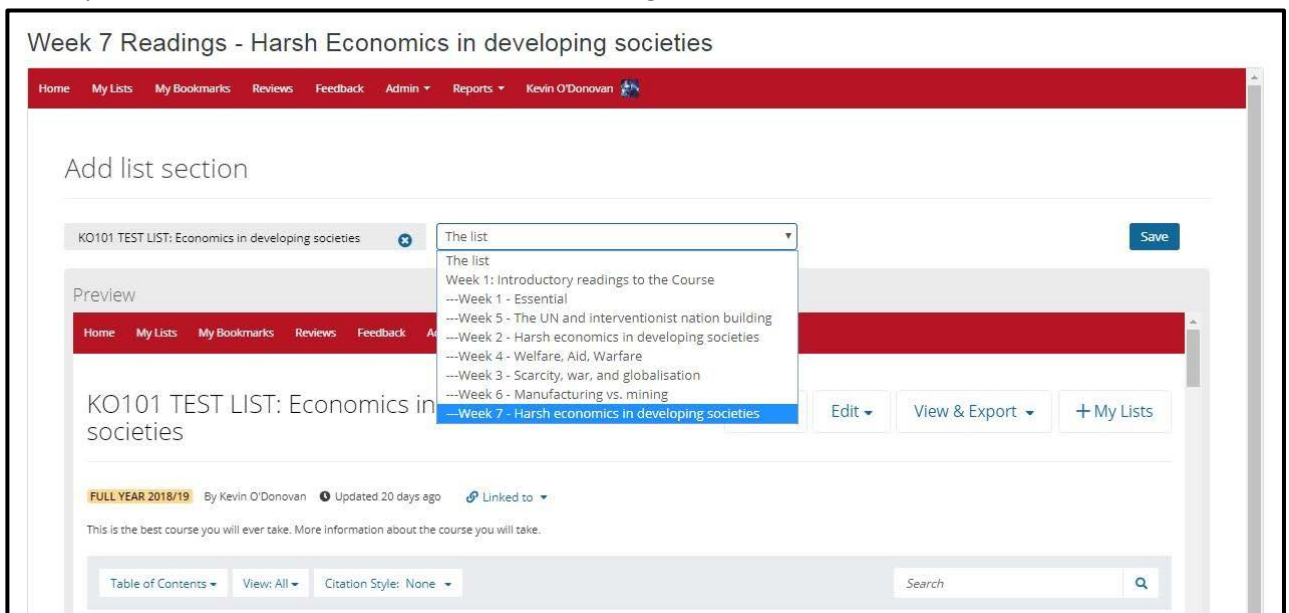

## Embedding sections of your reading list in Moodle

After you have created sections in your reading list, you can embed these in your Moodle course site. This is a short version of this process. For more detail please go to this section.

The benefits of doing this are that your students will have a consistent experience across their courses; the Library will have access to your reading list data so the content can be acquired for you; and you won't have to duplicate the effort of entering your reading list into Moodle.

1. Open your Moodle course, go into edit mode by clicking Turn editing on near the top right corner.

2. Go to the week or section of your Moodle course where you want to embed a section from your reading list, and click the drop down menu for Add an activity
3. Select Reading List (Talis Aspire) from the drop down activities menu
4. Enter your chosen title text for the Activity name, such as “Week X readings”. This is what will appear in Moodle.
5. Then click the Save and display button near the bottom of the options.
6. You will now be brought to the reading list for your course. You should accept any cookies if prompted to do so. You may be asked to authenticate your username when embedding – please click any ‘key’ icons, or enter your username and password if prompted to do so.
7. Select the section of the reading list you want to embed in Moodle from the drop down menu. When you are finished, click the Save button on the right.

8. Your reading list section is now embedded in your Moodle course. You can see the results by navigating back to your Moodle course and click Turn editing off.

## Comprehensive guide to Reading Lists @ LSE

This is the full guide to creating and editing Reading lists, and covers in greater depth the topics outlined in the Quick guide, along with further information for making full use of the system.

### Getting Started

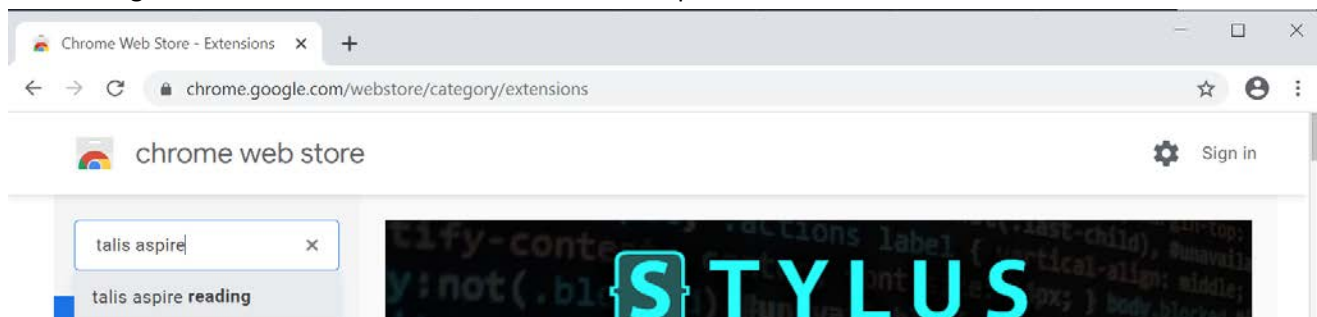

ReadingLists@LSE is compatible with all web browsers but, for the best experience, we recommend that you use Google Chrome or Firefox.

#### Adding the Talis Aspire browser extension

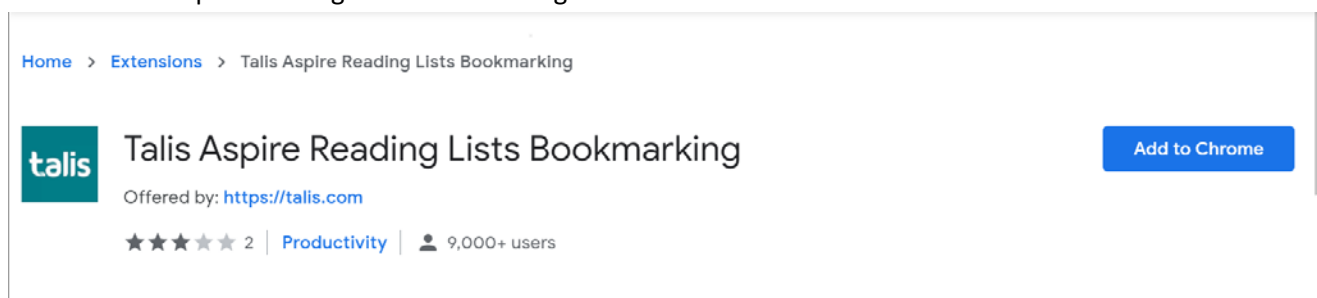

Successful use of the software depends upon setting up a shortcut on your browser. This tool will allow you to create a reading list item (e.g. a book or journal article) to add to your list. These items are referred to as bookmarks. When you bookmark an item, the bibliographic information (title, author, publisher etc.) is automatically created for you, meaning that you do not need to manually enter this data.

For Chrome users (the Library recommends you use this browser for your reading list editing)

- Go to Google Chrome web store and search for “Talis Aspire”.

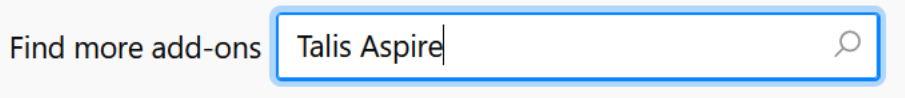

- Click on Talis Aspire Reading Lists Bookmarking and Add to Chrome.

- Click on the Add-ons icon  and pin extension.
- You should now see a small blue-green Talis button in the top right of Chrome .
- The first time you click on it, please select LSE as your institution.

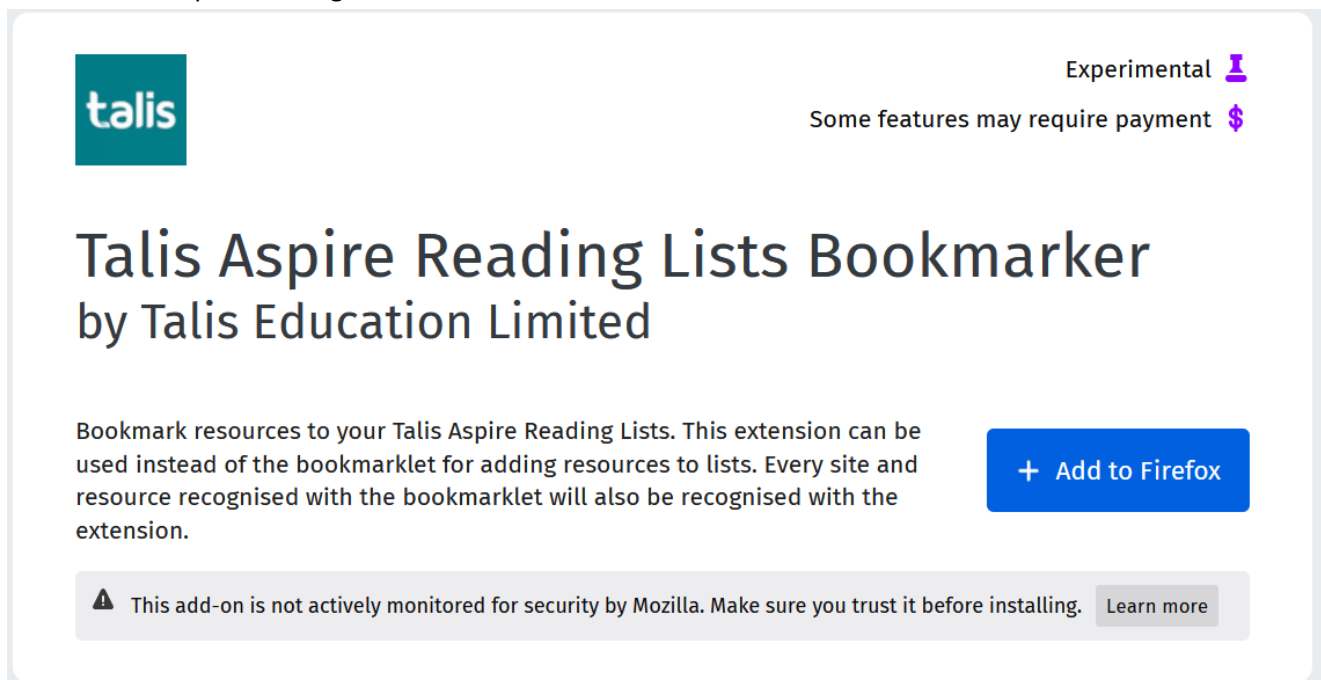

## For Firefox users

- Click on the menu at the far end of the top right hand corner of the browser .
- Enter “Talis Aspire” in the Find more add-ons box.

Find more add-ons

- Click on Talis Aspire Reading Lists Bookmarker and Add to Firefox.

**talis** Experimental ⓘ  
Some features may require payment 💰

# Talis Aspire Reading Lists Bookmarker

by Talis Education Limited

Bookmark resources to your Talis Aspire Reading Lists. This extension can be used instead of the bookmarklet for adding resources to lists. Every site and resource recognised with the bookmarklet will also be recognised with the extension.

[+ Add to Firefox](#)

⚠ This add-on is not actively monitored for security by Mozilla. Make sure you trust it before installing. [Learn more](#)

- The Talis button will appear in the top right hand corner of your browser.

## Logging in

Access is available to Reading Lists@LSE to all current staff and students. This is done on the basis of the LSE network username and password.

1. Go to <http://readinglists.lse.ac.uk/index.html>
2. Select the ‘Log In’ option from the red menu bar at the top of the screen.
3. Enter your LSE network username and password.
4. The first time you login you will need to set up your profile.
5. Complete your details on the ‘Tell us about yourself’ form.
6. Set your profile to either public or private.
7. Click Save to complete your profile.

## Registering

The Library will send you an invitation to register with the Reading Lists @ LSE system. Look out for an email from Talis Aspire. You may need to check your “Clutter” or “Junk” folders, as this will be an automated email coming from [noreply@taliaspire.com](mailto:noreply@taliaspire.com)

If you haven’t already received an email, please contact your [department librarian](#) who will arrange editor access for you.

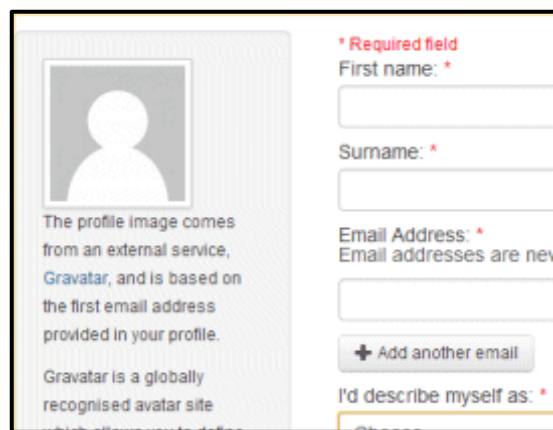

Click on the link at the bottom of the email, and follow the onscreen instructions to register. The system uses your standard LSE login and password, but the first time you log on you’ll

be asked to fill in some basic details, including your name and email address.

## Editing an existing list

Add any list you wish to

Go to My Lists and select  
Edit and Edit list details to

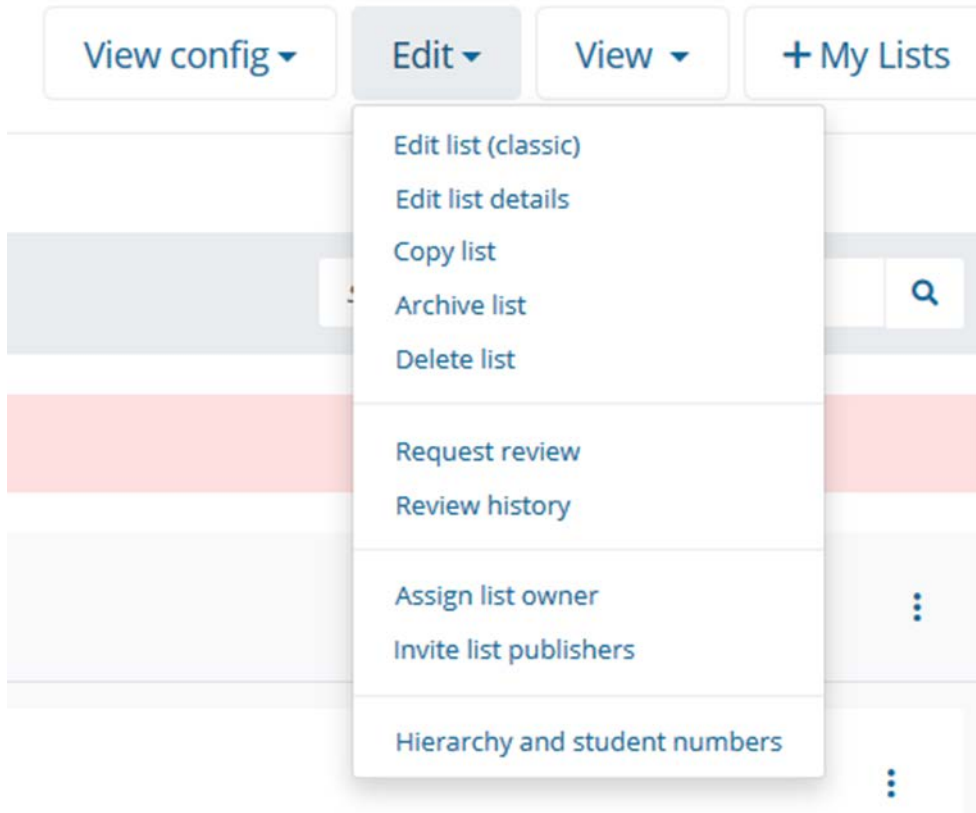

The screenshot shows a registration form with the following elements:

- A profile picture placeholder with a grey silhouette and the text: "The profile image comes from an external service, Gravatar, and is based on the first email address provided in your profile. Gravatar is a globally recognised avatar site".
- A red asterisk indicating a required field: "\* Required field".
- Input fields for "First name: \*" and "Surname: \*".
- An input field for "Email Address: \*" with the note "Email addresses are new".
- A button labeled "+ Add another email".
- An input field for "I'd describe myself as: \*".

edit to My Lists.

the list you wish to edit. Click on  
open the relevant list.

Instead of entering a new module, you are now presented with your resource list, in editable form, which says Draft followed by the list name. A dark blue line appears with the options ADD RESOURCE / ADD PARAGRAPH / ADD SECTION. The line marks where the Resource/Paragraph/Section will be added.

### Moving an item within a list.

- To move an item within a list
  - Either drag and drop it to its new location using the drag tool  ;
  - Or open the Edit item menu  , and use Cut followed by Paste below at the new location, or Move up or Move down to move above or below the nearest bookmark in either direction.

### Copying an item to another location within the list.

It is not possible to directly copy an item in a list and to add it to another location. To add an item without removing it from its existing location, add a bookmark.

- See “Adding an Item from an existing Bookmark” below.
- If the item is not in your existing bookmarks, you can add it to your bookmarks from the Edit item menu  .

- Use an existing bookmark for a different reading from the same book, and Edit to add the Chapter or the extract to be read that week in Note for students as required. See “Editing an item” and “Bookmarking a Chapter”, below.

### Accessing Material

Reading lists contain a variety of material, not all of which will be available as an online resource. There are therefore two methods for accessing material.

- For items which are accessible online, just click the blue ‘View Online’ button as indicated below. This should automatically take you through to the item, though in some cases you may be asked to login.

MICHAELMAS TERM

This item appears on the following list

Draft: Test copy of HY244: Britain's Atlantic World, 1688-1837

Library availability

Collection	Shelf Mark	Availability
LSE Library	Main Collection Books HT1161 D77	1 copy available

[View in library catalogue](#)  
[Search the library catalogue for other formats/editions](#)

There are also options to:

- Edit the list by cutting and pasting or moving bookmarks.
- Add Notes.
- Add Resource/Section/Paragraph.
- Save bookmarks to use in other lists.

To Set Importance, click on the drop down on the bookmark.

The screenshot shows a reading list entry for "From slavery to freedom: comparative studies in the rise and fall of Atlantic slavery" by Seymour Drescher (1999). A dropdown menu is open, showing options: Essential, Background, Suggested for Student Purchase, and Importance not set. The current selection is "Importance not set".

The importance settings within the system, Essential and Background, have a dual purpose:

- They tell students how important an item is for reading purposes
- They tell the library on what basis we should buy.
  - o Essential – multiple copies based on our purchasing guidelines, which go to the Course Collection.
  - o Background – one copy in the Main Collection.

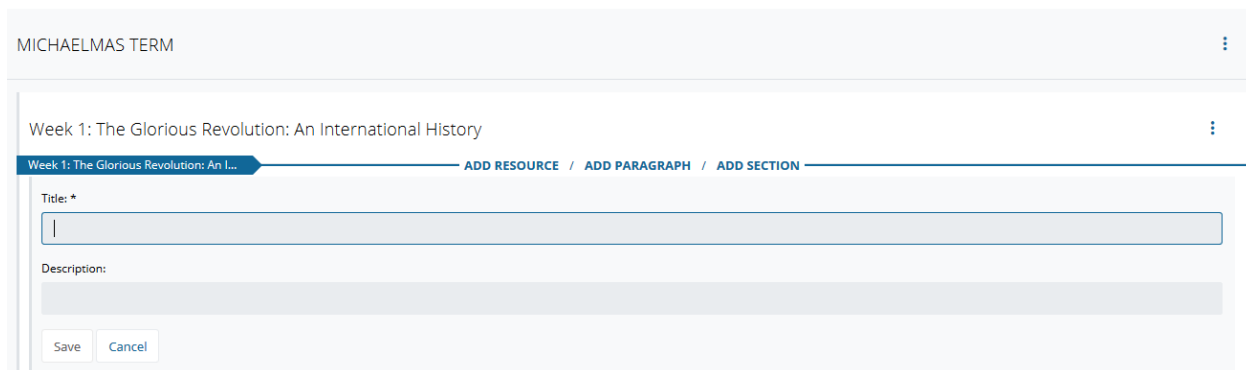

The Library uses this information to ensure that we hold adequate stocks of recommended books for your course. If no importance is listed, we assume that the reading is Background and will order only one copy.

### Adding a Section.

It is possible to create new sections within your lists, which can be used to help signpost students to resources and define the course structure.

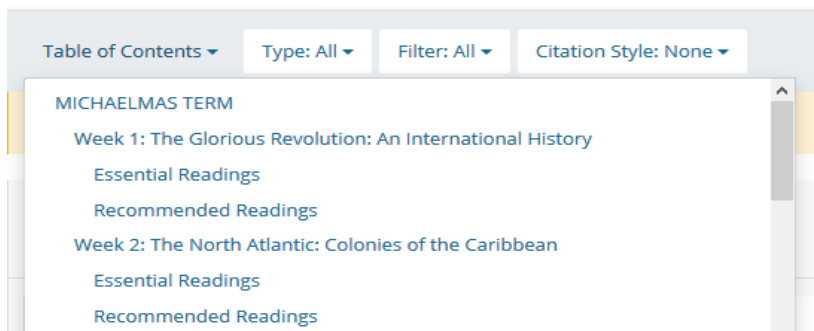

- To add a new section, Place the cursor where you want to add the section and click on ADD SECTION.
- Alternatively, when you have finished a section click on Edit item menu  and select Add section below.

You will then be prompted to name the section (e.g. Week 1 Readings, Essential Reading). You can also create sub-sections to give your list additional structure.

The screenshot shows a form titled "MICHAELMAS TERM" with a sub-section "Week 1: The Glorious Revolution: An International History". Below this, there is a form for creating a new section. The form has a title field labeled "Title: \*" and a description field labeled "Description:". At the bottom of the form are "Save" and "Cancel" buttons. Above the description field, there are navigation options: "ADD RESOURCE", "ADD PARAGRAPH", and "ADD SECTION".

Your reading list will have a Table of Contents created from the Sections and Sub-sections you have created. Scroll down the table to navigate the list more quickly, and click on the Section you want to edit.

The screenshot shows a "Table of Contents" for a reading list. At the top, there are filters: "Table of Contents", "Type: All", "Filter: All", and "Citation Style: None". The table lists the following sections:

- MICHAELMAS TERM
  - Week 1: The Glorious Revolution: An International History
    - Essential Readings
    - Recommended Readings
  - Week 2: The North Atlantic: Colonies of the Caribbean
    - Essential Readings
    - Recommended Readings

## Bookmarking

Notes on bookmarks.

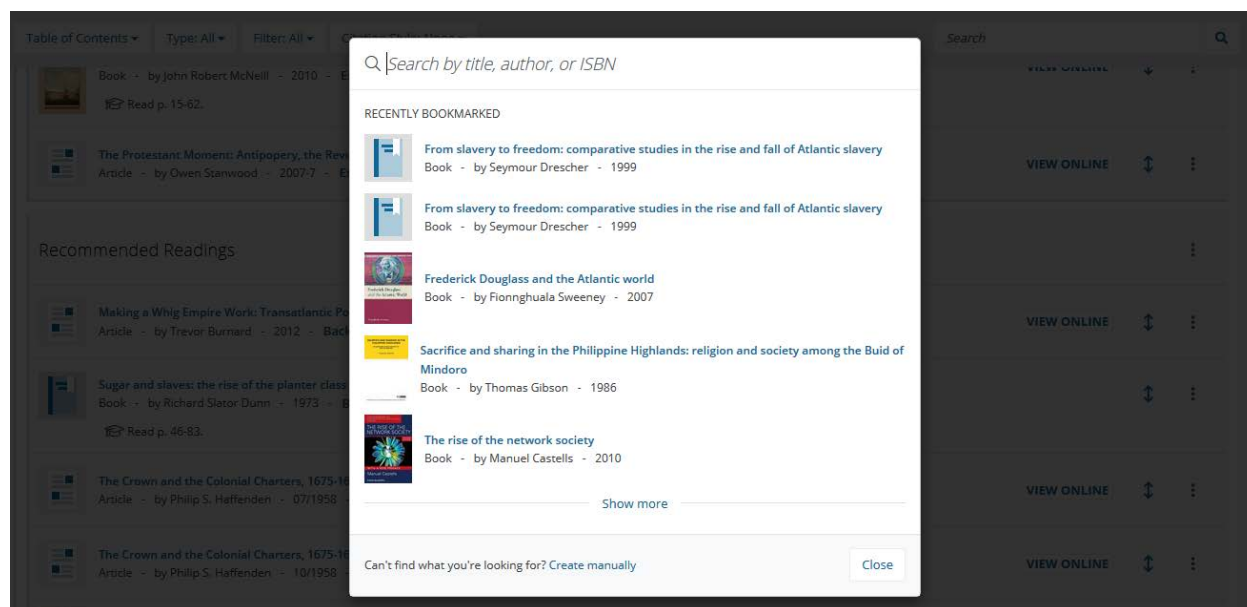

To ensure consistency, please add existing bookmarks to the list if you have them rather than creating a new bookmark. If creating a new bookmark, please re-use it for each entry for the same book across all your lists. As well as avoiding unnecessary duplication of effort on your part, this will make it quicker and easier for Library staff to ensure the correct materials are available.

Once added, the bookmark can be edited and amended as needed.

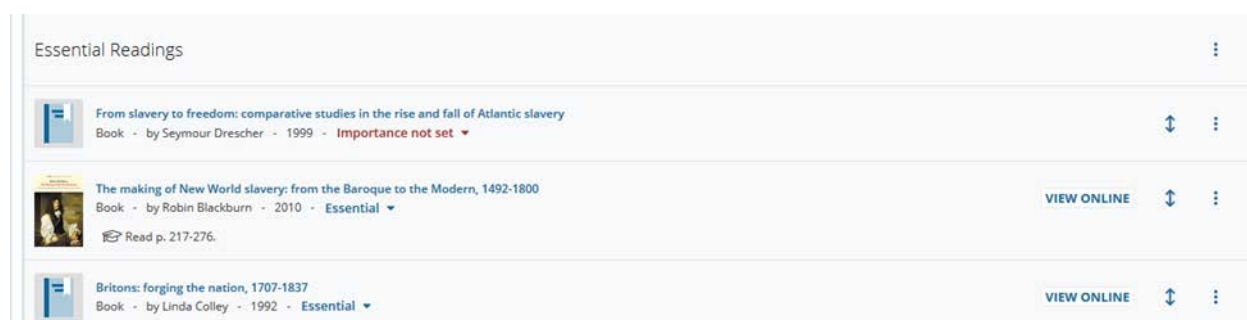

- If a whole book should be read as part of the course, add the bookmark for the entire book to the whole course or term reading, or other relevant section of the list.
- If asking students to read only a specific chapter or extract of a book, add the bookmark for the book and add a Has Part (chapter, article etc....) field with the relevant details. Multiple chapter bookmarks for the same book can be added to a list. Important: please carefully read the instructions contained in Bookmarking a Chapter below before adding chapter bookmarks.
- Ensure that you select the correct Resource Type, e.g. Chapter in the Has Part... field, Book in the main bookmark (or the Is Part of... field) for a book, including where a selected passage is to be read as in the second bullet point above.
- If using a book throughout the course but asking students to read a different chapter or passage for specified weeks, add the bookmark for the entire book to each week and add or amend a Note for students specifying that week's requirements.
- Please note that e-books must have the Resource Type Book and are treated exactly the same in most respects as print versions. See Adding an e-book link below for details and variations.
- Other formats such as Journal articles, Theses, websites, etc. must be assigned the appropriate Resource Type. Important: the default Resource Type is Book, so it is essential that the correct Resource Type is selected to avoid problems.

## Adding an Item from an existing Bookmark.

- o To add a new item, place the cursor above where you want to add the item and click on ADD RESOURCE.
- o Alternatively, when you have finished editing the previous item click on Edit item menu  and select Add resource below.
- o This will open a list of RECENTLY BOOKMARKED items. If the item you want to add to your list does not appear, you can search for it.

Once you have found and selected the correct bookmark, clicking on the selected bookmark will insert it into the list below the point where you clicked on ADD RESOURCE or Add resource below.

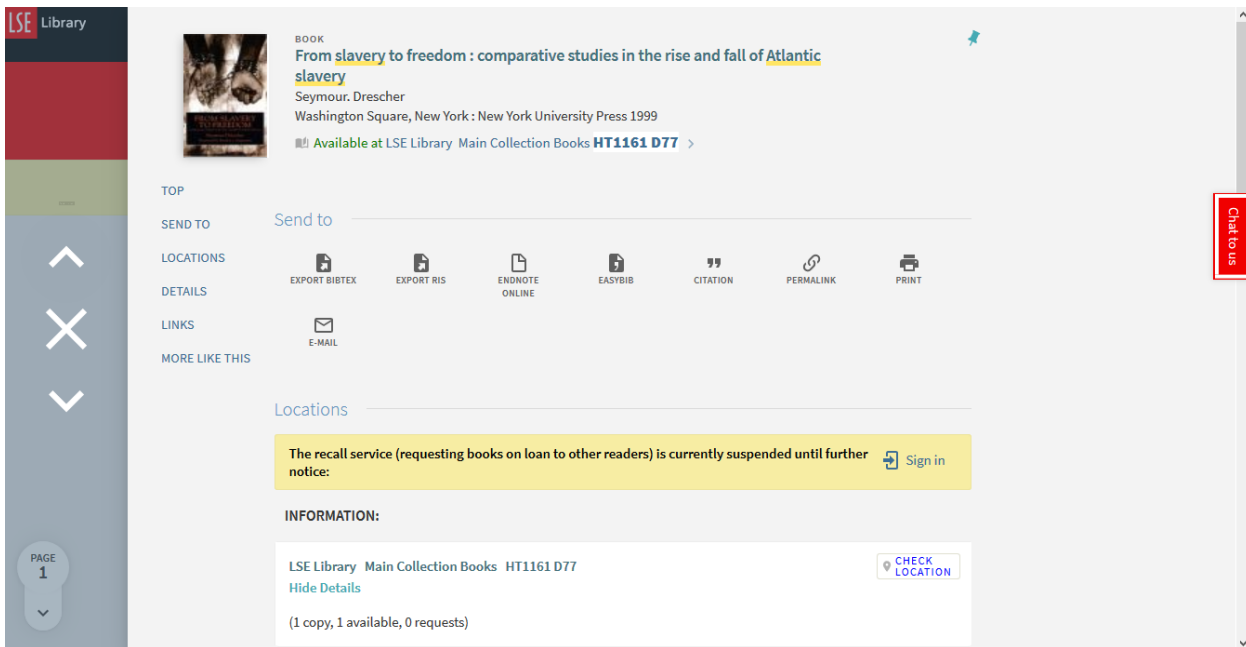

If the required item is not among your existing bookmarks, it is not necessary to Create manually.

- Close the list.
- If you have not already done so, add the Add to My Bookmarks button  to your browser. (Links: [Chrome](#) and [Firefox](#). Select LSE as your institution.)

- Search for the item in Library Search.

### Bookmarking a print Item held by LSE.

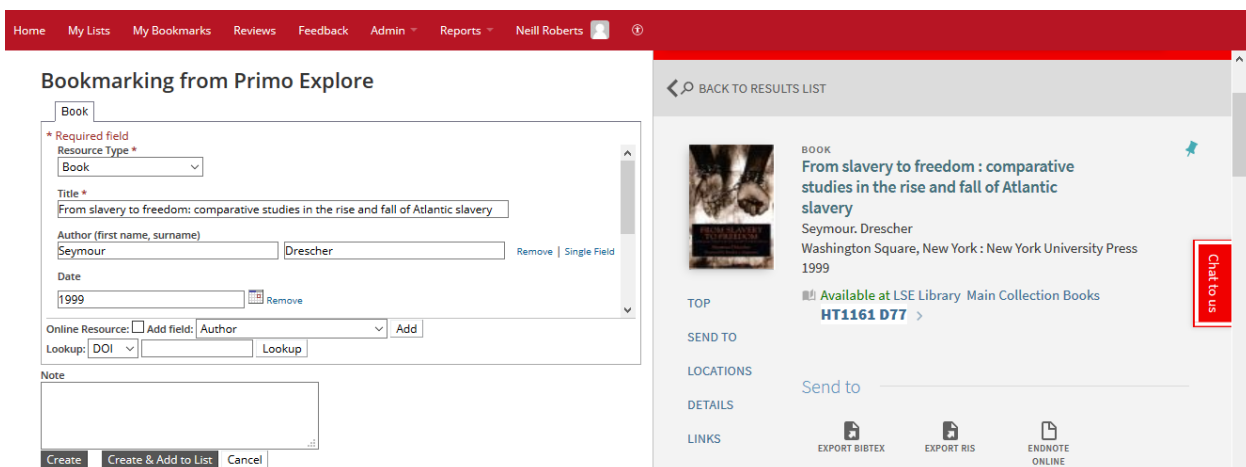

- o Go to the Library homepage: [www.lse.ac.uk/library](http://www.lse.ac.uk/library).
- o Search for the item you need and click on the title when you find the right record.

The screenshot shows the LSE Library search results page for the book "From slavery to freedom : comparative studies in the rise and fall of Atlantic slavery" by Seymour Drescher. The page includes a book cover, title, author, and publication information. It also features a sidebar with navigation options like "TOP", "SEND TO", "LOCATIONS", "DETAILS", "LINKS", and "MORE LIKE THIS". A "Send to" section offers various export options: EXPORT BIBTEX, EXPORT RIS, ENDNOTE ONLINE, EASYBIB, CITATION, PERMALINK, and PRINT. There is also an "E-MAIL" option under "LINKS". A yellow banner indicates that the recall service is currently suspended. The "INFORMATION" section shows the book is available at LSE Library Main Collection Books HT1161 D77, with 1 copy available and 0 requests.

Click on the Add to My Bookmarks button that you have recently added to your browser toolbar, or the browser extension  .

Check, add or amend details and notes as necessary before clicking Create or Create & Add to List.

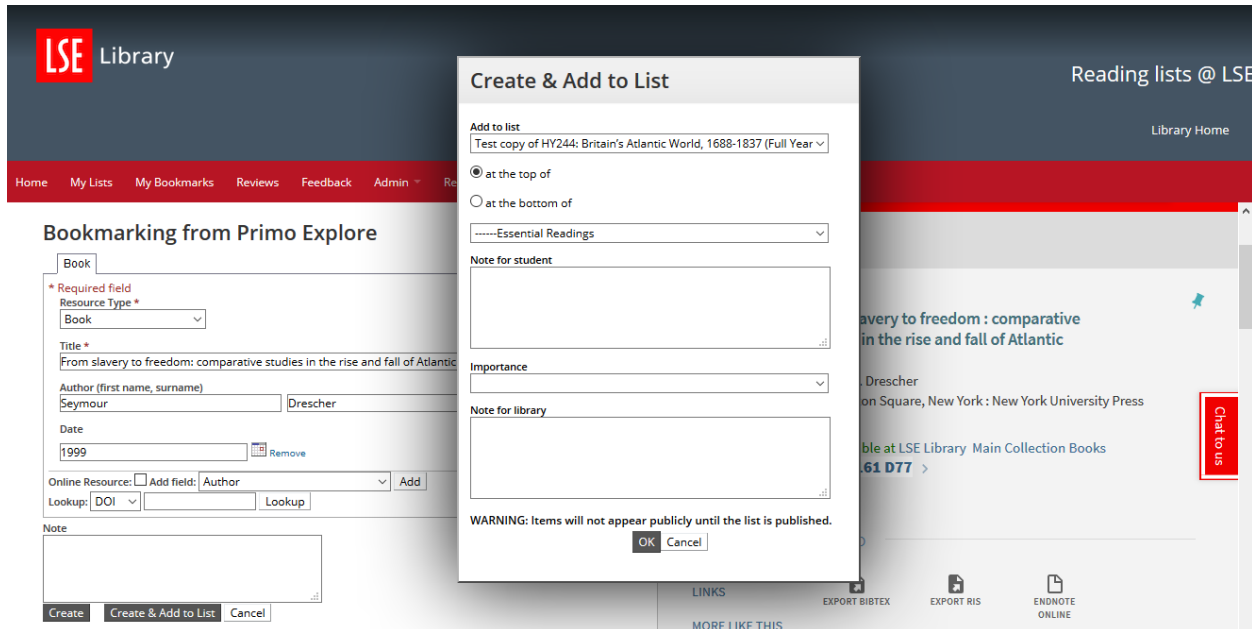

The screenshot shows the Primo Explore bookmarking interface. On the left, there is a form titled "Bookmarking from Primo Explore" with fields for "Resource Type" (set to "Book"), "Title" ("From slavery to freedom: comparative studies in the rise and fall of Atlantic slavery"), "Author" ("Seymour Drescher"), and "Date" ("1999"). There are also options for "Online Resource" and "Lookup" (set to "DOI"). At the bottom of the form are buttons for "Create", "Create & Add to List", and "Cancel". On the right, there is a preview of the search results page for the same book, showing the title, author, and publication information, along with a "Send to" section and a "Check Location" button.

- Clicking Create will add the item to the list of your Most Recent Bookmarks which is displayed when you click on ADD RESOURCE or Add resource below.

- Clicking Create & Add to List will open a window where you can select the list, and in which section of the list, to which you want to add the resource using the Table of Contents drop down.
  - o The item can either go at the top or bottom of a section.
- You can also Add Notes and Set Importance before clicking OK to add the Resource.

### Adding Notes.

You can add a Note for students either when you Add to List (as above) or by selecting Note for students on the Edit item menu .

- o Note for students

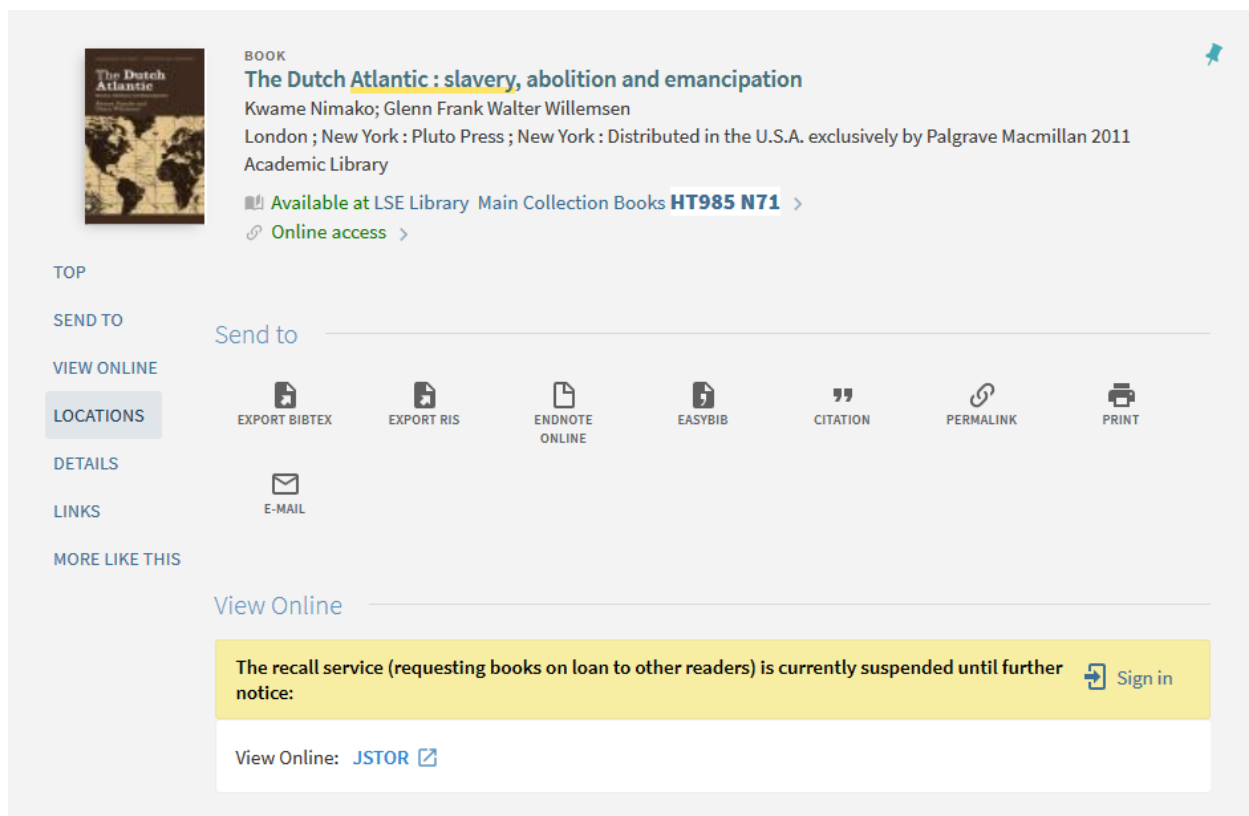

- o Type the information you want students to see and click Save.
- o Do not use Note for library, unless requesting that an article not held by the Library is scanned. See “Bookmarking an article not available through the Library” below.

## Adding an e-book link.

To add an e-book there is an additional step that needs to be undertaken. Sometimes e-book records are separate from the print copies:

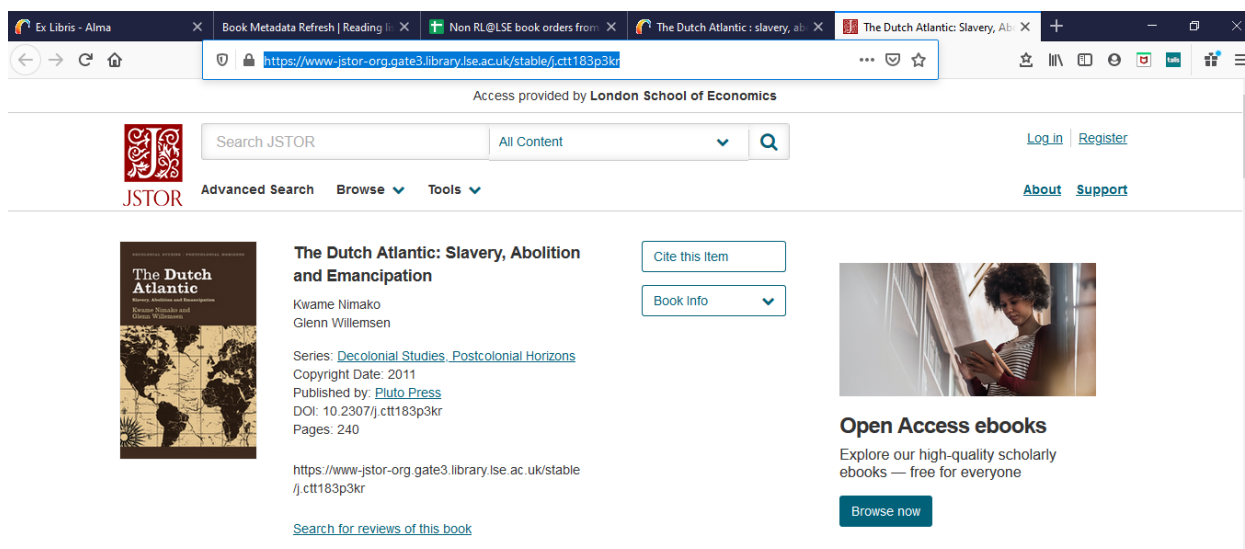

- Records with a Location tab are for print books only
- Those with a View Online tab are e-book records
- Records with both Location and View Online tabs are combined records.

The screenshot shows a library record for the book "The Dutch Atlantic: slavery, abolition and emancipation" by Kwame Nimako and Glenn Frank Walter Willemsen. The record includes a book cover, title, authors, and publication information. It is available at LSE Library Main Collection Books HT985 N71. The record has several tabs: TOP, SEND TO, VIEW ONLINE, LOCATIONS (selected), DETAILS, LINKS, and MORE LIKE THIS. Under the LOCATIONS tab, there are options for EXPORT BIBTEX, EXPORT RIS, ENDNOTE ONLINE, EASYBIB, CITATION, PERMALINK, and PRINT. Under the VIEW ONLINE tab, there is a message: "The recall service (requesting books on loan to other readers) is currently suspended until further notice:" with a "Sign in" button. Below this, there is a "View Online: JSTOR" link.

From either the individual e-book record or the combined one:

- Click on the book title to open the record.
- Where it says View Online it will show the e-book provider, usually in blue text (Ebook Central, Ebsco, Cambridge Core, etc.). Click on this link and it will open a new tab in your browser, bringing you to the e-book itself.

- Copy the URL of the e-book from your browser window to your clipboard. This URL should look like one of the below links from our e-book providers or publishers:

<https://ebookcentral.proquest.com/lib/londonschoolecons/detail.action?docID=477864>

<https://www-cambridge-org.gate3.library.lse.ac.uk/core/books/cambridge-history-of-war/3692E0B63BEA540FEAD6AE08F00C3ADA>

<https://www-taylorfrancis-com.gate3.library.lse.ac.uk/books/e/9781315627762>

<https://www-jstor-org.gate3.library.lse.ac.uk/stable/j.ctt183p3kr>

- Either select the combined record or click on the title of the print book record and click the browser extension  .

- If bookmarking the print record, select Web address from the Add field drop down and click Add.
- Paste the e-book link into the Web address field. Tick the Online Resource box and click Link to.
- Select Web address, and click OK.
- If bookmarking a combined record, check that the Web address is correct and that the Online Resource box is ticked. Untick the box and tick it again to check that Web address has been selected as the Online Resource Link.

- Click Create & Add to list.
  - Select the list to add the resource.
  - Select the Section to add the resource and whether at the top or bottom of the Section.
  - Set Importance.
  - Add any Notes.

Click OK.

### Bookmarking an Item not held by LSE.

ReadingLists@LSE supports adding books from a variety of different places, including Amazon. You should always check availability of the item via Library Search first, before bookmarking items from external websites. The below example uses Amazon as the source.

- Search for the item you need and click on the title when you find the right record.

- Click Add to My Bookmarks or the browser extension .

You are shown a screen containing bibliographic information of the item. You should always ensure that the Resource Type you are adding is a Book (and not incorrectly adding as a Website).

Scroll down to see all the fields. Check, add or amend details and notes as necessary, before clicking Create or Create and Add to List.

- If bookmarking from Amazon, ensure that you remove any Amazon web link. Any URL which does not link to an e-book held by LSE (or freely available), and which links to inaccessible material will be misleading to users. Leaving the link in the bookmark will result in a View Online button appearing on the reading list.

Tips for editing a bookmark?

- Dual Field Author.
- Subtitle.
- Year only date.
- ISBN-13; remove punctuation.

## Bookmarking a Chapter – requesting a scanned reading of it

When you create a “Chapter” item on your reading list, this will automatically indicate to the Library that you need this item to be provided as a scanned reading. If you want an extract scanned, you should treat this in the same way as a Chapter.

The Library will detect your newly added Chapter item on your list, scan it, and populate the reading list with the link for you. You do not need to do anything further.

More information on scanned readings is available at the [Support for teaching staff](#) webpage.

- Create a bookmark from the desired book that contains the Chapter from Library Search (or Amazon if the text is not available through the Library – please see the previous section entitled “Bookmarking a print book that LSE does not currently hold” if you wish to add a Chapter from a book that is not in the LSE collections.)

- Then, in the select ‘Has etc....)’
- Then click the the menu to Chapter entry

Add Field section, Part (chapter, article

Add button next to generate the fields

- A

new tab will be opened. Here you should select 'Chapter' as the Resource Type from the drop-down menu. Then type the chapter number or title required

- Recording Chapters in the reading list in this way provides clear guidance to students about the specific reading to be undertaken.
- Bookmarking an article through the Library

- Go to the Library homepage and search for the article you need:
- [www.lse.ac.uk/library](http://www.lse.ac.uk/library).
- Follow through to the full details page of the article. Then copy the URL from your browser, or copy a permalink URL if there is one available on the page. Then click Add to bookmarks.
- When the bookmarking screen appears, select Add field: Web Address from the drop down menu, click Add, and paste in the link.
- Tick the online resource box and choose the Web address option to link to. It is possible to link to the DOI, but this does not always go to the version covered by our subscriptions.

- Not clicking the online resource box will mean that the blue 'online resource' button box will not appear on the reading list which may make it difficult for students to navigate to these resources.

### Online Resource Link

The 'Online Resource' button which will appear for this resource will open the selected below when clicked.

### Bookmarking an article not available through the Library

Sometimes you may wish to add an Article to your reading list that is not currently covered by the Library's subscriptions. If you do this, the Library will attempt to source an electronic copy for you, and add the link for it to your list.

- In these cases do not tick the Online Resource box, otherwise users will end up at a page asking for payment to access the article. This will at best cause confusion about whether or not we hold the article, at worst the user will make a payment in error.

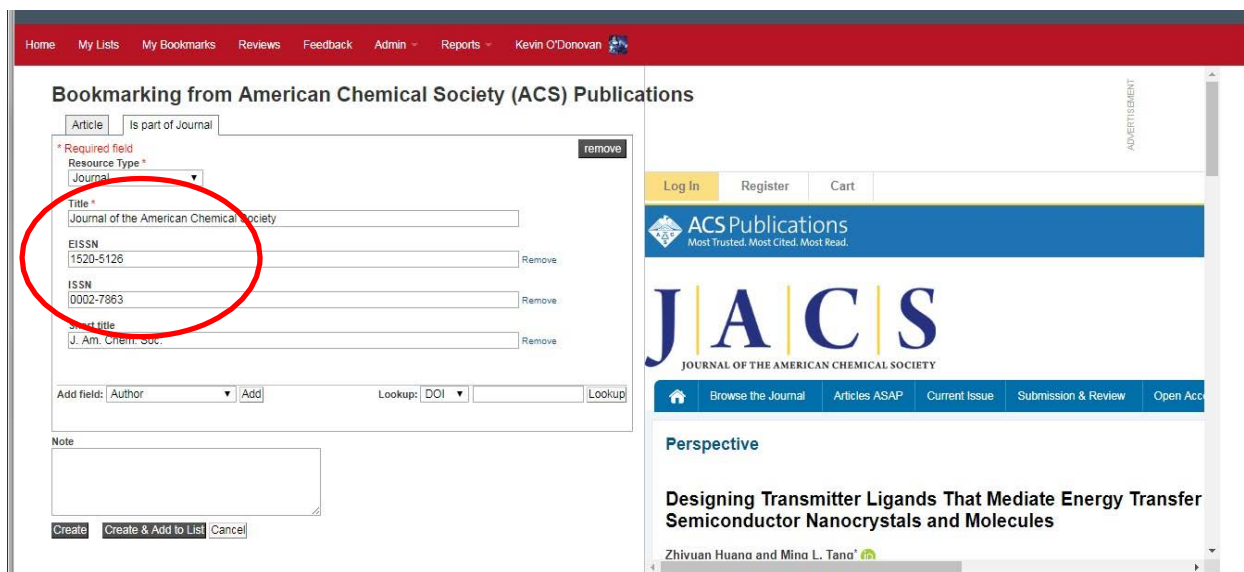

The Library will prioritise providing electronic access to Articles that have been given an Essential importance on reading lists.

- Locate the full details page of the article you wish to add. This may be from a publisher website, or a database that the Library does not subscribe to
- The example below is an Article about "Designing Transmitter Ligands" from the Journal of the American Chemical Society, that LSE does not subscribe to.

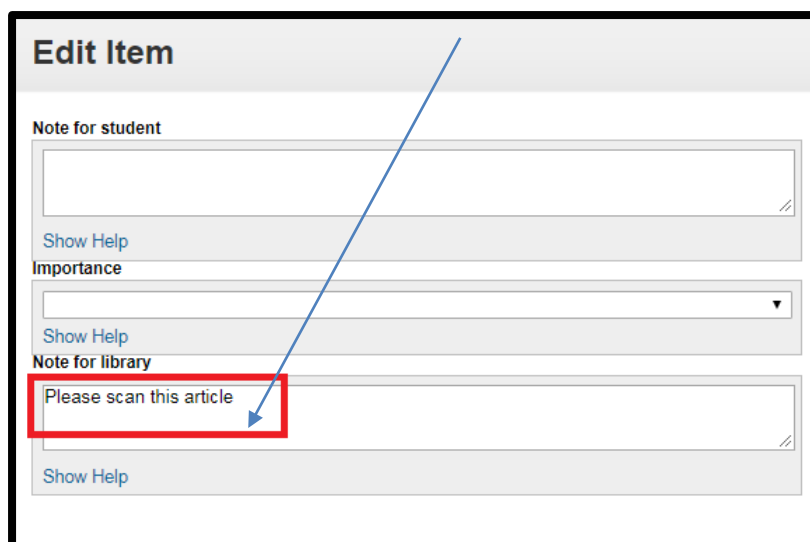

The screenshot shows the article page for "Designing Transmitter Ligands That Mediate Energy Transfer between Semiconductor Nanocrystals and Molecules" by Zhiyuan Huang and Ming L. Tang. The article is published in the Journal of the American Chemical Society (JACS). The abstract includes a diagram illustrating the energy transfer mechanism between a Nanocrystal (NC) Donor and a Molecular Acceptor/Triplet Transmitter. The diagram shows a green nanocrystal (NC) Donor with a binding group (X) that has strong affinity and no charge transfer. This is connected to a red bridge, which is a short, low barrier. The bridge leads to a yellow box representing the Molecular Acceptor/Triplet Transmitter, which has energy cascade between NC donor and annihilator, and is rigid/stable.

- Copy the URL from your browser, or copy a permalink URL if there is one available on the page. Then click Add to bookmarks in your browser or use the browser extension .
- When the bookmarking screen appears, select Add field: Web Address from the drop down menu, click Add, and paste in the link.
- Check the information in your bookmark and add or amend details as necessary. Note that with articles from some journals, you will see a second tab 'Is part of journal' in the bookmark.

- You may wish to check that the journal title and ISSN are correct, before clicking Create or Create and Add to List.
- Once you have added the Article to your reading list, you will need to add a Library Note to indicate to the Library that this Article needs to be sourced. Please click on Edit notes and Importance, and add the following text to the Library Note field, then click Save.

Please scan this article

Show Help

Once you have entered this text, the Library will automatically detect that the Article is outside our subscriptions. We will try to source a copy of the Article for you, and place a link on the reading list when complete.

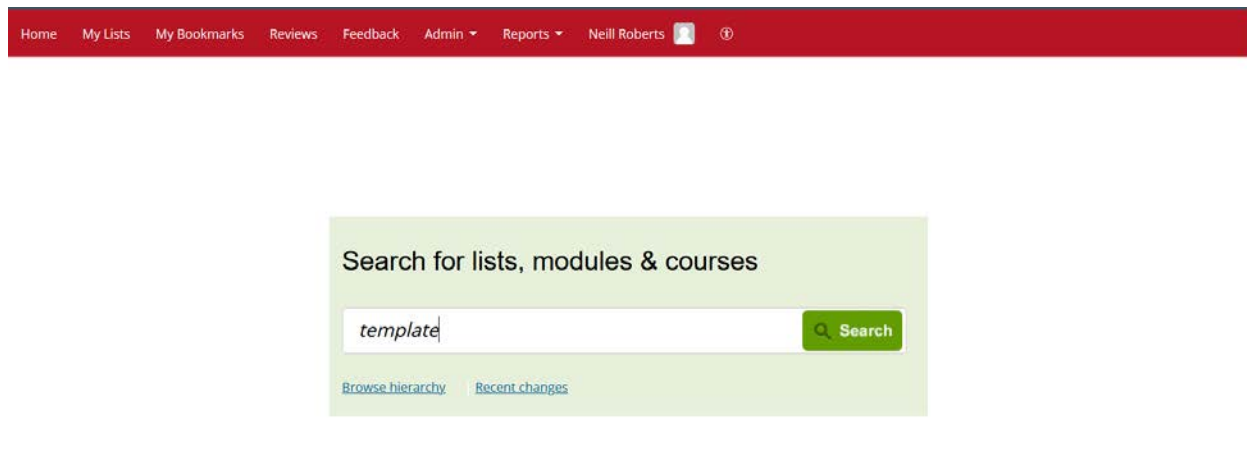

### Bookmarking a website

- Locate the webpage online and click Add to bookmarks.
- You will be presented with a screen containing details of the webpage.
- Check the information in your bookmark and add or amend details as necessary, before pressing Create at the bottom of the screen.
- Most webpages will default to 'Webpage' as the Resource Type. If the material which you are is a working paper (e.g. from NBER, OECD etc.), we recommend that you categorise this as a 'Document'.
- This item has now been added to your My Bookmarks section.

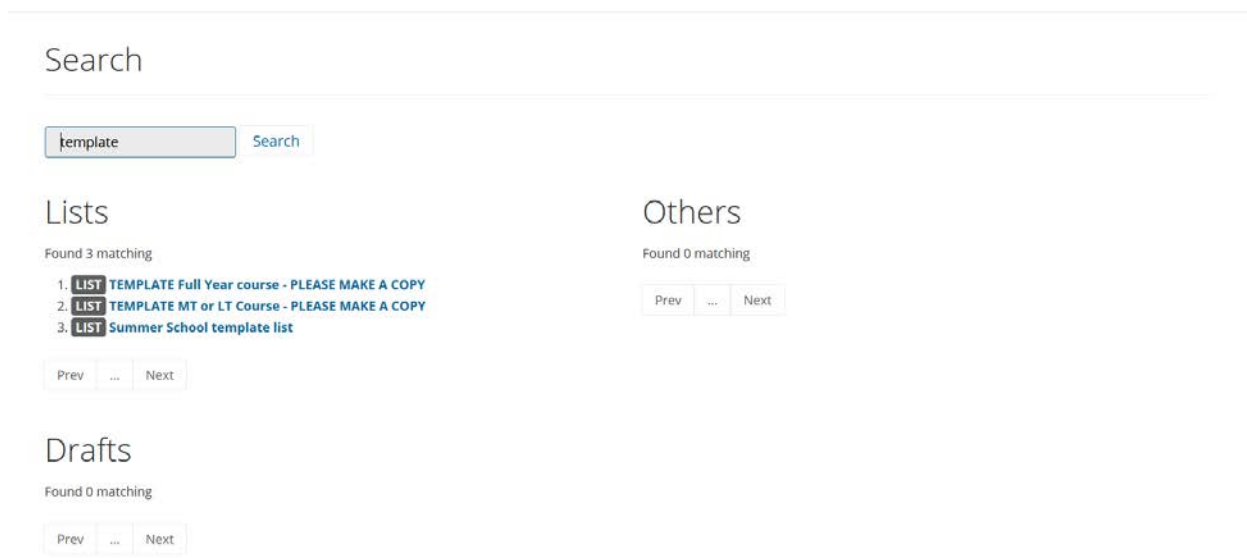

## Creating a new list.

You should always search for an existing list first before creating a new list from scratch. It is much faster to edit an existing list than to create a new one. See Editing an existing list above.

- You can search at the Reading Lists@LSE Home page for your course, by title or course code.
- If you are satisfied you wish to create a brand new list, search for the word “template”.

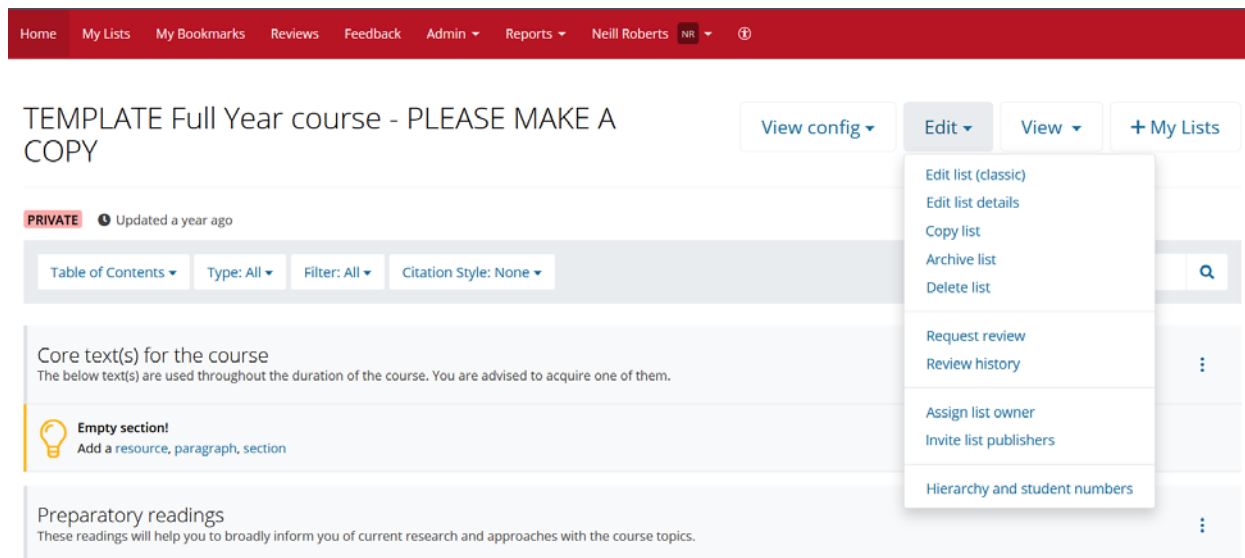

There are three templates that you can use:

Select the template which most exactly meets your need.

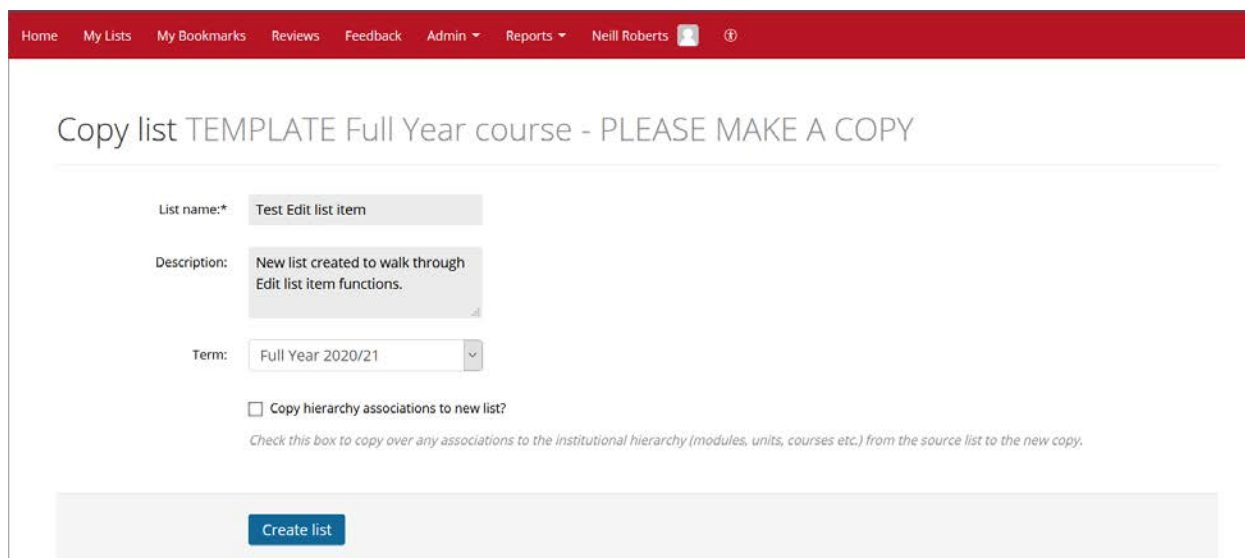

Click Edit and Copy list.

The screenshot shows the LSE Library Services interface. At the top, there is a navigation bar with links for Home, My Lists, My Bookmarks, Reviews, Feedback, Admin, Reports, and a user profile for Neill Roberts. The main content area displays a course list titled "TEMPLATE Full Year course - PLEASE MAKE A COPY". Below the title, there are buttons for "View config", "Edit", "View", and "+ My Lists". The "Edit" dropdown menu is open, showing options: "Edit list (classic)", "Edit list details", "Copy list", "Archive list", "Delete list", "Request review", "Review history", "Assign list owner", "Invite list publishers", and "Hierarchy and student numbers". The course list itself includes a "PRIVATE" status, a "Table of Contents" button, and sections for "Core text(s) for the course" and "Preparatory readings".

Type your List name, add a Description and Term (or Full Year).

- The List name must contain the module code at the start, e.g.: AN404 - Anthropology: Theory and Ethnography.

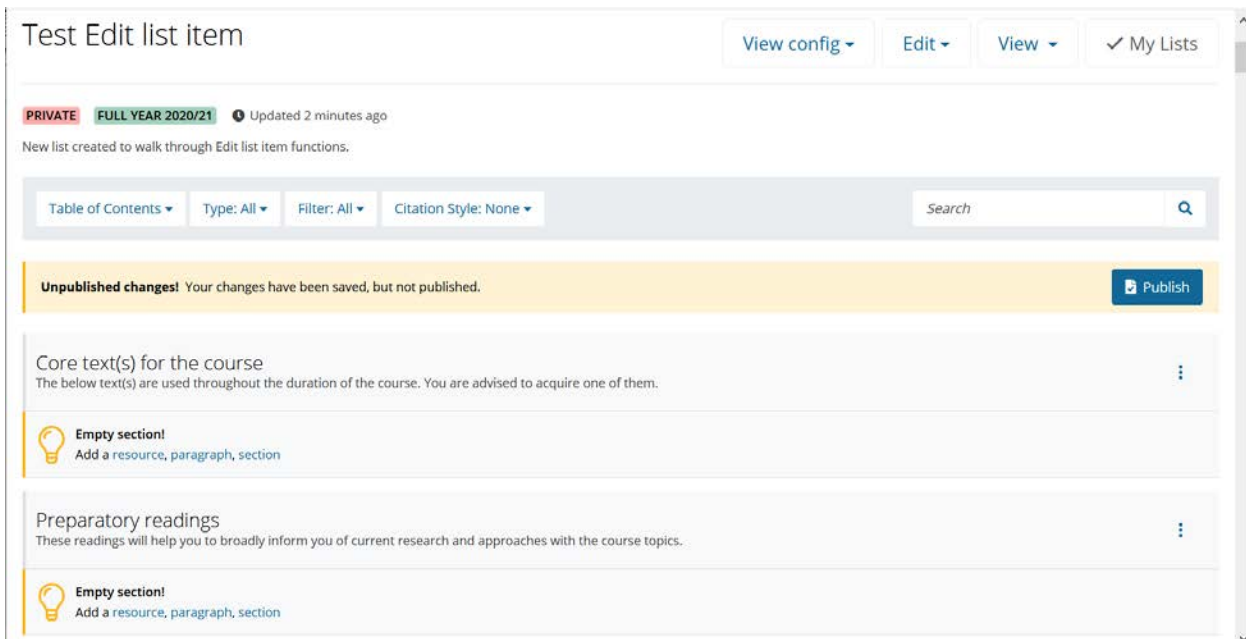

The screenshot shows the "Copy list" form in the LSE Library Services interface. The form is titled "Copy list TEMPLATE Full Year course - PLEASE MAKE A COPY". It contains the following fields:
 

- List name:** A text input field containing "Test Edit list item".
- Description:** A text area containing "New list created to walk through Edit list item functions."
- Term:** A dropdown menu set to "Full Year 2020/21".
- Copy hierarchy associations to new list?** An unchecked checkbox with a note below it: "Check this box to copy over any associations to the institutional hierarchy (modules, units, courses etc.) from the source list to the new copy."

 At the bottom of the form is a blue "Create list" button.

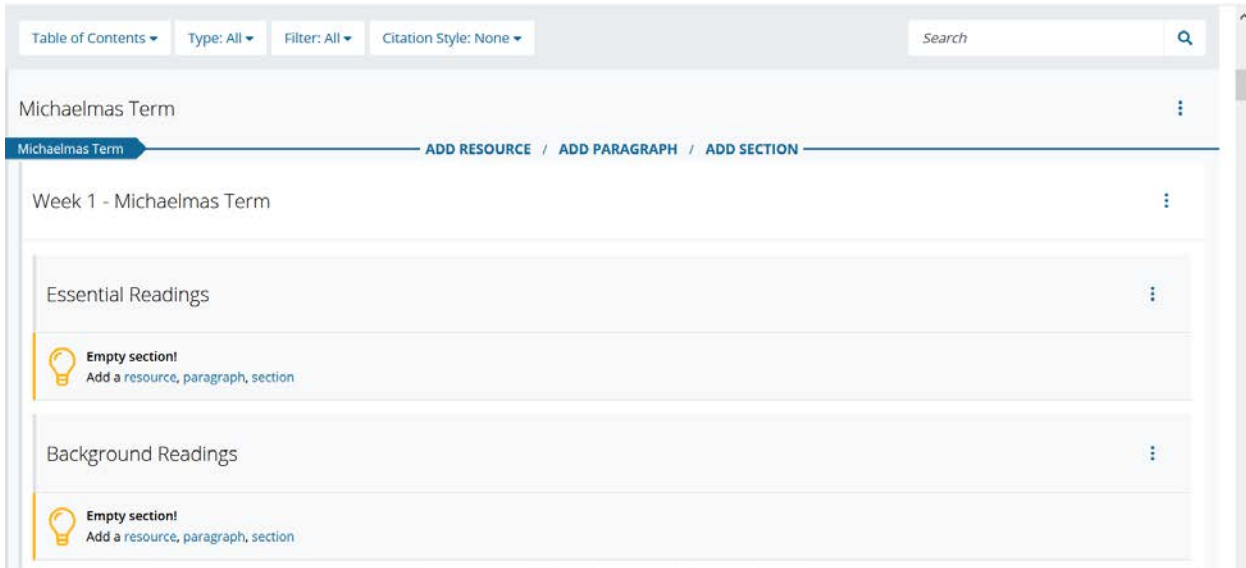

- Untick the Copy hierarchy associations.. box.
- Click the blue Create list button.

- The new list template includes the List name, Description and Term you entered.
- Immediately below, there are Sections for Core text(s) and Preparatory readings for the entire course.

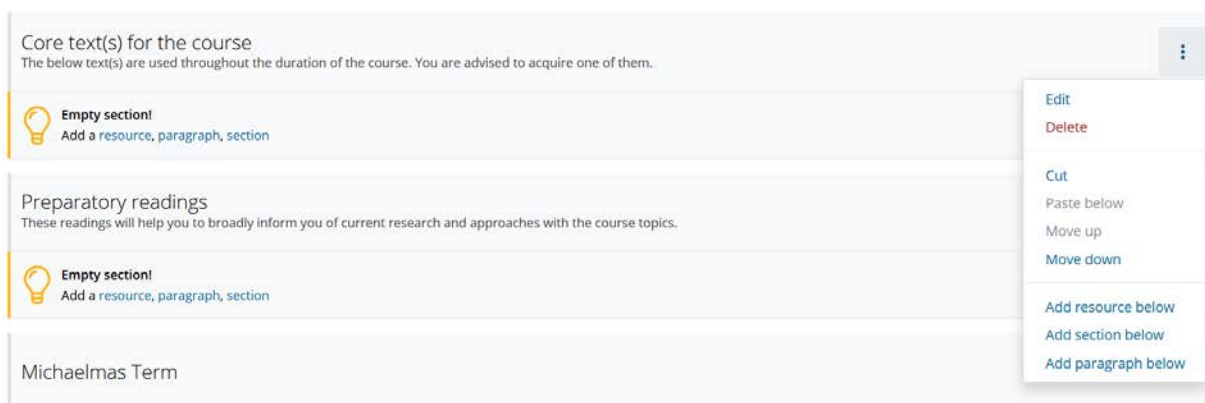

The screenshot shows the 'Test Edit list item' interface. At the top, there are buttons for 'View config', 'Edit', 'View', and 'My Lists'. Below this, the list is set to 'PRIVATE' for 'FULL YEAR 2020/21' and was updated 2 minutes ago. A message states: 'New list created to walk through Edit list item functions.' The interface includes a navigation bar with 'Table of Contents', 'Type: All', 'Filter: All', 'Citation Style: None', and a search box. A yellow banner indicates 'Unpublished changes! Your changes have been saved, but not published.' with a 'Publish' button. The main content is divided into two sections: 'Core text(s) for the course' and 'Preparatory readings'. Each section has a description and a vertical ellipsis menu. Below each section is an 'Empty section!' placeholder with a lightbulb icon and the text 'Add a resource, paragraph, section'.

Below these Sections, the Template has Sections for each Term and Week, and for Essential and Background Readings within each week.

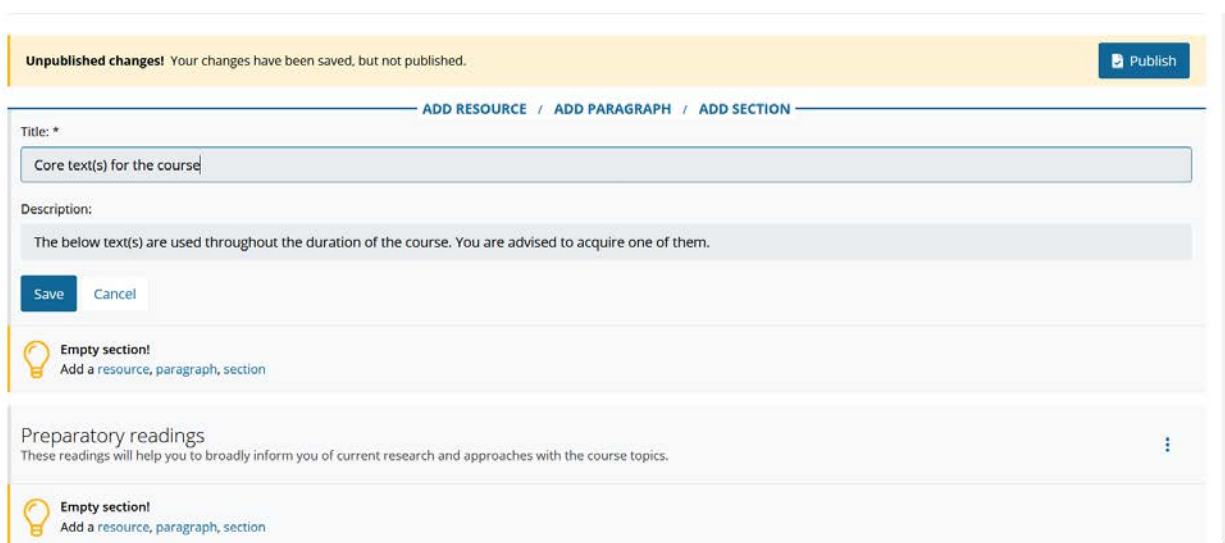

The screenshot shows the 'Michaelmas Term' interface. At the top, there are buttons for 'Table of Contents', 'Type: All', 'Filter: All', 'Citation Style: None', and a search box. The main content is divided into sections for 'Michaelmas Term' and 'Week 1 - Michaelmas Term'. Each section has a vertical ellipsis menu. Below the 'Week 1 - Michaelmas Term' section are two sub-sections: 'Essential Readings' and 'Background Readings'. Each sub-section has a vertical ellipsis menu and an 'Empty section!' placeholder with a lightbulb icon and the text 'Add a resource, paragraph, section'. A blue bar at the top of the week section contains the text 'Michaelmas Term' and 'ADD RESOURCE / ADD PARAGRAPH / ADD SECTION'.

- To edit click on the Edit menu .

- Click on Delete to remove the Section.
- Click on Edit to edit the text in the Title and/or Description fields for the Section.
- Click Add resource below to add Texts for reading to the Section.

See Adding an Item above for details.

## Publishing a list

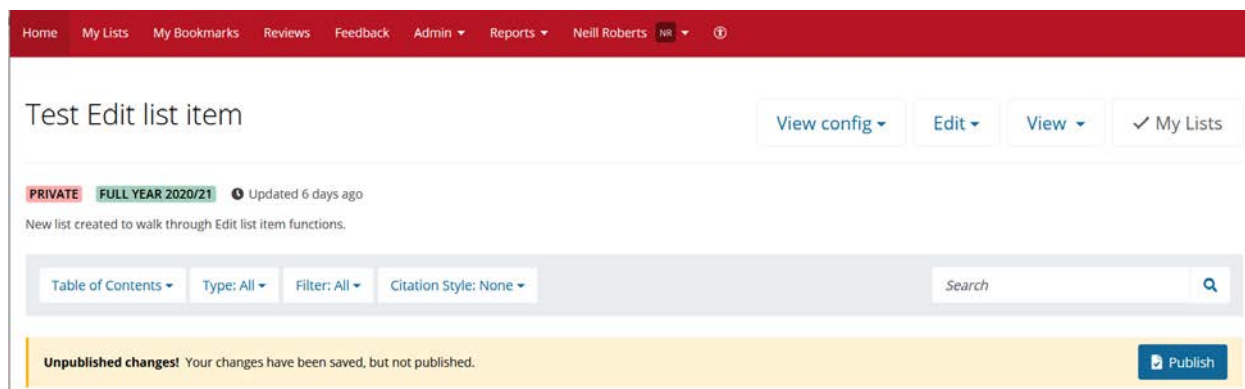

The list is not available for students to view until you publish it.

Before you publish your reading list, there are a few points you should check have been completed:

- Please ensure that you have added the anticipated student numbers for the course. (You can add this number by clicking on 'Edit' and the 'Edit' button which appears in the top right of the screen next to the course title.)
- Ensure that all items listed on the reading list have an importance set (i.e. Essential or Recommended).

Click on the blue Publish button.

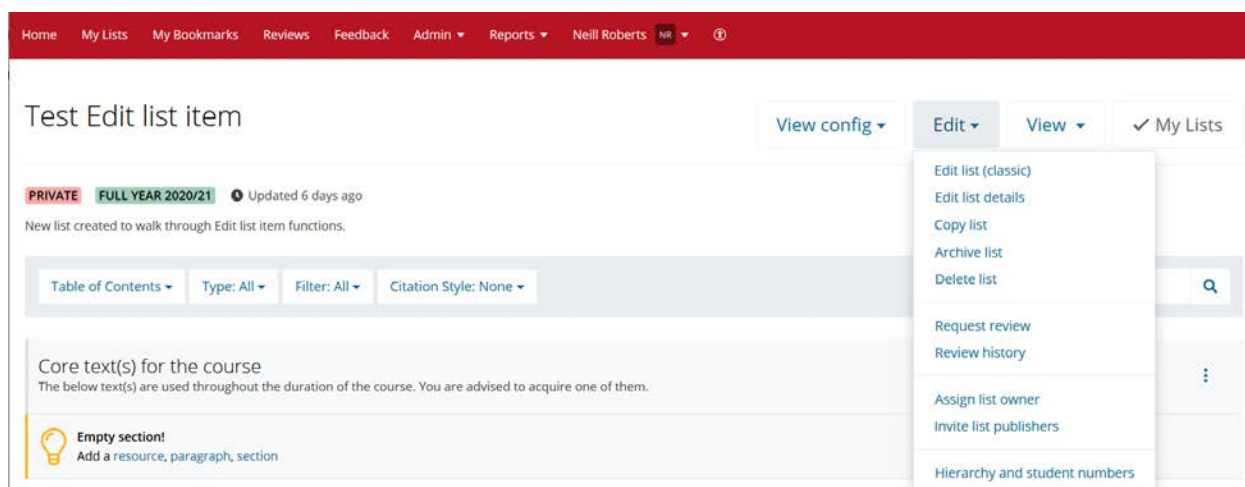

You can also publish from the My Lists view using the Edit menu .

<input type="checkbox"/>	Title	Term	Linked to	Status	Last updated	Action
<input type="checkbox"/>	Copy of Test Edit list item	Full Year 2020/21		Draft	less than a minute ago	
<input type="checkbox"/>	Test Edit list item	Full Year 2020/21		Published		View draft list
<input type="checkbox"/>	Test copy of HY244: Britain's Atlantic World, 1688-1837			Published		Edit Copy to a new list Publish
<input type="checkbox"/>	MA320 : Mathematics of Networks	Lent Term 2020/21	MA320	Published		Remove

The list can now be publically accessed through the [Reading Lists@LSE homepage](#) by searching for the list title.

### Sending your list for Review

Once you publish your reading list, you should submit it to the Library for review. You can do this by clicking on the 'Request Review' in the Edit menu.

It is important that you submit your list for review. The Library will be informed of any additions/amendments you have made to your reading list and will ensure that your required texts are stocked in the library.

The Library Acquisitions team will check to ensure that all titles listed on your reading list are stocked at levels appropriate for the number of students taking the course.

### Embedding sections of your reading list in Moodle

After you have created sections in your reading list, you can embed these in your Moodle course site.

The benefits of doing this are that your students will have a consistent experience across their courses; the Library will have access to your reading list data so the content can be acquired for you; and you won't have to duplicate the effort of entering your reading list into Moodle.

1. Open your Moodle course, go into edit mode by clicking Turn editing on near the top right corner.
2. Go to the week or section of your Moodle course where you want to embed a section from your reading list, and click the drop down menu for Add an activity
3. Select Reading List (Talis Aspire) from the drop down activities menu

The image shows a screenshot of a Moodle course page. At the top right, there is a red 'LSE' logo followed by the text 'Library Services'. The main content area is a light grey box containing two 'Add a resource...' dropdown menus. The right-hand dropdown menu is open, showing a list of activities. The 'Reading List (Talis Aspire)' option is highlighted in blue. To the right of the dropdown menus, there are two 'Edit' buttons with a red pencil icon and a plus sign icon below each. The background of the page is a light grey color.

4. Enter your chosen title text for the Activity name, such as “Week X readings”. This is what will appear in Moodle.

5. Then click the Save and display button near the bottom of the options.

The screenshot shows the Moodle interface for adding a new external tool. The title is "Adding a new External tool to 9 October - 15 October". Under the "General" section, the "Activity name" field is highlighted with a red border and contains the text "Week 3 Readings". A red error icon is visible to the left of the field. Below the field is a "Select content" button. A blue arrow points from the text "Week X readings" in step 4 to the "Week 3 Readings" text in the form. Another blue arrow points from the text "Save and display button" in step 5 to the "Save and display" button at the bottom of the form. The form also includes sections for "Privacy", "Grade", "Common module settings", "Restrict access", "Tags", and "Competencies". At the bottom, there are three buttons: "Save and return to course", "Save and display", and "Cancel". A footer message states: "There are required fields in this form marked ⓘ".

6. You will now be brought to the reading list for your course. You should accept any cookies if prompted to do so. You may be asked to authenticate your username when embedding – please click any ‘key’ icons, or enter your username and password if prompted to do so.

Select the section of the reading list you want to embed in Moodle from the drop down menu. When you are finished, click the Save button on the right.

7. Your reading list section is now embedded in your Moodle course. You can see the results by navigating back to your Moodle course and click Turn editing off.

The screenshot shows a Moodle interface for LSE. At the top left is the LSE logo and the text 'THE LONDON SCHOOL OF ECONOMICS AND POLITICAL SCIENCE'. At the top right, the user 'Kevin O Donovan' is logged in, with a 'Log out' link. A navigation menu includes 'Moodle', 'SUMMER SCHOOL', 'LSE For You', 'Library', 'Reading Lists', 'LSE LIFE', 'Cookies', 'Terms of Use', 'Help', and 'My Courses'. A breadcrumb trail reads: 'Professional Development / Library / KO101 - Hidden / 7 November - 13 November / Week 7 Readings - Harsh Economics in developing societies'. The main heading is 'Week 7 Readings - Harsh Economics in developing societies'. Below this is a 'ReLink?' warning: 'To change the linked list or section click here'. The reading list contains three items:

- Chapter 7 of "EU law and the welfare state: in search of solidarity"** in EU law and the welfare state: in search of solidarity
