

Report Summary

Report Name: XYZ Data Center
Completed for: XYZ Company
Inspection Date: July 12, 2021
Location: Anywhere, USA
Contact: Bill Smith, Superintendent
Score: 76.5%

Scope of Work: Test job to demonstrate new "Large Photo" template

Opportunities for Improvement:

Cranes

Issue Identified: Accessible areas within swing radius of crane are not barricaded to prevent workers from being struck or crushed (1926.1424) (See Photo)

Recommendation: All accessible areas within the swing radius of a crane shall be barricaded to prevent workers from being struck or crushed. Take appropriate action to address issues of non-compliance. [reference 1926.1424(a)] [View OSHA Standard](#)

Notes: Need to install radius guard on crane

Severity: Moderate 1

Responsible Party: The Final Company

Fueling Operations

Issue Identified: Fuel tanks are not properly labeled/identified (NFPA 30) (**See Photo**)

Recommendation: Take steps to ensure fuel tanks are properly labeled and/or identified with fuel name stenciled on tank, flammable placards, etc. per requirements in NFPA 30 and/or applicable local/state codes.

Notes: Improper labeling on fuel tanks. Need to contact company that services the tanks.

Responsible Party: Glidden LLC

No labels and no berm.

Ladders/Stairs

Issue Identified: Top of ladder/side rails are not secured as needed to prevent side shift (1926.1053) (**See Photo**)

Recommendation: Take appropriate steps to ensure ladder side rails are secured to a rigid support to prevent the top of ladder from shifting (i.e. slipping sideways and possibly falling over). [reference 1926.1053(b)(1)] [View OSHA Standard](#)

Notes: This ladder was not secured. It was being used by multiple contractors to access the roof on the west side of building.

Severity: Serious Deducts 5%

Responsible Party: Glidden LLC

PPE

Issue Identified: Appropriate hand protection is not worn as required (1926.28) (**See Photo**)

Recommendation: Take steps to ensure employees use appropriate hand protection (i.e. leather, chemical resistant gloves, cut-resistant gloves, etc.) where hands are exposed to hazardous conditions. [reference 1926.28(a)]
[View OSHA Standard](#)

Notes: Gloves are required when using adhesives to connect PVC pipes. No gloves were being used.

Responsible Party: The Final Company

Need to use gloves when handling adhesives

Other/Misc.

Issue Identified: An unsafe condition was identified that could potentially cause serious physical harm to employees if not corrected. See notes and/or photos for additional detail (5a1) (**See Photo**)

Recommendation: Take steps to address the unsafe condition (or conditions) identified during the inspection that could potentially cause serious physical harm to employees if not corrected. [reference OSHA Section 5(a)(1)]
[View OSHA Standard](#)

Notes: Stairs to storage trailer need to be repaired, add hand rail on right side.

Responsible Party: Glidden LLC

These stairs need to be repaired or replaced!

Positive Findings:

Cranes

- Positive Finding** Required operational aides (i.e. boom angle/radius indicator, boom/jib hoist limiting device, anti two-blocking device, etc.) are installed and maintained (1926.1416)
- Positive Finding** Crane(s) and attachments are operated per manufacturer procedures (1926.1417)
- Positive Finding** A visual inspection by a competent person is completed each shift the equipment is used (1926.1412)
- Positive Finding** The rated capacities (load charts), instructions and operator's manual are kept in cab(1926.1417)
- Positive Finding** Accessible areas within swing radius of crane are barricaded to prevent workers from being struck or crushed (1926.1424)

Photo(s)

- Positive Finding** Only qualified riggers are allowed to perform rigging duties (1926.1425)
- Positive Finding** Crane operator meets all Federal, State and/or Local certification requirements (1926.1427)
- Positive Finding** Signal person(s) trained, qualified and authorized to perform duties (1926.1428)
- Positive Finding** Fire extinguisher of 5BC rating or higher is available at the operator station and/or cab (1926.1433)

Electrical Safety

- Positive Finding** Ground pins are attached to electrical cords (i.e. extension cords and/or flexible cord sets) (1926.404)
- Positive Finding** GFCI is used for temporary power connections (1926.404)

Photo(s)

- Positive Finding** Cord sets and/or Power Supply cords are used per Listing (i.e. not interconnected or "daisy chained") (1926.403)
- Positive Finding** Flexible cords are maintained in good condition (1926.416)

- Positive Finding** Breakers, switches and/or other disconnecting means are legibly marked to indicate purpose (1926.403)
- Positive Finding** Electrical panels/circuits are effectively enclosed (1926.405)

PPE

- Positive Finding** PPE maintained in a sanitary/reliable condition (1926.95)
 - Positive Finding** ANSI approved eye protection is used as required (1926.102)
 - Positive Finding** Face protection is used when sawing, cutting, grinding, welding, etc. (1926.102)
- Photo(s)**

- Positive Finding** Hard hats are worn as required (1926.100)
- Positive Finding** Appropriate safety footwear is worn as required (1926.28)
- Positive Finding** Hearing protection is provided/used as required (1926.52)

Safety Training

- Positive Finding** Toolbox talks are completed weekly per company policy (1926.21)
- Photo(s)**

Recommendations:

Score Summary	#	Severity Summary	Qty
Issues Identified:	5	NA 1	3
Positive Findings:	22	Advisory 1	0
Total Findings:	27	Minor 1	0
Percent Positive:	81.5%	Moderate 1	1
Severity Adjustment:	5.0%	Serious Deducts 5%	1
Final Score:	76.5%	Critical Deducts 10%	0
