Interpersonal Skills for Healthcare Providers Student Version

Cynthia Diefenbeck, PsyD, APRN, BC
Betty Paulanka, EdD, RN
Kyle Phillips, BFA, BSN, RN

Five **easy-to-navigate, interactive scenarios** help your students develop the confidence to communicate appropriately in difficult, but common patient situations.

Multiple decision points within each scenario let students choose from three possible responses. A narrator explains why the response selected was ‘best,’ ‘acceptable,’ or ‘unacceptable.’

- Offers a **safe way to explore different approaches** to real patient problems.
- Features a narrator who provides **feedback** throughout each scenario.
- **No limit** on the number of times the student can practice with each interaction.

Calculating Dosages Safely A Dimensional Analysis Approach

Tracy Horntvedt, RN, MSN, BA

Dosage calculations can be intimidating, but they don't need to be. **Using dimensional analysis**, your students will learn how to calculate both simple and complex

medication dosage problems with consistency and accuracy and reduce medication errors with simple safety mechanisms.

Dimensional analysis, which can be used on virtually every dosage calculation problem, eliminates the need to use other methods or perform lengthy, multi-step calculations. It's a method of problem solving that organizes data in a manner that is easy to understand and apply.

- Focuses on **patient safety**.
- Incorporates **learning models**, including the **“4 Cs”** approach to dosage calculations: **compute, convert, conceptualize, and critically evaluate**.
- Features over **1,000 practice problems** throughout the book, including basic skills pre-test • end-of-section practice tests in each chapter • end-of-unit assessment tests • and end-of-book post-test.
- Presents **case studies** that illustrate how to apply concepts to practice.
- **Speed Challenge** quizzes on Bonus CD-ROM that help students increase speed and accuracy.
