

RFID

DESIGN PRINCIPLES

SECOND EDITION

**HARVEY
LEHPAMER**

Contents

CHAPTER 1

Introduction	1
--------------	---

CHAPTER 2

Short-Range Communications Systems	3
2.1 Radio-Frequency Spectrum and Propagation	3
2.1.1 Theory of Electromagnetism and Maxwell's Equations	3
2.1.2 RF Propagation and Interference	5
2.1.3 Basic Antenna Parameters	8
2.1.4 Range of a Radio Communications System	17
2.2 Spread-Spectrum Communications Systems	18
2.2.1 Frequency-Hopping Spread-Spectrum Systems	20
2.2.2 Direct-Sequence Spread-Spectrum Systems	20
2.3 WLAN	21
2.3.1 Basics of WLAN	21
2.3.2 WLAN Components	22
2.4 Wireless Personal Area Network	23
2.4.1 Bluetooth	23
2.4.2 ZigBee	26
2.5 Wireless Body Area Networks	27
2.5.1 About Wireless Body Area Networks	27
2.5.2 Technical Challenges of Body Area Networks	30
2.5.3 Principle of Inductive Coupling	32
2.5.4 Medical Implant Communication Service and Wireless Medical Telemetry Service Bands	38
2.5.5 Passive Wearable Electrostatic Tags	41
2.6 Ultrawideband Technology	42
2.6.1 Ultrawideband Description	42
2.6.2 UWB Technical Specifications	44
2.6.3 UWB Medical Applications	45
2.6.4 Orthogonal Frequency-Division Multiplexing	46
2.7 Review Questions and Problems	47
References	49

CHAPTER 3

Automatic Identification Systems	51
3.1 Bar Codes	51
3.2 Card Technologies	52
3.2.1 Magnetic Cards	52
3.2.2 Smart Cards	52
3.2.3 Optical Cards	53
3.3 Radio Frequency Identification	54
3.3.1 RFID Historic Background	54
3.3.2 RFID System Overview	54
3.3.3 Principles of RFID Operation	58
3.3.4 The Electronic Product Code System	63
3.3.5 RFID and Biometrics	65
3.3.6 Challenges of RFID Implementation	67
3.4 Wireless Sensor Networks	69
3.4.1 Basics of Wireless Sensor Networks	69
3.4.2 Applications of Wireless Sensor Networks	70
3.4.3 Concept of Ambient Intelligence	72
3.4.4 Sensor Networks Design Considerations	73
3.4.5 The Future of RFID Sensing	76
3.5 RFID Applications	77
3.5.1 Supply Chain Logistics	77
3.5.2 Product Authentication	78
3.5.3 Agriculture and Animals	80
3.5.4 Intelligent Transportation Systems	81
3.5.5 Document Management	83
3.5.6 Pharmaceutical and Health Care Industry	83
3.5.7 Indoor Localization for First Responders	86
3.5.8 Passive Keyless Entry	87
3.5.9 Military Applications	88
3.5.10 Other RFID Applications	89
3.6 Other Developments in AutoID Systems	93
3.6.1 RuBee	93
3.6.2 Visible Light Tags	94
3.6.3 RFID and Printable Electronics	94
3.6.4 RFID and Mobile Phone Integration	94
3.7 Review Questions and Problems	95
References	98

CHAPTER 4

RFID Standards Development Challenges	101
4.1 Regional Regulations and Spectrum Allocations	101
4.2 Key Players in RFID Standardization	103
4.3 ISO and EPC Approach	105
4.4 RFID Systems and Frequencies	106

4.4.1	Power Emissions Conversion	106
4.4.2	North American and International Frequency Bands	107
4.4.3	RFID Interoperability and Harmonization	109
4.4.4	Advantages and Disadvantages of Using 125-kHz Frequency	112
4.4.5	Advantages and Disadvantages of Using the 13.56-MHz Frequency	112
4.4.6	Operation in the 433-MHz Band	114
4.4.7	Operation in the 900-MHz Band	115
4.4.8	Operation in the 2.45- and 5.8-GHz Bands	116
4.5	ISO/IEC 18000: RFID Air Interface Standards	119
4.5.1	About the 18000 Standards	119
4.5.2	ISO/IEC 18000-1:2008	119
4.5.3	ISO/IEC 18000-2:2009	120
4.5.4	ISO/IEC 18000-3:2010	120
4.5.5	ISO/IEC 18000-4:2008	120
4.5.6	ISO/IEC 18000-6:2010	121
4.5.7	ISO/IEC 18000-7:2009	122
4.6	UHF and EPCglobal Gen 2	122
4.6.1	The EPC Class Structure	123
4.6.2	UHF Gen 2	124
4.6.3	Electronic Product Code Information Services	125
4.6.4	UHF RFID Tag Example	126
4.7	Review Questions and Problems	128
	References	129

CHAPTER 5

Components of the RFID System		131
5.1	RFID Engineering Challenges	131
5.2	Near-Field and Far-Field Propagation	132
5.2.1	Far-Field Propagation and Backscatter Principle	133
5.2.2	Near-Field Propagation Systems	143
5.3	Tags	150
5.3.1	Tag Considerations	150
5.3.2	Data Content of RFID Tags	152
5.3.3	Passive Tags	154
5.3.4	Active Tags	157
5.3.5	Active And Passive Tags Comparison	159
5.3.6	Multiple Tag Operation	159
5.3.7	Overlapping Tags	162
5.3.8	Tag Antennas	163
5.3.9	UHF Tags Circuits	168
5.3.10	Tag Manufacturing Process	171
5.4	Readers	172
5.4.1	Principles of Operation	172
5.4.2	Reader Antenna	174
5.4.3	Software Defined Radios in RFID Systems	175
5.4.4	Data Transfer Between a Tag and a Reader	176

5.4.5	UHF Reader Electronic Circuitry	183
5.5	RFID Power Sources	186
5.5.1	Power-Harvesting Systems	187
5.5.2	Active Power Sources	188
5.6	Review Questions and Problems	191
	References	193

CHAPTER 6

	RFID System Design Considerations	195
6.1	RFID System Main Considerations	195
6.1.1	Configuration Design	195
6.1.2	System Design Checklist	197
6.1.3	Carrier Frequency and Bandwidth	199
6.1.4	Frequency Band Selection	200
6.1.5	Power and Range	201
6.1.6	Link Budget	202
6.1.7	Collision Avoidance	206
6.1.8	Tag Reading Reliability	211
6.2	RFID Reader-Tag Communication Channel	212
6.2.1	Data Content and Encoding	213
6.2.2	Modulation	216
6.2.3	Data Encryption	219
6.3	Testing and Conformance	221
6.3.1	Test Equipment	221
6.3.2	Frequency and Bandwidth-Related Measurement	222
6.3.3	Polling and Timing Measurements	223
6.3.4	Collision Management	223
6.3.5	Multivendor Interoperability and Testing	223
6.4	Review Questions and Problems	226
	References	229

CHAPTER 7

	RFID Technology for Medical Applications	231
7.1	Integrating RFIDs and Sensor Networks	232
7.1.1	Basics of Biomedical Signals	232
7.1.2	Sensor Networks in Medicine	234
7.1.3	Medical Implants	236
7.2	Operational Challenges of Implanted Devices	240
7.2.1	Biomedical Materials Inside of the Human Body	240
7.2.2	Radio Propagation Inside the Human Body	243
7.2.3	Power Requirements for Implanted Devices	249
7.3	Development of Medical Devices	251
7.3.1	Technology Transfer	251
7.3.2	Medical Product Development	252
7.3.3	Laws and Regulations Regarding Wireless Body Implants	255
7.4	Wireless Neural Implants	257

7.4.1	The Brain and the Spinal Cord	257
7.4.2	The Neurons and the Neurostimulation	260
7.4.3	Brain-Computer Interface (BCI)	263
7.4.4	Wireless Neural Implants: Principle of Operation	269
7.4.5	Fully Implantable Wireless Neural Implants	270
7.5	Patient's Risks	271
7.5.1	Surgical Risks	271
7.5.2	Security and Privacy Risks	272
7.5.3	Ethical Issues	274
7.6	Review Questions and Problems	275
	References	278

CHAPTER 8

	Sociocultural Implications of RFIDs and Their Applications	285
8.1	Market Trends and Usage	285
8.1.1	Barriers to RFID Adoption	286
8.1.2	Globalization	288
8.2	RFID Security and Privacy Aspects	288
8.2.1	Access to Information	288
8.2.2	Privacy Threats and Protection	290
8.2.3	The Blocker Tag	291
8.2.4	Reader Signal Energy Analysis	292
8.2.5	Protecting the Public	292
8.2.6	Fair Information Practices	293
8.3	Health Risks from RFID	294
8.4	Ethical and Moral Dilemmas of Technology	296
8.4.1	Basic Concepts of Ethics	297
8.4.2	Major Ethical Theories	299
8.4.3	Moral Lessons of the Past Research	302
8.4.4	Ethics and Technology Today	304
8.4.5	Enhancing Humans	308
8.4.6	Ethical Decision-Making Process	313
8.4.7	Mathematical Modeling of Ethical Decisions	317
8.5	Review Questions and Problems	323
	References	326

	Appendix	329
	Glossary	335
	Acronyms	343
	About the Author	347
	Index	349
