CROSS BAR OPTIONS

HOW MUCH CAN THEY CARRY?

This varies considerably from vehicle to vehicle, so always check our website for your specific vehicle model, or speak to your local expert dealer. As an example, our Trackmount systems are rated from 220lbs for a two crossbar system to 330lbs for our 3 bar system. Always remember that our engineers design all our roof rack systems according to the available capacity of the vehicles roof as specified by the vehicle manufacturer.

ROOF RACK ACCESSORIES
PIONEER LEG SPACERS

RHPLHS1

Designed to raise the Pioneer Roof Trays to allow the legs to slide out wider onto the Rhino-Rack Backbone system developed for the **JEEP JK Wrangler**. 4 spacers are included in this kit.

RHPLHS2

For a Pioneer system. Attached between either a Rhino-Rack **RHRLCP**, **RHRLTF/P** or **RHRL** leg and a Pioneer Platform or Tray, these spacers will raise the Pioneer to allow the legs to slide out wider, approximately by 75 mm overall. This allows each of the Pioneers to fit a wider ranger of vehicles, with the option of choosing a narrower tray/platform rather than a larger one.
