Sandblasted

SANDBLASTED SIGNS
Wholesale to the Trade ONLY!

Furnish us with your design and we will sandblast it for you in SignFoam!

We only use SignFoam brand HDU for our signs!

We no longer offer ANY sandblasted wood.

- Round up to the nearest half foot when computing.
  - Example - 28"x 40" sign would be calculated as 2.5 ft x 3.5 ft = 8.75 sqft
- Furnish us with your ready-to-cut computer file in EPS, AI, or CDR(Version 9 or older only).
  - All fonts must be converted to curves. We do not offer editing or scanning services. If your fonts or lines are rough when we receive them, we must assume that you meant for them to be that way and the sign will be produced as is from the supplied files.
- A minimum of 2 (two) square feet per sign.
- Custom Shapes may require an additional cutting charge.
- Allow 2 Weeks (10 working days) for production (unpainted) plus delivery times.
- Please include a print of your artwork with your order, so that we may confirm that the file you send is complete and matches the printout

Sandblasted SignFoam Sign WITHOUT Woodgrain

Sandblasted SignFoam Sign WITH Woodgrain		
Foam Thickness	Blasted One Side	Blasted Two Sided
1.5"	* /sqft	* /sqft
2"	* /sqft	* /sqft

Ask about getting your sand-blasted sign PAINTED!!!

Please note: There are minimum charges for painting. If your sign is less than (5) five square feet, the minimum will impact your pricing.

Please call and ask for help on any sandblasted job you have. We will be happy to help you compute your cost on EVERY sandblast job.

Because material prices often fluctuate, our prices are subject to change without notice.

GF GRAIN•FRAIM™ WOOD GRAIN SIMULATOR

Grain Fraim	Price
24"x 48" Grain Fraim	*
Restring Kit	*

The GRAIN•FRAIM™ was developed specifically to simulate wood grain in SIGN•FOAM. Simply place the GRAIN•FRAIM™ in front of a pre-masked sign and sandblast through the wires until the desired depth is achieved.

Jay Cooke's All Purpose Sign Primer

Gallon   *

All-Purpose Primer is ideal for flat signs made of MDO plywood, PVC or other porous surfaces. Fine for metal too. Perfect for refurbishing signs. Also ideal for hand carved, dimensional, routed, or sandblasted signs. Excellent for any wood, foam (HDU), or MDF.

Chromatic Waterborne Acrylic Coating (High Build Primer)

Gallon   *

This state-of-the-art waterborne acrylic coating is formulated for applications requiring high film build, high fill, easy sanding characteristics, outstanding chemical, abrasion and ultraviolet resistance.

Gorilla Tape

New Product

35 yard Roll   *

Gorilla Tape is 2 to 3 times thicker than conventional duct tape and packs extra layers of adhesive. It is especially good on Brick, stucco and other non-smooth surfaces. It is wrapped in an all-weather shell so it can be used outdoors.
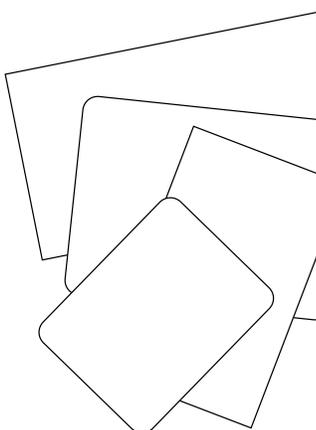

Gorilla Glue

8 oz Bottle   *

Gorilla Glue is easy to use and incredibly strong. It will bond ceramics, plastics, metal, softwoods, hardwoods, Sign Foam 3, teak, and other exotic or challenging woods without any special preparation or resin removal.

ULTRA FOAM CORE PANELS

New Product Line

ULTRA PLUS

For temporary or light-duty uses, ULTRA CORE is the best choice available. It is both economical and well manufactured to provide you a quality foam-centered art board at an affordable price.

ULTRA MOUNT is the show-stopper of mounting boards. It is a heavy-duty board with 18-pt poly-coated paper liners perfect for laminating, dry mounting, cold mounting, screen printing, paints or vinyl. Ultra Mount panels are lightweight but durable and will not warp or bow like other foam boards. The coated surface lets you reposition a print or vinyl lay-up without damaging the paper liner.

You may never cut another sheet of PVC or plywood once you've constructed an ULTRA PLUS sign. This is the lightweight, durable, rigid alternative to conventional outdoor materials. Ultra Plus is made of high-quality extruded polystyrene foam between two layers of 1mm or 2mm expanded PVC liner. It is extremely dent-resistant, warp-resistant, weatherproof and rigid. Ultra Plus is the most durable foam board product anywhere, easily replacing wood and aluminum in the construction of outdoor signs. It has the same qualities and versatility as expanded PVC panels, but is lighter and less expensive. You can treat and cut Ultra Plus just like wood. Use a circular saw, router, band saw or scroll saw. Anchor it with adhesives or with screws and washers. Ultra Plus will not rot and is not degraded by direct sunlight, wind or moisture.

Scooter Board	Price
48"x 96"x 3/16"	*
24"x 36"x 3/16"	*

Scooter Board is one of our newest products. It is moisture resistant (call and ask how we tested this product) and weighs 1/3 less than high-density hardboards. It has a brilliant white finish that is stain resistant and tougher than roller-coated applied paints. Ready to screen print, unique and unequaled in it's price range. There is no other product available that meets this quality and these prices. Scooter Board works great for graphics, P.O.P. displays and any other projects that require a ready-to-go, quality product at a very competitive price. Scooter Board readily accepts vinyl, digital flat bed printing, laser engraving as well as a variety of screening inks. Since each material has different characteristics and longevity we recommend testing to determine the best method for your application.
