(d) *Authorized enforcement officers.* Public health sanitarians or other authorized officers or employees of the Department and other City departments or agencies having jurisdiction over matters applicable to the operations of mobile food vendors and mobile food vending units, including, but not limited to, officers of the Police Department, shall have the power to enforce all laws, rules and regulations relating to mobile food vendors and mobile food vending units, including the provisions of this Article. This Article shall not be construed as restricting in any way any other power granted by law to any officer or employee of the City. Any such officer or employee may seize any food or mobile food vending unit which does not have a permit or which is being used by an unlicensed mobile food vendor. §6-01 Scope and applicability.

All mobile food vendors and the mobile food vending units operated in the City of New York are subject to and must comply with all applicable provisions of Articles 5, 71, 81, 89 and all other applicable provisions of the New York City Health Code (the “Health Code”); Title 17 of the Administrative Code of the City of New York (the “Administrative Code”); Part 14 of the New York State Sanitary Code (the “Sanitary Code”); and the rules of the Department set forth in this Chapter and Chapters 20, 26 and other applicable provisions of Title 24 of the Rules of the City of New York.

§6-02 Definitions.

Words and terms used in this Chapter have the following meanings:

Acceptable to the Department means acceptable under conditions of use and being used in conformance with applicable regulatory, industrial or other safety standards.

Contaminated has the meaning set forth in Article 81 of the Health Code.

Detergent sanitizer means a solution used to wash and/or sanitize utensils and equipment.

Food has the meaning set forth in Article 71 of the Health Code.

Food grade material means material certified as meeting the standards of the National Sanitation Foundation (NSF) or other organization utilizing a process approved by the American National Standards Institute (ANSI), or that is otherwise acceptable to the Department in compliance with §81.17 of the Health Code or successor provision. During use with food products such material shall not react with such food products or food contact surfaces; and shall not contaminate or impart any odor, color or taste to such food products. No food additive, food equipment, lubricant or other similar substance used in food processing, preparation, storage or service shall expose food to physical debris, toxic chemicals, harmful substances or other contaminants.

Green cart has the meaning set forth in §17-306(s) of the Administrative Code or successor provision.

Mobile food commissary or other facility approved by the Department means either

- (i) A commissary that complies with the requirements of Articles 81 and §89.27 of the Health Code, or
- (ii) Another facility providing storage and/or cleaning of no more than four Class D or Class E mobile food vending units, nor more than one food truck, in accordance with §6.08 of this Chapter.

Mobile food vending unit means a food service establishment as defined in Article 81 of the Health Code located in a pushcart or truck, self or otherwise propelled, used to store, prepare, display, serve or sell food, or distribute food free of charge to the public, for consumption in a place other than in or on the unit. Any such pushcart or food truck is deemed a mobile food vending unit whether operated indoors or outdoors, on public, private or restricted space. A mobile food vending unit does not mean a stand or a booth.

Potable water means drinking water that meets the drinking water requirements of subpart 5-1 of the State Sanitary Code and is thereby suitable for human consumption or use directly or indirectly in connection with the preparation of food for human consumption, including ice making and cleaning of utensils and equipment.

Potentially hazardous food has the meaning set forth in Article 81 of the Health Code.

Pre-permit inspection by the Department means the inspection of a mobile food vending unit in which the Department determines that the unit has been constructed and equipped in accordance with this Chapter. A pre-permit inspection by the Department is required:

- (i) Before the issuance of a new or renewed mobile food vending permit and decal;
- (ii) When a permittee seeks to replace a mobile food vending unit with another unit;
- (iii) When a permittee seeks to amend a permit classification from non-processing to processing or processing to non-processing;
- (iv) When a mobile food vending unit has sustained a material alteration, as defined in §89.03 (e) of the Health Code; or
- (v) When any permit decal has been removed.

Processing means transforming food into the form in which it is to be served to the mobile food vending unit patron, including, but not limited to, by means of slicing, dicing, grating, portioning, blending, mixing, combining, cooking and reheating, or otherwise treating food in such a way as to create a risk that it may become adulterated if improperly handled. Portioning by butchering is not allowed; food may be processed on a mobile food vending unit only in accordance with Article 89 of the Health Code. A person who processes food on a mobile food vending unit is not a manufacturer, as that term is defined in Administrative Code §17-306 (p), or successor provision of law.

Sanitization means effective treatment by heat or chemical means that destroys pathogens on surfaces treated and is acceptable to the Department, as defined in § 81.03(ii) of the Health Code, or successor provision.

Ware washing or multi-compartment sink means a sink, other than a hand wash, dedicated to washing cookware, kitchenware and utensils.

§6-03 Mobile food vending unit classifications.

Mobile food vending units shall be classified based on the foods, processing and packaging of foods served. Class A and Class B units are processing units and Class C, Class D and Class E units are non-processing units for the purpose of payment of the permit fees set forth in §17-308 (c) of the Administrative Code, or successor provision, and Article 5 of the Health Code.

(a) *Class A mobile food vending unit* means a processing unit on which raw, pre-cooked and/or manufactured potentially hazardous foods requiring temperature control as specified in Health Code §81.09 are stored, prepared and provided for individual service. Such foods include, but are not limited to, grilled or fried meats, sausages, poultry, shish kebab, hamburgers, eggs and gyros.

(b) *Class B mobile food vending unit* means a processing unit in or on which pre-cooked and/or manufactured potentially hazardous foods requiring temperature control as specified in §81.09 of the Health Code are stored, prepared and provided for individual service. Such foods include, but are not limited to, sandwiches prepared on the unit, raw fruits, vegetables and salads, breads, bagels and rolls buttered or topped with cream cheese on the unit, smoothies and soft serve ice cream.

(c) *Class C mobile food vending unit* means a non-processing unit in or on which only intact, prepackaged potentially hazardous foods requiring temperature control as specified in Health

Code §81.09 are provided for individual service. Such foods include, but are not be limited to, prepackaged frozen desserts, prepackaged sandwiches, and prepackaged and presliced fruits and vegetables.

(d) Class D mobile food vending unit means a non-processing unit in or on which non-potentially hazardous packaged or unpackaged foods not requiring temperature control for safety are provided or served. Such foods include, but are not limited to, brewed coffee and tea, donuts, pastries, rolls and bagels buttered or topped with cream cheese at a commissary, popcorn, cotton candy, nuts, candied nuts, soft pretzels, and chestnuts, regardless of whether such foods are heated for aesthetic purposes. However, mobile food vending units that prepare and serve any potentially hazardous foods, including but not limited to, dairy products, pre-cooked or manufactured knishes, boiled frankfurters and sausages are Class D mobile food units that require equipment or other means of holding potentially hazardous foods at the temperatures required by Articles 81 and 89 of the Health Code.

(e) Class E mobile food vending unit means a green cart or other non-processing mobile food vending unit in or on which only non-potentially hazardous uncut fruits and vegetables are sold or held for sale or service.

(f) Only food to be served or sold. A permit to distribute or sell food from a mobile food vending unit does not authorize the sale of any other product or merchandise from such unit.

(g) If a vendor serves or prepares foods included in more than one Class of operation, the unit must be equipped in accordance with the classification that reflects the greater degree of food protection.

§6-04 Mobile food vending units: pre-permit construction and equipment requirements for all classes of mobile food vending units.

Mobile food vending units must be constructed and equipped so that they may be maintained and operated in a clean and sanitary manner, in accordance with all applicable law, so as to protect foods from contamination by dust, dirt and toxic and other substances, and the public from risk of injury, and must be equipped in accordance with the requirements set forth in Table 1 in §6-05 of this Chapter. Units and equipment must be manufactured from easily cleanable, durable, hard, smooth, non-porous, non-absorbent, non-reactive and non-toxic materials. All equipment must be fastened securely to the mobile food vending unit. No mobile food vending unit or truck may be used as a dwelling, or for sleeping or other residential purposes for any period of time.

(a) *Food contact surfaces.* Food contact surfaces, as defined in Health Code §81.03(p) or successor provision, shall be constructed of easily cleanable, non-toxic commercial food grade materials; kept free of cracks, chips, holes, pits and sharp edges; and maintained in a clean and sanitary condition. Upon request of the Department, a permittee shall provide proof acceptable to the Department that a material used in construction or equipping of a mobile food unit is certified as food grade.

- (1) *Lubricants.* Equipment for processing foods that contain bearings and gears maintained and operated with non-food grade lubricants must be designed and constructed so that lubricants can not leak, drip, or contaminate food or food contact surfaces.

(2) *Cooking surfaces.* Cooking surfaces within a mobile food vending unit shall be placed and configured so as to minimize the risks of food contamination and injury to patrons, vendors, and the public.

(b) *Non-food contact surfaces.* All non-food contact surfaces must be smooth, easily cleanable, maintained in good repair and kept clean. If solder is used in construction or repairs, it shall be made of non-toxic materials, corrosion resistant, and contain less than 0.2% lead.

(1) *Interior non-food contact surfaces.* Interiors of mobile food vending units, including floors, walls and ceilings of food trucks, and non-food contact surfaces of equipment that are exposed to food splash or debris, or that otherwise require frequent cleaning shall be designed and constructed of smooth, non-toxic and washable materials, free of unnecessary ledges, projections, or crevices, readily accessible for cleaning and sanitizing and maintained in a clean and sanitary condition.

(2) *Exterior non-food contact surfaces.* Exterior non-food contact surfaces shall be constructed of smooth, durable, non-porous, non-toxic materials, without any open seams and joints.

(3) *Permit decal to be visible and unobstructed.* No ornamentation, advertisement, menu, price list, other display, sign or printed matter may cover or obscure the permit decal. A six (6) inch space shall be left clear on all sides of the decal. The decal may be covered by a hinged, hard, transparent plastic or glass cover no thicker than one-sixteenth of an inch. The cover shall not be secured by a lock, but installed so that the decal may be directly accessible for examination and inspection at all times.

(4) *Doors and windows.* In a food truck a partition or a partition with a self-closing door shall be installed between the driver's seat and the food processing and service area. To protect foods from potential contamination in all units, no service window may be installed over or behind cooking or food preparation equipment.

(c) *Lighting.* A mobile food vending unit shall be equipped with artificial lighting fixtures providing a minimum of 540 lux (50 foot candles) of light at all food contact surfaces and ware washing sinks whenever natural lighting conditions do not meet that standard. When artificial lighting is used, shatter-proof or shatter-guarded lighting shall be installed. Lighting fixtures located over or near food storage, preparation and service equipment shall be shielded to prevent broken glass from falling into food or onto food contact surfaces.

(d) *Ventilation.* Cooking equipment shall be mechanically ventilated to prevent a nuisance from heat, smoke, odors or fumes. Mechanical ventilation hoods and equipment shall be installed and used to prevent grease, steam, smoke, and odors from collecting on interior surfaces, contaminating food and creating a nuisance. If filters and other grease extracting equipment are not designed to be cleaned in place, they must be readily removable for cleaning and replacement, and must be removed and cleaned to prevent accumulations of grease. Power generators shall be used and vented in accordance with manufacturers' specifications.

(e) *Insect and rodent control.* Mobile food vending units shall be maintained so as to be free of insects, rodents, and conditions promoting harborage, as defined in Article 151 of the Health Code, and breeding of insects and rodents.

(f) *Potable water supply.* Mobile food vending units that are required to maintain a potable water supply in accordance with Table 1 of §6-05 shall be equipped with plumbing and plumbing

fixtures that provide adequate supplies of potable hot and cold water during all times of operation. Individuals operating mobile food vending units shall maintain sufficient supplies of potable water to allow for hand, ware and food washing and food preparation. Plumbing and fixtures shall be properly connected, vented and drained to prevent contamination of the City water supply or any other potable water supply. Water supply outlets and connections to water supply fixtures or equipment shall be designed and constructed to prevent back-flow into the water supply. Bottled and packaged potable water certified by the New York State Department of Health for sale in New York State may be used to supplement the potable water supply, if handled and stored in a way that protects it from contamination. If used, bottled and packaged potable water shall only be poured into tanks from the original containers. Failure to provide and maintain potable water supplies required by this Chapter is an imminent health hazard requiring immediate cessation of operation of any mobile food vending unit.

(1) *Tank capacity.* When a potable water supply is required by Table 1 of §6-05 of this Chapter, a food truck shall be equipped with a tank or tanks with a total capacity of no less than 40 gallons; other mobile food vending units shall be equipped with a tank or tanks with a total capacity of no less than 10 gallons. All tanks shall be filled to capacity prior to beginning operation or operating, as defined in Health Code §89.03 (j). On and after January 1, 2018, all water tanks shall be equipped with a water level indicator visible from outside the tanks.

(2) *Water tanks and inlet pipes.* Water tanks shall be constructed of food grade materials that are corrosion resistant, durable and non-absorbent. Water inlet pipes shall be made of flexible, food-grade material. The fitting for hose connections shall be capped except when tanks are being filled.

(g) *Plumbing.* Plumbing fixtures shall be constructed of food grade material; piping and distribution piping shall be installed and maintained to protect the water from contamination. All piping shall be easily accessible for inspection and repair.

(1) *Tank drainage.* Potable water tanks shall be fitted with a faucet or valve and tilted to allow complete drainage. The entire system shall be constructed to be drained by gravity or other means acceptable to the Department.

(A) Potable and waste water connections on a mobile food vending unit shall be designed and constructed so as to prevent backflow and/or cross-connection with the water supply.

(B) Equipment and fixtures used for storage, preparation, or processing of food that are drained into the waste water tanks shall be equipped with a readily accessible vented check valve on the waste line.

(C) No equipment may be directly attached to the potable water supply unless an approved backflow device is installed.

(2) *Pressure.* Potable water, when required by Table of §6-05 of this Chapter, shall be dispensed at sufficient pressure to provide a constant adequate flow.

(h) *Waste water system.* Waste water shall be stored and disposed of in accordance with §89.25 of the Health Code.

(1) Waste water storage tanks and pipes shall be designed and maintained so as not to leak or spill on sidewalks or public streets.

- (2) When required by Table 1 of §6-05 of this Chapter, waste water tanks shall have a minimum capacity that is at least 15% greater than the potable water supply capacity and be clearly and permanently labeled “waste water.”
- (3) Mobile food vending units creating liquid waste, including but not limited to units serving beverages such as coffee or tea or boiling frankfurters or holding melting ice, shall be equipped with a waste water tank with a minimum capacity that is at least 15% greater than the amount of water used for brewing coffee, processing food or for other liquid waste.

 - (B) Dispense potable running water;
 - (C) Have a dispenser valve or faucet which provides a constant flow of water when opened;
 - (D) Be supplied by a potable water storage tank constructed of food grade material that holds at least five (5) gallons of water;

 - (F) Be equipped with “Wash Hands” signs in accordance with Health Code §81.21 (c).
- (2) Ware washing and sanitizing sink.
- (A) All equipment and utensils must be cleaned and sanitized at least once daily at the mobile vending unit commissary in accordance with Health Code §89.19(l). When required by Table 1 of §6-05 of this Chapter, a sink with a swivel faucet must be provided to wash and sanitize utensils and equipment that have become contaminated while the unit is in operation before being re-used.
 - (B) Utensils being used to serve or dispense ready to eat foods may be stored in a container of water heated to and maintained at 135 degrees Fahrenheit (57 degrees Celsius) or higher. The container must be cleaned and sanitized at least once every 24 hours at the permittee’s commissary, and be large enough to allow immersion of the largest sized utensils.
 - (C) A sink used for ware washing and sanitizing may be used for washing foods, but may not be used for washing hands or as a slop or utility sink.
- (3) Washing foods in a separate food washing sink or food grade container. When required by Table 1 of §6-05, a separate dedicated sink, or a food grade container placed in a

(4) No sink used for washing hands, wares or food may be used as a slop or utility sink.

(l) *Hot and cold storage.* When required by Table 1 of §6-05 of this Chapter, mechanical or other holding equipment shall be provided and used to hold potentially hazardous hot foods at or above 140 degrees Fahrenheit (60 degrees Celsius) and cold foods at or below 41 degrees Fahrenheit (five degrees Celsius).

(1) *Thermometers.* Each hot and cold storage unit shall be equipped with a numerically scaled or other indicating thermometer, accurate to plus or minus two degrees Fahrenheit (one degree Celsius).

(2) *Placement of thermometers.* Thermometers in cold holding equipment shall be placed in such equipment or cold holding containers to measure air temperature in the warmest part of the unit. Thermometers used to measure the temperature of food in hot holding equipment shall be placed so that they measure the temperature in the coolest part of such equipment.

(m) Compliance with fire safety requirements. In addition to the other requirements of this section, all mobile food vending units and commissaries shall comply with the New York City Fire Code (Title 29 of the Administrative Code) and rules of the Fire Department found in Chapter 38 of Title 3 of the Rules of the City of New York, or successor provisions, regulating the use of any flammable gas, and governing the storage, handling and use of propane and other liquefied petroleum gases (“LPG”). As set forth in Chapter 38 of the Fire Code and Chapter 38 of the Fire Department rules, such provisions prohibit the use of any flammable gas other than LPG for cooking and heating on a mobile food vending unit. The provisions also prohibit the placement of any unit with propane or other LPGs on a subway grate, and among other things regulate:

(1) Design of the cooking grills and other heating equipment;

(2) Size, number, location and securing of the LPG containers;

(3) Securing of container valves; and

(4) Size, type, location and mounting of required portable fire extinguishers.

(p) *Food security.* All mobile food vending units shall be equipped with appropriate food grade coverings, tamper-proof locks or other mechanisms. Vendors shall secure such units when it is

necessary to leave mobile food vending units unattended on a street for no more than one-half hour. Units left unattended for periods longer than one-half hour shall be deemed abandoned and an imminent health hazard, in accordance with Health Code §89.31(c).

§6-05 Mobile food vending units: supplies and equipment required for different classes of mobile food vending units.

(a) In addition to the general requirements for construction and design of mobile food vending units and their equipment in §6-04 of this Chapter, each class of vending units shall be supplied and equipped in accordance with Table 1 of this section. The minimum equipment required is determined by the class of the unit and the foods that are processed and/or sold on the unit.

(a) *Non-truck units.* No new permit shall be issued after October 31, 2013 for any mobile food vending unit pushcart that exceeds ten (10) feet in length and five (5) feet in width, including wheels, axles and other appurtenances to such wheels. When vending on a sidewalk, the operator must place the unit so that the longer side is adjacent and parallel to the curb abutting the sidewalk.

(1) Current permits for units that exceed the size restrictions, and that expire on or before October 31, 2013, shall be renewed only once. Subsequent renewal permits shall be approved only for units that comply with these size restrictions.

(2) Current permits that expire on or after November 1, 2013 shall be approved for renewal only for units that comply with these size restrictions.

Such plates or decals shall contain the fresh fruits and vegetables permit number issued to the owner of each such green cart and the borough and police precincts in which the green cart is authorized to operate. Permit decals may not be removed or transferred to any other mobile food vending unit.

(b) At the time an initial green cart permit is issued, the Department will provide a distinctive and readily recognizable “green cart” umbrella to each green cart permittee. The umbrella must be safely secured to the green cart and maintained in good condition and repair at all times by the permit holder, and must be displayed in an open position above the green cart whenever the green cart is being used to vend. For any replacement umbrella, the green cart permittee must pay a fee of fifty dollars (\$50.00) reimbursing the Department for the cost of the umbrella. §6-11 Inspections; permit issuance and renewal.

No unit shall be approved for use unless such unit has passed a pre-permit inspection by the Department and found to be constructed and equipped in compliance with this Chapter and Article 81 and Article 89 of the Health Code.

(a) Renewal applications to be submitted timely. An application for renewal of any permit shall not be accepted unless the applicant submits a complete renewal application, the tax clearance certificates required by §17-310 of the Administrative Code, and proof of payment of all fines and penalties owing for notices of violation as required by §17-317(b) and §6-10 of this Chapter, no later than thirty (30) days before the date of expiration of the permit. The Department may accept a late renewal application only if the applicant submits proof that may be verified by the Department that the delay in submission of the completed application and clearances resulted because of delays in issuing the clearances. In such cases, the permittee must show that applications for tax and penalty clearances were submitted at least sixty (60) days before the date of renewal of the permit.

(b) Inspections to be scheduled timely. In accordance with §17-307(e) of the Administrative Code, a new or renewal permit shall not be issued if the applicant's mobile food vending unit fails to pass a pre-permit inspection by the Department within six (6) months after the permit application has been certified or accepted by the Department. The Department may conduct such an inspection more than six (6) months after the application has been submitted only if Department records indicate that the Department caused the delay in scheduling the inspection.

(c) Permit holder photographs. All individual applicants for a new or renewed permit, and persons who require a replacement or substitute permit or decal for a mobile food vending unit, shall personally appear at a location designated by the Department so that a current identifying photograph may be taken.

(e) Applicants other than natural persons. If an entity other than a natural person is an applicant or permittee, such as a corporation or limited liability company, the person who brings a mobile food vending unit in for inspection on behalf of such entity must be a person authorized by law to accept service of process on behalf of such entity pursuant to Article 3 of the New York CPLR. Such persons may include an officer, director or managing agent of a corporation; a partner of a partnership or limited partnership; or a member of a limited liability company. No other person may bring any mobile food vending unit to the Department for the non-operational inspections required by this section.

(f) Identifying operators of mobile food vending units. The applicant for a new or renewal permit must (1) complete a form provided by the Department listing the name(s), address(es), telephone number(s) and the currently valid mobile food vending unit license number(s) of each person who will be operating the mobile food vending unit, and (2) provide a statement describing the legal relationship of such person to the permit holder, in accordance with §17-309(b)(1) of the Administrative Code. The completed form shall be signed and notarized by the permit applicant.

structure or equipment of the unit shall be brought to the Department for reinspection prior to reuse or continued use of the unit. Repair or replacement of a tire or an axle, and straightening a dent in a panel are not considered material alterations.

(i) Decals. No decal may be placed on any mobile food vending unit unless a Department inspector has determined at a pre-permit inspection that the unit is constructed and equipped in accordance with this Chapter, and that the person renewing or applying for a permit has completed and submitted all forms required by this section.

(j) Units to be photographed. The Department may take photographs of mobile food units at any time, so that the Department may verify that the unit has passed a pre-permit inspection.

(k) Notification of changes in operations. Permittees must notify the Department, in writing, on forms approved or provided by the Department, no later than ten business days after any there has been a change in:

Department inspection reports which note the absence of a disabled veteran licensee are deemed proof that a disabled veteran is not operating the unit, in violation of General Business Law §35-a.

§6-14 Government agency and charitable organization exemptions.

In accordance with §17-320 (a) of the Administrative Code, the Commissioner may exempt any area within the control of a government agency or charitable organization from provisions of Title 17 of the Administrative Code that limit the total number of full-term or temporary mobile food vending permits that may be issued, or the number of permits that may be issued to any one person. The Commissioner may make this exemption provided that (i) the request for issuance is made in writing by the agency or organization and (ii) permittees comply with all other applicable provisions, limitations and conditions imposed by the New York City Administrative Code, the Health Code, the State Sanitary Code and these rules.

§6-15 Modification.

When the strict applicability of any provision of this Chapter presents practical difficulties or unusual or unreasonable hardships, the Department, in a specific instance, may modify the application of such provision consistent with the general purpose of this Chapter and upon such conditions as are deemed necessary.

No food vendor while acting as such shall vend any item which the commissioner or board has not authorized or otherwise approved.

e. All licenses and permits issued pursuant to this subchapter shall be valid for two years unless sooner suspended or revoked. The commissioner may issue such licenses and permits to expire at various times during a year. To achieve such staggered expiration dates, initial licenses or permits may be issued for a period up to three years.

f. 1. The commissioner may issue temporary licenses and permits upon the furnishing of information and an application in such form and detail as such commissioner may prescribe and the payment of a fee pro-rated in accordance with the schedule of fees set forth in section 17-308 of this subchapter, but in no event shall the fee for such temporary license be less than ten dollars or the fee for such temporary permit be less than fifteen dollars.

(II) Any person who is eligible for the issuance of additional temporary permits pursuant to subitem (I) of this item shall be issued a maximum of sixty temporary permits.

(III) Additional temporary permits shall be issued pursuant to subitem (I) of this item only to persons who are eligible therefor who have not at the time of application for such additional temporary permits had a permit issued pursuant to this subchapter revoked or suspended and who satisfy the commissioner that they are fit and able to conduct, maintain and operate a food vending business. Such permits shall be renewed provided that all other requirements for renewal under the provisions of this subchapter and any rules promulgated pursuant thereto are complied with, the license of the person to whom the permits were issued or the permits have not been revoked or suspended and such person has not committed a violation or violations which would be a basis for permit or license suspension or revocation.

(IV) Nothing contained in subitem (I) of this item shall be construed as authorizing the issuance of full-term or temporary permits in excess of the numbers of such permits that are authorized to be issued pursuant to paragraph two of subdivision b of this section or clause (i) of this subparagraph.
