SAP SuccessFactors Health Check & Roadmap

For

ABC Consulting

Who needs an HR Health Check?

How healthy is your HR organization?

- Have you ever conducted an "HCM Health Check" for your Organization before?
- Have you ever able to measure the success or ROI of your previous HRIS Implementation?
- Are you still spending 60% or more of your HR dollars on administration?
- Are your customers 'very satisfied" with your HR service offerings?
- Is your current HR Services are simple to use and rate high on usability & adaptability?
- Can you easily find, aggregate and analyze your HR data and build actionable analytics on it?
- Does your ESS/MSS cover 95% of your HR process/transactions?
- Have you ever benchmarked your HR Processes and performance with the industry?
- Does your current solution meet the long-term strategic vision of your organization?
- Have you ever created an "HR Business Case" for your organization?

If you answered "NO" to one or more of these questions, then you would surely benefit from an HCM Health check

Agenda

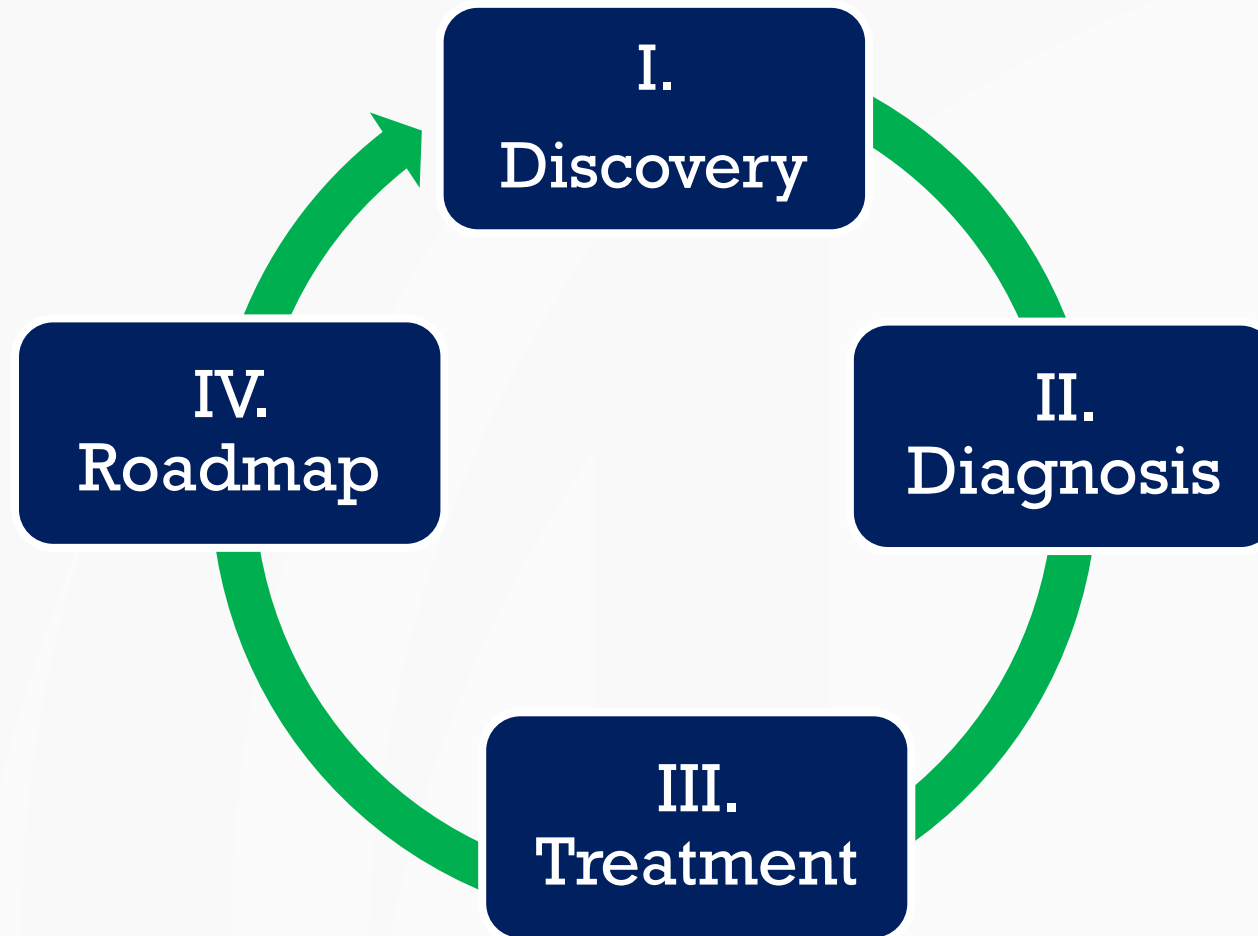

- Purpose
- Methodology
- Phase I Discovery
- Phase II Diagnosis
- Phase III Treatment
- Phase IV Roadmap

ABC Consulting is expanding their business, they have already implemented Performance and Rewards (SMB) solution from SAP SuccessFactors. The objective of this study is to run a “SAP SuccessFactors Health Check” service to Discover, diagnose and Treat the challenges faced by ABC Consulting in Performance Management system and suggest the path ahead.

Disclaimer: We do not have access to ABC Consulting’s Provisioning and the user assigned to us didn’t have “Admin” access. So our “Discovery” was limited to what we had access to.

Phase III: Treatment

Objective:

To suggest/recommend changes to ensure successful deployment

Key Areas we address:

- Suggest changes in the current implementation
- Suggest implementation of new modules/functionalities/additional SuccessFactors modules
- Changes in the support structure
- Changes in the interfaces design

Phase III: Treatment

Our Findings	Our Findings	Recommendation
SMB Vs LE	<ul style="list-style-type: none"> SMB is a great solution for a small company which is not rapidly growing and its demands are limited in the areas of PMGM, Succession and Compensation. When you would like to take advantage of all the innovations happening on the above mention modules or have a growth path which would need for you to have a broader HR system with all the bells and whites then LE is the path to go. 	
SMB (PMGM) Vs LE PMGM	<ul style="list-style-type: none"> We do not have Provisioning or Admin Center access of the ABC Consulting's Performance and Rewards System but as per our demo system (Performance and Rewards SMB), ABC Consulting can do Calibration, Continuous performance Management. 	<ul style="list-style-type: none"> There are a lot of additional Functionalities available in LE version which would be useful for your business going forward so it makes sense before you add more number of employees that you switch over to LE version.
SMB (Compensation) Vs LE (Compensation)	<ul style="list-style-type: none"> At least from the access we had we didn't see any Compensation functionalities being implemented for ABC Consulting. We do not have Provisioning or Admin Center access of the ABC Consulting's Compensation System but as per our demo system (Compensation SMB), ABC Consulting can do Compensation- Salary only-NO BONUS. 	<ul style="list-style-type: none"> Compensation in SMB version is very limited and from our experience customers normally would need the full version for a complete Compensation planning for their employees. Particularly as ABC Consulting is in service business hence it is all the more important that they start with the LE version.
SMB (Succession) Vs LE (Succession)	<ul style="list-style-type: none"> At least from the access we had we didn't see any Compensation functionalities being implemented for ABC Consulting. 	<ul style="list-style-type: none"> If Succession is important to you then LE is the options to go for as the SMB option has a lot less functionalities compared to the LE version.

Phase IV: Roadmap

Objective:
