Complete Safety Solutions

EZ-SCREEN LS Safety Light Curtains

- Intuitive and easy-to-use and set up
- End-to-end sensing
- Heavy-duty aluminum housing and recessed window to avoid damage in harsh environments
- Highly visible alignment and diagnostic indicators
- IP69 Hygienic models available for washdown environments
- Cascade capable models available
- See page 6

XS26-2 Expandable Safety Controllers

- Up to eight expansion I/O modules can be added as your safety application grows or changes
- Configuration software is so simple that you will be programming in minutes
- Simulator functionality allows users to test their configurations without being connected to a controller
- See page 25

SGS Safety Grid Systems

- Multiple beam safety light devices for access and long-range perimeter guarding
- Available in emitter/receiver models and in easy-to-deploy active/passive models
- Heavy-duty aluminum housing for tough environments
- Easy alignment and installation with on-board alignment lamp and indicators
- Muting arm kits available to simplify end-of-line packaging applications
- See page 14

Emergency Stop and Stop Control

- E-Stops available as panel mount, or as preassembled enclosures
- E-Stop models with illumination help operators to quickly identify actuated buttons
- Enabling devices provide ergonomic design with a detented enable position
- See page 40

Safety Switches

- Non-contact RFID switches accommodate misaligned/vibrating doors in a compact package
- Hinge switch combines safety switch and load bearing hinge in a single package
- Locking switches ensures doors remained closed for safety and process critical applications
- See page 36

Lighting and Indication

- Preassembled and preconfigured multi-segment LED tower light indicators
- Programmable multicolor LED indicators, panel mount models available
- Pro Editor software offers a wide variety of color and animation options

SX5 Safety Laser Scanners

- Two-dimensional laser scanner with easy-to-use software
- Programming of irregular shaped warning and detection zones
- 275° scanning angle with selectable resolutions and 5.5 m range
- See page 20

Type 4 Heavy-Duty Light Curtains

Robust safety light curtains for harsh industrial environments

Banner Engineering's easy-to-use, heavy-duty Type 4 safety light curtains with several resolution options available to detect fingers, hands, arms, or legs. Our heavy duty light curtains are built to withstand harsh industrial environments.

Due to its robust design, the EZ-SCREEN LS is the perfect fit in large robotic cell applications that require sturdy safety devices and heavy duty enclosures.

EZ-SCREEN LS light curtains in hygienic tubular enclosures successfully protect operators from injury and remain hygienic for easy cleaning procedures.

Type 4 Compact Light Curtains

Compact safety light curtains for safety in tight spaces

Banner Engineering's easy-to-use, compact Type 4 safety light curtains are available with several resolution options available to detect fingers, hands, arms, or legs. Our compact safety light curtains are ideal for smaller machines and other space-constrained areas.

SLC4 are Type 4 safety light curtains specifically designed to safeguard smaller points of operation and access on compact machines.

The EZ-SCREEN LP safety light screen is compact and mounts in tight spaces with its continual end-to-end sensing that leaves no gaps.

Safety Light Curtain Selection

Choose your safety light curtain, suitable for a wide variety of safety applications.

- Heavy-Duty Type 4 robust safety light curtains for harsh industrial environments
- Compact Type 4 safety light curtains for safety in tight spaces
- Type 2 cost-effective safety light curtains for lower risk applications

Type 4 Safety Light Grids

Easy-to-use, heavy-duty Type 4 grids for perimeter guarding

Two to four beam Type 4 safety light grids protect personnel from injury and machines from damage by guarding access, areas, and perimeters. Able to detect a body in a cost-effective and heavy-duty safety light curtain package.

SGS Safety Grid Systems, with two, three, or four beams, are used to monitor the perimeter of the work area.

SGS Safety Grid Systems are available in Emitter/Receiver models capable of safeguarding over very long distances and in easy-to-deploy Active/Passive models.

Muting Options for Safety Light Grids

Certain SGS models are available with integral muting for specific types of entry/exit applications

Integral Muting allows monitoring of redundant mute device inputs and automatically suspends (mutes) the safeguarding function of a device during the non-hazardous portion of the machine cycle.

Integral muting models have muting technology built into the device eliminating the need for an external muting controller. Preassembled muting arm kits are available in T, L and X configurations. The muting kits use premounted hardware and Q20 retroreflective sensors and reflectors.

Benefits of Muting

- Maintain high safety standards while allowing for a predetermined object to break a beam
- Limit downtime by not unnecessarily shutting down a conveyor or robot cell

Applications

- Assembly and packaging machines
- Automated production equipment
- Robotic work cells
- Automated warehouses
- Palletizers

Mute Arm Kits

Preassembled (with mounting hardware) for plug-and-play connection to the SGS grid and LS Safety Light Curtains

- Wiring connection block or cable accessories available
- Adjusts easily for line changes

L-Configuration

SGSA-ML-L-LPQ20

- Includes 2 mute arms, 2 SGSA-Q20PLPQ5 mute sensors, and 2 retroreflectors

SGSA-ML-R-LPQ20

- Includes 2 mute arms, 2 SGSA-Q20PLPQ5 mute sensors, and 2 retroreflectors

T-Configuration

SGSA-MT-LPQ20

- Includes 4 mute arms, 4 SGSA-Q20PLPQ5 mute sensors, and 4 retroreflectors

X-Configuration

SGSA-MX-LPQ20

- Includes 4 mute arms, 2 SGSA-Q20PLPQ5 mute sensors, and 2 retroreflectors

SGS Selection

Choose your safety light grids for perimeter guarding.

- 2, 3 & 4 beam Emitter/Receiver models with a broad feature set
- 2, 3 & 4 beam easy-to-deploy Active/Passive models, only require wiring to the active side

Safety Scanner System

Horizontal or vertical monitoring of both personnel and stationary or mobile systems

SX Series safety laser scanners protect personnel, equipment, and mobile systems by continuously scanning a user-defined area of up to 275° to create a two-dimensional protected zone.

SX5 software configuration allows for Zone switching for FULL, RIGHT-SIDE and LEFT-SIDE Safety Protection during this forklift access application.

Software interface makes it easy to create custom safety and warning zones to safeguard large, complex, and irregularly shaped areas.

Safety Scanner System

Increased Machine Uptime

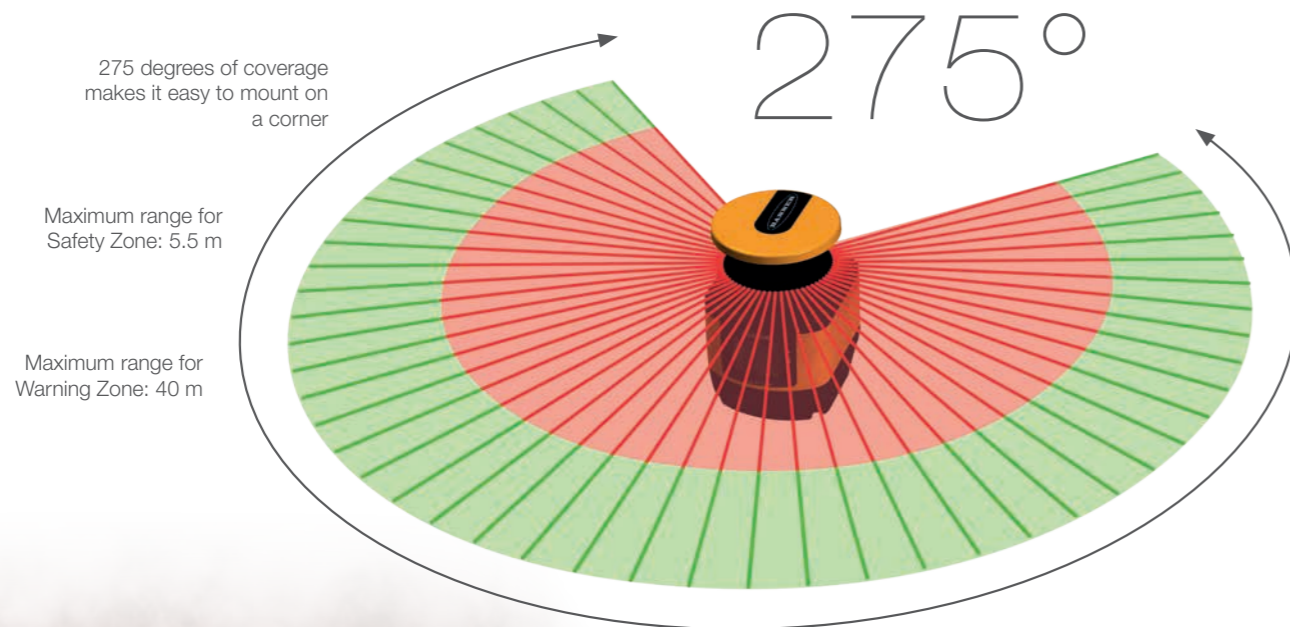

The SX5-B has on-board LED indicators and a large multi-segment color display that provide at-a-glance system status information so users can quickly identify zone breaches and resolve issues with a minimal amount of equipment downtime.

Compact, one-piece safety device installs easily above and away from area hazards without requiring time-consuming alterations to area infrastructure.

An alert is triggered if an object enters the warning zone and equipment will come to a stop if the safety zone is breached.

Light Immune and dust resistant – Best-in-class

Up to 6 zone sets free configurable

Rugged design for reliable industrial use

27 different status, diagnostic, warning and error displays

Dynamic Muting available and selectable detection capability for vertical applications

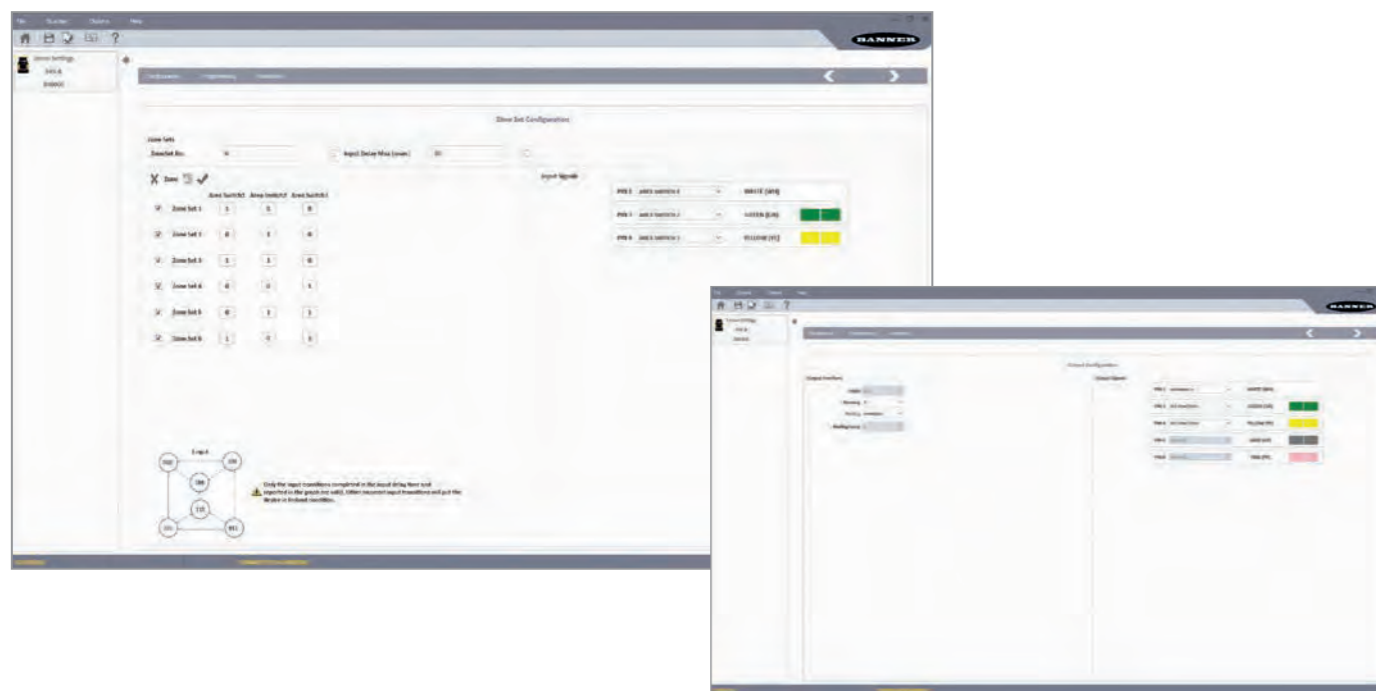

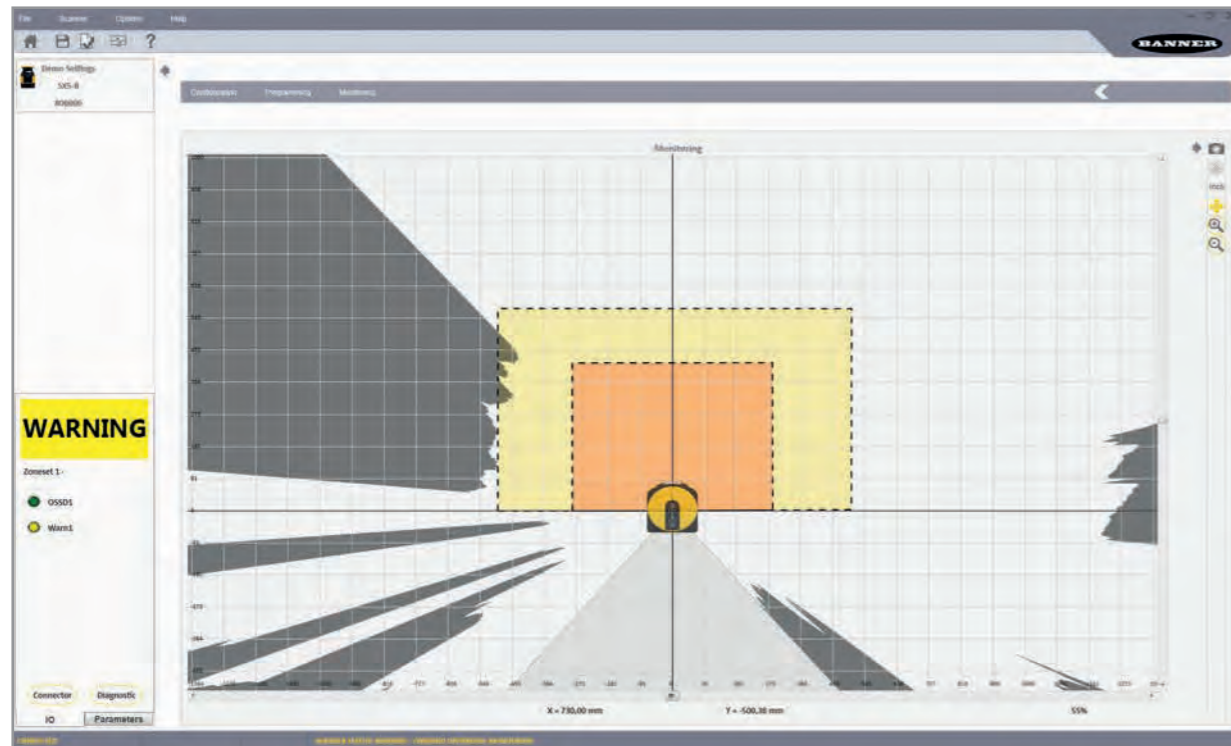

LED 1: Object Detection in Safety Zone (OSSD)
LED 2: Not Available
LED 3: Assigned to Warning Zone 2
LED 4: Assigned to Warning Zone 1
LED 5: Interlock Status (waiting for Reset)

Safety Scanner System – Software

Simple Setup for Rapid Deployment

The SX5-B can be set up in just a few simple steps using Banner's free configuration software. This robust software features menu-driven tools that guide users through setup and make it easy to design custom safety and warning zones to accommodate existing infrastructure and meet the specific needs of any application.

The software displays a graphic rendering of the monitored area, and provides configuration and management tools, such as drop-down menus, function-specific worksheets...

- Administrative data: file title header, application description and more
- Safety-relevant data: startup process information
- Safety Zone or Warning Zone configuration data: contours and limits

Safety Relays and Safety Controllers

Configurable controllers monitor multiple safety devices

Industrial safety controllers and relays provide an interface between safety devices and the machines and processes those devices monitor for a complete and easy-to-use safety control solution.

Safety controllers can be tailored for a wide variety of machines, including machines with multiple processes.

Safety Relays and Safety Controllers

Connect safety devices easily to the safety controller

- Universal input safety relays
- E-Stop monitoring safety relays
- Muting safety relays
- Safe speed monitoring relays
- Safety mat relays
- Safety extension relays

Various safety devices are monitored, such as E-stop buttons, safety switches, safety light screens, two-hand controls and rope pull switches.

Safety Relays

Hybrid Safety Controller plus 2 Safety Relays

Expandable Safety Controller

Cost-effective for simple safety circuits

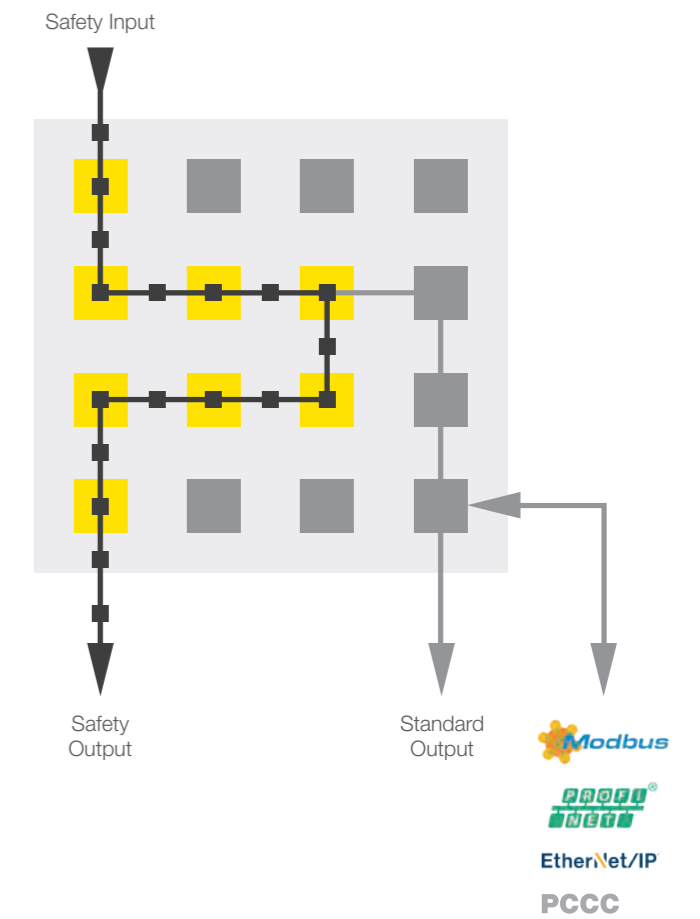

- Preset Functionality: Configuration not required
- Safety Inputs: 1
- Independently controlled Safety Outputs: 1; 4 to 7A

Flexible and cost-effective solution for machines typically using 2 Safety Relays

- PC Configurable: Flexible and easy-to-use
- Safety Inputs: up to 10; up to 14 using Automatic Terminal Optimization (ATO)
- Independently controlled Safety Outputs: 2; 6A each
- Convertible Safety Inputs: 4
- Terminal LEDs for easy troubleshooting
- Industrial Ethernet

Expandable for Complex Safety applications where 3 or more safety relays are typically used

- PC Configurable: Flexible and easy-to-use
- Safety Inputs: 26 (base unit) up to 154
- Independently controlled Safety Outputs: up to 68; 0.5A to 6A each
- Convertible Safety Inputs: 8 (Base Unit) up to 40
- LCD Display for easy troubleshooting
- Industrial Ethernet

Build System and Select Equipment

The feature-rich SC10 and SC/XS26 safety controller software provides a seamless user interface for setting up and managing safety systems. The software features an intuitive icon-based, drag-and-drop user interface to reduce the learning curve and speed up commissioning.

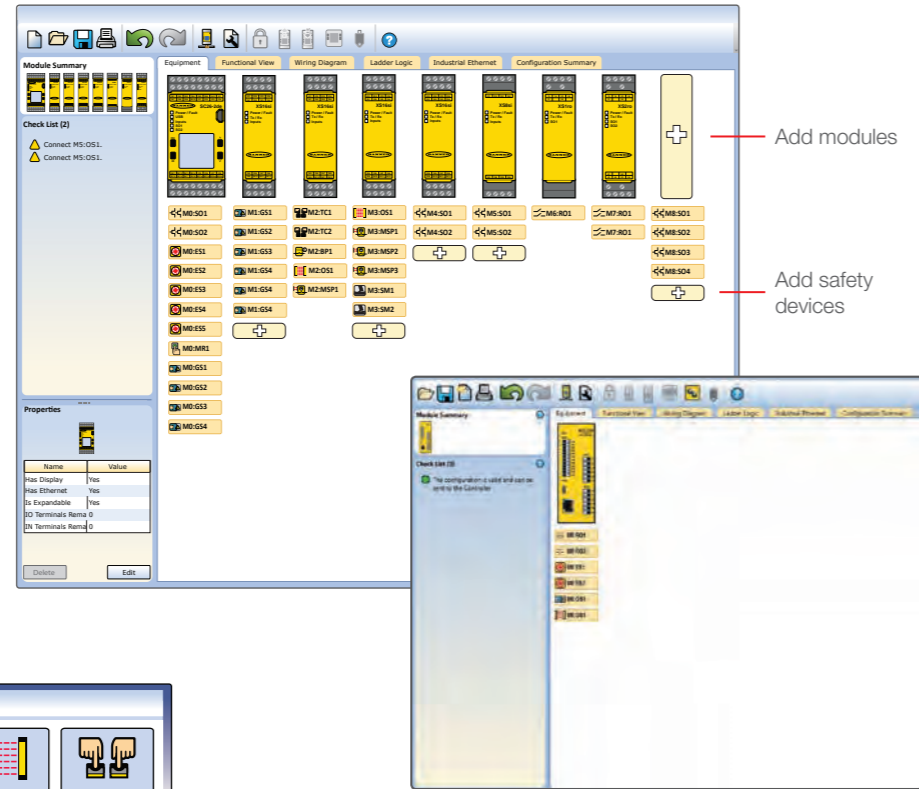

- Complex configurations made easy
- Simulate configurations before implementation
- Auto configure Industrial Ethernet for remote monitoring and diagnostics

Start using the free software today. Go to www.bannerengineering.com/safetycontroller

1. Choose Controller

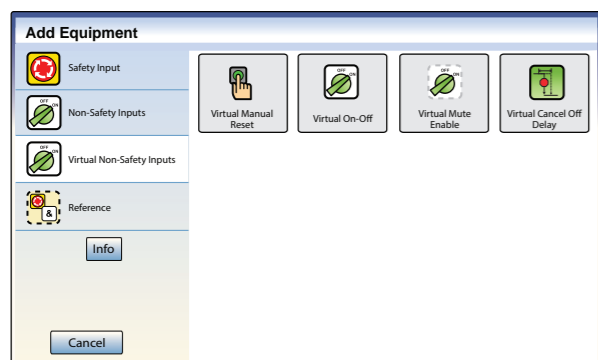

2. Equipment View

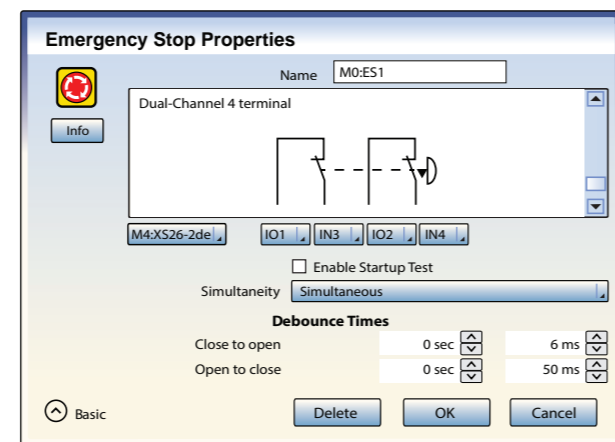

3. Add safety devices

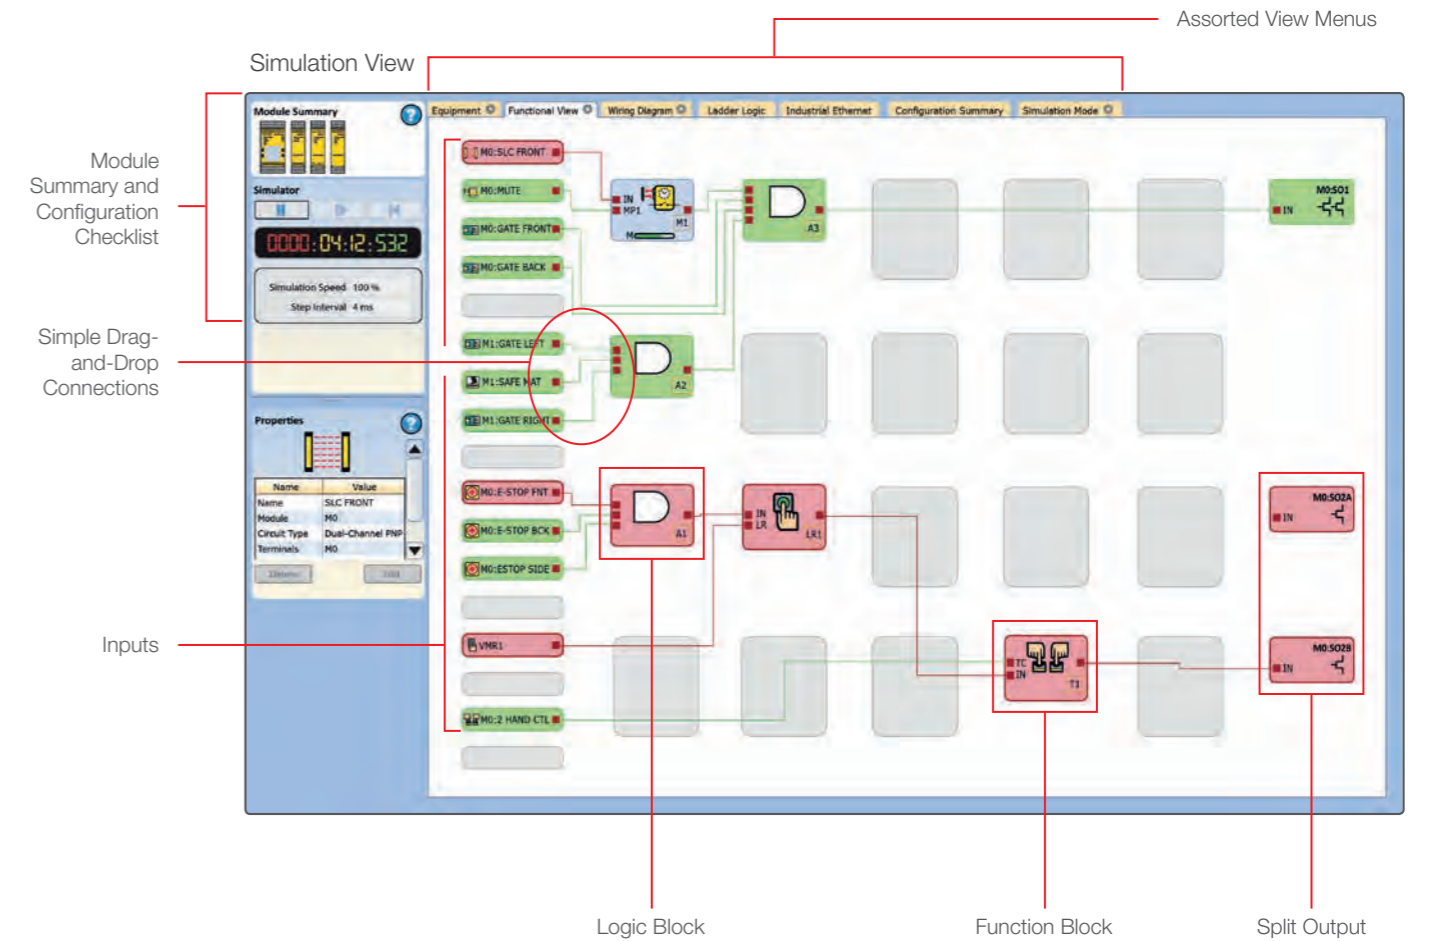

5. Add virtual non-safety inputs

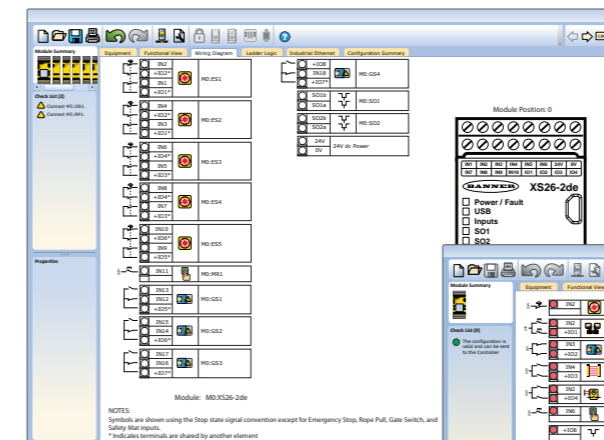

4. Select safety device properties

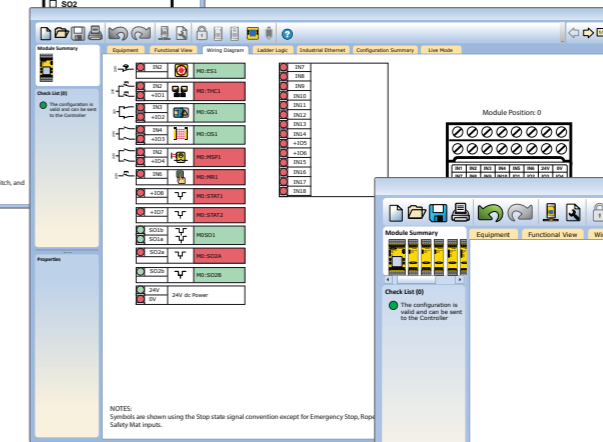

Configure your system in minutes

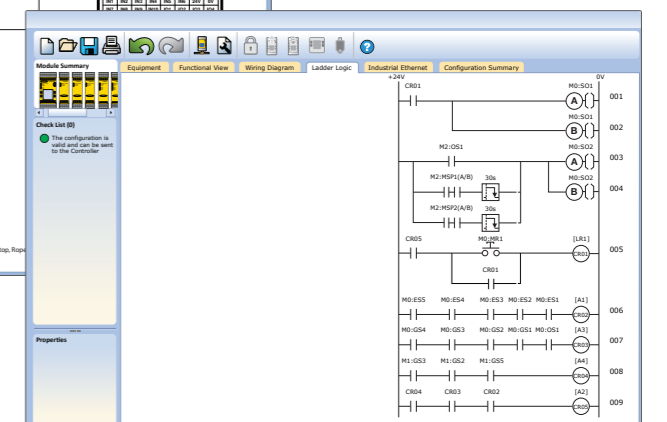

Wiring Diagram

Wiring Diagram in Live Mode

Ladder Logic

Safety Controllers

XS26 Expandable Safety Controller

- Optional display screen allows local diagnostics for efficient troubleshooting
- Up to eight expansion I/O modules can be added as automation requirements grow or change
- Choose from six expansion module models with a variety of safety inputs, solid-state safety outputs and safety relay outputs
- Controller and input modules allow safety inputs to be converted to status outputs for efficient terminal use

SC10 Safety Controller with SC-XM3 Programming

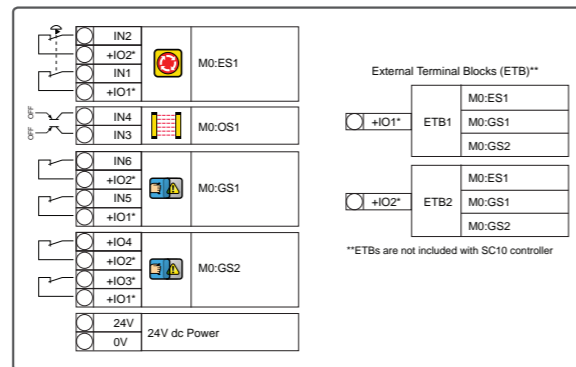

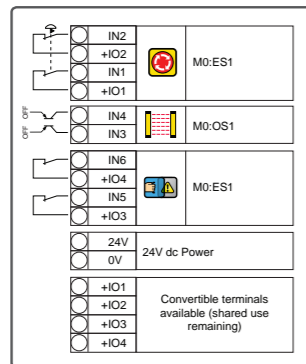

- 2x 6A independently controlled relays (RO1 and RO2)
- 3 NO sets of contacts each

- SC-XM3 Fast Programming and Swapout
- Backup copy of configuration, password, network settings
 - Download configuration without a PC; save time during panel build
 - Fast swapout to minimize downtime at swapout

Automatic Terminal Optimization (ATO)

- Allows for an increase from 10 to 14 inputs

Wire Diagram View for 14 Inputs with ATO

Safety Controllers – Models

I/O Hybrid Modules

I/O Hybrid Modules for PROFIsafe and CIP Safety

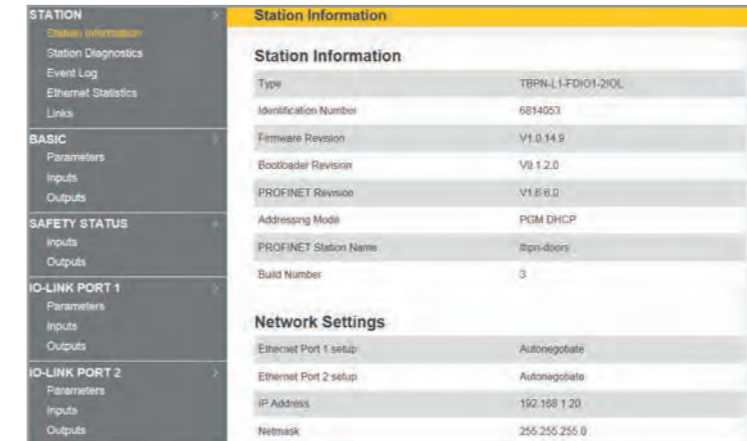

Turck's TBPn and TBIP hybrid safety block I/O modules combine standard and safety inputs/outputs in a single device. This enables the IP65/IP67/IP69K hybrid modules to be adapted flexibly to the actual signal requirement of your machine. The modules can operate with external safety PLCs or also as remote safety controllers. The configurable digital inputs/outputs are suitable for safety disconnections according to SIL3/PL e. This also applies to the second IO-Link master.

Safety Configurator

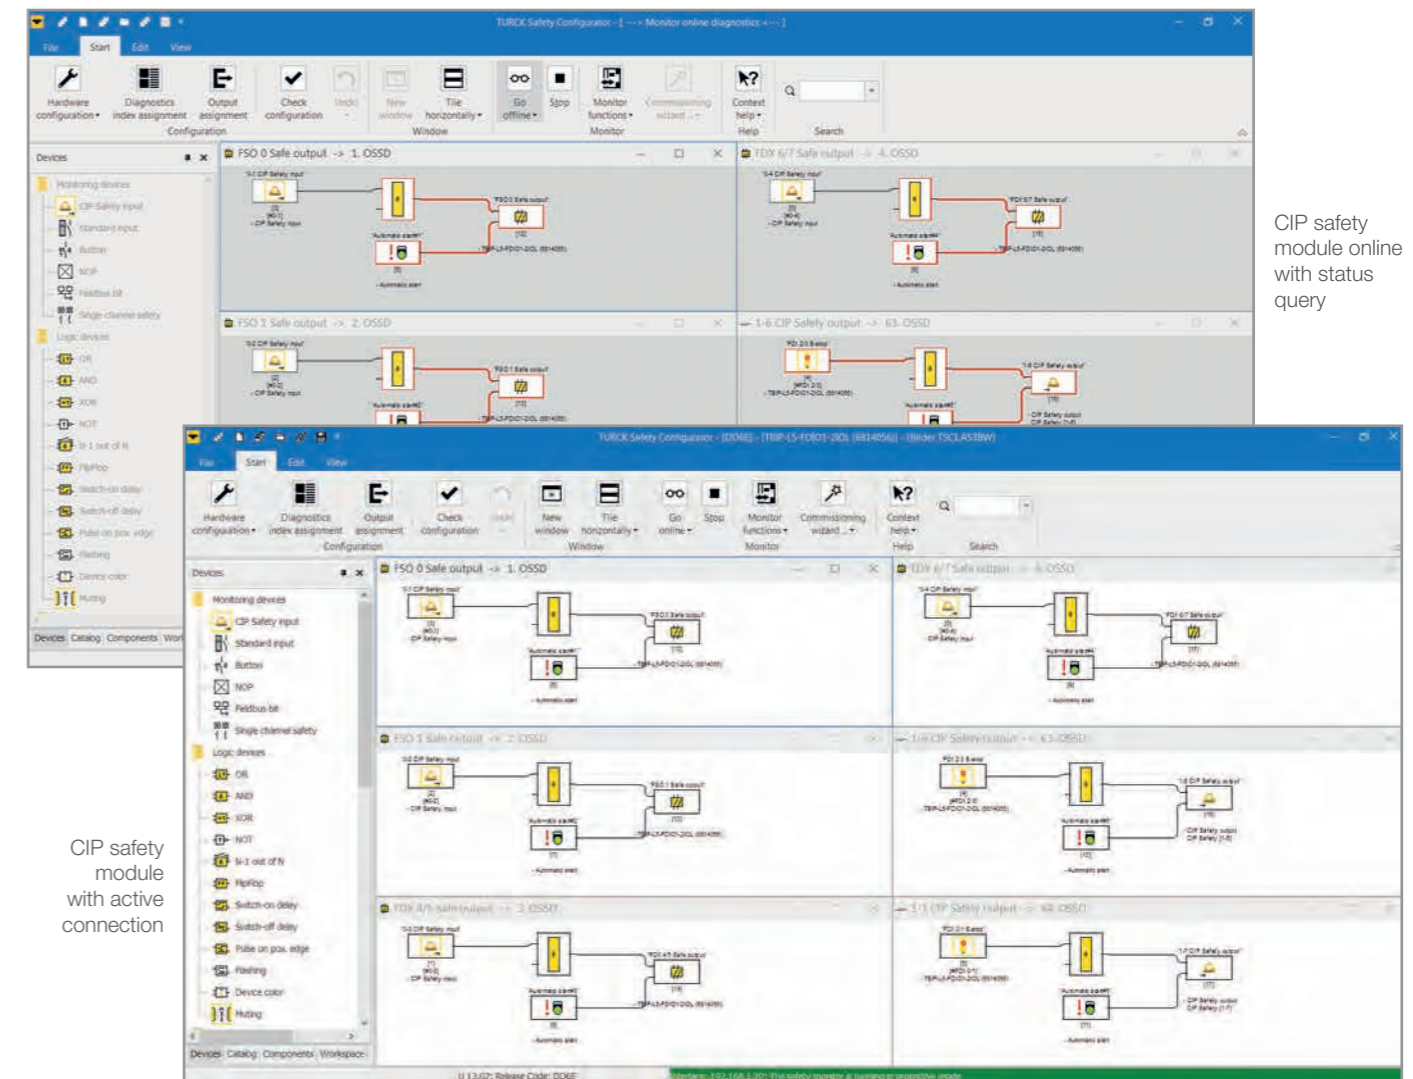

Easy installation and startup

The safety hybrid module is configured simply and quickly using the Turck Safety Configurator. The software preconfigures the module according to the I/O assignment. The standard configuration is based on the assumption that a safety controller is connected. However, the configuration can be adapted to your individual requirements at any time. For this Turck offers a large range of libraries, application and logic function blocks right through to start and monitoring function blocks.

Web server of the Profinet module

- Configuration of the safety features via a software tool
- Web server simplifies diagnostics and startup
- Integrated switch enables installation in a linear topology
- Extensive diagnostic function
- Possibility to preconfigure the safety application in the module
- Program transferable from one module to another

I/O Hybrid Modules – Models

Hybrid Block I/O Modules with Standard and Safety Inputs/Outputs

Model	Description
TBPN-L1-FDIO1-2IOL	Profinet/ProfiSafe hybrid module 2 dual-channel safety inputs; 2 configurable dual-channel safety inputs or PP/PM switching outputs, 4 DXP ports, power supply suitable for safety-related disconnection, 1 IO-Link master with power supply suitable for safety-related disconnection, 1 additional IO-Link master without disconnection
TBIP-L5-FDIO1-2IOL	Ethernet/IP/CIP safety hybrid module
Turck Safety Configurator	Software for configuring hybrid modules

Connectivity

Dimensional drawing	Model	Description	Length (m)
	VBRs4.4-2RKC4.880T-0,15/ 0,15/ TXL4000	Y-splitter, 2-way, 5-pin, female connector for connecting light screens to hybrid modules, male connector 5-way	0.15
	RKC8.704T-2-RSC4.5T/ TXY3013	Connection cable 8-pin to 5-pin for connecting an SSA illuminated emergency-stop switch, 8-pin directly to the hybrid modules	2
	RKC8T-2-RSC8T/ TXY3013	Connection cable 8-pin to 8-pin for connecting an SSA emergency-stop switch, 8-pin directly to the hybrid modules via a 6631295 Y-splitter	2
	RKC8.405T-2-RSC4.4T/ TXY3013	Connection cable 8-pin to 4-pin for connecting SX5-B safety laser scanner directly to the hybrid module	2
	VBRK8-2RSC4.870T-0,15/ 0,15/ TXL4000	Y-splitter, 2-way, 5-pin for connecting an SSA emergency-stop switch, 8-pin to the hybrid modules	0.15
	VBRK8-2RSC4.871T-0.15-0.15/ TXL4000	Y-splitter, 2 way, 5-pin for connecting SX5-B safety laser scanner directly to the hybrid module	0.15
	B8151-0/9 (female) BS8151-0/9 (male)	M12 x 1 round connector, field-wireable connector, straight, A-coded with screw terminals, 5-pin, PG9 screw-in thread, cable feed-through 6.0...8.0 mm	—
	BMS8151-0/PG9/YE (Field-wireable male connector) BM8151-0/PG9/YE (Field-wireable female connector)	M12 x 1 round plug connector, assemblable plug, straight, A-coded with screw terminals, 5-pin, yellow housing, metal union nut, cable passage 4.0...8.0 mm	—

Model	Description	Length in m
VBR-TXL4100	Junction system for connecting an Lxxx light screen, Y-splitter with cable, 2 x male connectors M12 x 1, 4-pin to 2 x female connectors M12 x 1, 4-pin and 8-pin	0.55
VBR-TXL4200	Junction system for connecting an Lxxx light screen, Y-splitter with cable, 2 x male connectors M12 x 1, 4-pin to 2 x female connectors M12 x 1, 8-pin	0.55

TBSB Safety Switch-Off Box

In order to provide a solution for safe switching off actuator voltage also in the field in customer applications TBSB for load currents up to 9 A. Safe switch-off is particularly advantageous for moving machine parts and helps to control the actuators in a simple manner.

- Die-cast aluminum housing, glass-fiber reinforced
- Fully potted module electronics
- High degrees of protection: IP65/IP67/IP69K
- Does not require to be installed in a cabinet
- Complies to SIL3, Ple
- Shock and vibration tested

TBSB Safety switch-off box

Model	Description
	Switch-off of actuator voltage V2, feedback output, switch-off input for emergency stop, switch directly or via hybrid modules
TBSB-L4-CS09	4 pole 7/8 inch plug and a max. current load of 9A
TBSB-L5-CS09	5 pole 7/8 inch plug and a max. current load of 9A
TBSB-LL-CS16	5 pole M12 power connector and a max. current load of 16A
TBSB-A1-CS12	5 pole push pull connector and a max. current load of 12A

Safety Switches

Hinge Switches

- One-piece sensor and actuator with hinge function
- Fast installation and set-up with repositionable safety switch point
- Stainless steel and IP69 available
- Matching hinges without sensing available for additional door support
- Available with up to 270° safety switch point operation range

Locking Switches

- Two-piece design with up to 2000N locking force for safety or process critical applications
- Flexible actuator options for misalignment
- Rotatable heads for flexible installation
- Mechanically coded actuator to minimize tampering
- Up to 15N latching force to position door prior to locking

Mechanical Switches

- Two-piece design with mechanical operator feedback
- Flexible actuator options for misalignment
- Rotatable heads for flexible installation
- Mechanically coded actuator to minimize tampering
- Up to 15N latching force to reduce downtime due to vibrating doors
- One-piece limit switches available

Non-Contact Switches

- Two-piece design where sensor and actuator do not contact
- In-Series Diagnostics (ISD) provides users with data from each sensor in a cascade chain
- Cascade up to 32 sensors while achieving the highest level of safety
- Accommodating to misalignment
- IP69 solutions available
- Available with the highest level of tamper resistance

Non-Contact Safety Switches

RFID SI-RF Switches

- Single door RFID non-contact gate/door sensing solution
- Basic, medium and high tamper resistance
 - Misalignment tolerance of 10 mm
 - Resistant to high vibration and operations with metallic shavings
 - On-board LED for status and diagnostics

Safety switches respond when a mechanical guard is opened. They feature “positive opening” contacts for high reliability regardless of environmental conditions and withstand attempts to override the switch and defeat the system.

RFID SI-RF Switches – Cascade

- Multiple door RFID non-contact gate/door sensing solution
- Basic, medium and high tamper resistance
 - Misalignment tolerance of 10 mm
 - Resistant to high vibration and operations with metallic shavings
 - On-board LED for status and diagnostics
 - Connect up to 32 sensors in cascade while maintaining the the highest level of safety

RFID SI-RF Switches – Cascade and ISD

- Multiple door RFID non-contact gate/door sensing solution
- In-Series Diagnostics (ISD) provides users with status and performance data from each sensor in a cascade chain. The ISD data collected is converted to IO-Link so it can be accessed with an HMI or similar device.

Users receive notification when an event has occurred as well as where in the series the event occurred. Events include the opening or closing of a door, door misalignment, wrong actuator, and a number of switch health attributes.

Safety Switches Selection

Choose a safety switch.

- Magnetic safety switches
- Plastic or metal compact safety switches
- Hinge safety switches
- Guard locking safety switches
- Rotary Lever, Plunger, Roller and Spindle-Mount Safety Limit Switches

Emergency Stop Buttons

Emergency Stop and Stop Controls

Emergency stop devices provide workers a means of stopping a device during an emergency by pushing a button or pulling a rope in order to prevent injury to personnel and material loss.

The red flashing illumination of the E-stop button visibly alerts operators which button was pressed so they can quickly and easily fix the problem to reduce downtime and only reset the button that was activated. When one button is pressed all other buttons turn red.

The 30 mm mount illuminated E-stop button has a unique 360 degree round housing, with a red button and yellow background, meeting worldwide safety standards. Models are also available in a non-lit, solid black base for additional safety applications.

30 mm Mount Electro-Mechanical E-Stop Push Button, IP65 rating

Rope Pull E-Stop Devices and Switches

- Switch activates if the rope is pulled, becomes loose or breaks
- Rugged plastic housing to withstand harsh environments or heavy-duty housing rated to IP67 for use outdoors
- Models available with additional solid-state auxiliary output for remote tension monitoring
- Models available with E-stop button with manual reset
- Tension indicators

Rope pull emergency stop switches, when used with steel wire rope, provide emergency stop actuation for conveyors and large machinery.

Rope Pull E-Stop Devices

Model	Maximum Rope Length	Safety Contacts	Auxiliary Contacts	Actuation	Housing Material

- RPA-CC ■ Clamps
- RPA-TA ■ Turnbuckles
- RPA-EB ■ Eye Bolts
- RPA-P ■ Pulleys
- RPA-S ■ Tensioning Springs

Hardware kits are available (RPAK)

Enabling Devices

A two-hand control safeguarding system will prevent the operator from approaching the machine while a hazard is present. Duo-Touch Run Bar provides an all-in-one solution. Operators can touch the Safety Touch Buttons on either side of the run bar to start or stop a process, or press the E-Stop button to completely halt the assembly line.

Manually operated safety control devices which, when continuously activated and used in conjunction with a separate actuating control, will allow the machine to function in manual operating mode. The handheld grip-styled switch is used for manual control of machine functions, including visual observations, minor adjustments, calibration and more.

Two-Hand Control

STB Self-Checking Touch Buttons

Model	Connection	Touch Surface Material	Output	Power Supply
STBVP6	2 m cable	Polyetherimide (PEI)	Solid-state 2 Complementary PNP (1 ON, 1 OFF)	10-30V dc
STBVP6Q5	4-pin M12 QD			
STBVR81	2 m cable	Polyetherimide (PEI)	E/M Relay 2 Complementary SPST (1 NC, 1 NO)	20-30V ac/dc
STBVR81Q6	5-pin M12 QD			

STB buttons include yellow field cover to prevent unintended switching. To comply to safety standards, STB buttons must be used with appropriate Two-Hand control modules, SC26, XS26 or SC10 Safety Controller or comparable Type IIIC Two-Hand system.
