Research Methods

SAGE Research Methods is the comprehensive methods library with more than 1,000 books, reference works, and journal articles; more than 550 case studies of real research projects; 120 teaching datasets to help students master data analysis through hands-on practice; and, coming soon, a collection of 120+ hours of instructional videos that bring research methods, statistics, and evaluation to life. The resources cover every aspect of research skills training and can help you support students and researchers through every step of the research process.

SAGE researchmethods

What every researcher needs

What are Research Methods, and why are they important?

Research Methods are the tools used to conduct research. Learning research skills are increasingly important for all students, not just those who will go on to do postgraduate study or pursue a career in academia, as employers value graduates who can carry out market research, understand statistics, and critically evaluate sources of information.

What does SAGE Research Methods do?

- **Supports students** taking research methods, statistics, or evaluation courses or conducting research projects by providing instructional content covering every step of the research process
- **Aids faculty research** by providing crucial resources to help design, execute, and write up research for publication in leading journals
- **Assists faculty teaching research methods** in creating supplemental reading lists to share with students
- **Helps librarians** teach information literacy, research skills, literature review, and writing workshops

Content and Features

- More than 1,000 of SAGE's **renowned book, journal, and reference titles** in Research Methods, Statistics, and Evaluation
- The **Methods Map** shows how methods terms and concepts are related.
- **Methods Lists** can be used to compile reading lists of selected books, book chapters, and journal articles for later review or to share with colleagues and students.
- Includes **over 50 short instructional videos** featuring leaders in the field

 *SAGE Research Methods* is an excellent resource for researchers and faculty alike. No self-respecting library should be without it!

– *Dr Paul Baines, Professor of Political Marketing, Cranfield University, UK*

cases

Learn from stories of real research

SAGE Research Methods Cases are stories of how real research projects were conducted. The collection provides more than 550 case studies, showing the challenges and successes of doing research, written by the researchers themselves. They explain why the researchers chose the methods they did, how they overcame problems in their research, and what they might have done differently with hindsight—the realities of research that are missing from journal articles and textbooks.

Each case:

- Is peer-reviewed
- Comes with learning objectives and discussion questions
- Can be used as a teaching tool to demonstrate a particular method
- Serves as inspiration to students who are preparing for their own research project

 Choice Magazine Outstanding Academic Title

datasets

Master data analysis through hands-on practice

SAGE Research Methods Datasets is a collection of 120 teaching datasets and instructional guides that give students a chance to learn data analysis by practicing themselves. This bank of topical, engaging practice datasets, indexed by method and data type, is optimized to use in classroom exercises or in exam papers, saving faculty hours sourcing and cleaning data themselves. The decisions researchers make when analyzing data can seem like a black box for students—through practicing analysis using real data from **SAGE Research Methods Datasets**, students can see how analytic decisions are made, helping them to become confident researchers.

- Quantitative datasets are taken from surveys and experiments and come with instructions to analyze the data in SPSS
- Qualitative datasets are taken from academic research projects, providing bite-sized examples from interviews, focus groups, documentary sources, and more, plus advice on how to approach analysis

Bring research methods, statistics and evaluation to life

Every librarian has encountered frantic students struggling with a paper or research project. We know that students have a range of preferred learning styles, and when students are already overwhelmed by the number of books or journal articles they need to read to complete their paper, more text-based resources may not be the most effective educational tools. *SAGE Research Methods Video* can help your students learn research skills by watching and listening and can help your teaching faculty deliver memorable research methods and statistics lessons by providing interactive and engaging visual content.

Content and Features

- Includes tutorials, case study videos, expert interviews, and more
- Covers every aspect of research skills training and guides students through every step of the research process
- Contains 120+ hours of content, 60% of which is exclusive to SAGE
- Students can access content at any time, and instructors can embed videos in their course management systems
- Includes an entire 15-hour introductory statistics course, which students can access again and again, ensuring they master the concepts

Business & Management

SAGE Business & Management meets the ever-changing needs of business students, professors, researchers, and librarians to keep up with the pace of business and management study. With a variety of different formats, including in-depth reports, downloadable data, case studies, and video, SAGE resources create a highly interactive, visual experience that easily leads even novice researchers through the business research process. ***SAGE Business & Management*** is the definitive suite for every business researcher.

Guiding students through the key issues in business & management

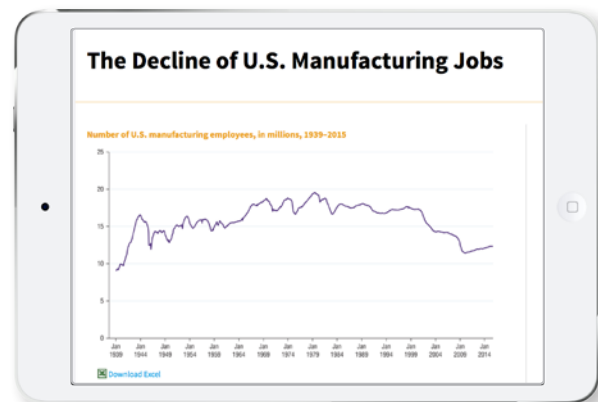

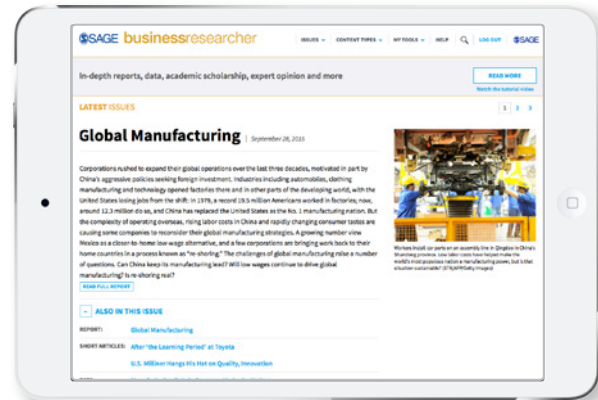

SAGE Business Researcher provides students with a comprehensive overview of current business and management issues as they begin their research journey. With succinct, timely, and digestible coverage, it provides an end-to-end view—ranging from an executive summary, background synopsis, current situation assessment, important debates, and a look ahead to issues on the horizon—complete with links to further academic resources and suggested related content.

In addition to rigorous, balanced reports, *SAGE Business Researcher* also delivers:

- Downloadable data for independent analysis
- Expert commentary that illustrates both sides of the issue
- Brief explorations of key related issues, adding depth and dimension to the topic
- A chronology and bibliographies to guide further student research

More thorough than newspaper or magazine articles and more timely than scholarly journals and reference works, *SAGE Business Researcher* helps students to delve into the issues in which they have enduring interest.

AM Adam Matthew

Primary sources for teaching and research

Video

Video lectures offer expert views on a range of topics; in *American History, 1493–1945*, users can watch a lecture and afterward discover the primary source documents discussed within the collection. Featured video lectures cover topics including: *George Washington*, the *Founding Brothers*, and *Inheriting the Revolution*. In addition, rare film footage from the early 20th century in *Victorian Popular Culture*, and on topical themes from 1950–1976 in *Popular Culture in Britain and America* also serve as an excellent resource to aid teaching and learning.

360-Degree Objects

View historical objects from every angle at the click of a button with Adam Matthew's 360-degree object features. Items include a Kinora from *Victorian Popular Culture*, artifacts from the Hooge Crater Museum in Ypres from *The First World War: Personal Experiences*, and branded goods from *Global Commodities*.

Mapping

Explore interactive and high-resolution maps in many Adam Matthew collections: from first drafts of the Australian coastline in *Empire Online* to exploring British government files in *Archives Direct* by selected continents.
