Sample IEP Goals for Students with TBI

Remember:

- These are only sample goals designed to provide guidance for goal development. All goals must be <u>personalized</u> for the student based on his/her needs.
- Often students with TBI need goals that go beyond any one specific academic area.
- Keep goals functionally oriented, outcome-based and measureable.
- Base goals on the student's strengths paired with student need.
- IEP goals may need to be rewritten more frequently than yearly to meet changing needs of student.
- State objectives as an increase in positive behaviors rather than the elimination of negative behaviors.
- Goals are intended to drive instructional needs and decisions. With every goal comes specially designed instruction to help the student achieve the goals.
