Agenda

1. Local control
2. Centralized control
3. Integrated management system
4. Building management system
5. Ancillary controls & modules
6. DVM chiller controls

2

Before we begin...

Important Notices

Specification Changes

Specifications are subject to change without prior notice. Every effort has been made to insure that the information included in this presentation is as accurate as possible at the time of it's publication.

Use of Training Material

This training module is not intended to replace Samsung service manuals, technical data books, installation/operation manuals or other factory documents.

For technical support issues, always contact a Samsung equipment provider. www.samsunghvac.com/downloads

Handling of Equipment

Only properly trained, HVAC professionals should attempt to install and start up any Samsung heating and air-conditioning system.

Use of Information

This presentation may only be used with authorization by Samsung HVAC. Unauthorized use, duplication or alteration of this presentation is prohibited.

High Voltage Caution:

Extra care must be taken when working on or around the system equipment due to numerous high voltage components. Whether installing or servicing Samsung RLC equipment in the field or while attending Samsung HVAC training classes which include powered simulators and equipment, be aware of the potential dangers of high voltage Use Caution

Control Wiring NASA Digital Control Layers

- F1 F2 – Set Layer:
 - ODU to IDU's & MCU'S
 - (incl. multiport EEV Kit)
 - Daisy chain connections
 - 0.5 VDC
- F3 F4 – Local Layer:
 - Wired Remote Controller to indoor unit
 - 12 VDC
- R1 R2 – Control Layer:
 - Outdoor Unit to upper-level controllers
 - 5 VDC
- Control Wire:
 - 16/2 AWG stranded with shield
 - Never use solid core thermostat wire

Local Control

©2021 Samsung All rights reserved. SAMSUNG

7

Remote Controllers

- Indoor units are controlled by digital, Remote Controllers
 - Wireless
 - No internal room temperature sensor
 - Wired
 - All wired controllers have built-in room temp sensors
- Power Line Communication
 - (12 vdc)

©2021 Samsung All rights reserved. SAMSUNG

8

Wireless Remote Controllers

Wireless controllers come with RAC systems, but must be purchased separately for CAC, FJM & DVM Systems

AR-EH04U	
▪ Long reach function	▪ Fan speed
▪ Single event timer setting	▪ Filter reminder setting
▪ Temperature setting	▪ Operation mode
▪ Wind-Free™* Cooling mode, if applicable	▪ Option code setting (Up to 4 indoor units)

AR-KH03U 360 Cassette	
▪ Long reach function	▪ Fan speed
▪ Single event timer setting	▪ Filter reminder setting
▪ Temperature setting	▪ Operation mode
▪ 360 Cassette directional airflow control	▪ Option code setting (Up to 4 indoor units)

*The Wind-Free™ unit delivers an air current that is under 0.15 m/s while in Wind-Free™ mode. Air velocity that is below 0.15 m/s is considered "still air" as defined by ASHRAE 55-2013 (American Society of Heating, Refrigerating, and Air-Conditioning Engineers).

©2021 Samsung All rights reserved.

SAMSUNG

9

Wired Remote Controllers

Features include:

- Louver position setting
- Partial/ all button lock capability
- Outing function
- Wind-Free™* cooling
- Long reach function
- Built-in room temperature sensor
- Control up to 16 indoor units on a single system or across multiple systems
- Service mode for monitoring, setup, addressing, etc.

Touchscreen Wired Controller

Features include:

- Color screen
- Dual set-point**
- Built-in room sensor
- Advanced heat pump auto changeover settings
- 7-day programmable scheduling
- Occupied/unoccupied and setback settings
- Group control of up to 16 indoor units
- Energy monitoring
- IR receiver
- Service mode settings and error code display with description
- WindFree™* function

Advanced Wired Controller

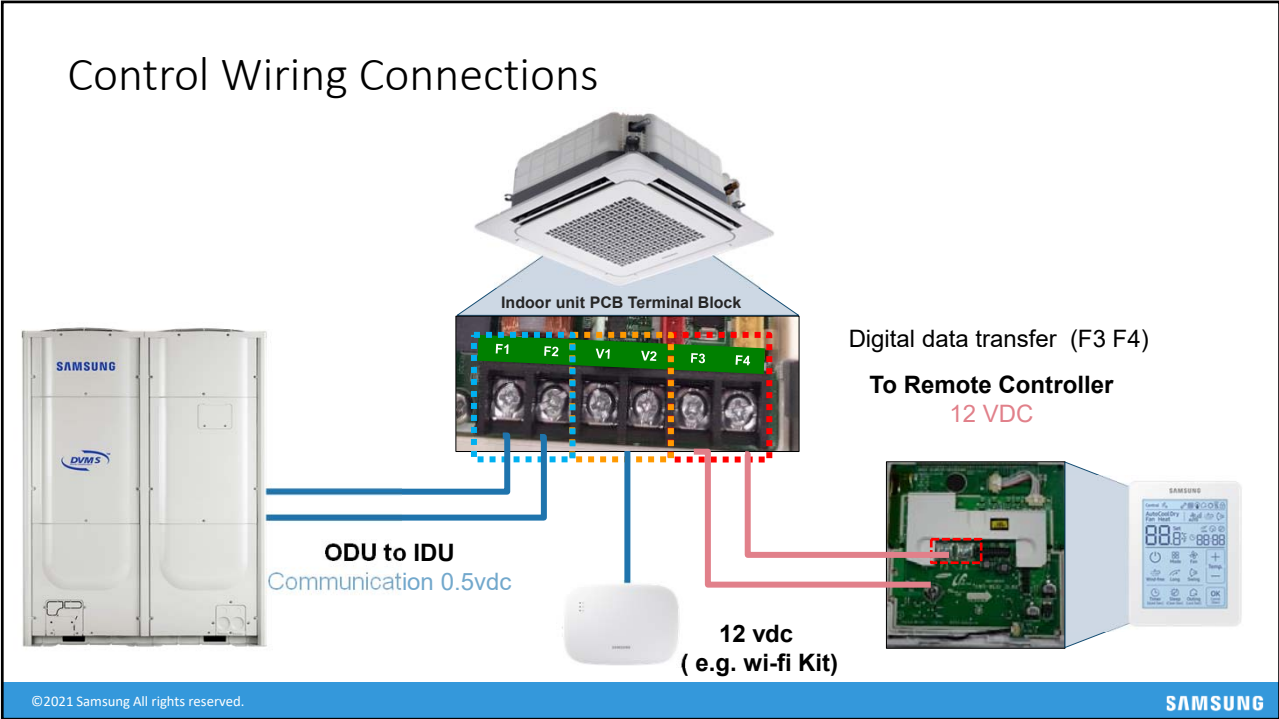

See specifications or manual for additional functions.

*The Wind-Free™ unit delivers an air current that is under 0.15 m/s while in Wind-Free™ mode. Air velocity that is below 0.15 m/s is considered "still air" as defined by ASHRAE 55-2013 (American Society of Heating, Refrigerating, and Air-Conditioning Engineers).

SAMSUNG

10

11

Wired Remote Controller – Built-in Sensor

- Room temperature control
- Default
 - Indoor unit return air sensor
- Options
 - Wired remote controller’s built-in room sensor
 - Average room temperature between the indoor unit and remote controller

MWR-SH11UN

MWR-WG00UN

Room temperature sensor

12

MWR-SH11UN “Simple Touch” Wired Remote Controller

- Built-in room sensor
- Backlit LCD display
- Wind-Free™* Control
- Clean Function
- Long Reach
- Error display
- Built-in infrared receiver
 - allows control with wireless remotes
- Button lock feature: All buttons or selected buttons
- Temperature display option
 - “Set Temperature”
 - “Room Temperature”
- Address and option code setting
- For detailed functions and operations refer to IOM manual

*The Wind-Free™ unit delivers an air current that is under 0.15 m/s while in Wind-Free™ mode. Air velocity that is below 0.15 m/s is considered “still air” as defined by ASHRAE 55-2013 (American Society of Heating, Refrigerating, and Air-Conditioning Engineers).

SAMSUNG

13

MWR-WG00UN Wired Remote Controllers

- Built-in IR receiver and temperature room sensor
- Dual Set Point (DSP) Setting (for supported indoor units)
- **Wind-Free™*** function settings
- 360 cassette functions
- Backlit LCD display
- Advanced HP auto changeover
- Error display
- Weekly operating schedule
- Upper/lower temperature limit setting
- Child lock
- Button lockout options
- Wireless remote-control restriction
- MDS (motion detection sensor) Indirect/Direct setting
- Service mode support
- Address and option code setting
- For detailed functions and operations refer to IOM manual

*The Wind-Free™ unit delivers an air current that is under 0.15 m/s while in Wind-Free™ mode. Air velocity that is below 0.15 m/s is considered “still air” as defined by ASHRAE 55-2013 (American Society of Heating, Refrigerating, and Air-Conditioning Engineers).

SAMSUNG

14

AR-EH04U Wireless Remote Controller

- Compatible with all indoor units equipped with an IR receiver
 - (excl. 360 cassette)
- 4 channels for individual unit control
- No built-in room temp sensor
- Powered louver control
- WindFree* function
- Address and option setting
- Ducted units require Wireless Receiver Kit
- 4-Way Cassette each louver can be set individually
 - 32° to 65°
- For detailed functions and operations refer to IOM manual

©2021 Samsung All rights reserved.

SAMSUNG

15

AR-KH03U Wireless Remote Controller

360 Cassette

- Air flow direction control for 360 cassettes
 - Individual booster fan control
- No built-in room temp sensor
- 4 channels for individual unit control
- Buzzer sound mute
- Address and option setting

©2021 Samsung All rights reserved.

SAMSUNG

16

MRW-TA External Room Sensor

- Provides for more accurate room temperature control when indoor unit is installed in high ceiling, or has outside fresh air ducted into the return,
- 2-wire connection to indoor unit PCB

©2021 Samsung All rights reserved.

SAMSUNG

17

MRW-TA External Room Sensor

- Replaces input from return air sensor and provides temperature sensing for remote controllers without internal sensor
- Applies to all indoor units
- Includes a 39 ft. 2-conductor connection cable

Unplug the IDU return air sensor (CN412) and plug in the MRW-TA wire in it's place

©2021 Samsung All rights reserved.

SAMSUNG

18

Centralized Control

19

WIFI Adapter MIM-H04UN

- “Samsung Smart Things” app required
- Android and Apple devices
- Control up to 16 indoor units
- Scheduling / 7 day
- Grouping On/Off control
- Energy Monitoring
 - Daily
 - Weekly
 - monthly

MIM-H04UN

21

WIFI Adapter MIM-H04UN Schedule and Settings

The first screenshot shows the 'Schedule' screen with 'TURN ON' at 01:45 PM and 'TURN OFF' at 05:45 PM, both for Mon, Tue, Wed, Thu, Fri. A plus sign is at the bottom right.

The second screenshot shows the RAC main menu with a mode selection pop-up menu. The pop-up menu includes: Auto (selected), Cool, Dry, Fan, and Heat. The background shows 'Home 73°F' and the main menu items.

The third screenshot shows the 'Options' screen with the following settings: 2-step cooling (OFF), Fast Turbo (OFF), Comfort (OFF), Single User (OFF), Quiet (OFF), Good Sleep (Off >), and Color of Wind (Off >).

22

WiFi Adapter MIM-H04UN

Energy Monitoring

- Display of power output
- Different than consumption found on utility bills
- View kWh by
 - Day
 - Week
 - Month

©2021 Samsung All rights reserved.

SAMSUNG

23

Touch Centralized Controller MCM- A300UN

- 7" Touchscreen Controller
- Maximum 128 indoor units
- Maximum of 16 systems on a single R1/R2 upper-level comm. Line
 - Control of multiple systems
- Can connect to one system on the set layer F1/F2
 - Control of one system

©2021 Samsung All rights reserved.

SAMSUNG

24

Touch Centralized Controller MCM- A300UN

- Creation of zones for indoor unit grouping
 - Max 12
- Digital output interlocked with indoor unit operation
 - Operation error
- SD card slot for data backup and future software updates
- 100 – 240vac power supply
 - Requires code compliant installation

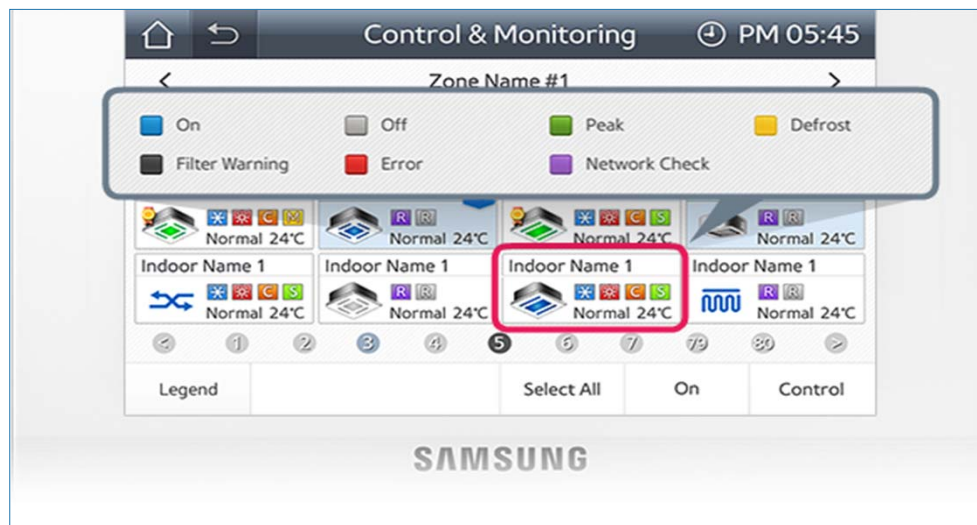

©2021 Samsung All rights reserved.

SAMSUNG

25

Touch Centralized Controller MCM- A300UN

©2021 Samsung All rights reserved.

SAMSUNG

26

Touch Centralized Controller MCM- A300UN

● Front

- On/Off button for LCD backlight
- LED indicator
 - Blue : Indoor unit's operation status.
 - Red : Indoor unit's error status.

SD card slot

● Bottom

- 485 comm.
- DO(Digital Output)
- Indoor unit's on/off status : DC 12V, 10mA
- DI-1(Digital Input-1)
- DI-2(Digital Input-2)
- Reset button
- Power source
- : Dry contact(voltage free)

©2021 Samsung All rights reserved.

SAMSUNG

27

Touch Centralized Controller MCM- A300UN

- To connect to multiple systems the controller must be connected to the R1/R2 Connection
- Must be daisy chained
- Maximum 16 systems on R1/R2
 - (single controller most common)
- 128 units maximum

©2021 Samsung All rights reserved.

SAMSUNG

28

Touch Centralized Controller MCM- A300UN

- Can be used in conjunction with other upper-level controls
 - DMS 2.5
 - BACnet
- Multiple central controllers can be used in the network.

©2021 Samsung All rights reserved.

SAMSUNG

29

Touch Centralized Controller MCM- A300UN

- Connection can be made at indoor or outdoor unit
- Not polarity sensitive
- Max of 64 units on F1/F2

©2021 Samsung All rights reserved.

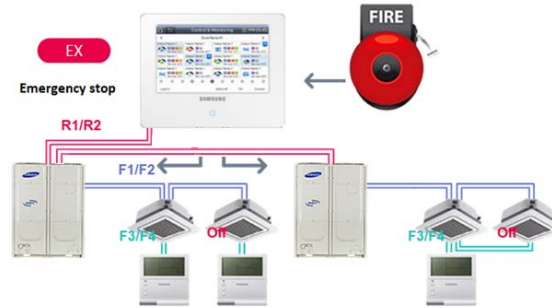

SAMSUNG

30

Touch Centralized Controller MCM- A300UN

External Device Interlock

- Simple operation control
- 2 Digital inputs
 - Stop signal (stops all equipment)
 - Signal to lock/unlock local controllers
- Interlock with external contact

©2021 Samsung All rights reserved.

SAMSUNG

31

Touch Centralized Controller MCM- A300UN

Three operation patterns

Pattern	Control	Contact Input
1	No function (Default setting)	Not applied
2	DI 1. Emergency stop operation. (Short : Stop / Open : standby) All indoor units stop operating and any command is ignored	Short / open contact
	DI 2. no function	
3	DI 1. All indoor unit ON/OFF control (Short : off / Open: on) ※ It is different from DMS 2.5 (Short : on / Open : off)	Short / open contact
	DI 2. Permitted/Prohibited remote controller use (Short : Permitted / Open : Prohibited)	
4	DI 1. All indoor unit ON control	Short pulse
	DI 2. All indoor unit OFF control

SAMSUNG

33

Integrated Management System

©2021 Samsung All rights reserved.

SAMSUNG

34

Data Management Server 2.5

- Directly compatible with
 - All NASA Systems
 - DVM, Current CAC & FJM,
- Fresh Access™ Split DOAS

©2021 Samsung All rights reserved.

SAMSUNG

35

Data Management Server 2.5

- Compatible with use of adaptors
 - Non-NASA Systems
 - With adaptor MIM-N01
 - Fresh Access™ ERV'S
 - With adaptors
 - MIN-N10
 - MXD-K200VN
 - RAC
 - With adaptor

Accessory are physically the same, but the software is different. Take care when installing to make sure the correct part number is with the correct components

MIM-R10UN

SAMSUNG

36

Interface Requirements

- Windows PC or mobile device utilizing any of the following internet browsers
 - Edge
 - Internet Explorer
 - Chrome
 - Safari
 - Firmware 2.9.0.15 or greater is required

©2021 Samsung All rights reserved.

SAMSUNG

37

DMS 2.5 Control & Monitoring

- Individual/Zone management up to 256 indoor units
- Remote control via LAN/Internet

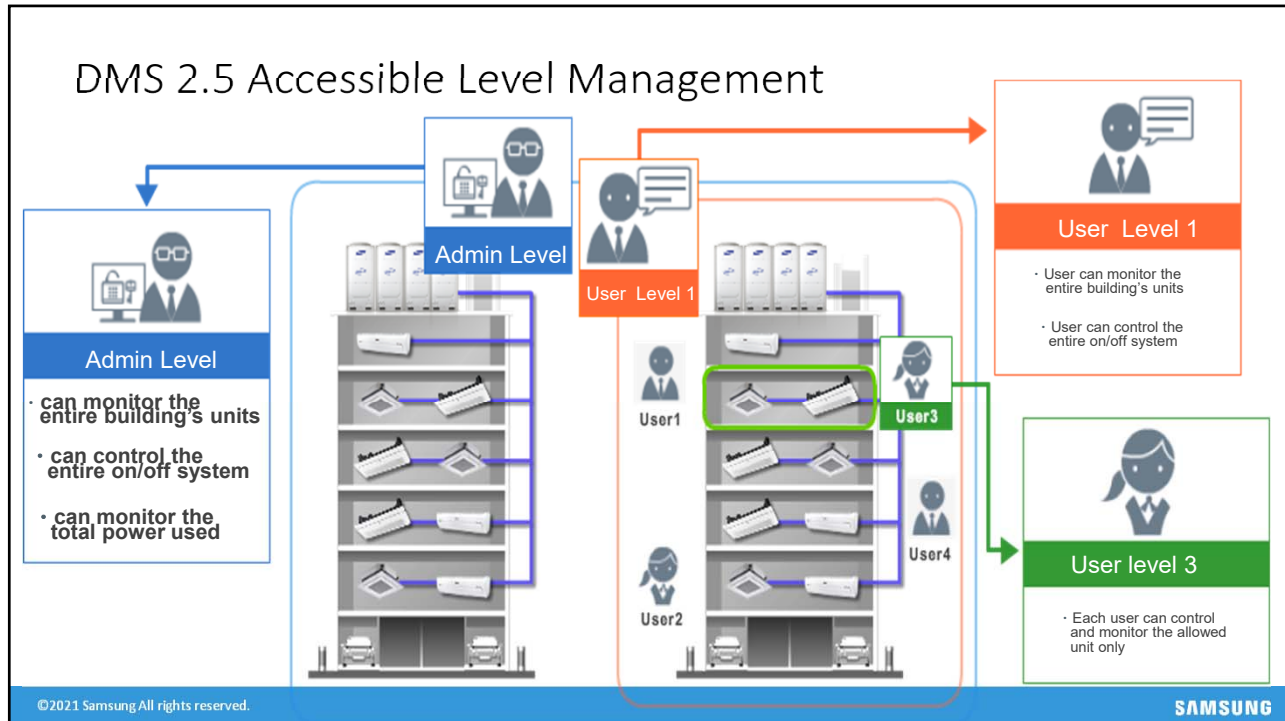

Example

- | | |
|--------|-------------------------------------------------------------------------|
| A zone | Cooling only / No remote controller /
Minimum cooling setpoint: 68°F |
| B zone | Cooling only / Remote controller use |

©2021 Samsung All rights reserved.

SAMSUNG

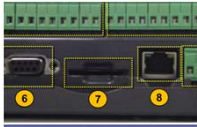

38

39

DMS 2.5 Recorded History Management

- Indoor unit operation history
- Schedule history
- Control logic operation history
- System environment setting history
- Error history
- SD card allows data storage when the DMS memory fills.

©2021 Samsung All rights reserved. SAMSUNG

40

DMS 2.5 Connections

No	Name	Description
1	Digital Input	All indoor unit operation and wired/wireless remote controller use are controlled according to the option switch setting. (10Channel) Have fixed addresses
2	Digital Output	DC signal voltage is output in case of error in more than one indoor unit and outdoor unit. Output voltage : 12VDC, 200mA 8Channel have fixed addresses
3	Reserved	Not use
4	Power	Power supply to DMS. 12VDC/3.0A (adapter)
5	Reset button	Press the reset button to restart DMS.
6		Only use for R&D
7	SD card slot	SD card slot for data storage and updating software
8	LAN port	LAN connection with upper-layer devices.
9	RS485	Connect for RS485 communication with devices (5 Channel)

©2021 Samsung All rights reserved.

SAMSUNG

41

DMS 2.5 Connections: DI/DO

- 2 dedicated DI
 - Emergency control,
 - Voltage free
- 8 dry contact inputs
 - open/short contact
 - Voltage free

©2021 Samsung All rights reserved.

SAMSUNG

42

DMS 2.5 Connections: DI/DO

- 2 dedicated DO
 - Operation/Error
 - 12vdc max. 200mA
- 6, Non dedicated 12vdc outputs
 - External interlocking systems

©2021 Samsung All rights reserved.

SAMSUNG

43

DMS 2.5 Connections: DI/DO

- 2 reserved outputs for future use

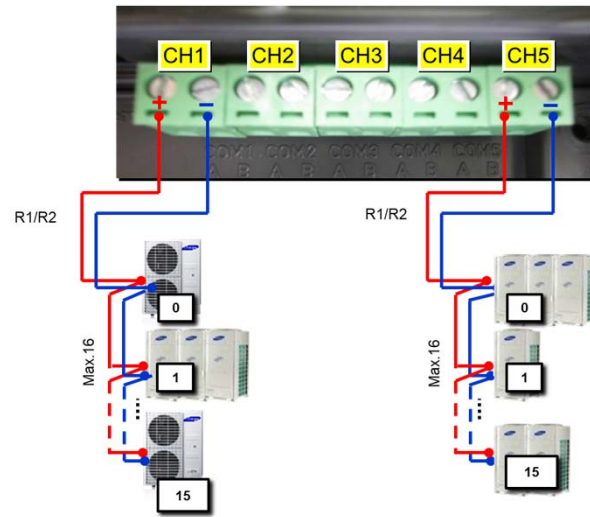

©2021 Samsung All rights reserved.

SAMSUNG

44

DMS 2.5 Wiring Detail

- 5 Channels
- Max 16 systems per channel
 - 16 Systems X 5 channels
 - Max 80 systems
- Any channel configuration
- Max 128 indoor units and MCU's per channel
- Max 256 indoor units Per DMS 2.5

©2021 Samsung All rights reserved.

SAMSUNG

45

DMS 2.5 Connections

- Dedicated computer or integrated with a building network

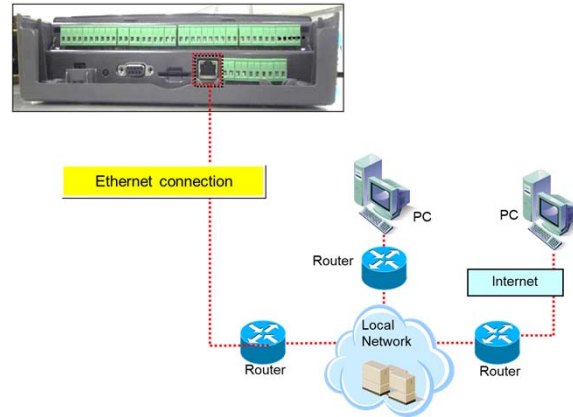

©2021 Samsung All rights reserved.

SAMSUNG

46

DMS 2.5 Connection Example

- Local or Remote Access available
- IP address of remote computers must be registered in the DMS
- VPN maybe required if using a computer in multiple locations

©2021 Samsung All rights reserved.

SAMSUNG

47

DMS 2.5 Power Distribution

- Maximum 8 MIM-B16UN per DMS 2.5
- Maximum 8 pulse type watt hour meters
- 1-year power distribution data storage
- Data query for
 - watt-hour, use time and use ratio
 - Current power consumption monitoring
- Current-type electricity meter support
 - (CT ratio input)
- Pulse Input Module required
- (PIM) MIM-B16UN
- Export data to Microsoft Excel

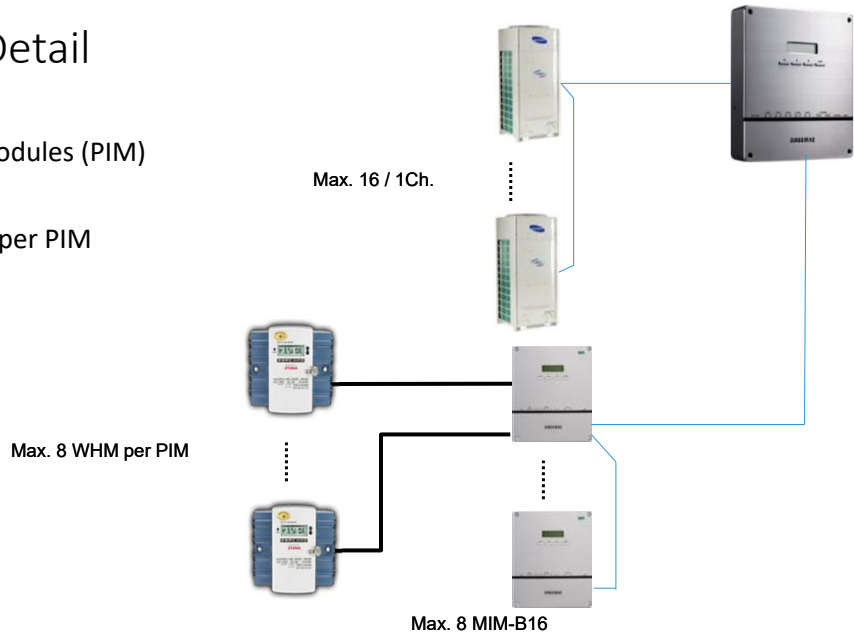

©2021 Samsung All rights reserved.

SAMSUNG

48

DMS 2.5 Wiring Detail

- Max 8 Power Interface Modules (PIM)
 - MIM-B16UN
- Max 8 Watt Hour Meters per PIM

©2021 Samsung All rights reserved.

SAMSUNG

49

DMS 2.5 Configurable Control Logic

User can edit control logic with different variable parameters

©2021 Samsung All rights reserved.

SAMSUNG

50

DMS 2.5 Configurable Control Logic

Sequence of Control Logic Setting

1. Definition

Name					
Period	2011	10	18	2012	10
Day	Sun	Mon	Tue	Wed	Thu
Time	0	+ 0	+ 28	+ 0	

1. Control logic name
2. Period
3. Day
4. Time

↓

2. Input condition setting

Compound factor	Factor	Comparison operator	Standard value	Duration (minute)
AND	Select a factor	>	Select a factor	# Cancel / Apply
AND	Select a factor	>	Select a factor	# Cancel / Apply
AND	Select a factor	>	Select a factor	# Cancel / Apply

1. Select a factor (Single, Arithmetic, Function)
2. Select comparison operator & value
3. Select duration (optional)

↓

3. Output command setting

Factor	Command
Select a factor	Select a factor
Select a factor	Select a factor
Select a factor	Select a factor

1. Select a factor
2. Select operation command

DMS 2.5 Configurable Control Logic

- Example 1 – Cool Mode
- Changing mode based on average room temperature vs. set temperature

IF
 The average room temperature is greater than the average set temperature
AND
 Outdoor temperature is greater than 51°F
 For 30 minutes

Compound factor	Factor	Comparison operator	Standard value	Duration (minute)
<input type="checkbox"/>	Averages INDOOR 1.Current temperature INDOOR 2.Current temperature INDOOR 3.Current temperature INDOOR 1.Outdoor Temp.	>	<input type="radio"/> <input checked="" type="radio"/> Averages INDOOR 1.Desired temp. INDOOR 2.Desired temp. INDOOR 3.Desired temp.	<input type="radio"/> Cancel <input checked="" type="radio"/> Apply 30
<input type="checkbox"/>	Select a factor	>	51 Select a factor	<input type="radio"/> Cancel <input checked="" type="radio"/> Apply 1
<input type="checkbox"/>	Select a factor	=	None Select a factor	<input type="radio"/> Cancel <input checked="" type="radio"/> Apply 1

Factor	Command
<input checked="" type="checkbox"/>	INDOOR 1.Mode <input checked="" type="radio"/> Cool Select a factor
<input checked="" type="checkbox"/>	INDOOR 2.Mode <input checked="" type="radio"/> Cool Select a factor
<input checked="" type="checkbox"/>	INDOOR 3.Mode <input checked="" type="radio"/> Cool Select a factor

THEN
Change the indoor units to COOL mode

* Setting Guide: In the initial setting, click 'Select a factor' and a factor editing window appears. Then click 'Select' button to set the device. After setting the device, the information in the 'Select a factor' is updated to the setting. Select the information to modify it.

DMS 2.5 Configurable Control Logic

- Example 4
- Activate an outside air device based on OA and indoor temperature

IF
Outdoor
temperature is
between 40 ~
90°F

THEN
Activate
Digital Output
(renamed as "AUX
FAN")

Setting control logic

Name: FAN ON

Period: 2015 | 6 | 24 | 2019 | 12 | 31

Day: Sun Mon Tue Wed Thu Fri Sat Daily

Time: 0 | 0 | 24 | 0

Compound factor	Factor	Comparison operator	Standard value	Duration (minute)
<input checked="" type="checkbox"/>	INDOOR 1.Outdoor temp.	>	40 Select a factor	<input type="radio"/> Cancel <input type="radio"/> Apply 1
<input checked="" type="checkbox"/>	INDOOR 1.Outdoor temp.	<	90 Select a factor	<input type="radio"/> Cancel <input type="radio"/> Apply 1
<input type="checkbox"/>	Select a factor	=	None Select a factor	<input type="radio"/> Cancel <input type="radio"/> Apply 1

Factor	Command
Aux Fan Status	On Select a factor
Select a factor	None Select a factor
Select a factor	None Select a factor

* Setting Guide: In the initial setting, click "Select a factor" and a factor editing window appears. Then click "Select" button to set the device. After setting the device, the information in the "Select a factor" is updated to the setting. Select the information to modify it.

Buttons: Add, Delete, Save

SAMSUNG

53

DMS 2.5 Configurable Control Logic

Basic logic tips

- If input conditions are true and output commands are being executed, the output command type cannot be changed for that unit
- Additional control logic programs must be created to undo what your logic programs may have done
 - Example 1: If you activated an ERV in bypass mode for "free cooling", make sure that there is also a program to turn it off later if room temperature is below set temperature.
 - Example 2: If you activated a valve for backup radiant heating with a DO, make another program to turn it off once set temperature is reached.

DMS Lonworks Gateway MIM-B18BUN

- Interface for Lonworks Building Management System
- Included DMS2.5 function
- Maximum 128 indoor units per gateway
- Number of objects monitored/controlled varies based on quantity of indoor unit
- Communication connection
 - Lower layer: RS485 Samsung Systems
 - Upper layer: Ethernet 10/100 Base-T To internet
- Lonworks layer: TP/FT-10A to BMS
- Lonworks limited to a max 600 points
 - Example 30 indoor units 20 points each

©2021 Samsung All rights reserved.

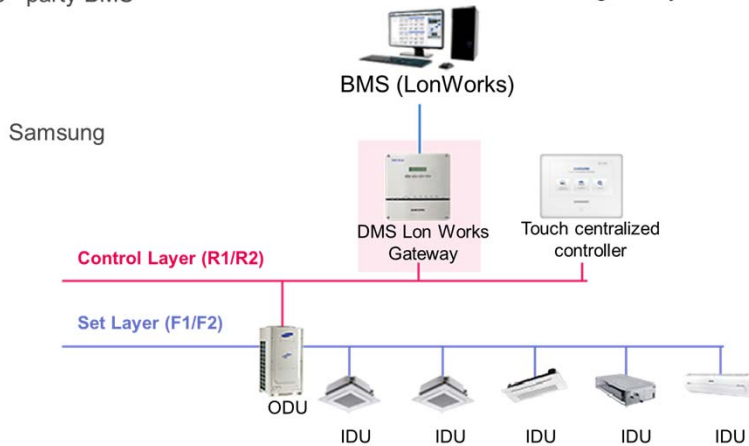

SAMSUNG

Intesis™ BACnet IP-MSTP Interfaces

■ Features

- Direct access to outdoor unit's communication bus.
- Automatic identification of the units present in the VRF system.
- Supports BACnet/IP and BACnet MSTP physical layers.
- Datalogging through external USB port.
- Configuration through IP or USB (Console) port.
- Front cover LED indicators to provide easy to check communication status on both the Ethernet and serial ports.
- Automatic updates for both Intesis MAPS and interface's firmware.
- Power supply not included. 24 vdc ($\geq 140\text{ma}$) recommended;

Model	Indoor Unit Quantity
INBACSAM0040000	1 - 4
INBACSAM0080000	1 - 8
INBACSAM0160000	1 - 16
INBACSAM0640000	1 - 64

SAMSUNG

69

Intesis™ Modbus RTU Interface

- Allows fully bi-directional communication between NASA units and Modbus RTU networks.
- Features
 - Configuration from both onboard DIP-switches and Modbus RTU.
 - Quick and easy installation
 - External power not required.
 - Simultaneous control of the AC unit by wired/wireless controllers and Modbus RTU.
 - Window contact function allows energy savings.
 - Included components: Intesis Gateway, Installation Manual

73

Wireless Signal Receiver – MRK-A10N

- To allow indoor units without an infrared receiver to use a wireless controller
 - Ducted/Console
 - On/Off control
 - Operation indication
 - Filter maintenance indication
 - 32' connector cable included
- If the unit is using a wired controllers this receiver will not be needed as both our wireless controllers can receive an infrared signal

©2021 Samsung All rights reserved.

SAMSUNG

74

Operation Mode Selector Switch – MCM-C200U

- Manual system mode select
- Heat Pump systems only
 - Cool – Heat – Auto setting options
- Installed in outdoor unit or in building
- Allows manual operation mode change preventing mixed operation
- Max. 328ft of wire between outdoor unit and MCM-C200U
- 3 conductor cable require

©2021 Samsung All rights reserved.

SAMSUNG

75

External Temperature Sensor – MRW-TA

- 2-wire connection to indoor unit PCB
- Replaces unit return air sensor
- Applies to all indoor units
- Includes a 39 ft. 2-conductor cable
- Provides for more accurate room temperature control when
 - Indoor unit is installed in a high ceiling
 - Fresh air is ducted into the return
 - When using a remote controller with no built-in space sensor

©2021 Samsung All rights reserved.

SAMSUNG

76

Interface Module Communication Adapter MIM-N01

- Allows connection of DVM S series systems to previous generation central control models
- Allow connection of non-NASA products to NASA communication upper-level controllers
- Installs in the outdoor unit
- Includes wire harness for
 - F1/F2
 - 12 VDC

©2021 Samsung All rights reserved.

SAMSUNG

77

Interface Module Communication Adapter MIM-N01

- Gives older equipment a R1/R2 connection
- Converts everything to NASA
- Address will be set with a dial,
- Each unit will need a unique address

SAMSUNG

83

External Contact Controller – MIM-B14

- Direct indoor unit control by external contact signal
- Function examples:
 - Hotel key card switch
 - Door/window switch
 - Occupancy sensor
 - On/Off ventilation control with indoor unit thermo-on/ thermo-off
- Indoor unit operation/error state output through relay contacts
- Emergency control with simple contact input
- Compatible with all DVM S indoor fan coil units

©2021 Samsung All rights reserved.

SAMSUNG

87

External Contact Controller – MIM-B14

- To control other devices based on indoor unit operation
- Output terminals are open/close contacts 0 volts
- Indoor unit option setting required
 - 02 installation option setting, segment 15
- Max load rating on the Operation & Error terminals
 - 250vac, 3A

©2021 Samsung All rights reserved.

SAMSUNG

88

External Contact Controller – MIM-B14

- MIM-B14 Controller operation output can be modified to one of the following at a time
- Operation On/Off
 - Output based on power status of connected indoor unit (On or Off including fan)
- Thermo On/Off
 - Output based on connected indoor unit’s current operation
 - Heating/Cooling trying to condition the space
 - Satisfied set point and in a “Thermo-Off” state
 - Fan mode – contact open
- External Heat control

SAMSUNG

94

Multi-Tenant Function Controller – MCM-C210N

- Used in applications where an indoor unit will not have power for long periods to allow full system operation.
 - If an indoor unit loses power the DVM S system will lock out on an E201 error code after 2 minutes
 - Timing can be changed to 12 or 24 hours
 - MTFC can keep the system online
- One MTFC per DVM S indoor unit
 - Monitors supply voltage to the indoor unit
 - Supplies auxiliary power to maintain communication during power loss
 - Powers the EEV closed during power loss to avoid water damage
 - Condensation
 - Drain pump not powered causing water overflow
 - 5 VDC to maintain communication
 - 12 VDC to power EEV closed for safety

©2021 Samsung All rights reserved.

SAMSUNG

95

Multi-Tenant Function Controller – MCM-C210N

- Controller power supply:
 - 24vac 50/60Hz transformer (not provided)
- Transformer must be powered from a separate circuit
- Indoor unit connection cable
 - Max length 118"
- One Wired Remote controller cannot be connected to multiple indoor units when using the MTFC
- The MTFC must be installed in an NEC approved enclosure (field provided)

For ceiling type: 1 WAY CASSETTE, 4 WAY CASSETTE and DUCT

99

MCR-SMA Motion Sensor – Mini 4-Way Cassette

- Samsung Comfort Logics (activated in “Premium” mode)
- Comfort Flow:
 - MDS prevents cassette from blowing directly on occupants by changing air flow direction
- Comfort Temperature:
 - When the temperature difference between the upper and lower parts of the room is large, the supply air louvers will lower to direct air downward
- Comfort Saving:
 - When no motion is detected, MDS will adjust set temperature to reduce energy consumption (maximum +3.6° F in cooling, and -3.6° F in heating)

Mode	Soft Off (minutes)	Hard Off (minutes)	Function Description
Standard	20	30	SOFT OFF: turns off indoor unit but can restart with motion detection before HARD OFF. HARD OFF: Turns unit off but will not turn back on after motion is sensed. Unit will need to be power ON with a unit controller.
	40	60	
	80	120	
	120	180	
Premium	20	30	SOFT OFF and HARD OFF are the same as Standard Mode. Samsung comfort functions are activated.
	40	60

Motion Detect Sensors

Pattern Learning Function Details

- Pattern Learning Function is implemented with ON/OFF function baseline (default OFF times)
- Pattern Learning Function is 3rd step
- If there is a pattern of leaving and not returning, the MDS will slowly decrease the amount of time for Soft OFF and Hard OFF saving energy with shortened operation times.

*ON/OFF Function 120min

*Cooling set point 64.4° F, 18,000 btu/h Mini 4way 1 set

Motion Detect Sensors

Indirect Air Flow

- People sensing O → avoid direct air flow
- People sensing X → direct air flow
- ⇒ Feeling comfortable

Floor Temperature Sensing

24VAC Thermostat Adapter MIM-A60UN

Features

- Allow control of indoor units with a standard 24VAC thermostat
- One adapter per indoor unit connected to F3-F4

Basic control of:

- Power: ON/OFF
- Mode: Heat, Cool, Fan
- Supports 1 or 2 stages cooling inputs, 1 or 2 stages heating inputs

Can be configured to operate the indoor unit as

- Primary heating source
- Secondary heating source
- Cooling only with heat from an external source only

External contact input to disable the unit when contact is opened

SAMSUNG

106

24VAC Thermostat Adapter MIM-A60UN

▪ Basic priority :

- Central control and wireless remote control will operate normally. If the indoor unit is controlled by central control or wireless remote control, the displayed indoor status on the thermostat and the actual status of the indoor unit may be different.

SW1	Operation priority setting
ON	Thermostat priority
OFF	Basic priority (default)

▪ Thermostat priority :

- The thermostat control will be applied first and will control the indoor unit based on the thermostat demand. Indoor units with this option set to ON will ignore wireless remote control and central control commands including central controller schedule, logic control, etc. Central controllers will only monitor indoor unit status.

Capacities and Specifications

DVM Chiller~

Available capacities - 10 | 15 ton modules
(Heat pump only)

- Connect up to 16 units for system capacities up to 240 tons
- 208-230V / 60Hz / 3 ϕ or 460V / 60Hz / 3 ϕ
- Outdoor unit static pressure up to 0.32" WC
- • Water temperature ranges
 - Cooling: 41°F - 77°F (5°C – 25°C) as standard, 14°F – 77°F (-10°C – 25°C)*
 - Heating: 77°F - 131°F (25°C - 55°C)**

~Requires FCU Interface Module

SAMSUNG

114

Samsung's DVM Chiller

Key Features

MIM-F00N

16 single 10 or 15-ton modular chillers can be combined to achieve 240-tons from a single system.

Capacity Modulation

Its compatibility and high space efficiency makes it perfect for replacing existing chillers as it cuts down maintenance costs and frees-up valuable space while expanding overall capacity.

Advanced Performance and Efficiency

Boasts a highly efficient BLDC inverter compressor with flash injection technology.

Flash Injection

Uses Samsung BLDC scroll compressors with flash injection technology for increased low ambient heating performance.

Control Options*

Optional Fan Coil Unit Control Kits and Fan Coil Interface Modules are available to control and integrate third-party fan coil units to Samsung central and local controls.

*Used with MIM-F00N FCU Control Kits, requires MIM-F10N Interface Module
