

THE GIANT AWAKENS

WHY SHOULD YOU EXHIBIT AND SPONSOR?

You'll meet hundreds of qualified buyers

The prolific Eagle Ford shale ranks among the Permian Basin and the SCOOP/STACK for rising rig count. As operators adapt to today's breakeven prices, **meeting business prospects face-to-face is the best way for your company to sell itself.**

Everyone does online research, yet when significant money is on the line, no one trusts a website alone. They check you out, talk with other clients, and negotiate directly before they buy. That's why you must have a presence on the exhibit floor at **DUG Eagle Ford.**

Exhibiting at **Hart Energy's DUG** conferences, the world's largest series of unconventional resource development events, **delivers exceptional value.**

It's all part of the "DUG experience."

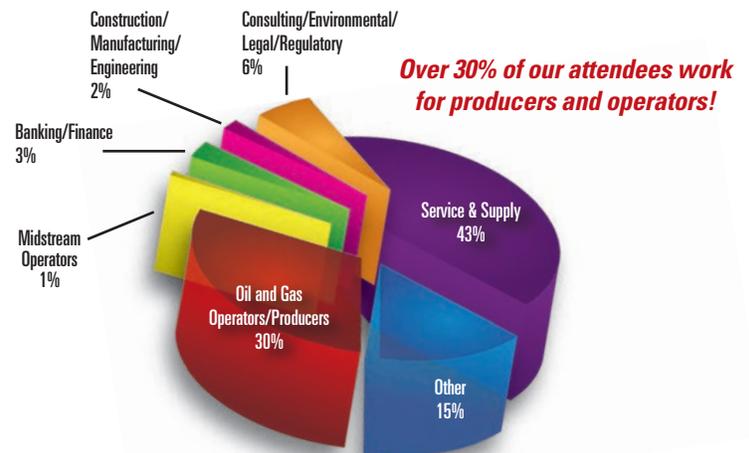

DUG Eagle Ford offers specific value for you

What makes **DUG Eagle Ford** exceptionally effective for you and your sales team? The quality of its attendees. This conference presents serious information and attracts serious players.

Who attends DUG Eagle Ford?

JOB FUNCTION

Executive/Management.....	31%
Engineering/Technical.....	17%
Purchasing/Procurement.....	3%
Administrative/Consulting/Legal.....	1%
Business Development/Marketing.....	30%

FEATURED SPEAKERS

Beth McDonald,
VP, South Texas
Asset Team,
*Pioneer Natural
Resources*

Patrick R. Oenbring,
CEO,
Hawkwood Energy

Jay Graham,
CEO,
*WildHorse
Resource
Development*

Jarl Pedersen,
CCO, *Port of
Corpus Christi
Authority*

Chip Simmons,
CEO, *Titanium
Exploration
Partners, LLC*

**World-class conference
creates effective
networking opportunities**

Hart Energy's slate of speakers at **DUG Eagle Ford** always delivers **high-value content** and attracts **high-quality audiences**. Before the sessions begin, during the breaks, at lunch, after the sessions end and throughout the day, hundreds of **high-level, serious oil and gas players** roam the exhibit floor.

Exhibitors and sponsors have ample opportunities to **meet the speakers and the hundreds of their industry peers** and colleagues in the audience.

Regional Highlights

Gigantic opportunities remain on-tap

Growing demand for U.S. natural gas (in power generation, petrochemicals and for export) is keeping commodity prices within money-making range for Eagle Ford producers.

- **Drilling rigs working in the Eagle Ford have roughly tripled** from a low of 29 in June 2016, rising past 85 rigs in mid-May this year.
- At least **10 pipelines with capacity of 2 million barrels per day** now deliver crude from the Eagle Ford to Corpus Christi, a less-congested alternative to the Houston market.
- In January, **Anadarko agreed to sell 155,000 net acres for \$2.3 billion to a Sanchez Energy** and Blackstone partnership. The area, which Sanchez calls Comanche Peaks, is contiguous to the Catarina property Sanchez successfully built up over the past two years.
- In May, **WildHorse Resource Development purchased ~111,000 net acres** next to its position in Burleson, Brazos, Lee, Milam, Robertson and Washington counties, making it the second largest Eagle Ford operator.
- ConocoPhillips' Eagle Ford position is the core of its U.S. shale business. With **completion costs down 40% since '14**, it has 3,500 locations it can drill at a cost of supply of less than \$40/bbl.
- Austin-based Venado Oil and Gas has invested over \$1 billion in Eagle Ford acquisitions since the year began and it partnered with capital investment firm KKR to build up its portfolio.

Sources: *Oil and Gas Investor*, Baker Hughes and *Forbes*

**Judge the quality of the
crowd for yourself**

Look at the statistics in this brief. Review the titles and companies of the producer and operator personnel who've registered for recent **DUG Eagle Ford** conferences. Then ask yourself whether this is the right audience for your selling proposition.

Learn more at **DUGEagleFord.com**
