# SAP Global Trade Services Management of Legal Changes

## Brexit – CDS (Customs Declaration Services)

The screenshot displays the SAP ONE Support Launchpad interface. The main content area shows a knowledge base article titled "GTS: GB: Implementation of new customs system for export: Customs Declaration Services (CDS)". The article is filtered by "Country/Region: United Kingdom (GB)", "Component: SLL-LEG", and "Complexity: High". The planned delivery date is 30.04.2021, and the company status is "New".

**Introduction**  
HM Revenue and Customs (HMRC) is planning to replace the current IT System CHIEF with a new system called Customs Declaration Services (CDS). All export declarations have to be filed to this new system when ready.

**Business Background/Impact**  
You are using SAP GTS to declare exports of goods to the British Customs CHIEF system (Handling of Export Freight) with the required declarations for goods leaving the UK/EU and complete customs information electronically.

**Expected Solution**  
According to the current plans of the authorities the final release of non-critical functionality planned for the end of March 2020.  
*Based on current, but not final, communication from authorities CHIEF and CDS are being dual run and it has been decided to continue to run both platforms beyond December 2020.*

- The upgrade is planned to be made available based on minimum Support Package 11 for the current SAP GTS Release 11.0. Notes will be provided until tests are completed.
- SAP GTS with CDS will convert to the message format XML and thereby to a Unicode character set.
- On the Seeburger BIS6 also an upgrade and implementation of the new solution will be required.

This includes the introduction of a new technique to hand over XML files. Legal Disclaimer | Versions | The IT Status Log | Change Status between SAP GTS and the Seeburger BIS. See note 2732006 (Changeover technique for the transfer of XML files and

# SAP Global Trade Services Management of Legal Changes

## Brexit – Import declarations in CDS

The screenshot displays the SAP ONE Support Launchpad interface. The main content area shows a knowledge base article titled "GTS: GB Import declarations in CDS for Transports from Great Britain to Northern Ireland". The article is categorized under "GTS \*". The left sidebar provides a list of items, filtered by "Country/Region, Component, Keywo...". The article details include:

- Country/Region: **United Kingdom (GB)**
- Planned Delivery Date: **30.11.2020**
- Company Status: **New**
- Component: **SLL-LEG**
- SAP Note: **Planned**
- Complexity: **High**
- Manual Activity: **Yes**

The article content is divided into sections: **Introduction**, **Reference**, and **Expected Solution**.

**Introduction**  
After the end of the transition period in December 2020 goods moving from Great Britain to Northern Ireland will be subject to the need to file an import declaration towards Customs Declaration Service (CDS). CDS being the new declaration system of HMRC still being ramped up.

**Reference**  
The requirement results from the Northern Ireland Protocol (NIP) is defunct appendix to a the Brexit withdrawal agreement finalised in November 2018.

**Expected Solution**  
Solution will focus on the requirements for filing import declarations from Great Britain to Northern Ireland in the context of NIP. This includes the introduction of CDS. The introduction of CDS requires enhancements and upgrade of Seeburger BIS components. It is planned to deliver SAP GTS related changes via notes. Upgrade to a recent SAP Support Package is recommended.

At the bottom of the article, there is a "Change Log" section and a footer with links for "Legal Disclaimer", "Versions", "Status Log", and "Change Status".

## SAP Global Trade Services Management of Legal Changes

### Brexit

2546068 - GB\_UK Withdrawal from the European Union (Brexit)

<https://launchpad.support.sap.com/#/notes/2546068>

2749671 - BREXIT: Guidelines in case of "no deal"

<https://launchpad.support.sap.com/#/notes/2749671>

### **SAP GTS**

2912027 - SAP GTS: Withdrawal of the UK from the EU (Brexit) - recommended actions for transition period

<https://launchpad.support.sap.com/#/notes/2912027>

## Current Status (20.10.2020) – 72 days ahead of Brexit

- The UK and EU are still negotiating the Free Trade Agreement (FTA). The UK had set a deadline of the 15<sup>th</sup> October to conclude this (obviously this has passed) whereas the EU have said the end of October (agreement on fishing quota)
- However, on Friday UK did announce that trade talks were “over” and to prepare for an Australian type deal and face to face talks were cancelled
- Government is preparing a letter to be sent to 200,000 organisations trading with the EU member states explaining new tax and customs regulations
- No-Deal scenario likely
- SAP still carry on monitoring the political landscape

# Hot topics: APAC and Americas

Alain Schnetzer, Director, Customs & International Trade  
PwC US

**Alain Schnetzer**  
Director, Customs &  
International Trade  
PwC US

# Agenda

- 01 China - EU Trade Relationships
- 02 China - U.S. Trade Relationships
- 03 China - Unreliable Entity List
- 04 Update APAC
- 05 U.S Trade Relationships

# China - EU Trade Relationships

**Objective:** EU - China 32nd round of negotiations on a China-EU investment deal

**Timeline:** Currently under negotiation and to be completed by the end of 2020

## Observations

- China limited growth in terms of GDP and risk observed by Chinese government of U.S. decoupling
- Market access is a privilege and not a right
- Continuous development and reinforcement of China's 2025 strategy
- Negotiations with the EU may not be compatible with WTO obligations
- Stronger collaboration in other areas (security, politics, economy...) may rely on a successful trade and investment deal

## What does that mean for you

- Threat to market access and local presence
- Threat to fair competition
- Additional controls in regard to labour and workforce
- Continuous focus on joint business relationships

# China - U.S. Trade Relationships

**Objective:** Changes to the EAR to restrict use of U.S. technology

**Timeline:** Entered into force on 6/29/2020

## Observations

- U.S. sanctions still in place
- Extension to export controls and license requirements with China, Russia and Venezuela to prevent U.S. technology to be used in military applications
- Introduction of additional control on military end-user and not only military end-use
- Extension of the end-use definition to “any item that supports or contributes to the operation, installation, maintenance, repair, overhaul, refurbishing, “development,” or “production,” of military items”, compared to “development” and “production” only
- Applies mainly to ECCN categories of materials processing, electronics, telecommunications, information security, sensors and lasers, marine-related items, and aircraft and propulsion.
- Integration of EEI export filing for low value shipments (below \$2,500) and ECCN

### What does that mean for you

- Removal of some license exceptions
- Increased scrutiny for shipments containing U.S. origin materials, products or technology
- Increased need for a U.S. re-export and de minimis determination

# China - Unreliable Entity List

**Objective:** Introduction of Chinese Unreliable Entity List to protect Chinese domestic investment

**Timeline:** Entered into force on 9/19/2020

## Observations

- Released by the Ministry of Commerce of China on September 19, 2020, effective immediately as a result of the Wechat and TikTok bans.
  - Only foreign entities and individuals (excluding foreign invested enterprises incorporated in China) may qualify as “unreliable entities”.
  - Unreliable defined as “acting against normal market principles to suspend normal transactions with or take **discriminatory measures** against Chinese companies, entities or individuals, causing material damages to the legitimate interests of such companies, entities or individuals”.
- Criteria and procedure for an addition or removal not published
- Extra-territorial application unclear
- Penalties for violations not published

## Impact

- Prohibition or restriction on all China-related import and export activities
- Prohibition or restriction on investment in China
- Travel bans, visa restrictions, financial penalties or any other measures that the authority deems as necessary.
- Update to contractual agreements to reflect “force majeure” in case of conflict of interest between U.S export controls and China Unreliable Entity List

# Update APAC

## Observations

- China pursues negotiations with Cambodia on \$10b FTA
- Canada drops negotiations of FTA with China despite being 2nd largest market after the U.S.
- Vietnam is the EU's second largest trading partner in the Association of Southeast Asian Nations (ASEAN) after Singapore, with trade in goods worth €45.5 billion in 2019. The Vietnam - EU FTA entered into force on August 1, 2020
- Risk of decoupling (transition from China to Vietnam, Malaysia and Eastern Europe due to tariffs)
- U.S may rejoin the Trans-Pacific Partnership (TPP) to counterbalance APAC trade relationships after Trump's withdrawal in 2017

## Impact

- Origin determination for EU - Vietnam needed to realize the benefits associated with the FTA
- APAC is a dynamic area in terms of FTAs to watch out for
- Rethink supply chains and sourcing alternatives to reduce risk of losing manufacturing capabilities or market access

# U.S. Trade Relationships

**Objective:** Transition from NAFTA to USMCA

**Timeline:** Entered into force on 7/1/2020

## Observations

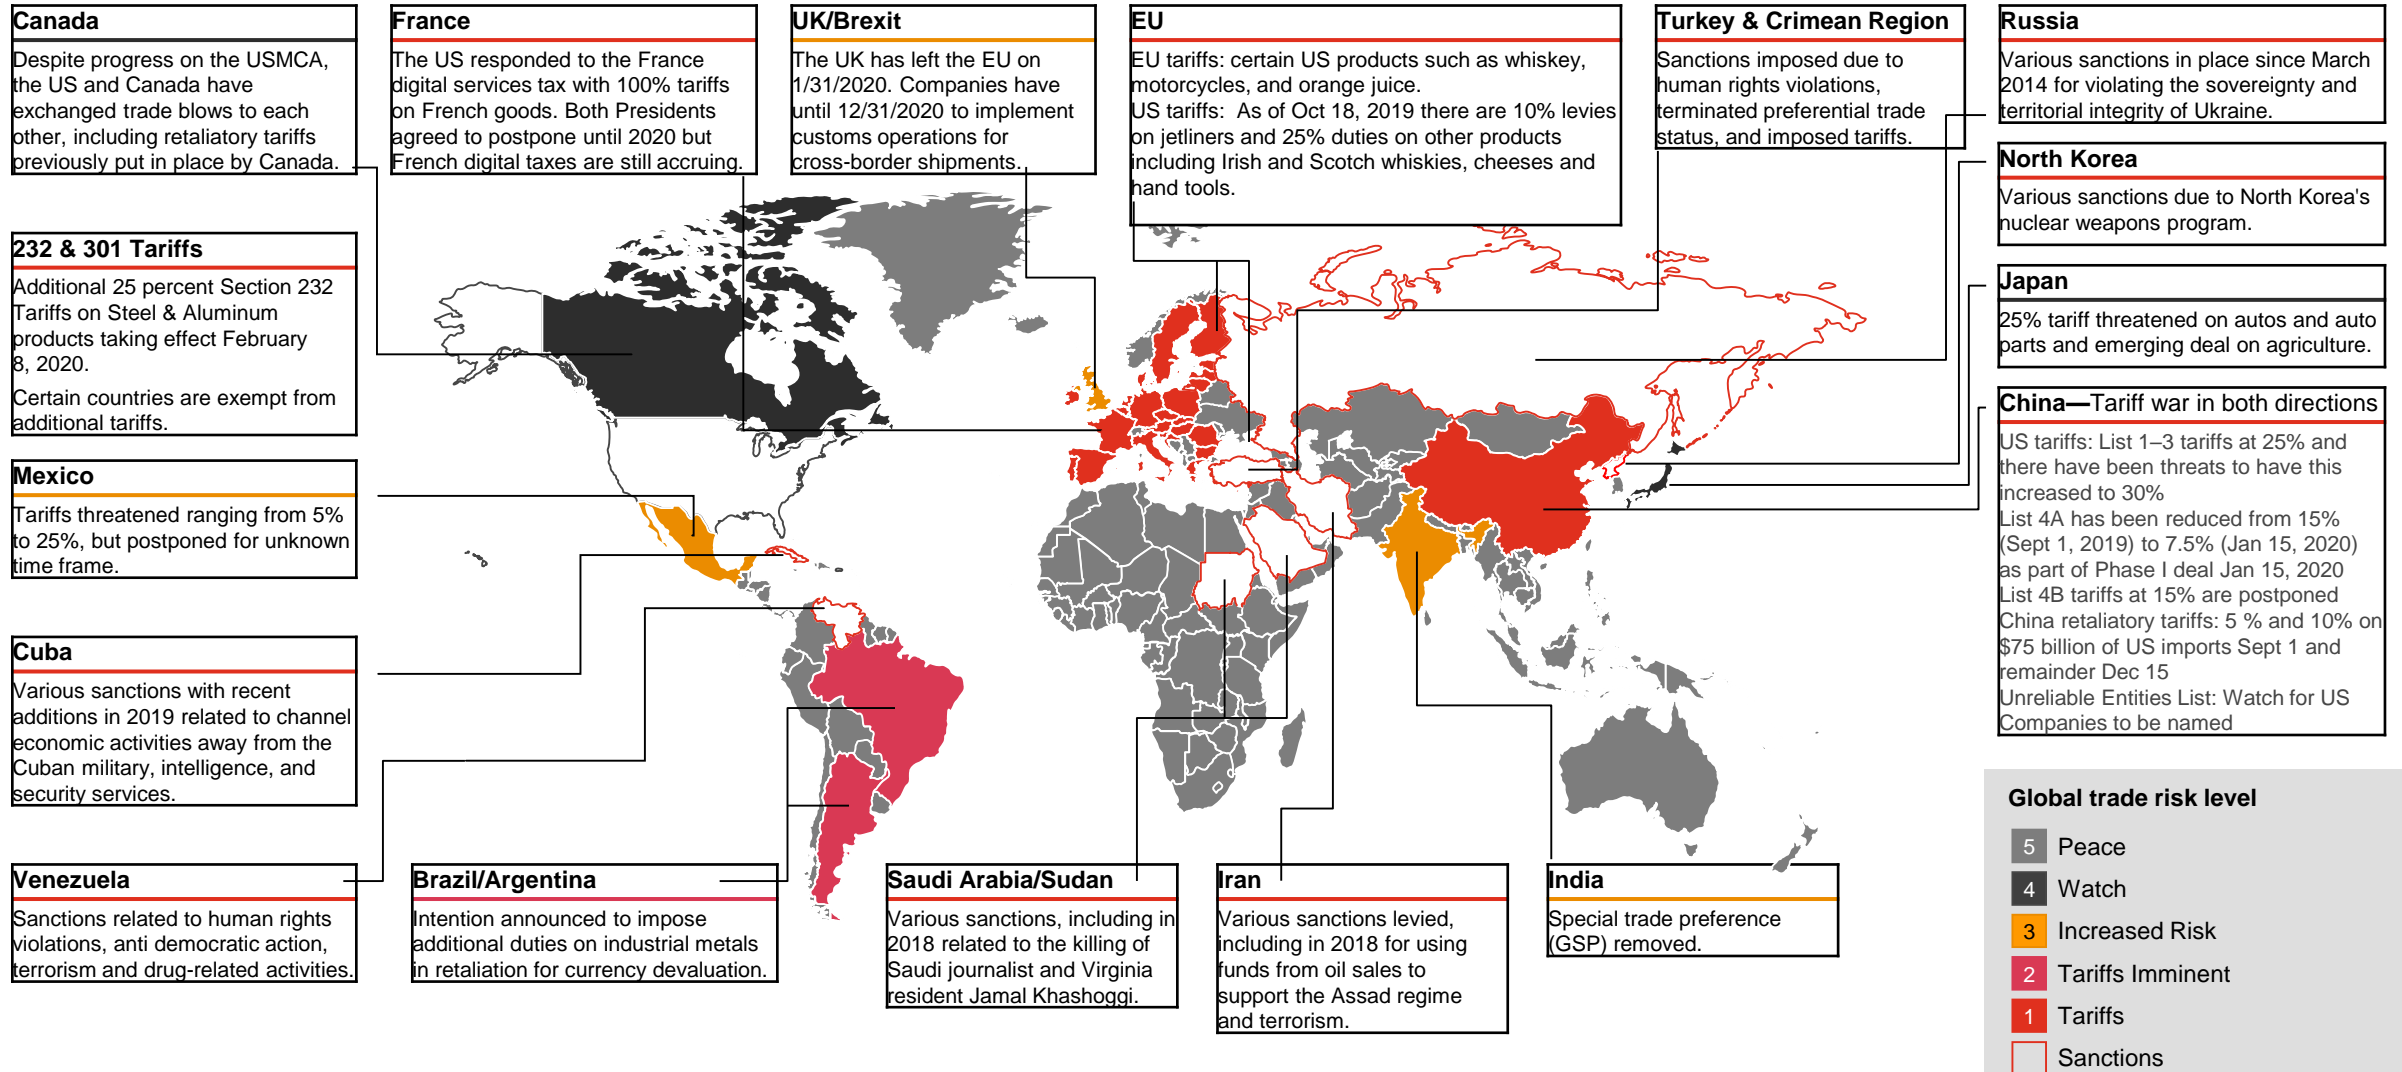

- USMCA entered into force 6 months earlier than anticipated
- New rules of origin focus mainly on automotive, but also require additional controls such as:
  - Increase of regional sourcing from 62.5% to 75%
  - 45% of the parts must come from a high-wage factory (\$16/h min)
  - Trading partner
- Agreement renewal by each party to take place every 6 years, automatic expiration after 16 years
- Certification and forms have not been defined and subject to interpretation

## Impact

- Update to rules of origin and new calculation required
- Update to certificates and forms

# Additional Trade Considerations

# Global trade analytics

Krisztina Nagy, Customs & International Trade  
PwC Switzerland

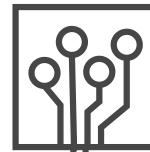

**Krisztina Nagy**  
Customs & International Trade  
PwC Switzerland

# The world of tax is changing **completely.**

## Why?

## Digital

Changes in supervision and control

Changes in business models and economic actors

Based on public figures, we estimate that the **tax authorities** of **G20** countries are currently spending **CHF 30 Bn** on **digitising themselves** (data lakes, predictive analytics, combining datasets for integrated views) **and their staff** (new profiles, upskilling existing staff).

That is only slightly more than another great disrupter:

Who? 

# Why are they investing all that money?

## The perfect storm of supervision

More digital data

Better access to data

Greater power to process

Reduction in the **cost of supervision**

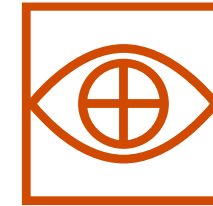

What does this now mean for business?

Authorities can process (and share) more data, more quickly.

There will be a drive away from sample testing, towards testing all relevant data and trend prediction.

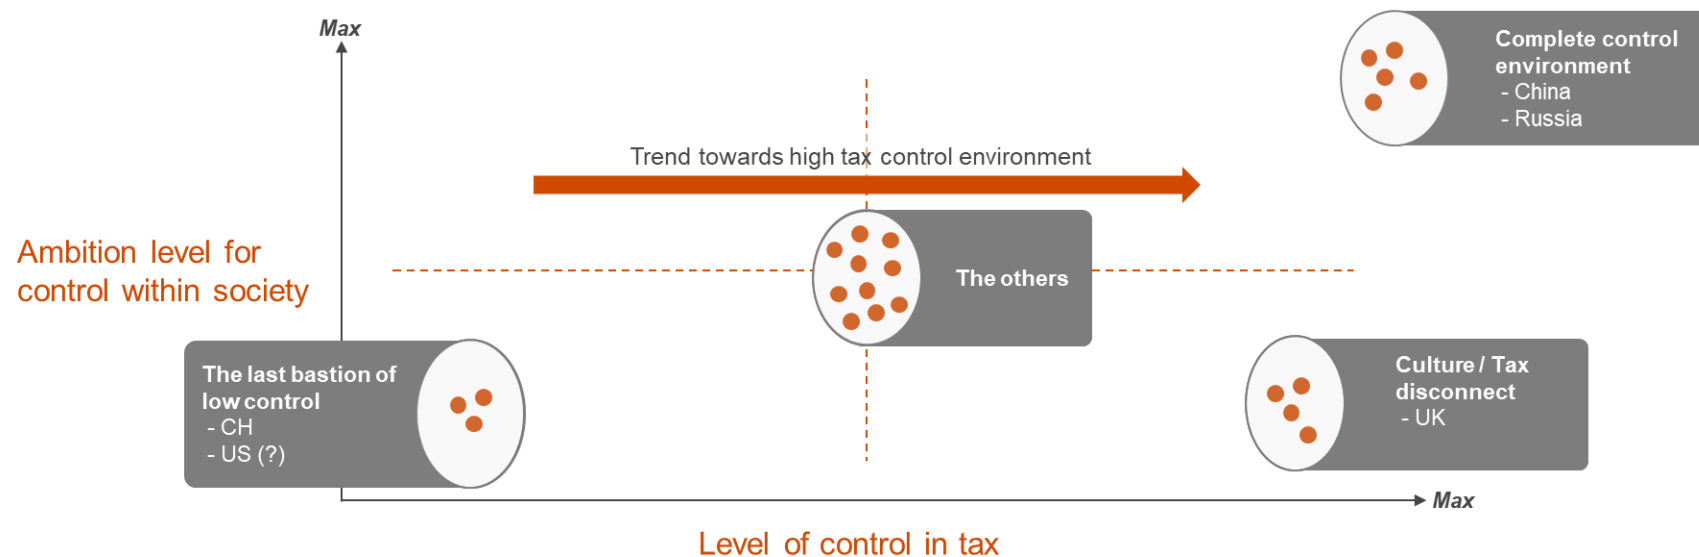

Non compliance (and incoherence) **will** be identified.

As they transform, authority expectations of your own capabilities will intensify.

# But not all countries are moving at the same pace

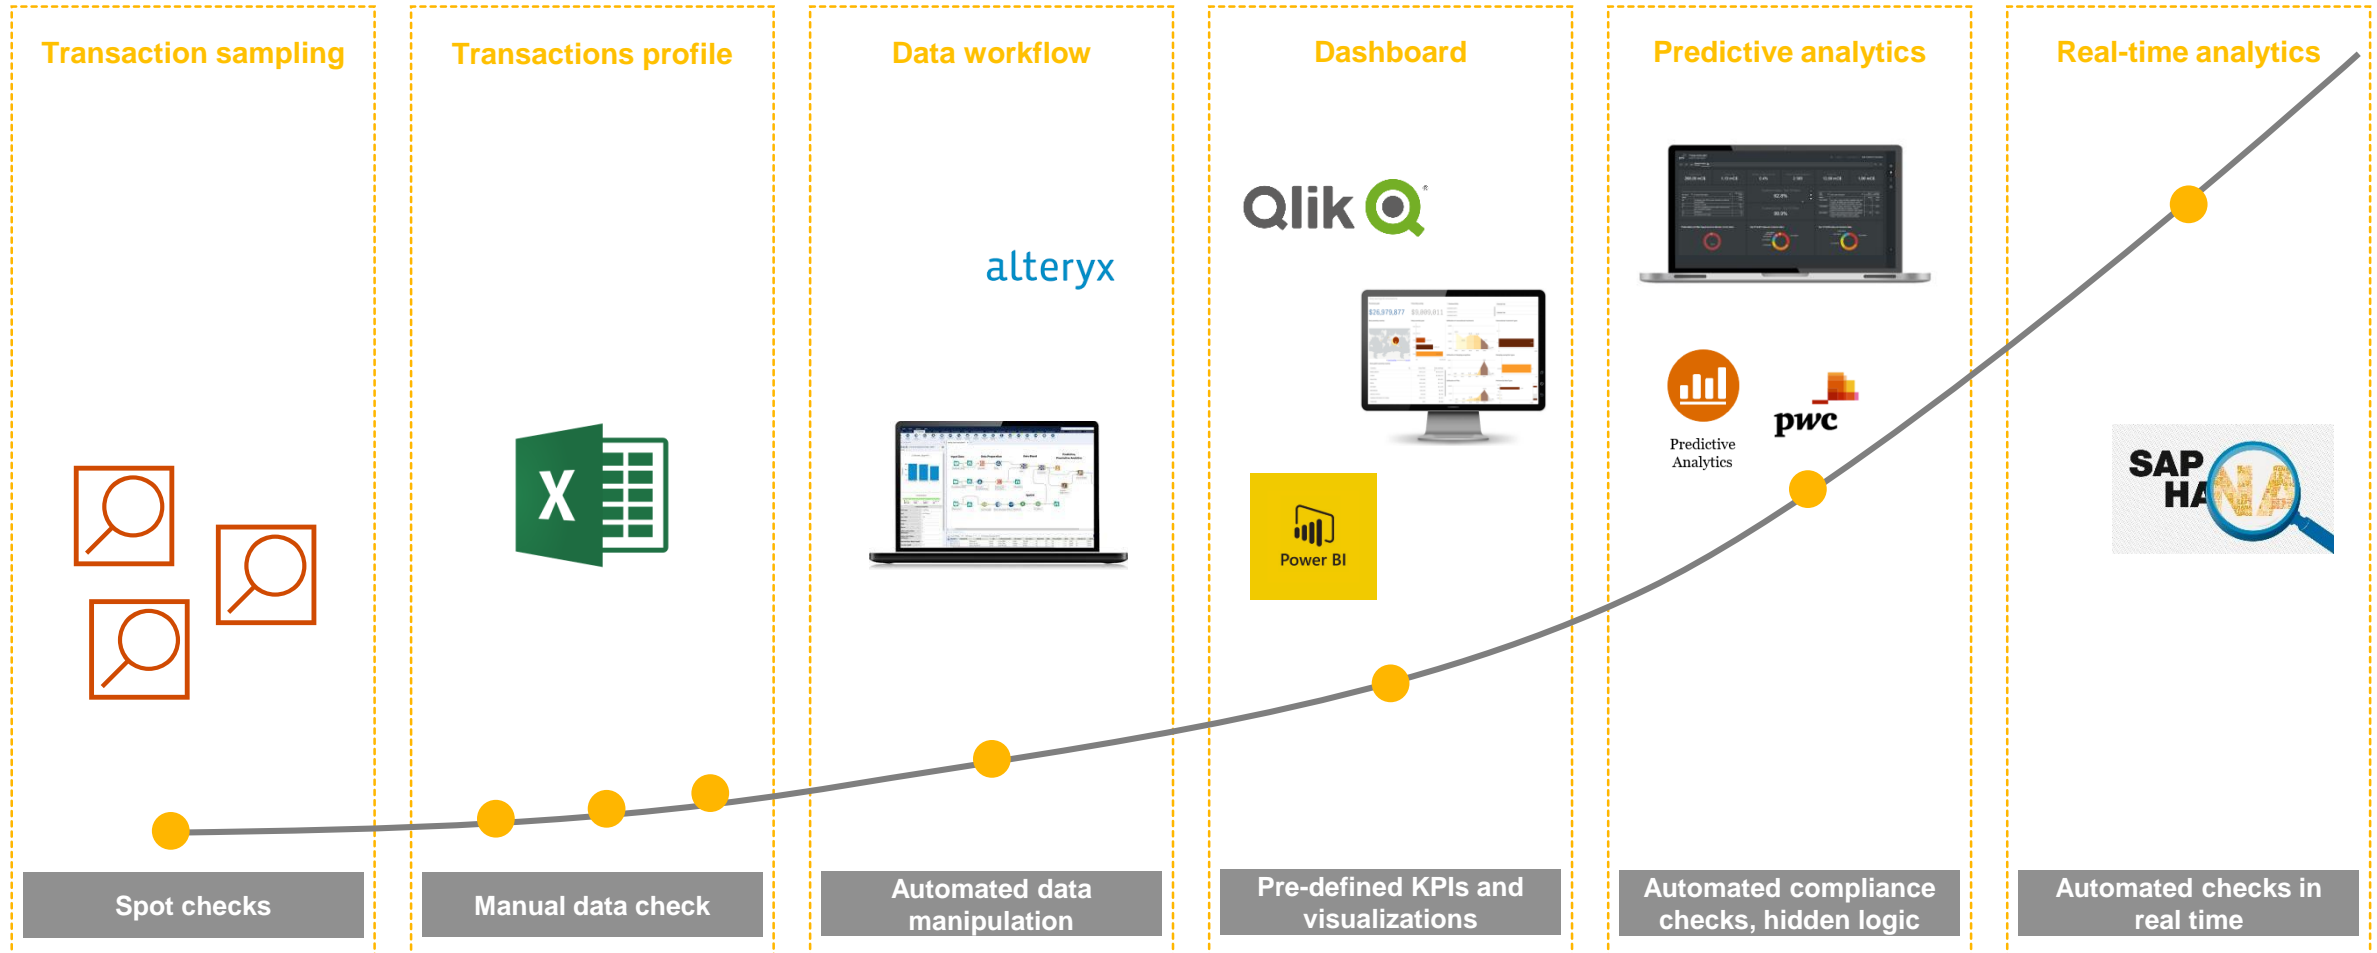

Digital technologies enable greater control of our complex, multi-faceted world

Progress towards control depends on where company sits on two scales. We think we will move to a world of clusters, with each one requiring a different strategy.

What can  
you do?

# Understand what authorities know about you

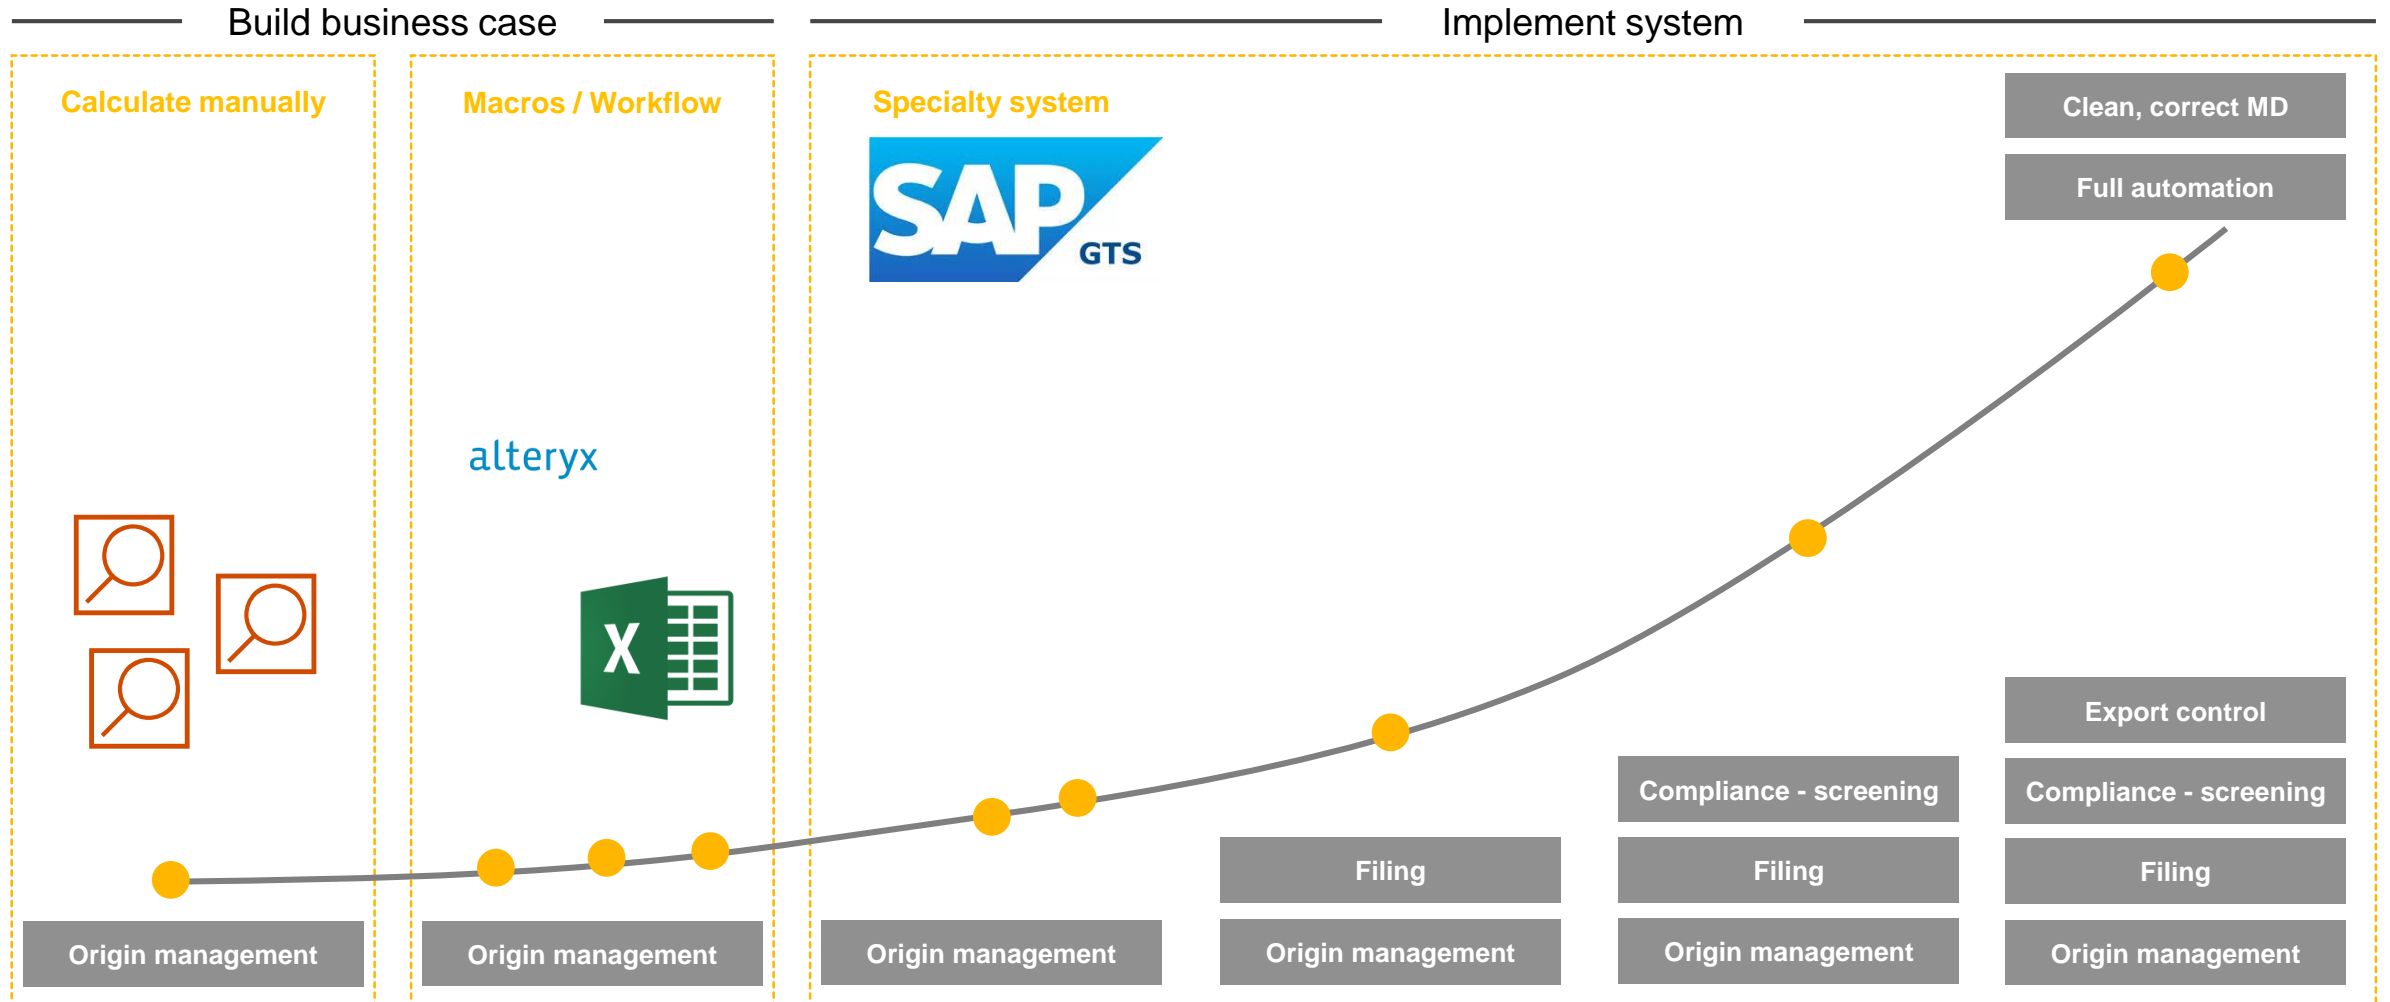

Is it only  
about  
managing  
risk?

**No.**

**There are huge opportunities in  
Customs.**

# Customs is a great field to optimize

# Building a business case is easier than you thought

Client data

Request data from the local authorities in selected geographies

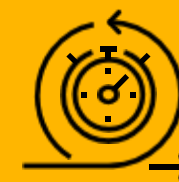

External data

Customs duties and other taxes paid at importation, providing the legal basis for analysis and simulation

With **almost zero client workload** and **no upfront financial investment**, we look for optimization potential and **help clients realize the detected savings**.

Welcome to the SAP Customer Connection Focus Topic for SAP Global Trade Services 2019!

**Define improvements for SAP GTS 11.0 with it's highly integrated processes**

**Purpose:** Cross-functional Customer Connection project to accelerate customer improvements into the current release. Based on previous functional specific Customer Connection focus topic projects, this offer shall accelerate the improvement across the scope of SAP GTS.

**In scope:** Improvements based on the existing scope of SAP GTS

**Out of scope:** Letter of Credit, Restitution, major User Interface Improvements (Fiori), EMCS

**Target Release:** GTS 11.0, minimum Service Package 11

Improvement requests need **five votes** from different customers to qualify for review. The decision of the review will be communicated in the Selection call

# SAP Global Trade Services, edition for SAP HANA 2020

## Early Adaptor Care Program

# Early Adopter Care (EAC) for SAP GTS, Edition for SAP HANA

Solution Capabilities, Product Direction and Key Benefits, EAC Features Scope, EAC Customer Value

## Product Direction & Key Benefits

- **Faster processing** through SAP HANA DB; **HANA specific redesign** of data structures
- **System Access through SAP Fiori Launchpad**, retrievable via any browser
- **Redesign of key user roles** with the ability for user specific configuration to displays only role relevant apps
- **Improved usability** by grouping apps in a tile optic
- **Embedded analytic functions** for selected transactions
- **Streamline of the upload process** of trade data content

## Solution Capabilities

**Accelerate** cross-border supply chain and streamline foreign trade business

Improve international trade management, compliance, and cross-border supply chains by **automating trade processes**.

**Embed risk management** into supply networks to reduce costs, penalties, and fines, clear customs quickly, and screen partners and transactions **in real time**.

**Increase profitability** by capitalizing on duty relief across geographies.

**Drive compliance** with EU statistical data requirements for the movement of goods across borders.

**Streamline processes** by proactively classifying products.

## EAC Customer Value

- **Support with early implementation** of SAP's latest innovation
- **Close collaboration with SAP** to safeguard projects and react to and minimize project risks
- **Direct channel to Development** for Product and Solution insights
- **Special support concerning incident processing**, EAC flag promotes the incident higher in the SAP support processing queue
- **Access Stay Current learning** (formerly Early Knowledge Transfer (EKT) at no additional costs for select programs
- **Get Connected** via [influence.sap.com](https://influence.sap.com)

## EAC Feature Scope

- **Trade Classification**
- **Sanctioned Party List Screening**
- **Trade Compliance** (Embargo Screening and Legal Control)
- **Customs Management Processing** (Export and Import Processing, Special Customs Procedures)
- **Intrastat**

# Influence.sap.com

The screenshot shows the SAP Customer Influence website. At the top left is the SAP logo and the text "Customer Influence". To the right is a navigation bar with "Globally" and a search field labeled "Search". A left sidebar contains icons for home, search, documents, and RSS. The main content area features a puzzle piece icon with a yellow, green, and blue bar. Below this is a section titled "Interested in closer collaboration with SAP development?" which lists three options: "SAP Customer Engagement Initiative", "SAP Beta Testing", and "SAP Early Adopter Care". The "SAP Early Adopter Care" option and its associated list item are highlighted with a yellow border. Below this is a link to a document: "Check our document: [How to register for a Project](#)". At the bottom of the main content area is the heading "Feedback and Issue Reports".
