Executive Summary

The Texas Medicaid program provides healthcare and long-term services and supports (LTSS) for more than 4.2 million individuals, the majority of whom receive services through managed care.¹ Medicaid managed care programs provide a wide array of acute health care services (primary, specialty and behavioral health care, pharmacy, dental and diagnostic services) and LTSS (nursing, home health care, therapy services, home and community-based services, nursing facility and attendant care). The Health and Human Services Commission (HHSC) contracts with managed care organizations (MCOs) and dental maintenance organizations (DMOs) to provide medically necessary services to Medicaid members.

HHSC is required by state and federal rules and laws to ensure MCOs and DMOs have adequate provider networks. To ensure MCOs and DMOs maintain the provider networks to deliver timely and appropriate care to Medicaid members, HHSC tracks timeliness of care through annual surveys, monitors member and provider complaints,² analyzes geo-mapping reports to measure the distance³ between providers' geographic locations and members' residences, and monitors utilization of out-of-network providers.

¹ Texas Health and Human Services Commission, Health Care Statistics. Medicaid and CHIP Enrollment. <https://hhs.texas.gov/about-hhs/records-statistics/data-statistics/healthcare-statistics>

² HHSC manages complaints or inquiries received from Medicaid providers, members, state agencies, or government officials.

³ HHSC conducted analysis of MCO compliance with travel time standards in Q4 of 2017 (June 2017 - August 2017) and Q1 of 2018 (September 2018 - November 2018). Based on data from these two quarters, HHSC determined MCO compliance with distance standards is highly correlated with compliance with travel time standards. If an MCO met or failed to meet distance standards, nearly 98 percent of the time, they also met or failed to meet the corresponding travel time requirement. Given the high association of these two data sets, and in the interest of efficient use of resources, HHSC is not conducting quarterly analysis of travel time.

Senate Bill (S.B.) 760, 84th Legislature, Regular Session, 2015, requires HHSC to report to the Legislature on access to providers in Medicaid managed care networks, and MCO compliance with contractual obligations related to provider access standards. The report requires:

- A compilation and analysis of information reported by MCOs to HHSC on MCO compliance with Medicaid managed care network adequacy requirements;
- Data on MCOs' average length of time for approving or denying a request for prior authorization of services, and between approving the request and initiation of service;
- A description and analysis of results from HHSC's process for monitoring MCOs; and
- Information on provider-to-recipient ratios in an MCO's provider network, including benchmark ratios to indicate whether there are deficiencies in a given network.

The results of these monitoring initiatives, detailed in Section 3 of this report, show MCOs continue to perform well in meeting requirements related to providing access to preventive care, with nearly all MCOs compliant with access standards for primary care providers (PCPs) and main dentists for all Medicaid programs. However, specialty provider shortages, particularly in rural areas of the state, continue to present challenges to member access.

MCO reporting on prior authorization wait times continues to vary widely⁴. For specialty care in the STAR program, MCOs' average reported wait times for a prior authorization decision ranged from 0 days to 11 days for plans that require prior authorization, and the average reported wait times from MCO approval to service initiation ranged from 0 days to 53⁵ days among plans that require prior authorization.

A 2018 study to examine appointment availability for behavioral health visits in STAR and STAR+PLUS showed improvement for both programs over findings from the same study conducted in 2016. However, study results were less favorable for

⁴ MCO-reported prior authorization wait times published in the 2018 Legislative Report on Managed Care Network Adequacy showed variation among MCOs and specialty types. The 2018 report can be found at: <https://hhs.texas.gov/reports/2019/01/report-medicaid-managed-care-provider-network-adequacy>

⁵ Delays between prior authorization approval and service initiation can be attributed to multiple factors, such as a member not following up with the provider, or the member's chosen provider not being available for an appointment.

high-risk prenatal care, which showed a decrease in compliance with appointment wait times over the same period⁶.

To help improve member access to care, particularly in areas with provider shortages, HHSC is working with MCOs to increase the availability of telemedicine and telehealth services through the implementation of S.B. 670, 86th Legislature, Regular Session, 2019, which prohibits MCOs from denying reimbursement for otherwise covered Medicaid benefits solely because the services were delivered via telemedicine or telehealth. The bill also prohibits MCOs from denying, limiting, or reducing coverage for a covered service based on the provider's choice of platform for providing telemedicine services.

HHSC has also developed new provider network distance standards for substance use disorder treatment providers and is working to implement additional standards for community attendant care providers. Additionally, HHSC is working to streamline and improve provider enrollment processes.

Healthcare access and provider shortage issues are not exclusive to Medicaid. Statewide provider ratios for the Medicaid population are in some cases more favorable than statewide provider ratios. Statewide, the ratio of licensed psychiatrists to the Medicaid population is 1:2,135 compared to a ratio of 1:12,804 for the general population.

While none of the indicators noted above provide a complete measure of network adequacy on their own, combined they help HHSC perform a robust assessment of the adequacy of MCO or DMO provider networks and their performance in meeting contractual obligations. This report contains a comprehensive account of MCO compliance with contractual obligations related to network adequacy and HHSC's continued efforts to ensure member access to a choice of quality providers.

⁶ Non-compliance with contractually required appointment wait times resulted in corrective action plans and assessment of liquidated damages.

1. Introduction

In 2015, the 84th Legislature, Regular Session, adopted S.B. 760, which modified Texas Government Code 533.005 to provide the state with additional tools for ensuring network adequacy in Texas Medicaid managed care. The bill directs HHSC to develop specific provider network access standards for Medicaid managed care, and to develop requirements for MCOs to:

- Pay liquidated damages for failing to comply with minimum network access standards;
- Establish an expedited credentialing process for certain provider types identified by HHSC;
- Regularly update and publish provider directories on MCO and DMO websites; and
- Send paper copies of provider directories to all STAR+PLUS and STAR Kids members, unless these members opt-out, and to members of other Medicaid managed care programs only upon request.

In response to the requirements of S.B. 760, HHSC worked extensively with stakeholders, including member advocates, provider groups, MCOs and DMOs, to implement several key initiatives, including:

- Updating requirements for MCO provider directories, including a requirement that all directories be available online, updated weekly, and searchable;
- Developing new distance and travel time standards for certain provider types, taking into account geographic area and managed care program service requirements;
- Updating expedited credentialing standards to decrease the time before a provider may be reimbursed for services and to allow MCOs and DMOs to more quickly address gaps in network coverage; and
- Enhancing MCO reporting and HHSC oversight to ensure compliance with all network adequacy standards.

These initiatives have provided a framework for HHSC's ongoing commitment to improving access to quality care for Medicaid members, and ensuring MCO and DMO accountability for health care service delivery. HHSC continues to examine options for enhancing network adequacy contractual requirements and monitoring

processes to ensure access to care for over 4.2 million Medicaid members statewide.

2. Background

Medicaid Managed Care

In Texas, approximately 94 percent⁷ of individuals enrolled in the state's Medicaid program receive services through managed care. Under the managed care model, the state contracts with MCOs and DMOs to provide members with an array of covered services and supports. HHSC pays MCOs and DMOs a monthly amount per enrolled member to coordinate care and reimburse providers for services to Medicaid members enrolled in their health and dental plans. MCOs contract with providers, including primary care physicians, specialty care, and behavioral health providers. These providers make up the MCO's "network." Sufficient provider networks ensure members have timely access to, and a choice of, health care providers and services covered by the Medicaid program.

HHSC administers and provides oversight of the state's Medicaid program in accordance with state and federal requirements. At the federal level, the Social Security Act⁸ and Code of Federal Regulations⁹ require state Medicaid programs to ensure that MCOs demonstrate the capacity to serve expected enrollment in the MCOs' service areas.¹⁰ The regulations include requirements for an appropriate "range of services and access to preventive and primary care services," with a "sufficient number, mix, and geographic distribution of providers of services." Generally, each state has flexibility to determine how to meet the federal requirements.

At the state level, HHSC establishes managed care contract requirements in accordance with Texas Department of Insurance (TDI) rules and regulations, and federal and state Medicaid rules. HHSC requirements are consistent with, or more stringent than, federal or TDI requirements.

In Texas, Medicaid managed care includes the STAR, STAR+PLUS, STAR+PLUS Medicare-Medicaid Plan (MMP)¹¹, STAR Kids, STAR Health programs,

⁷ <https://hhs.texas.gov/about-hhs/records-statistics/data-statistics/healthcare-statistics>

⁸ SSA §1932(b) (5), Demonstration of Adequate Capacity and Services.

⁹ 42 CFR §438.206 Availability of Services, §438.207 Assurances of Adequate Capacity and Services.

¹⁰ Service area means all the counties, as applicable to each managed care program, for which an MCO has been selected to provide MCO services.

¹¹ The Medicaid portion of STAR+PLUS MMP is subject to the same network adequacy standards as the STAR+PLUS program.

and Children’s Medicaid Dental Services program for individuals age 20 and younger. Seventeen MCOs and three DMOs deliver services across the state, operating in distinct geographic locations known as service delivery areas (SDAs). Each SDA has multiple counties. HHSC requires each MCO to ensure the delivery of services and supports for each of its members on a county-by-county basis.¹² In accordance with state and federal regulations, HHSC is responsible for ensuring each MCO maintains the required provider networks necessary to allow members in all regions of the state to have timely and reasonable access to medically necessary covered services.

Network Adequacy Initiatives

Time and Distance Standards

As part of its efforts to implement the requirements of S.B. 760, HHSC established an internal workgroup to address network adequacy issues in Medicaid managed care. A key initiative of the workgroup was to develop the provider network travel time and distance standards required by S.B. 760, and the protocols for analyzing MCO and DMO compliance with these new standards. HHSC developed the standards in close coordination with external stakeholders. In March 2017, HHSC amended its managed care contracts to include new distance and travel time standards for specific provider types and county designations. See Appendix A for county designations.

In developing the revised network standards, HHSC considered distances and travel times required for Medicare Advantage plans.¹³ When appropriate, HHSC adopted the network standards used by Medicare, which was a suggestion offered by stakeholders. In some cases, Medicare standards conflicted with existing provider standards required by TDI, in which case HHSC deferred to TDI standards. For example, TDI rules require access to specialty care within 75 miles, while Medicare Advantage allows longer travel distances in some rural counties; therefore, in order to comply with TDI rules, HHSC Medicaid managed care standards for specialty care do not exceed 75 miles. Table 1 below outlines the distance and travel times required for MCO provider networks beginning in March 2017, and Table 2 outlines additional network standards added to Medicaid managed care contracts in

¹² In Texas, TDI licenses managed care entities. The license specifies in which areas of the state the entity can operate.

¹³ Medicare Advantage plans provide managed care services for Medicare recipients. Medicare established distance and travel time for Medicare services. Stakeholders suggested Medicaid consider these as a starting point for distance and travel time and consider county level designations since managed care plans in Texas were already familiar with them.

September 2018. For some services in which the member does not travel to the provider, such as in-home skilled nursing, the MCO is required to provide the member a choice of at least two providers in each county in which the MCO operates.

Table 1: Medicaid Managed Care Network Access Distances and Travel Times - March 2017 Contract Amendments

Provider types/services	Programs	Distance and Travel Times¹⁴
Mental Health-Outpatient	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 30 miles, 45 minutes Rural: 75 miles, 90 minutes
Cardiology or Cardiovascular Disease	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 20 miles, 30 minutes Micro: 35 miles, 50 minutes Rural: 60 miles, 75 minutes
Endodontist, Orthodontist, and Prosthodontist	Children’s Medicaid Dental, STAR Health ¹⁵	75 miles, 90 minutes
General Surgeon	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 20 miles, 30 minutes Micro: 35 miles, 50 minutes Rural: 60 miles, 75 minutes
Acute Care Hospital	STAR, STAR Health, STAR Kids, STAR+PLUS	30 miles, 45 minutes
Main Dentist	Children’s Medicaid Dental, STAR Health	Metro: 30 miles, 45 minutes Micro: 30 miles, 45 minutes Rural: 75 miles, 90 minutes
Obstetrics or Gynecology	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 60 miles, 80 minutes Rural: 75 miles, 90 minutes
Occupational, Physical, or Speech Therapy	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 60 miles, 80 minutes Rural: 60 miles, 75 minutes
Ophthalmology	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 20 miles, 30 minutes Micro: 35 miles, 50 minutes Rural: 60 miles, 75 minutes

¹⁴ Metro, Micro, and Rural refer to county designation. These are based on population and population density. See Appendix A, which provides a map and lists each county by designation.

¹⁵ Most children and youth age 20 and younger receive comprehensive dental services through Children’s Medicaid Dental Services (CMDS) administered by dental maintenance organizations contracted with the state. For children and youth in STAR Health, dental services are carved-in to the STAR Health model.

Provider types/services	Programs	Distance and Travel Times¹⁴
Orthopedics	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 20 miles, 30 minutes Micro: 35 miles, 50 minutes Rural: 60 miles, 75 minutes
Otolaryngology (Ear, Nose, and Throat (ENT))	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 60 miles, 80 minutes Rural: 75 miles, 90 minutes
Pediatric Dental	Children's Medicaid Dental, STAR Health	Metro: 30 miles, 45 minutes Micro: 30 miles, 45 minutes Rural: 75 miles, 90 minutes
Pediatric Sub-Specialty	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 20 miles, 30 minutes Micro: 35 miles, 50 minutes Rural: 60 miles, 75 minutes
Prenatal Care	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 10 miles, 15 minutes Micro: 20 miles, 30 minutes Rural: 30 miles, 40 minutes
Primary Care	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 10 miles, 15 minutes Micro: 20 miles, 30 minutes Rural: 30 miles, 40 minutes
Psychiatry	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 45 miles, 60 minutes Rural: 60 miles, 75 minutes
Urology	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 45 miles, 60 minutes Rural: 60 miles, 75 minutes

Table 2: Medicaid Managed Care Network Access Requirements - September 2018 Contract Amendments

Provider types/services	Programs	Measure
Audiology Services (includes hearing aids)	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 60 miles, 80 minutes Rural: 75 miles, 90 minutes
Mental Health Rehabilitative Services	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 30 miles, 45 minutes Rural: 75 miles, 90 minutes
Mental Health Targeted Case Management	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 30 miles, 45 minutes Rural: 75 miles, 90 minutes

Provider types/services	Programs	Measure
Pharmacy ¹⁶	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 2 miles, 5 minutes Micro: 5 miles, 10 minutes Rural: 15 miles, 25 minutes
Pharmacy - Medicaid Rural Service Area (MRSA) ¹⁷	STAR, STAR Kids, STAR+PLUS	Metro: 2 miles, 5 minutes Micro: 5 miles, 10 minutes Rural: 15 miles, 25 minutes
In-Home Skilled Nursing	STAR+PLUS	Choice of two in county
Occupational, Physical, or Speech Therapy -in home	STAR Health, STAR Kids, STAR+PLUS	Choice of two in county
Attendant Care	STAR Health, STAR Kids, STAR+PLUS	Choice of two in county
Community First Choice Habilitation	STAR Health, STAR Kids, STAR+PLUS	Choice of two in county
Consumer Directed Services	STAR Health, STAR Kids, STAR+PLUS	Choice of two financial management service agencies
Private Duty Nursing	STAR Health, STAR Kids	Choice of two in county
Assisted Living Facility	STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 60 miles, 80 minutes Rural: 60 miles, 75 minutes
Nursing Facility	STAR+PLUS	Choice of two within 75 miles

Community Attendant Care

In September 2018, HHSC adopted network adequacy requirements for community attendant care, requiring all members to have a choice of providers, defined as home health agencies, in each county. In 2019, Rider 157 (86th Legislative Session) required HHSC to develop enhanced network adequacy standards for MCO provider networks to ensure sufficient member access to community care attendants. Additionally, updates to federal rules gave states broad discretion in the types of metrics allowed for monitoring network adequacy for LTSS. Specifically, federal guidelines in 42 CFR §438.68(b)(2)(ii) required managed care contracts to include

¹⁶ Compliance threshold for Pharmacy is 80 percent of members in Metro counties; 75 percent in Micro; and 90 percent in Rural.

¹⁷ Compliance threshold Pharmacy in MRSA is 75 percent of members in Metro counties; 55 percent in Micro; and 90 percent in Rural.

network adequacy standards other than time and distance standards for provider types that travel to the enrollee to deliver services.

In response to Rider 157, and in accordance with federal rule, HHSC engaged stakeholders in an effort to develop additional options for monitoring network adequacy for community attendant care. Options identified by HHSC, along with input from stakeholders, include:

- Ratio of service recipients to community attendants;
- Timeliness of service;
- Complaint monitoring; and
- Electronic Visit Verification data.

HHSC continues to work with stakeholders to evaluate these options in an effort to develop quantifiable standards for assessing provider network adequacy and intends to have a community attendant care measure in place by March 2021.

Substance Use Disorders

In 2020, as part of a strategy to increase member access to care for the treatment of substance use disorders (SUD), HHSC adopted new provider network standards for outpatient chemical dependency treatment facilities, and outpatient opioid treatment programs, as noted in Table 3 below. These standards were implemented in managed care contracts effective September 1, 2020. In addition, residential SUD treatment providers were added to the Medicaid managed care contract Liquidated Damages Matrix (Attachment B-3) to facilitate the monitoring of residential SUD treatment provider networks through HHSC’s out-of-network monitoring process.

Table 3: Medicaid Managed Care Network Access Requirements September 2020 Contract Amendments

Provider types/services	Programs	Distance and Travel Times ¹⁸
Substance Use Disorder (SUD) - Outpatient - Chemical Dependency Treatment Facilities	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45minutes Micro: 30 miles, 45 minutes Rural: 75 miles, 90 minutes
Substance Use Disorder (SUD) - Outpatient - Opioid Treatment Programs	STAR, STAR Health, STAR Kids, STAR+PLUS	Metro: 30 miles, 45 minutes Micro: 30 miles, 45 minutes Rural: 75 miles, 90 minutes

¹⁸ Metro, Micro, and Rural refer to county designation. These are based on population and population density. See Appendix A, which provides a map and lists each county by designation.

Compliance Monitoring

Managed care contracts require MCOs and DMOs to ensure at least 90 percent of members, unless otherwise specified, have access to a choice of PCPs and specialty providers within a specified distance or travel time. The required distance and travel time standards vary by provider and county type. Each quarter, HHSC analyzes provider network access for each Medicaid managed care program, and for each participating MCO and DMO. The analysis assesses the percentage of each managed care plan's members, for each provider or service type, with at least two providers within the maximum distance from the member's residence, based on Medicaid enrollment files. (See Appendices D and E for MCO compliance results.) MCOs and DMOs that do not meet the minimum established percentage for members within the required distance for each provider or service type may be subject to contract remedies including corrective action plans (CAPs) and/or liquidated damages. In addition, once a year HHSC calculates MCO and DMO compliance with established travel time standards, for which MCOs may also be assessed contract remedies for non-compliance¹⁹.

As part of the analysis to assess MCO compliance with network requirements, HHSC produces 'geomap' reports by county, which plot each MCO's network providers against its enrolled members, allowing HHSC to determine member proximity to network providers.²⁰ The criteria for analysis is adjusted as appropriate for managed care program, age, and sex (e.g., males are not mapped to gynecologists, adults are not mapped to pediatricians, and STAR is not assessed for LTSS). See Table 4 for additional detail on program assessment.

¹⁹ HHSC conducts travel time analysis annually, since compliance with travel time standards is highly correlated with compliance of distance standards.

²⁰ HHSC uses the following software to develop geo-mapping reports:

1. ArcGIS Desktop, including the Spatial Analyst and Network Analyst extensions, which support geo-distance and travel time analysis, respectively.
2. 'R' - an open-source statistical analysis program, which utilizes a geosphere package for conducting geo-distance analysis. This program runs the same geo-distance functions utilized in ArcGIS to calculate distance between geographical points.
3. StreetMap Premium for ArcGIS, which works within the ArcGIS Desktop program, and is used for geo-coding addresses.

Table 4: Medicaid Managed Care Age and Sex Specifications

Provider types/services	Managed Care Programs	Age	Sex
Audiology Services	STAR, STAR Health, STAR Kids, STAR+PLUS	All	All
Behavioral Health-Outpatient Care	STAR, STAR Health, STAR Kids, STAR+PLUS	All	All

Psychiatry	STAR, STAR Health, STAR Kids, STAR+PLUS	All	All
Urology	STAR, STAR Health, STAR Kids, STAR+PLUS	All	All

The geomaps allow HHSC to determine, for each MCO, the extent to which the MCO’s members in each county have access to a choice of providers for covered services. HHSC also uses these reports to assess MCO compliance with contractually required network adequacy standards. Failure to comply with contract requirements results in the assessment of a CAP requiring the MCO to take corrective action to ensure future compliance with program requirements. Depending on the frequency and severity of non-compliance, an MCO may also be subject to liquidated damages.

Telemedicine and Telehealth Services

To help improve member access to care, particularly in areas with provider shortages, HHSC is working with MCOs to increase the availability of telemedicine and telehealth services. S.B. 670, 86th Legislature, Regular Session, 2019, is intended to foster increased use of telemedicine and telehealth services. This legislation prohibits MCOs from denying reimbursement for otherwise covered Medicaid benefits solely because the services were delivered via telemedicine or telehealth and also stipulates that MCOs cannot deny, limit, or reduce coverage for a covered service based on the provider's choice of platform for providing telemedicine services. In response to COVID-19, HHSC implemented temporary flexibilities which authorized select Medicaid services to be delivered via telemedicine, telehealth, and telephone (audio-only) platforms²¹.

²¹ <http://tmhpacestg.prod.acquia-sites.com/news/2020-06-29-multiple-medicaid-covid-19-flexibilities-extended-through-july-31-2020>

3. MCO Network Oversight

Appointment Availability

S.B. 760 directed HHSC to establish and implement a process for direct monitoring of an MCO's provider network, including the length of time a recipient must wait between scheduling an appointment with, and receiving treatment from a provider. To fulfill this direction, HHSC contracted with its external quality review organization (EQRO) to implement an appointment availability study to analyze MCO compliance with appointment access standards specified in Section 8.1.3 of the managed care contracts, which outlines MCO requirements for ensuring members have timely access to covered services.

Standards

Access to care includes the ability to obtain appointments for primary and specialist care within a reasonable amount of time. HHSC managed care contracts outline MCO provider network standards for timely appointments and the availability of specialist appointments without referrals. Table 5 below shows the appointment wait time standards included in the managed care contracts and used in the HHSC appointment availability studies.

Table 5: Appointment Standards Defined in Managed Care Contracts

Level/Type of Care	Time to Treatment
Urgent Care (child and adult)	Within twenty-four (24) hours
Routine Primary Care (child and adult)	Within fourteen (14) calendar days
Preventive Health Services for New Child Members	No later than ninety (90) calendar days of enrollment (for STAR Health, the requirement is 30 days)
Initial Outpatient Behavioral Health Visits (child and adult)	Within fourteen (14) calendar days
Preventive Health Services for Adults	Within ninety (90) calendar days
Prenatal Care (not high-risk)	Within fourteen (14) calendar days

Level/Type of Care	Time to Treatment
Prenatal Care (high risk)	Within five (5) calendar days
Prenatal Care (new member in 3 rd trimester)	Within five (5) calendar days
Vision Care (ophthalmology, therapeutic optometry)	None indicated

Methodology

For the appointment availability study, the EQRO uses a secret shopper methodology to examine member experience in scheduling appointments. The study is comprised of four “sub-studies” covering the following areas: prenatal care (also referred to as obstetrics/gynecology (OB/GYN); PCP; vision; and behavioral health. The studies began in 2015, with initial results used to develop MCO strategies for addressing excessive appointment wait times and noncompliance with vision referral standards.²² In the 2016 study, an MCO’s failure to meet required standards resulted in the issuance of corrective action plans (CAPs). In 2018, MCOs failing to meet established minimum standards for compliance were subject to CAPs and liquidated damages.

Due to the secret shopper methodology, HHSC is not able to include specialists in the appointment availability study since specialists generally require a referral. Instead, HHSC worked with its EQRO to develop a PCP referral study, which asks PCPs to provide information on challenges experienced in referring members for specialty care. The 2018 PCP referral study indicated PCPs encountered the most challenges in obtaining referrals for behavioral health services, with 52 percent of PCPs reporting psychiatry as the specialty presenting the most difficulty for obtaining referrals.

Study Schedule

The EQRO conducts the appointment availability studies to evaluate MCO compliance with contractual appointment availability standards, based on the schedule outlined below. The EQRO conducted the first study in 2015, with a follow-up study in 2016. The 2016 study was extended to cover two contract years (2016-2017). The 2018 study will also cover two contract years (2018-2019).

²² Vision care should be available without a PCP referral.

2015 Appointment Availability Study²³

- Prenatal - STAR²⁴
- Vision - STAR, STAR+PLUS
- Primary Care - STAR, STAR+PLUS
- Behavioral Health - STAR, STAR+PLUS

2016 and 2017 Appointment Availability Study

- Prenatal - STAR
- Vision - STAR, STAR+PLUS
- Primary Care - STAR, STAR+PLUS
- Behavioral Health - STAR, STAR+PLUS

2018 Appointment Availability Study²⁵

- Prenatal - STAR
- Vision - STAR, STAR Kids, STAR+PLUS, STAR Health
- Primary Care - STAR, STAR Kids, STAR+PLUS, STAR Health
- Behavioral Health - STAR, STAR Kids, STAR+PLUS, STAR Health

Results

The results of the 2018 appointment availability studies show MCOs generally in compliance with appointment wait time standards for PCPs and behavioral health but failing to meet established compliance thresholds for high-risk prenatal care (see Table 8 below). However, the sample size of the study is limited due to the inability to reach many of the providers included in MCO provider directories. As a result, the study's findings may not always be representative of an MCO's full network of providers.

²³ The appointment availability studies included the Children's Health Insurance Program (CHIP); however, SB760 and this report do not pertain to CHIP.

²⁴ Only the STAR program is included in the prenatal sub study. While there are some pregnant women in other programs, their numbers are small.

²⁵ 2018/2019 were the first years that STAR Kids and STAR Health were included in the Study; therefore, only baseline data is available for those programs. This data is not included in this report.

The EQRO noted that provider directory accuracy was an issue for Medicaid members and providers seeking to refer patients. As a result, HHSC is working with the EQRO to develop additional studies to determine root causes for the directory inaccuracies, best practices, and appropriate corrective actions for provider directory maintenance. The EQRO performed a literature review of provider directory standards but found no nationally recognized standards at this time.

Primary Care

Table 6 below shows program-level compliance with PCP network access standards described in HHSC managed care contracts, which state that members must have access to a PCP: within 90 days for preventive care, within 14 days for routine care, and within 1 day for urgent care.

Table 6. Program-Level Compliance for Primary Care

Program	Standard	2016	2018 ²⁶
STAR	PCP Child Urgent Care (24 hours)	99.6%	100%
STAR	PCP Child Routine Care (14 days)	89.6%	100%
STAR	PCP Child Preventive Care (90 days)	99.6%	100%
STAR	PCP Adult Urgent Care (24 hours)	98.9%	100%
STAR	PCP Adult Routine Care (14 days)	93.5%	100%
STAR	PCP Adult Preventive Care (90 days)	97.6%	99.9%

²⁶ 2018 includes 2019 studies due to calendar and fiscal year overlaps.

Program	Standard	2016	2018 ²⁶
STAR+PLUS	PCP Urgent Care (24 hours)	99.1%	100%
STAR+PLUS	PCP Routine Care (14 days)	87.8%	100%
STAR+PLUS	PCP Preventive Care (90 days)	97.0%	99.2%

In addition to recommending HHSC take steps to improve provider directory accuracy, the EQRO recommends that HHSC encourage MCOs to work with providers to make weekend appointments available to members to improve access. Only about one-third of providers with available appointments indicated they offered appointments on weekends.

Behavioral Health²⁷

Table 7 shows program-level compliance with managed care contract requirements for behavioral health. The contract requires that members have access to a behavioral health provider within 14 days. While individual MCO results vary, overall, access to behavioral health providers in Texas improved across all programs for 2018. The behavioral health corrective action plan threshold for 2016 and 2018 was 75 percent for children in STAR, 79 percent for adults in STAR, and 89 percent for STAR+PLUS.

Table 7. Program-level Compliance for Behavioral Health

Program	2016	2018
STAR - Child	77.40%	84.2%

²⁷ Calls to STAR+PLUS providers in Hurricane Harvey-affected counties were suspended from August 25 through October 8, 2017, which should inform any interpretation of the study results.

Program	2016	2018
STAR - Adult	76.0%	85.60%
STAR+PLUS	81.7%	91.10%

Prenatal

The EQRO only performs the prenatal sub-study for the STAR program. Although other programs serve pregnant members, the numbers are too small to produce an adequate sample.

For this study, the callers used three separate telephone scripts with specific scenarios meant to represent members who were: (1) 12 weeks into the pregnancy (low-risk); (2) about 20 weeks into the pregnancy with a previous diagnosis of diabetes (high-risk); and (3) 32 weeks into the pregnancy (third trimester). Table 8 describes program-level compliance for access to STAR prenatal service providers in 2016 and 2018. Compliance with the standard increased for both low-risk and third-trimester appointments but decreased significantly for high-risk appointments. The corrective action plan threshold for the 2018 study was 85 percent for low-risk prenatal appointments, 51 percent for high-risk prenatal appointments, and 51 percent for third trimester appointments.

Table 8. Program-level Compliance for STAR Prenatal

Standard	2016	2018
Low-risk: Appointment available within 14 days	71.4%	72.5%
High-risk: Appointment available within five days	44.2%	27.9%
Third Trimester: Appointment available within five days	37.6%	57.9%

Additional research is necessary to determine why appointments for high-risk pregnancy continue to exceed prescribed wait times. Increasing after-hour and weekend appointments may provide additional times for appointments especially for high risk pregnant women. HHSC will continue investigating the root cause of these results.

Vision

Table 9 describes program-level compliance with managed care contract requirements that members must have access to a vision care provider without a PCP referral. While individual MCO results vary, access to vision providers generally improved across all programs from 2016 to 2018. The 2016 and 2018 corrective action plan thresholds for vision appointments were 99 percent across all programs.

Table 9. Program-level Compliance of Vision Care Providers

Program	2016	2018
STAR	92.70%	96.1%
STAR+PLUS	96.10%	99.0%

Corrective Action Plans

To promote and monitor program improvement, HHSC used the results from the 2015 appointment availability study as a baseline to establish CAP thresholds for 2016 and 2018. Thresholds for the 2016 and 2018 studies were set at ten points above the mean statewide compliance with wait times in the 2015 study, with a maximum threshold of 99 percent. Table 10 shows the 2015 benchmark and 2016/2018 CAP threshold for each program and standard.

Table 10. 2016 and 2018 CAP Thresholds

Program	Standard	2015 Benchmark	2016 and 2018 CAP Threshold ²⁸
STAR	OB/GYN Low-risk (14 Days)	74.9%	85%
STAR	OB/GYN High-risk (5 days)	40.9%	51%
STAR	OB/GYN 3rd Trimester (5 days)	40.9%	51%
STAR	Behavioral Health Child (14 days)	65.4%	75%
STAR	Behavioral Health Adult (14 days)	69.4%	79%
STAR	Child Vision (no referral required)	91.4%	99%
STAR	PCP Child Urgent Care (24 hours)	99.3%	99%

²⁸ Beginning in 2018, corrective action plans and liquidated damages were assessed to plans not meeting the Appointment Availability standards.

Program	Standard	2015 Benchmark	2016 and 2018 CAP Threshold²⁸
STAR	PCP Child Routine Care (14 days)	94.9%	99%
STAR	PCP Child Preventive Care (90 days)	99.8%	99%
STAR	PCP Adult Urgent Care (24 hours)	97.9%	99%
STAR	PCP Adult Routine Care (14 days)	85.8%	96%
STAR	PCP Adult Preventive Care (90 days)	99.4%	99%
STAR+PLUS	Behavioral Health Adult (14 days)	79.4%	89%
STAR+PLUS	Vision (no referral required)	89.4%	99%
STAR+PLUS	PCP Urgent Care (24 hours)	95.7%	99%
STAR+PLUS	PCP Routine Care (14 days)	77.2%	87%
STAR+PLUS	PCP Preventive Care (90 days)	96.8%	99%

There are several factors that may affect MCO compliance, including statewide and national workforce issues²⁹, provider directory accuracy, and the accuracy of information given by provider staff. HHSC and the EQRO are working together to determine appropriate follow-up studies, training, and corrective actions to address appointment availability issues.

Corrective Action Plan Responses

To address provider network deficiencies identified in the appointment availability studies, MCOs provided a broad range of proposed actions in their 2018 CAPs, including:

- Provider education in the form of letters, email and fax blasts, trainings and webinars, and provider orientations;
- Quality audits, including appointment availability studies conducted by the MCOs;
- Provider outreach calls to assess the accuracy of provider directory information; and
- Online training materials, interactive videos, and review of HHSC provider manuals.

HHSC has issued multiple CAPs for MCOs that did not meet the contractual standards for appointment wait times. However, between 2015 and 2018, all Medicaid programs showed improvements across studies. HHSC will continue to monitor the MCOs to make improvements in MCOs' performance in meeting appointment wait time standards.

Prior Authorization Wait Times

S.B. 760 requires MCOs to report data on the sufficiency of the organization's provider network with regard to providing care under Texas Government Code §533.0061(a), including specific data on the average length of time: (1) for approving or denying a request for prior authorization of services, and (2) between approving the request and initiation of service.

²⁹ The Department of State Health Services Primary Care Office publishes data on statewide provider shortages. Additional information, including information on areas deemed Health Professional Shortage areas can be found here: <https://www.dshs.texas.gov/chpr/Health-Professional-Shortage-Area-Designation.aspx>

In fulfillment of this requirement, HHSC requested each MCO provide information for each program (STAR, STAR Health, STAR Kids, and STAR+PLUS) for the following services³⁰:

- Physician specialty care
- In-home services:
 - ▶ Nursing services
 - ▶ Occupational therapy
 - ▶ Physical therapy
 - ▶ Speech therapy
 - ▶ Attendant care
- Clinic or provider setting
 - ▶ Occupational therapy
 - ▶ Physical therapy
 - ▶ Speech therapy

For each service listed above, HHSC asked each MCO to report on the average length of time between:

- The date a provider requested prior authorization and the date the authorization is either approved or denied by the MCO, and
- The date authorization is approved, and the date service is initiated.

MCO prior authorization reporting results can be found in Appendix B and are based on MCO self-reported data for services authorized between March 1, 2020 and May 30, 2020 (third quarter of fiscal year 2020). HHSC managed care contracts require MCOs to issue a determination on prior authorization requests within three business days of the request.³¹ The majority of MCOs reported making a decision on prior

³⁰ The majority of Medicaid services do not require prior authorization, thus, the analysis for this section of the report focused on services that most often require MCO prior authorization.

³¹ In response to SB 1207, (86th Legislature, Regular Session, 2019), HHSC is establishing a uniform timeline for Medicaid MCOs to process prior authorization requests with insufficient or inadequate documentation. The new process extends the timeline on an out-patient, non-emergent prior authorization request, allowing providers to submit additional documentation, request a peer-to-peer consultation with a physician of similar specialty and experience and does not exceed federally-required time frames for an MCO to render a decision.

authorization requests, on average, in three days or less, and most MCOs reported services initiated, on average, within 21 days of authorization. For specialty care in the STAR program, MCOs' average reported wait times for a prior authorization decision ranged from 0 days to 11 days, and the average reported wait times from MCO approval to service initiation ranged from 0 days to 53 days.

There are challenges and limitations to the data collected on prior authorization/service initiation wait times. Variation exists among MCOs in service authorization requirements for some services, as managed care contracts provide MCOs flexibility in establishing prior authorization policies. Prior authorization requirements also vary within an MCO's network. For example, certain providers may be exempt from requiring referrals or prior authorizations based on the provider's history and past performance.

Delays between prior authorization approval and service initiation can be attributed to multiple factors, including a member not following up with the provider, or the chosen provider not being available for an appointment. Similarly, a member not being available for a required assessment could result in delays in an MCO decision on a prior authorization request. An MCO also could require prior approval for purposes of claims payment and not service initiation, resulting in receipt of care before the date of service request or authorization.

HHSC will continue to explore additional methods to capture information and conduct meaningful analysis on the time it takes for members to obtain services after prior authorization. In addition to prior authorization data required for this report, HHSC utilization review staff conduct monthly and annual reviews of MCO prior authorization data, including requests, approvals and denials, and member appeals to ensure MCO prior authorization processes comply with state and federal guidelines governing authorization of health care services.

Provider Ratios

S.B. 760 requires HHSC to include in its biennial report to the Legislature specific information on provider-to-member ratios in an MCO's provider network, as well as benchmark ratios to indicate whether deficiencies exist in a given network. In response to this requirement, HHSC examined provider-to-member ratios for each MCO, by service area, and county type (metro, micro, and rural), for each Medicaid managed care program based on data from the third quarter of fiscal year 2020. See Appendix C for a full report of these ratios.

The Department of State Health Services (DSHS) Health Professional Resource Center is the primary source of health workforce information in Texas. While data on all physician specialties and health care provider types are not available, DSHS publishes data for primary care and psychiatry. Table 11 and Table 12 below show the ratio for the general population of Texas to one licensed primary care provider or one psychiatrist. The information reported in Table 11 and Table 12 below is derived from DSHS Supply tables (September 2019) at <http://www.dshs.texas.gov/chs/hprc/health.shtm>

Table 11. Texas Licensed Primary Care Providers: Ratio of 2019 Population to 1 Provider, Statewide and by Service Area, reported by County Type³²

Service Area	Within Entire Service Area	in Metro Counties	in Micro Counties	in Rural Counties
Statewide	1,320	1,240	1976	2,227
Bexar	1,302	1,264	1,426	2660
Dallas	1,147	1,142	NA	1,714
El Paso	1,825	1822	NA	3,401
Harris	1,222	1,206	9990	2,183
Hidalgo	1,872	1,773	3,020	6,780
Jefferson	2,191	1,719	3,039	2,597
Lubbock	1,407	1,258	NA	2,411
MRSA Central	1,352	1,112	2,306	1,843
MRSA Northeast	1,380	898	1,887	3,520
MRSA West	1,573	1,389	934	2,098
Nueces	1,330	1,045	3,155	2,232
Tarrant	1,375	1,371	1,551	NA
Travis	1,141	1,083	3,381	1,570

Note: 'NA' applies to situations in which a particular county type is not present within the service area.

³² Reported data is based on an aggregate of the population in all counties of a given county type within each service area. See Appendix A for country designations.

Table 3. Texas Licensed Psychiatrists: Ratio of 2019 Population to 1 Provider, Statewide and by Service Area, reported by County Type³³

Service Area	Within Entire Service Area	in Metro Counties	in Micro Counties	in Rural Counties
Statewide	12,804	11,486	21,889	81,907
Bexar	10,360	9,965	10,614	40,780
Dallas	9,901	9,789	NA	53,020.0
El Paso	21,811	21,726	NA	-
Harris	10,671	10,481	24,975	109,154
Hidalgo	33,434	31,211	61,912	-
Jefferson	31,130	14,946	255,298	-
Lubbock	20,939	16,804	NA	161,544
MRSA Central	18,853	11,800	56,494	123,477
MRSA Northeast	20,184	13,431	22,371	158,379
MRSA West	16,831	13,739	5,607	42,629
Nueces	29,006	19,023	97,813	-
Tarrant	16,861	16,704	32,580	NA
Travis	7,629	6,941	128,484	91,036

Note: 'NA' applies to situations in which a particular county type is not present within the service area.

HHSC tracks primary care physician and specialist counts based on data reported by MCOs; however, there are currently no established benchmarks for provider ratios, or managed care contract requirements for member-to-provider ratios. Although member-to-provider ratios can illustrate the number of providers available to members, these ratios are limited in their ability to demonstrate member access³⁴.

Table 13 and Table 14 provide information about the ratio of members to one primary care and to one psychiatrist in Medicaid managed care programs. When

³³ Reported data is an aggregate of the population in all counties of a given county type within each service area.

³⁴ The data does not capture whether the providers are accepting new Medicaid members, or actually serving Medicaid members. It is also not possible to know what share of the Medicaid providers' practices are devoted to serving Medicaid members.

compared to statewide data for the general population, the ratio of providers to members are generally more favorable for PCPs and Psychiatrists in Medicaid managed care. Statewide, the ratio of individuals to one PCP is 1:1,320, compared to a ratio of 1:154 for Medicaid, for all programs, and the ratio of individuals to one Psychiatrist is 1:12,804, compared to a ratio of 1:2,135 for Medicaid, for all programs. (See Appendix C for ratios for other provider types.)

Table 13. Medicaid Managed Care Primary Care Providers: Ratio of 2020 Q3 members to 1 Provider, Statewide and by County Type

Medicaid Managed Care Program	Within Entire Service Area	in Metro Counties	in Micro Counties	in Rural Counties
All Programs	154.2	153.1	131.7	129.5
STAR	170	170	163.9	140.3

Tarrant - all programs	716.9	709.5	1628.7	NA
Travis - all programs	377.3	326.6	1967.5	655

Note: 'NA' applies to situations in which a particular county type is not present within the service area.

MCO Network Analysis

In response to S.B. 760, HHSC amended managed care contracts to include new minimum provider access standards for travel time and distance for specific provider types and three county designations. These county designations are based on population and density, and are based on a modification of county types used by Medicare.

- Medicare Large Metro and Metro were combined to form HHSC Metro;
- Medicare Micro was used to form HHSC Micro; and
- Medicare Rural and Counties with Extreme Access Considerations (CEAC) were combined to form HHSC Rural.

Distance and Travel Time Standards

HHSC requires MCO provider networks to comply with distance or travel time standards in accordance with managed care contract requirements (Table 1). Travel time and distance standards vary by provider and county type.

Monitoring and Reporting

In March 2017, HHSC implemented a new process for analyzing MCO and DMO provider network data, designed to improve the accuracy and consistency of provider network analysis across MCOs and DMOs. While the previous monitoring process relied solely on MCO-reported data, under the revised process, MAXIMUS (the HHSC enrollment broker) validates MCO and DMO provider data to ensure accuracy of certain critical elements of the provider directory. HHSC uses this data to determine proximity of providers in relation to member residences.

HHSC uses geomapping analysis to determine MCO and DMO compliance with network distance requirements. If an MCO or DMO does not meet the required compliance standards, HHSC determines whether a contract remedy is appropriate. An MCO or DMO may request a special exception when it does not meet the standards. HHSC may grant exceptions for specific areas that do not have providers available for contracting, or if the MCO is unable to contract with providers in the area and has demonstrated reasonable efforts to do so.

Results of Distance Analysis

Figure 1 below shows the percentage of members within the required distance of at least two PCPs for MCOs, and of at least two main dentists for DMOs. The data presented is from the third quarter of fiscal year 2020. Appendices D and E provide details of MCO compliance with distance standards for PCPs, main dentists, and specialty providers by program, provider type, and county. The appendices include data by MCO and by county for select provider types and populations.

For the third quarter of fiscal year 2020, the following compliance thresholds were applied for access to primary care physicians and specialists:

- PCPs – 90 percent of the members within the required distance of two PCPs with an open panel³⁵; and
- All other providers - 90 percent of members within the required distance of at least one of each provider type.

³⁵ Open panel refers to a provider accepting new patients.

Figure 1: Percent STAR Members within distance standards of two primary care providers SFY 2020 Quarter 3 (March 2020 data)

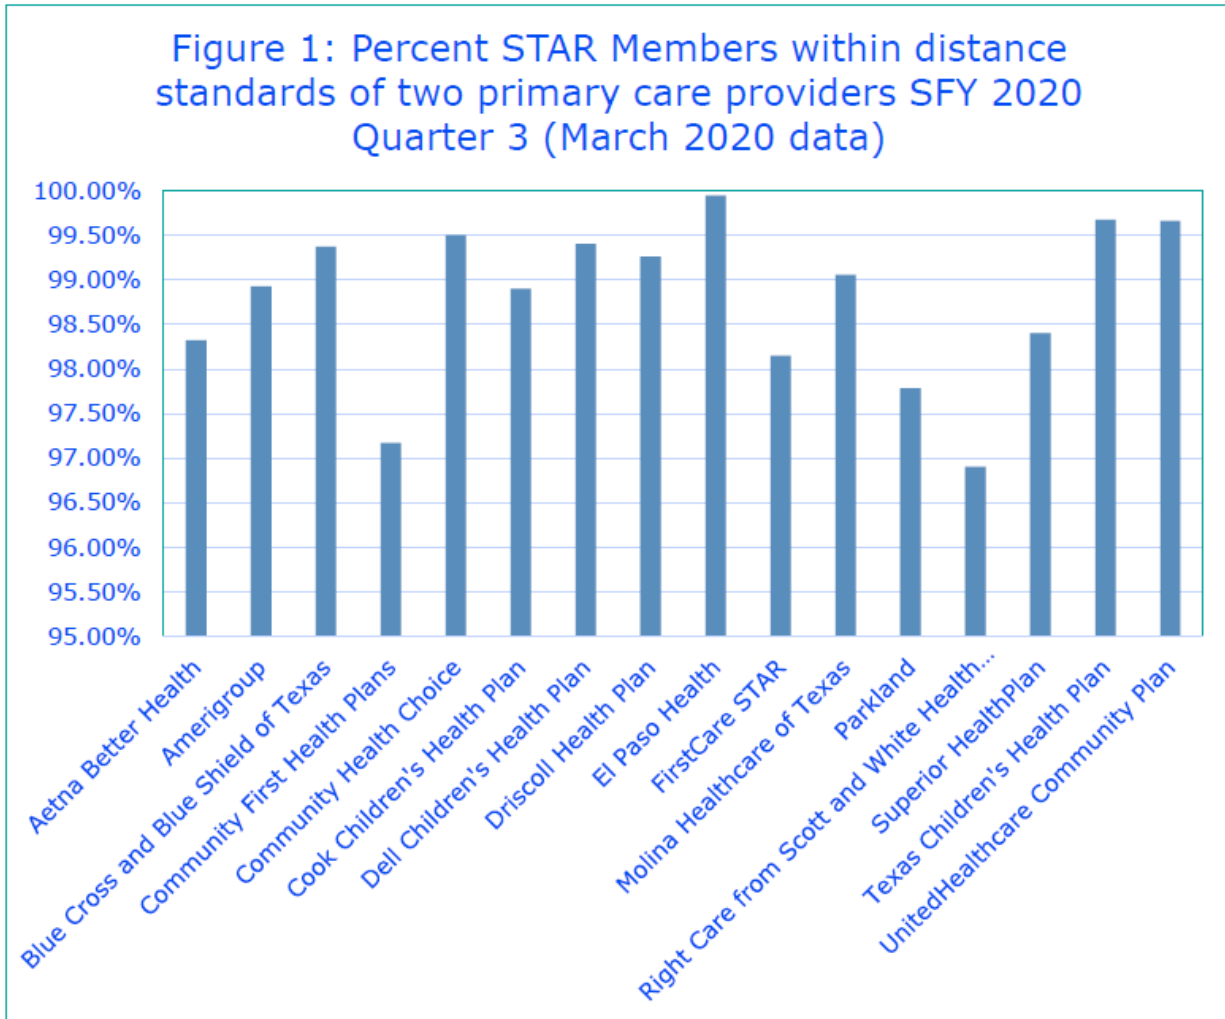

Figure 2: Percent STAR+PLUS Members within distance standards for two primary care providers SFY 2020 Quarter 3 (March 2020 data)

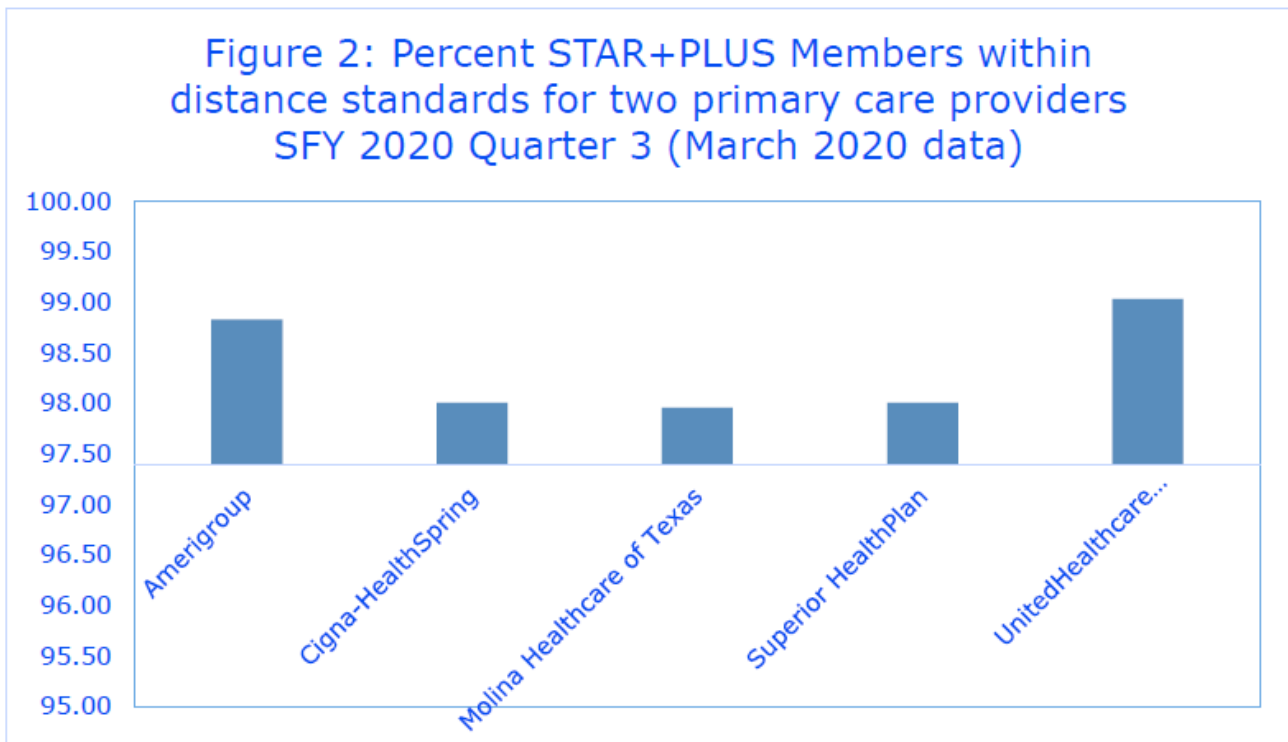

Figure 3: Percent STAR Health Members within distance standards of two primary care providers SFY 2020 Quarter 3 (March 2020 data)

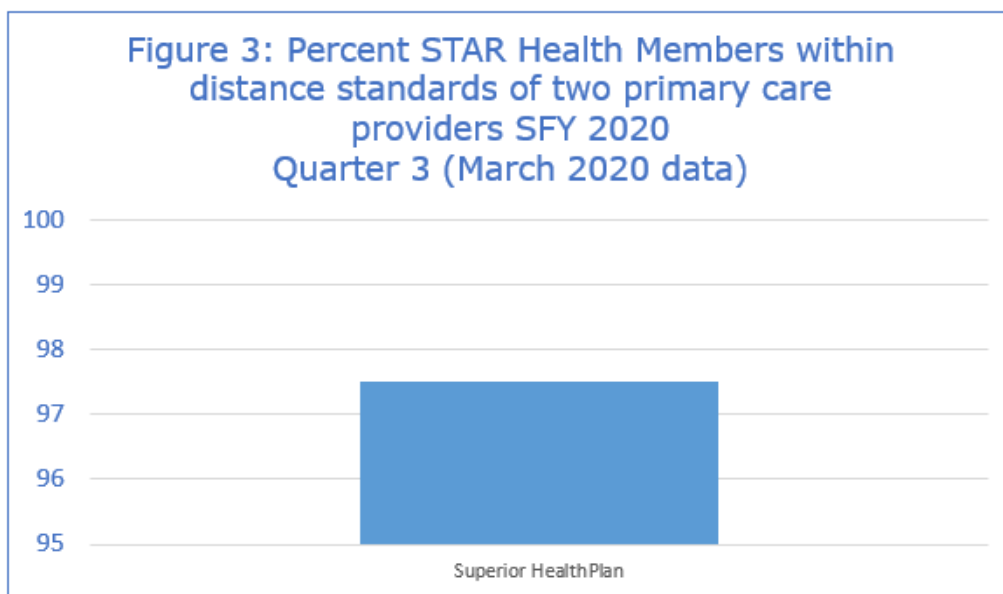

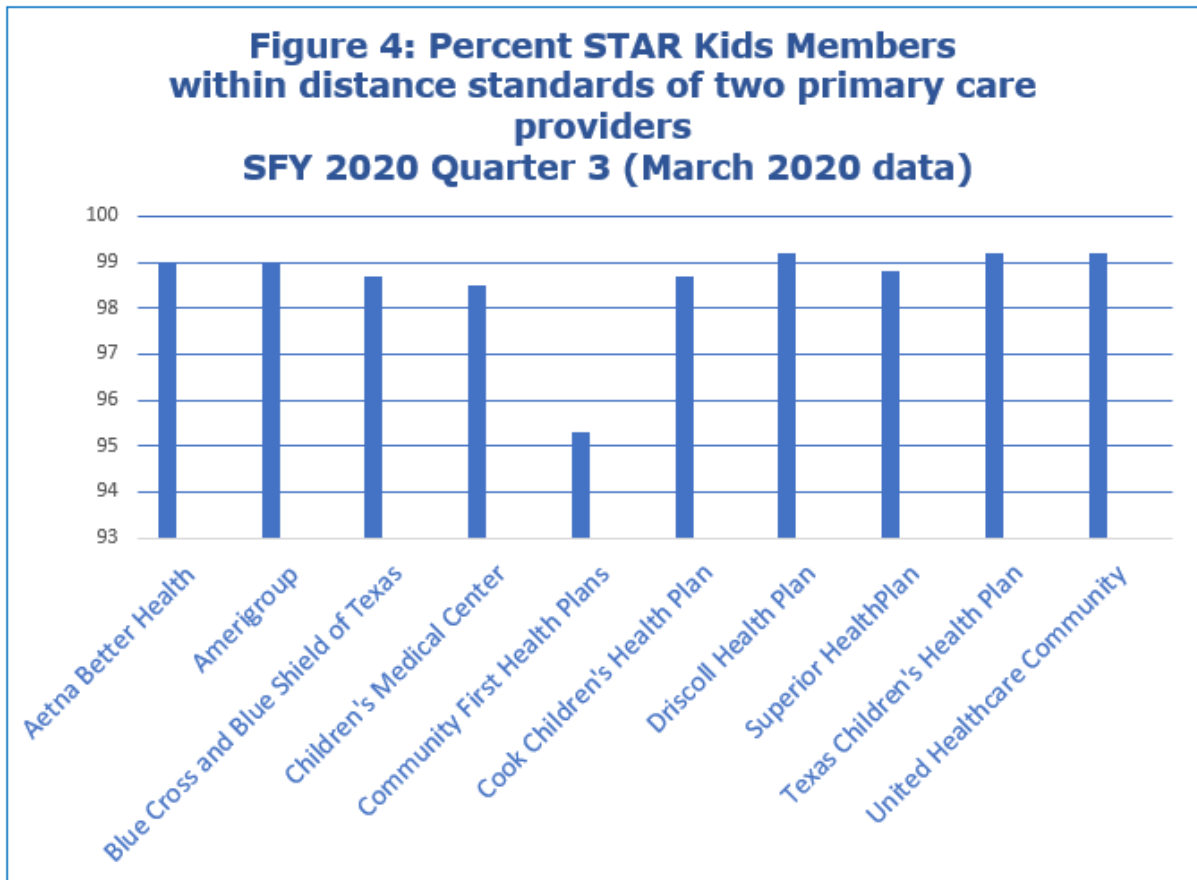

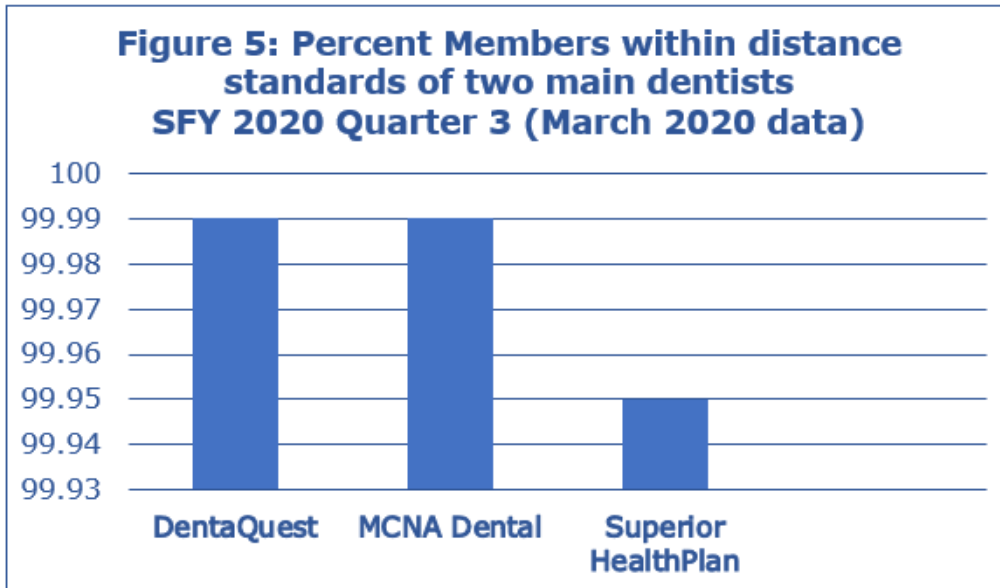

Figure 4: Percent STAR Kids Members within distance standards of two primary care providers SFY 2020 Quarter 3 (March 2020 data)³⁶

³⁶ Effective September 1, 2020, Children's Medical Center no longer participates in Texas Medicaid.

Figure 5: Percent Members within distance standards of two main dentists SFY 2020 Quarter 3 (March 2020 data)³⁷

Appendix D provides the results of analysis for the percent of members within distance standards of two primary care providers or main dentists. Performance includes the following highlights:

- STAR: with the exception of rural counties in the El Paso and Hidalgo service areas, all MCOs met or exceeded 90 percent of members within the distance standard of two PCPs;
- STAR+PLUS: with the exception of rural counties in the Hidalgo service areas, and micro counties in the Nueces service area, all MCOs met or exceeded 90 percent of members within the distance standard of two PCPs;
- STAR Health: regardless of county type, more than 97 percent of STAR Health members are within the distance standard of two PCPs;
- STAR Kids: with the exception of micro counties in the Bexar service area, all MCOs met or exceeded 90 percent of members within the distance standard of two PCPs; and
- Dental: regardless of county type, more than 99 percent of members are within the distance standard of two main dentists.

³⁷ Dental services are carved-in to the STAR Health program, which is administered by Superior HealthPlan.

Appendix E depicts the percent of members within distance standards of at least one specialty care provider. MCOs are generally in compliance with distance standards for most specialists; however, HHSC noted consistent issues with compliance with distance standards for audiology, and mental health targeted case management, particularly in areas of West Texas, as indicated below:

- In STAR, MCOs are generally in compliance with distance standards for the majority of specialist provider types with some exceptions, including:
 - ▶ Audiologists –Six of 13 service areas show all MCOs in full compliance across all counties; however, there are multiple occurrences of non-compliance for MCOs in the other seven service areas: Hidalgo, Jefferson, Lubbock, MRSA Central, MRSA Northeast, MRSA West and Nueces service areas.
 - ▶ Mental Health Targeted Case Management -Three of 13 service areas show all MCOs in full compliance across all counties; however, there are multiple occurrences of non-compliance for MCOs in the other 10 service areas: Bexar, Harris, Hidalgo, Jefferson, Lubbock, MRSA Central, MRSA Northeast, MRSA West, Nueces, Tarrant and Travis service areas.

In STAR PLUS, MCOs are generally in compliance with distance standards for the majority of specialist provider types with some exceptions, including:

- ▶ Audiologists -Six of 13 service areas show all MCOs in full compliance across all counties; however, there are multiple occurrences of non-compliance for MCOs in the other seven service areas: Hidalgo, Jefferson, MRSA Central, MRSA Northeast, MRSA West, Nueces and Tarrant service areas.
- ▶ Mental Health Targeted Case Management -Three of 13 service areas show all MCOs in full compliance across all counties; however, there are multiple occurrences of non-compliance for MCOs in the other 10 service areas: Bexar, Harris, Hidalgo, Jefferson, MRSA Central, MRSA Northeast, MRSA West and Nueces, Tarrant and Travis service areas.

In STAR Kids, MCOs are generally in compliance with distance standards for the majority of specialist provider types with some exceptions, including:

- ▶ Audiologists -Seven of 13 service areas show all MCOs in full compliance across all counties; however, there are multiple occurrences of non-compliance for MCOs in the other six service areas: Hidalgo, Jefferson, MRSA Central, MRSA Northeast, MRSA West and Nueces service areas.
- ▶ Targeted Case Management -Three of 13 service areas show all MCOs in full compliance across all counties; however, there are multiple occurrences of non-compliance for MCOs in the other 10 service areas: Bexar, Harris, Hidalgo, Jefferson, MRSA Central, MRSA Northeast, MRSA West, Nueces, Tarrant and Travis service areas.
- In STAR Health, the MCO is generally in compliance with distance standards for the majority of specialist provider types with some exceptions, including:
 - ▶ Audiologists -Eight of 13 service areas show the MCO in full compliance across all counties; however, there are multiple occurrences of non-compliance in the other five service areas: Hidalgo, MRSA Central, MRSA Northeast, MRSA West and Nueces service areas.
 - ▶ Mental Health Targeted Case Management -Four of 13 service areas show the MCO in full compliance across all counties; however, there are multiple occurrences of non-compliance in the other nine service areas: Harris, Hidalgo, Jefferson, MRSA Central, MRSA Northeast, MRSA West Nueces, Tarrant and Travis service areas.

MCO compliance results for all specialty provider types are reported in Appendix E. Though compliance with network standards may vary from Medicaid program to program, the data show provider shortages to be more common for micro and rural counties, and for certain specialty types (audiology, mental health targeted case management, pharmacy, and dental specialties). The two primary reasons cited for these network challenges are: a lack of available specialty providers in rural areas (e.g., no OB/GYN or ophthalmologist in the county), and providers who are in the area are not interested in participating in Medicaid managed care.

Limitations

Network reports reflect point-in-time data. While provider enrollment data is generally consistent over extended periods of time, actual enrollment numbers are subject to day-to-day fluctuations; and member enrollment data can fluctuate monthly.

There are also limitations to the data collection and analysis process. For example, providers and members whose addresses cannot be verified and geocoded, either due to information that is outdated, or in some cases incorrectly recorded, are excluded from analysis. The distance analysis for PCPs and main dentists is based on providers with an open panel to accept new patients; however, the data for specialists does not capture whether a provider is accepting new patients or has capacity for existing patients. While the analysis has limitations, it reflects the extent to which MCOs are able to contract with providers in each county and is one of the many tools HHSC uses to assess network adequacy.

4. Conclusion

Since the passage of S.B. 760, HHSC has made continuous efforts to enhance and improve MCO network adequacy requirements and processes for monitoring MCO compliance. HHSC adopted new travel time and distance standards for PCPs and specialty providers and updated processes for analyzing and monitoring MCO compliance with these standards. HHSC also enhanced requirements for provider directories and expedited credentialing. In 2018, HHSC adopted revised standards for LTSS and pharmacy providers; and in 2020 HHSC adopted revised network standards for outpatient chemical dependency treatment facilities, and outpatient opioid treatment programs. HHSC is currently working with stakeholders to develop additional options for monitoring network adequacy for community attendant care and anticipates adoption of new network adequacy standards in March 2021.

Additionally, HHSC is undertaking process improvement efforts to help streamline the Medicaid provider enrollment process. HHSC's provider portal redesign initiative includes the design, development, and implementation of a new online provider portal, Provider Management and Enrollment System, which will allow HHSC to manage and maintain enrollments for all Medicaid providers through a single online application.

HHSC uses a variety of tools to monitor and assess member access to care, including review of appointment wait times, analysis of out-of-network utilization and member complaints, and member satisfaction surveys. While none of these tools alone can effectively ensure provider network adequacy, combined they help HHSC monitor member access to care and identify areas for improvement.

HHSC is continually evaluating network adequacy standards and monitoring processes for Medicaid managed care programs, as part of an ongoing effort to ensure that members have access to a choice of quality health care providers and services. HHSC is working on a range of initiatives related to network adequacy, including:

- Streamlining the Medicaid provider enrollment process to reduce the enrollment cycle time for providers;
- Identifying process changes to improve the accuracy of MCO provider directories, including simplifying the process for providers to update their information in the Provider Information Management System;

- Developing and maintaining internal provider network adequacy-related dashboards to track:
 - ▶ MCO provider enrollment data and open panel status;
 - ▶ Provider terminations;
 - ▶ MCO compliance with network adequacy distance requirements; and
 - ▶ Therapy provider data, as required by Rider 15 (House Bill 1, 86th Legislature, Regular Session, 2019).
- Expanding the use of telemedicine, telehealth, and telemonitoring services to improve access to care for members in rural and underserved areas; and
- Developing network adequacy measures for community attendant services.

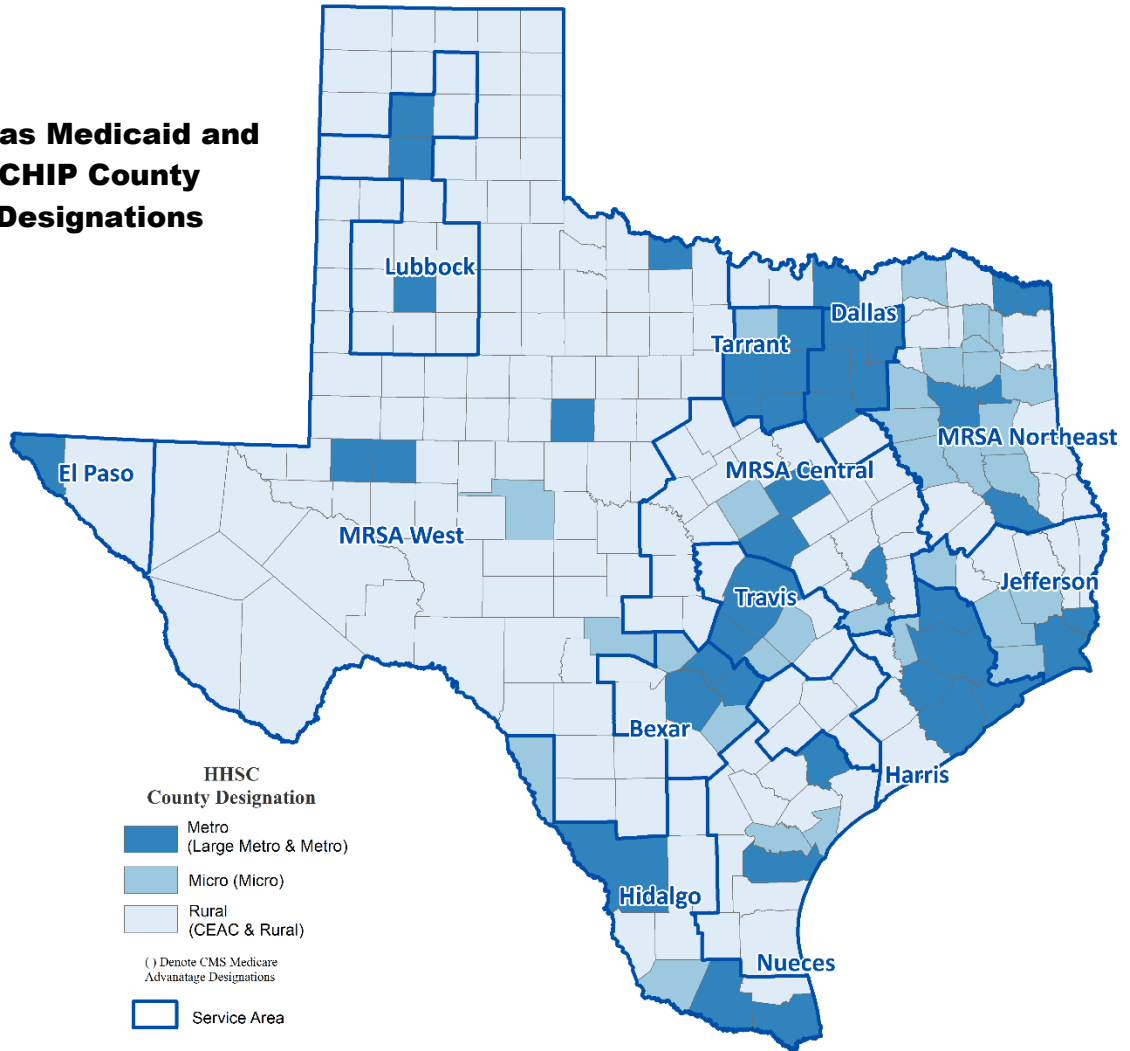

These activities are part of a coordinated effort to develop a more efficient, comprehensive approach for ensuring network adequacy in MCO provider networks.

List of Acronyms

Acronym	Full Name

Appendix A. County Designations

Texas Medicaid and CHIP County Designations

HHSC County Type	Medicare Advantage County Type	Population	Density
Metro	Large Metro	≥ 1,000,000	≥ 1,000/mi ²
Metro	Large Metro	500,000 – 999,999	≥ 1,500/mi ²
Metro	Large Metro	Any	≥ 5,000/mi ²
Metro	Large Metro	≥ 1,000,000	10 – 999.9/mi ²
Metro	Large Metro	500,000 – 999,999	10 – 1,499.9/mi ²
Metro	Large Metro	200,000 – 499,999	10 – 4,999.9/mi ²
Metro	Large Metro	50,000 – 199,999	100 – 4,999.9/mi ²
Metro	Large Metro	10,000 – 49,999	1,000 – 4,999.9/mi ²

HHSC County Type	Medicare Advantage County Type	Population	Density
Micro	Micro	50,000 – 199,999	10 – 99.9 /mi ²
Micro	Micro	10,000 – 49,999	50 – 999.9/mi ²
Rural	Rural	10,000 – 49,999	10 – 49.9/mi ²
Rural	Rural	<10,000	10 – 4,999.9/mi ²
Rural	CEAC	Any	<10mi ²

Notes

A county must meet both the population and density thresholds for inclusion in a given designation.

Notes

The County Designations in Appendix A are for purposes of assessing access to network providers (excluding pharmacies). The designations build upon CMS Medicare Advantage (MA) designations. The table above lists the population and density parameters applied to county type designations. A county must meet both thresholds for inclusion in a given designation. In order to facilitate monitoring, HHSC has combined the Large Metro and Metro MA categories into one category for Metro. The categories for Counties with Extreme Access Considerations (CEAC) and Rural counties have been combined to create the Rural category.

Appendix B. MCO Prior Authorization Reporting

Each of the tables in this Appendix present the average number of days between a request for authorization of a service, and the average number of days between the decision and receipt of the authorized service, reported by MCO, program, and type of service.

Data is self-reported by MCO for authorization requests received March - May 2020. Averages are rounded to nearest whole number. Average time for MCOs decisions can be impacted by incomplete authorization requests or delays in completing required evaluations to determine medical need. Negative numbers reflect services which were initiated prior to receipt of authorization request or MCO decision. MCOs are provided flexibility to determine if a service will require prior authorization. If an MCO does not require prior authorization, the table shows "not applicable."

Appendix C. Provider Ratios

Each of the tables in this Appendix presents results of analysis of the ratio of members to one provider. Results are reported for each MCO by service area, program, and provider type. Lower numbers indicate a better ratio.

Unless an exception is noted data below is derived from member and provider counts used for the third quarter of fiscal year 2020 MCO network provider analysis.

A number of ratios are noted as not applicable (NA) because a ratio cannot be calculated. Ratios can be NA for the following reasons:

The service area does not have the type of county (e.g. none of the counties in the Dallas Service Area meet the criteria for a micro county). These are represented as NA¹.

1. There are members, but no providers. These are represented as NA².
2. There are providers, but no members. These are represented as NA³.
3. There are no members, and no providers. These are represented as NA⁴.

Appendix D. MCO Network Analysis - PCPs and Main Dentists

Each of the tables in this Appendix presents the percent of members, by county type, who are within the distance standard of two providers. Results are reported by service area for each provider type and each MCO. Results are from HHSC Center for Analysis and Decision Support (CADS) distance analysis using March 2020 Medicaid managed care eligibility files, and MCO provider files. 'NA' in a cell indicates the county type does not exist in the service area, or there were no members enrolled with the plan during March 2020, and HHSC could not calculate the percent of Members within the distance standard.

Note: Each occurrence of failure to meet or exceed established compliance thresholds for network distance standards results in a CAP, and may result in liquidated damages for failure to comply with the terms of the CAP. 39

Appendix E. MCO Network Analysis - Specialists

Each of the tables in this Appendix presents the percent of members, by county type, who are within the distance standard of one provider. Results are reported by service area for each provider type and each MCO. Results are from HHSC CADS distance analysis using March 2020 Medicaid managed care eligibility files, and MCO provider files. 'NA' in a cell indicates the county type does not exist in the service area, or there were no members enrolled with the health plan during March 2020, and HHSC could not calculate the percent of members within the distance standard.

Note: Each occurrence of failure to meet or exceed established compliance thresholds for network distance standards results in a CAP, and may result in liquidated damages for failure to comply with the terms of the CAP.⁴⁰
