THE UNIVERSITY OF CHICAGO PRESS

The Elements

A Visual History of Their Discovery

Philip Ball

From water, air, and fire to tennessine and oganesson, celebrated science writer Philip Ball leads us through the full sweep of the field of chemistry in this exquisitely illustrated history of the elements.

“Ball has once again produced a terrific book, one that presents a tremendous amount of the history of chemistry in a manner that is engagingly written, beautifully illustrated, and conscientious about avoiding the usual traps of popular science: triumphalism, a Eurocentric and male bias, and a reliance on just-so stories that are inadequately supported by the evidence. I cannot think of another popular history of chemistry I have so enjoyed reading.”

—Michael D. Gordin, author of *On the Fringe:*

Where Science Meets Pseudoscience

2021 224 p. 7 1/2 x 9 3/4 200 color plates

1 Cloth ISBN: 978-0-226-77595-1 \$35.00 **Your Price: \$28.00**

Strata

William Smith's Geological Maps

Edited by the Oxford University Museum of Natural History

“Some books are beautiful, others are enlightening. *Strata* is both. Packed with exquisite illustrations, it presents the work of William Smith, a seventeenth-century geologist, who was the first person to comprehensively map the earth beneath our feet. It's the best non-fiction book I've read in a long time.”—*BBC News*

“Offers a glimpse of ancient history and reminds us of the immensity of geological time. . . . [The] beautifully drawn, colorful maps and drawings are as much a work of art as of science.”—*Library Journal*

2020 256 p. 10 1/2 x 14 3/8 500 color plates

2 Cloth ISBN: 978-0-226-75488-8 \$65.00 **Your Price: \$52.00**

Restricted Data

The History of Nuclear Secrecy in the United States

Alex Wellerstein

“Secrecy was a defining aspect of the creation of the atomic bomb and, 75 years later, nuclear secrecy remains a feature of American democracy. In *Restricted Data*, Alex Wellerstein examines the health of democracy in the face of big science, big government, and big weapons.”—*Science*

“Wellerstein peels back the layers of the nuclear onion to reveal a rich debate about what should be kept secret and why. . . . Confronts the reader with the confounding questions that scientists and government officials faced when trying to decide what information should be withheld.”—*Nature*

2021 528 p. 6 x 9 12 halftones, 7 line drawings, 3 tables

3 Cloth ISBN: 978-0-226-02038-9 \$35.00 **Your Price: \$28.00**

A Planet of Viruses

Third Edition

Carl Zimmer

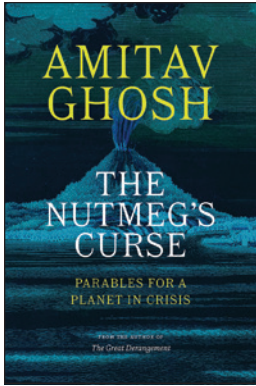

“Offers an edifying tour of the improbable world of viruses, which is also our world. The strategies our bodies have devised for survival are endlessly matched by viruses, with their uncanny intelligence for evolution. Over the past year, their ability to reinvent themselves has heightened the suspense around the development of new vaccines against COVID-19.”—*Guardian*

“Zimmer reshapes our understanding of the hidden realities at the core of everyday existence. . . . Concise and illuminating.”—*Washington Post*, on the first edition

2021 144 p. 5 x 7 24 halftones

4 Paper ISBN: 978-0-226-78259-1 \$15.00 **Your Price: \$12.00**

The Nutmeg's Curse

Parables for a Planet in Crisis

Amitav Ghosh

"With literary precision, [Ghosh] delves into the history and culture of conquest, drawing a direct line from actions committed hundreds of years ago to the planet's current predicament. A singular achievement and a title of its time, *The Nutmeg's Curse* reminds us why the land is crying."—*Booklist*

"In this brilliant book, aflame with insight and moral power, Ghosh shows that in the history of the nutmeg lies the path to our planetary crisis, twisting through the horrors of empire and racial capitalism. *The Nutmeg's Curse* brings to life alternative visions of human flourishing in consonance with the rest of nature—and reminds us how great are the vested interests that obstruct them."—Sunil Amrith, author of *Unruly Waters*

2021 336 p. 6 x 9 6 halftones

5 Cloth ISBN: 978-0-226-81545-9 \$25.00 **Your Price: \$20.00**

The Genesis Quest

The Geniuses and Eccentrics on a Journey to Uncover the Origin of Life on Earth

Michael Marshall

"*The Genesis Quest* traces the ongoing efforts of scientists to explain exactly how life first arose on Earth. Marshall introduces the field's major theories, figures, and controversies."

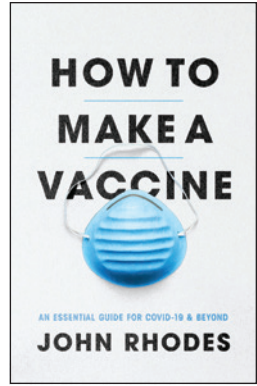

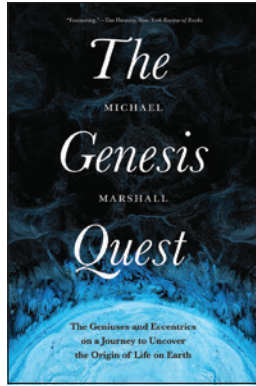

—*Publishers Weekly*

"Marshall's book focuses on the chemical research into life's origins. It's a fascinating and challenging story, and leavened with mini-biographies, the best of which are based on his own interviews with his subjects."

—*New York Review of Books*

2021 368 p. 6 x 9 7 halftones, 1 table

6 Paper ISBN: 978-0-226-81804-7 \$18.00 **Your Price: \$14.40**

How to Make a Vaccine

An Essential Guide for COVID-19 and Beyond

John Rhodes

"At a time when online searches for books on vaccines are more likely to turn up misinformation than reliable literature, *How to Make a Vaccine* is a required primer that demystifies concepts and gives an informative overview of how vaccines are developed and how they work. An essential guide indeed."—*The Inquisitive Biologist*

"A great book for those wanting to know the background. Rhodes covers many fascinating details in immunology and the history of vaccine discoveries, as well as the basic science behind the development of COVID-19 vaccines, a topic which couldn't be more important."

—Daniel M. Davis, author of *The Beautiful Cure*

2021 184 p. 5 1/2 x 8 1/2 1 table

9 Paper ISBN: 978-0-226-75913-5 \$20.00 **Your Price: \$16.00**

The Modern Myths

Adventures in the Machinery of the Popular Imagination

Philip Ball

“Ball does an impressive job with the literary histories behind each iconic title, assembling a set of origin stories rich in cultural history and imagination. . . . To Ball, mythic writing is where the conditions of irrationality, superstition, and enchantment persist: forms of wonder that depend on the disconnect between what we know for sure and what we simply believe.”

—*New York Times Book Review*

“In *The Modern Myths*, [Ball] makes a persuasive case that myth isn’t gone but can be found in stories closer to our current obsessions such as science and technology, globalization and individual psychology. . . . His provocations to debate are among the book’s many pleasures.”

—*Wall Street Journal*

2021 368 p. 6 x 9 60 halftones

10 Cloth ISBN: 978-0-226-71926-9 \$30.00 **Your Price: \$24.00**

The Second Jurassic Dinosaur Rush

Museums and Paleontology in America at the Turn of the Twentieth Century

Paul D. Brinkman

“Ever wonder why the great museums of New York City, Pittsburgh, and Chicago are filled with Jurassic dinosaurs? Brinkman’s account looks at when early dinomania spurred museums to try to get the biggest and best dinosaurs for their displays, setting the foundation for exhibits that still stand today.”—*National Geographic*

2020 345 p. 6 x 9 31 halftones, 8 line drawings

13 Paper ISBN: 978-0-226-75216-7 \$40.00 **Your Price: \$32.00**

Nature’s Mirror

How Taxidermists Shaped America’s Natural History Museums and Saved Endangered Species

Mary Anne Andrei

“Most welcome and much needed. . . . Andrei’s book presents the complex and admittedly sometimes contradictory personalities of, and motivations behind, the people who brought to life some of the most well known natural history museum displays ever seen in the United States. In it she also examines how the creation of these displays brought to light the rapidly declining populations of some of the animals presented in them, as well as their visual power to influence public interest in their conservation.”

—*Well-Read Naturalist*

2020 264 p. 6 x 9 60 halftones

Lawrence M. Principe, Alan Rocks, and E. C. Spary

Karen Darling, Acquiring Editor

A series that welcomes all historical treatments of chemistry, broadly construed,
and its diverse roles in society.

Published in partnership with the Science History Institute.

Lady Ranelagh

The Incomparable Life of Robert Boyle's Sister

Michelle DiMeo

“DiMeo has written the first full-length biography of Ranelagh by gleaning details of her life from her correspondence and the archives and writings of her relatives and contemporaries. The result is a detailed account of this notable woman, her work, and her close, collaborative relationship with her brother Robert—set against the backdrop of the turbulent politics of the times.”—*Physics Today*

2021 296 p. 6 x 9 10 halftones

16 Cloth ISBN: 978-0-226-73160-5 \$45.00 **Your Price: \$36.00**

The Poison Trials

Wonder Drugs, Experiment, and the Battle for Authority in Renaissance Science

Alisha Rankin

“The book’s fascination lies in its exposure of the early attempts at an approach to medicine that we would now call scientific—along with the revelation of how quickly and seemingly instinctively these attempts became enmeshed in a primitive version of what we would now call medical ethics. These tensions, like contagions, have always been with us.”—*Nature*

2021 312 p. 6 x 9 38 halftones, 1 table

17 Paper ISBN: 978-0-226-74485-8 \$35.00 **Your Price: \$28.00**

The Experimental Fire

Inventing English Alchemy, 1300-1700

Jennifer M. Rampling

“Rich and vast. . . . *The Experimental Fire* challenges us to grapple with a more expansive idea of history. . . . Just because something isn’t true doesn’t mean it’s not real, that it can’t be studied, argued over, or taught. Indeed, alchemy, Rampling argues, is nothing but the invention and reinvention of one type of knowledge. And what is literature, or history, or science, if not a variation of the same?”—*Chicago Review of Books*

2020 416 p. 6 x 9 19 halftones, 2 tables

20 Cloth ISBN: 978-0-226-71070-9 \$35.00 **Your Price: \$28.00**

The Sciences of the Soul

The Early Modern Origins of Psychology

Fernando Vidal

“Firm scholarly conviction has it that psychology began as a scientific discipline only in the last part of the nineteenth century. Vidal thoroughly overturns that assumption in his compelling historical reconstruction of the development of psychology from the sixteenth through the eighteenth centuries. . . . No other history comes close to his exquisite accomplishment.”

—Robert J. Richards, University of Chicago

2020 432 p. 6 x 9 3 halftones, 14 line drawings, 8 tables

25 Paper ISBN: 978-0-226-71036-5 \$40.00 **Your Price: \$32.00**

William Morgan

Eighteenth-Century Actuary, Mathematician and Radical

Nicola Bruton Bennetts

To meet William Morgan is to encounter the eighteenth-century world of finance, science and politics. Dubbed “the father of actuarial science,” his interests went far beyond actuarial tables—his papers on his electrical experiments reveal that, albeit unwittingly, he constructed the first X-ray tube. As a political radical, his outspoken views put him at risk of imprisonment during Pitt’s Reign of Terror. This accessible biography introduces readers to a fascinating polymath whose influence is still being felt today.

Sound Authorities

Scientific and Musical Knowledge in Nineteenth-Century Britain

Edward J. Gillin

“This book reveals the Victorians as you’ve never heard them before. . . . Gillin engagingly traces the traffic between concert halls, shops, laboratories, and lecture theaters that made it possible to think about sound scientifically. In doing so, he adds a new sense to our understanding of science in the making of the modern world.”

—Jim Secord, author of *Visions of Science*

2021 320 p. 6 x 9 33 halftones, 4 tables

28 Cloth ISBN: 978-0-226-78777-0 \$50.00 **Your Price: \$40.00**

The Science of Walking

Investigations into Locomotion in the Long Nineteenth Century

Andreas Mayer

“What could be more natural, more intuitive than walking? Yet as Mayer shows in this erudite and perceptive study, everyone from physiologists to physicists, drillmasters to dancemasters, novelists to physiognomists tried to plumb the secrets of human locomotion in the long nineteenth century. Deeply researched and beautifully illustrated, this book draws together philosophy, science, literature, and medicine into the fascinating story of a science that sought the essence of the human and the truths of character in how we put one foot in front of another.”—Lorraine Daston, director emerita, Max Planck Institute for the History of Science

2020 232 p. 6 x 9 50 halftones

29 Cloth ISBN: 978-0-226-32835-5 \$50.00 **Your Price: \$40.00**

Lines of Thought

Branching Diagrams and the Medieval Mind

Ayelet Even-Ezra

“Even-Ezra roots the history of ideas in her probing analysis of habits of reading materialized in the horizontal tree diagrams that fill the margins of medieval university manuscripts. Applying concepts from linguistics and cognitive science within a framework inspired by Extended Mind Theory, the author reconstructs coordinated habits of hand and mind that remain as critical today in literary criticism, cognitive studies, and computational linguistics as they were to medieval theology, philosophy, literature, logic, law, and medicine. A brilliant and utterly original book.”

—Jeffrey F. Hamburger, author of *Diagramming Devotion: Berthold of Nuremberg’s Transformation of Hrabanus Maurus’s Poems in Praise of the Cross*
2021 272 p. 8 1/4 x 11 4 color plates, 27 halftones,

Before Nature

Cuneiform Knowledge and the History of Science

Francesca Rochberg

“Positing the absence of a Mesopotamian concept of ‘nature’ as a fundamental discontinuity between Mesopotamian and later Western approaches to the phenomenal world, Rochberg offers a compelling case that they nonetheless display sufficient kinship to grant—indeed, necessitate—a place for cuneiform knowledge in the history of science. . . . A thought-provoking take on a perennial question: How can we approach the knowledge traditions of societies that conceive of the world in a fundamentally different way from ourselves?”—*Isis*

2020 392 p. 6 x 9 1 halftone, 1 table

The Arts of the Microbial World

Fermentation Science in Twentieth-Century Japan

Victoria Lee

“In *The Arts of the Microbial World*, Lee explores how Japanese scientists treated microbes not as threats, but as gifts, from which they conjured new foods, drinks, drugs, fuels, and tastes. The result is a thrilling and surprising new history of fermentation biology that offers a nuanced counterpoint to western, gene-centric histories. Wonderfully written and brilliantly researched, this is compelling and exciting work.”

—Christopher Otter, Ohio State University

Making Modern Science, Second Edition

Peter J. Bowler and Iwan Rhys Morus

“Explains difficult scientific and philosophical issues in brief and often surprisingly clear terms. . . . The field of history of science has been calling out for a book just like this one.”—*Science*

“A real landmark. Finally, two first-rate academic historians—one a specialist in biological and earth sciences, one in physical sciences—both firmly committed to sociological, contextual approaches, offer an overview of their discipline for the beginning student.”

—*Times Literary Supplement*

2020 608 p. 6 x 9 93 halftones, 14 line drawings

The Chicago Guide to College Science Teaching

Terry McGlynn

“Many of us find ourselves in front of a university classroom with little formal training in how to be effective instructors or how to mentor diverse populations of undergraduates. McGlynn’s book is the resource so many of us have been waiting for. . . . Whether you are new to college instruction or a seasoned professor you are certain to discover tools that will improve your science teaching.”—Corrie Moreau, Cornell University

The Other Dark Matter

The Science and Business of Turning Waste into Wealth and Health

Lina Zeldovich

“Here is an indispensable book about what we might call the Anthro-poo-cene. Humanity’s current collision course with nature has everything to do with energy and how we abuse it—including the human waste products of our metabolic bodies. This lively and entertaining history is also full of innovative ways people are finally dealing with their you-know-what.”

—Mary Ellen Hannibal, author of *Citizen Scientist: Searching for Heroes and Hope in an Age of Extinction*

2021 264 p. 6 x 9 8 halftones

51 Cloth ISBN: 978-0-226-61557-8 \$26.00 **Your Price: \$20.80**

Dangerous Earth

What We Wish We Knew about Volcanoes, Hurricanes, Climate Change, Earthquakes, and More

Ellen Prager

“Gale-force winds, torrential rainfalls, catastrophic ground shaking, and searing flows of molten rock are just a few examples of natural phenomena that can be devastating for nearby human populations. In *Dangerous Earth* . . . Prager discusses some of the most destructive natural disasters of recent history, the geologic forces at work, what scientists have learned by studying them, and how much we have yet to understand.”—*Physics Today*

2020 272 p. 6 x 9 9 color plates, 24 halftones

The Climate of History in a Planetary Age

Dipesh Chakrabarty

“One of the first thinkers to reckon with the concept of the Anthropocene and its relation to humanism and its critics, Chakrabarty forges new territory in his account of the planetary. If globalism was an era of human and market interconnection, the planetary marks the intrusion of geological forces, transforming both the concept of ‘the human’ and its accompanying sense of agency. This is a tour de force of critical thinking that will prove to be a game changer for the humanities.”—Claire Colebrook, Pennsylvania State University

2021 296 p. 6 x 9 2 halftones

54 Paper ISBN: 978-0-226-73286-2 \$25.00 **Your Price: \$20.00**

Cataclysms

An Environmental History of Humanity

Laurent Testot

“In this essential book, Testot has written a fascinating history of the relationship of mankind with its environment. At each stage of its historical evolution since the Neolithic, mankind has led a more and more aggressive war on nature. The question remains: who will end this war and prevent us from entering into chaos? To answer, this book is a must-read.”

—Philippe Beaujard, author of *The Worlds of the Indian Ocean*

2020 480 p. 6 x 9 1 halftone, 1 table

We Are All Whalers

The Plight of Whales and Our Responsibility

Michael J. Moore

“Moore, a marine scientist and veterinarian, makes a compelling argument that whales’ survival depends on each of us—not just on those who venture out on ships, hunting whales for meat and blubber. It’s sobering to grapple with the ways we might unwittingly contribute to the mammals’ demise, like by eating commercially caught seafood. But Moore also offers reason to be hopeful, including new technologies for ropeless fishing.”—*Washington Post*

2021 224 p. 5 x 8 33 halftones

63 Cloth ISBN: 978-0-226-80304-3 \$25.00 **Your Price: \$20.00**

Why Study Biology by the Sea?

Edited by Karl S. Matlin, Jane Maienschein, and Rachel A. Ankeny

“A fascinating collection of essays on the historical emergence of marine biological stations, the diversity of work they pursue, and their significant contributions to scientific discovery and knowledge.”—Diana Kenney, Marine Biological Laboratory

“By showing, over and over again, the importance of obscure sea creatures for building basic biological knowledge, this book offers a powerful argument for sustaining the institutions that allow scientists to study them.”—Lynn K. Nyhart, University of Wisconsin–Madison

Convening Science: Discovery at the Marine Biological Laboratory

Now in Paperback

Ahab's Rolling Sea

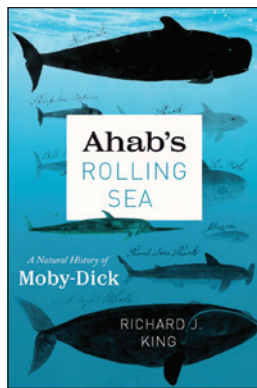

A Natural History of Moby-Dick

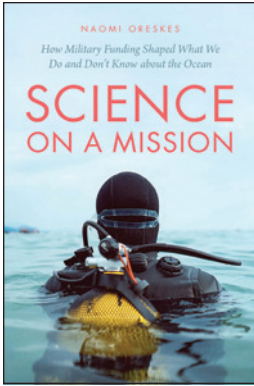

Richard J. King

“Herman Melville’s sprawling masterpiece *Moby-Dick* is a fictional feat studded with empirical evidence, reveals maritime historian King in this invigorating study. King traces references to ethology, meteorology, marine microbiota and the oceans to Melville’s sailing experience in the Pacific and wranglings with the works of scientists William Scoresby, Louis Agassiz and others. *Moby-Dick*, King boldly avers, is a ‘proto-Darwinian fable’—and its beleaguered narrator, Ishmael, an early environmentalist.”—*Nature*

Science on a Mission

How Military Funding Shaped What We Do and Don't Know about the Ocean

Naomi Oreskes

"Insightful. . . . The book reminds us that science does not happen in a vacuum."
—*Scientific American*

"Impressive and authoritative. . . . Oreskes uses fascinating historical episodes to reveal serious, underappreciated consequences of oceanographers' prolonged reliance on secret, mission-driven navy projects. . . . As an exposé of how navy-sponsored oceanographers wound up constraining their own research agendas and believing their own myths, the book should give pause to all scientists who consider themselves immune to the potential influence of their funders, or who romanticize the golden age of military scientific patronage."—*Science*

2021 744 p. 6 x 9 73 halftones, 17 line drawings

68 Cloth ISBN: 978-0-226-73238-1 \$40.00 **Your Price: \$32.00**

Elsewhere

A Journey into Our Age of Islands

Alastair Bonnett

"A great primer on the concept of islands in the modern age. . . . Engagingly written."
—*Library Journal*

"[A] beguiling, fact-filled account of the world's headlong dash to build artificial islands. Via a mixture of extensive desk research and short field visits, Bonnett invites readers to journey with him from military-orientated 'Frankenstein Islands' in the South China Sea to gigantic windfarms anchored to the bottom of the North Sea."—*Times Literary Supplement*

What Kind of Ancestor Do You Want to Be?

Edited by John Hausdoerffer, Brooke Parry Hecht, Melissa K. Nelson, and Katherine Kassouf Cummings

This book brings together a thoughtful community of Indigenous and other voices and demands a return to the force of lineage—to spiritual, social, and ecological connections across time.

“What Kind of Ancestor Do You Want to Be?” captures the deep dialogue, continuity, and resonance Indigenous peoples feel and espouse for ancestors, ourselves, our children—with a view for the now and for our very uncertain future. And yet, its audience is at once Indigenous and Universal. Weaving poetry, narrative, interview, essay, and spirit, it is a unique, landmark tapestry. Utterly timely and profoundly urgent.

Surroundings

A History of Environments and Environmentalisms

Etienne S. Benson

“In this timely and erudite book, Benson offers a fresh perspective on how the environment became such a central category in the modern world. Surroundings excavates the chasm between humans and the natural world that often underlies ‘environment,’ exposing the notion’s inadequacy as well as its fruitfulness. An indispensable text for students, scholars, activists, and anyone interested in the history—and future—of environmentalism.”

—Angela N. H. Creager, Princeton University

Carbon Technocracy

Energy Regimes in Modern East Asia

Victor Seow

This book examines the deep links between energy extraction and technocratic governance through the history of Fushun, a town in North-eastern China that was once East Asia's biggest coal mine.

"Seow shows that civilizations built on coal undermine their own foundations with each strike of the shovel. His exploration of carbon technocracy highlights how the desire for technological progress and development runs along a deep seam of violence. Profoundly humane and thoughtful."—Kate Brown, author of *Manual for Survival: An Environmental History of the Chernobyl Disaster*

Studies of the Weatherhead East Asian Institute

2022 384 p. 6 x 9 25 halftones

Dead Reckoning

Air Traffic Control, System Effects, and Risk

Diane Vaughan

“With *Dead Reckoning*, Vaughan—a leading student of how organizations go wrong—studies an organizational system, the air flight control system for commercial aviation, with an extraordinary track record of getting things right. . . . A breathtaking achievement, a comprehensive, analytically shrewd, and gracefully written study that explains the effectiveness of air flight controllers both in routine times and during crises.”—Paul DiMaggio, New York University

2021 640 p. 6 x 9 16 halftones

84 Cloth ISBN: 978-0-226-79640-6 \$35.00 **Your Price: \$28.00**

Shaping Science

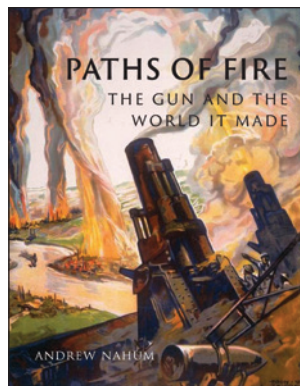

Organizations, Decisions, and Culture on NASA's Teams

Janet Vertesi

“Vertesi has lifted the curtain for all to see. Embedded with various NASA projects for years, she takes readers into the heart of two of them. . . . [She] does not simply describe the nuts and bolts of how these missions operate. Rather, she draws sweeping conclusions about the very nature of scientific discovery—what gets found—and how it depends on the ways in which scientists collaborate. . . . No matter how the lakes on Titan shimmer, or what the mineralogy of a particular Martian rock turns out to be, it was the people behind the spacecraft, keyboards and endless tele-conferences that drove what these interplanetary robots discovered.”—*Nature*

2020 352 p. 6 x 9 12 halftones

85 Cloth ISBN: 978-0-226-69108-4 \$45.00 **Your Price: \$36.00**

Paths of Fire

The Gun and the World It Made

Andrew Nahum

“Ancient yet contemporary, the gun has for centuries dominated the world in a myriad of ways and is woven into the fabric of human existence. People in fortunate countries are not often aware of this, according to Nahum, whose chronicle of the gun is an authoritative as well as original study of this invention and its impact on society and nations. . . . The book abounds with amusing anecdotes as well as revealing portraits of key figures.”—*History of War*

Pragmatism's Evolution

Organism and Environment in American Philosophy

Trevor Pearce

"The merit of Pearce's book lies in the huge amount of historical information and precision he brings to a familiar story. . . . [The] book is rich in detail, well-delivered and well-written. It will be invaluable to both scholars of pragmatism and historians of science alike and certainly proves the usefulness of the history of science in increasing our understanding of pragmatist theses, whether in metaphysics or ethics, beyond a vague ritualistic reference to Darwin. . . . Pearce has done a superb job."—*Metascience*

Information and Experimental Knowledge

James Mattingly

"A very stimulating and original exploration of a large number of issues linked to the role of experimentation in science. . . . Mattingly defends a novel account of experiments as having to do with the flow of information between proximate systems which are the immediate objects of experimentation and the more distal systems which we use experiments to learn about. I strongly recommend this thought-provoking book to anyone with an interest in these topics."

—James Woodward, University of Pittsburgh

2021 400 p. 6 x 9 13 halftones

Theory and Reality

An Introduction to the Philosophy of Science, Second Edition

Peter Godfrey-Smith

"Godfrey-Smith presents a clear, comprehensive, and accessible introductory survey of the major problems and movements in the philosophy of science. . . . His exposition is accented by insightful commentary and criticism, and by examples from the history of science, all with a keen sense of humor."—*Science Education*

"A stimulating introduction to nearly every department of general philosophy of science. . . . A very fresh and well-conceived book."

—*Journal of the History of the Behavioral Sciences*

2021 368 p. 6 x 9 7 halftones

98 Paper ISBN: 978-0-226-61865-4 \$30.00 **Your Price: \$24.00**

The Evolutionary Origins of Life and Death

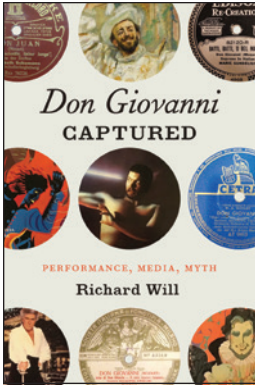

Pierre M. Durand

The question of why an individual would actively kill itself has long been an evolutionary mystery. Durand's ambitious book answers this question through close inspection of life and death in the earliest cellular life. As Durand shows us, cell death is a fascinating lens through which to examine the interconnectedness, in evolutionary terms, of life and death. It is a truism to note that one does not exist without the other, but just how does this play out in evolutionary history?

"This book, compact and simple but densely packed with information and ideas, presents the new edifice of evolutionary biology, a vibrant, progressing field that goes far beyond the confines of neo-Darwinism."—Eugene V. Koonin, National Center for Biotechnology Information

2020 232 p. 6 x 9 30 halftones, 3 tables

99 Paper ISBN: 978-0-226-74776-7 \$35.00 **Your Price: \$28.00**

Don Giovanni Captured

Performance, Media, Myth

Richard Will

In “*Don Giovanni*” *Captured*, Richard Will sets out to analyze more than a century’s worth of recorded performances of the opera, tracing the ways it has changed from one performance to another and from one generation to the next. Will consults both audio recordings, starting with wax cylinders and 78s, as well as video recordings, including DVDs, films, and streaming videos. By choosing a work with such a rich and complex tradition of interpretation, Will helps us see *Don Giovanni* as a standard-bearer for evolving ideas about desire and power, both on and off the stage.

Painting with Fire

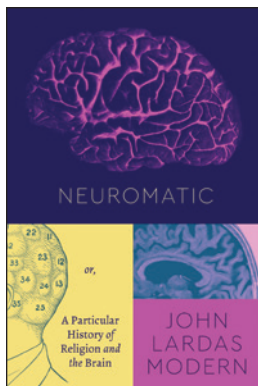

Sir Joshua Reynolds, Photography, and the Temporally Evolving Chemical Object

Matthew C. Hunter

“*Painting with Fire* is scholarship of signal vision, intellectual force and literary panache. Transforming our understanding of even the most canonical of geniuses such as Joshua Reynolds, it urges with passion and penetration an original interpretation of painting as a chemical and ecological enterprise, where understandings of time itself unfold through the natural materials of artistic practice. It is bravura, breathtaking, and sometimes breathless work, powerfully confirming Hunter’s voice as one of the most vibrant and virtuosic on early modern art and science today.”—James Delbourgo, author of *Collecting the World: Hans Sloane and the Origins of the British Museum*

2020 304 p. 7 x 10 20 color plates, 68 halftones, 1 table

What Is Time?

An Enquiry

Truls Wyller

“With this erudite yet very accessible book, Wyller tackles the most central question in the study of time: How do we reconcile the time of physics with time as we experience it? His answer—drawing on history, philosophy, science, and literature—is that time is constituted by consciousness itself. Delightful, synoptic, and laudably interdisciplinary.”—Adrian Bardon, author of *A Brief History of the Philosophy of Time*

From Data to Quanta

Niels Bohr's Vision of Physics

Slobodan Perović

"In this book, Perović provides a fascinating new perspective on Bohr's unique approach to physics, in which experiment played a pivotal role in the very process of constructing new theories. Here Perović weaves together careful historical research with philosophical insight in presenting an image of Bohr as a theoretical physicist whose thinking was deeply immersed in the daily workings of the laboratory. This book constitutes a valuable contribution to Bohr scholarship and the philosophy of scientific practice."—Kristian Camilleri, University of Melbourne

2021 240 p. 6 x 9 8 halftones, 1 line drawing

Immunization

How Vaccines became Controversial

Stuart Blume

“Blume’s *Immunization* is a clearly written, brilliant, and highly sophisticated look at the roots of the growing phenomenon of ‘vaccine hesitancy.’ He rejects the dominant, and superficial interpretation by public health officials of what is going on, and shows the reader what insights occur when you really stop and listen to what people are saying rather than assuming you already know what motivates them and pigeon-holing their supposed views into various unflattering categories.”—William Muraskin, City University of New York

of Addiction
in America

David Herzberg

New Edition

The Death Gap

How Inequality Kills

David A. Ansell, MD

"This passionate polemic uses powerful patient stories to highlight the importance of neighborhood conditions, healthcare inequalities and poverty in explaining the health gap between black and white Americans. Drawing on detailed case studies of racial inequalities in breast cancer mortality, the health consequences of mass imprisonment, immigration status and access to healthcare, the Chicago heatwave and Hurricane Katrina, Ansell vividly unpicks a spider's web of causality. . . . This is a wide-ranging and very important book. Easy to read and engaging, it makes the social determinants come alive."

—*Times Higher Education*

The Province of Affliction

Illness and the Making of Early New England

Ben Mutschler

"Timely for its historical reflections on the challenges posed by disease, *The Province of Affliction* documents the resilient responses of early New Englanders to the regular occurrences of serious illness. Mutschler provides a poignant and pointed account of a world in which colonial settlers regularly stretched their capacities to tend to the sick and dying."—Kathleen Brown, University of Pennsylvania

American Beginnings, 1500-1900

2020 368 p. 6 x 9

144 Cloth ISBN: 978-0-226-71442-4 \$55.00 **Your Price: \$44.00**

Just the Tonic

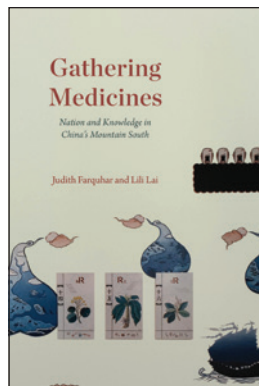

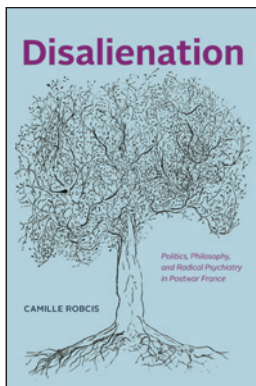

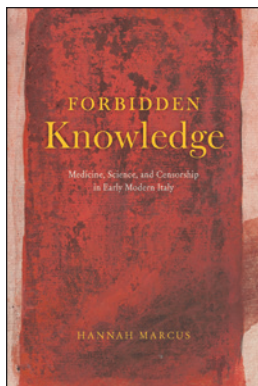

A Natural History of Tonic Water

Kim Walker and Mark Nesbitt

Distributed for Royal Botanic Gardens, Kew

2020 144 p. 6³/₄ x 9³/₄ 150 color plates

145 Cloth ISBN: 978-1-84246-689-6 \$25.00 **Your Price: \$20.00**

Forbidden Knowledge

Medicine, Science, and Censorship in Early Modern Italy

Hannah Marcus

“Marcus shows how censors did their job in Counter-Reformation Italy, using medicine as a test case. Censors’ tools ranged from humanist techniques for reading, which enabled them to find and highlight problematic passages, to pens and scissors, with which they defaced the names of religious enemies and much more. But their means and powers were always limited. Drawing on unexplored documents, Marcus also recreates the system of permissions that enabled medical men to stay abreast of the new books printed in Protestant Europe. As lively as it is learned, this book reveals that Italian libraries witnessed as many scenes of struggle as of repression.”—Anthony Grafton, Princeton University

2020 360 p. 6 x 9 40 halftones, 2 tables

146 Cloth ISBN: 978-0-226-73658-7 \$45.00 **Your Price: \$36.00**

Bodies Politic

Disease, Death and Doctors in Britain, 1650–1900

Roy Porter

“[A] magical history tour of illness and public attitudes to disease and doctors over the past 250 years. Dense with thought-provoking reflections and makes you realize how very much we remain at the mercy of all too fallible doctors.”
—*Daily Mail*

Distributed for Reaktion Books

2021 368 p. 5 x 7 3/4 137 halftones

147 Paper ISBN: 978-1-78914-279-2 \$15.00 **Your Price: \$12.00**

Merchants of Medicines

The Commerce and Coercion of Health in Britain's Long Eighteenth Century

Zachary Dornier

2020 280 p. 6 x 9 24 halftones, 5 tables

148 Cloth ISBN: 978-0-226-70680-1 \$50.00 **Your Price: \$40.00**

Disalienation

Politics, Philosophy, and Radical Psychiatry in Postwar France

Camille Robcis

“This is a superb history of how the theory and praxis of institutional psychotherapy inflects the work of French thinkers. . . . It is an insightful account of the constellation out of which emerged some of the most consequential ideas in late-twentieth-century French thought. An impressive achievement.”—Carolyn J. Dean, author of *The Moral Witness: Trials and Testimony after Genocide*

Chicago Studies in Practices of Meaning

2021 240 p. 6 x 9 24 halftones

149 Paper ISBN: 978-0-226-77774-0 \$35.00 **Your Price: \$28.00**

Gathering Medicines

Nation and Knowledge in China's Mountain South

Judith Farquhar and Lili Lai

“In *Gathering Medicines*, Farquhar and Lai offer a remarkably wide range of observations and reflections on the anthropology and history of medicine as a living social practice in southern China. They weave into their discussion a fascinating array of life histories and object narratives, a rich assortment of institutional sites and both textual and nonliterate practices, and an abundance of self-critical reflections on methodology and meaning. This is a major, pathbreaking piece of scholarship, indicative of the highest-quality research and analysis.”
—David Arnold, University of Warwick

2021 304 p. 6 x 9 5 halftones, 3 tables

150 Paper ISBN: 978-0-226-76365-1 \$35.00 **Your Price: \$28.00**

Appetite and Its Discontents

Science, Medicine, and the Urge to Eat, 1750–1950

Elizabeth A. Williams

2020 416 p. 6 x 9 10 halftones

151 Paper ISBN: 978-0-226-69304-0 \$35.00 **Your Price: \$28.00**
