Agile Tour Bucharest 2013

 *agile tour*
2013

Warming-up Poll

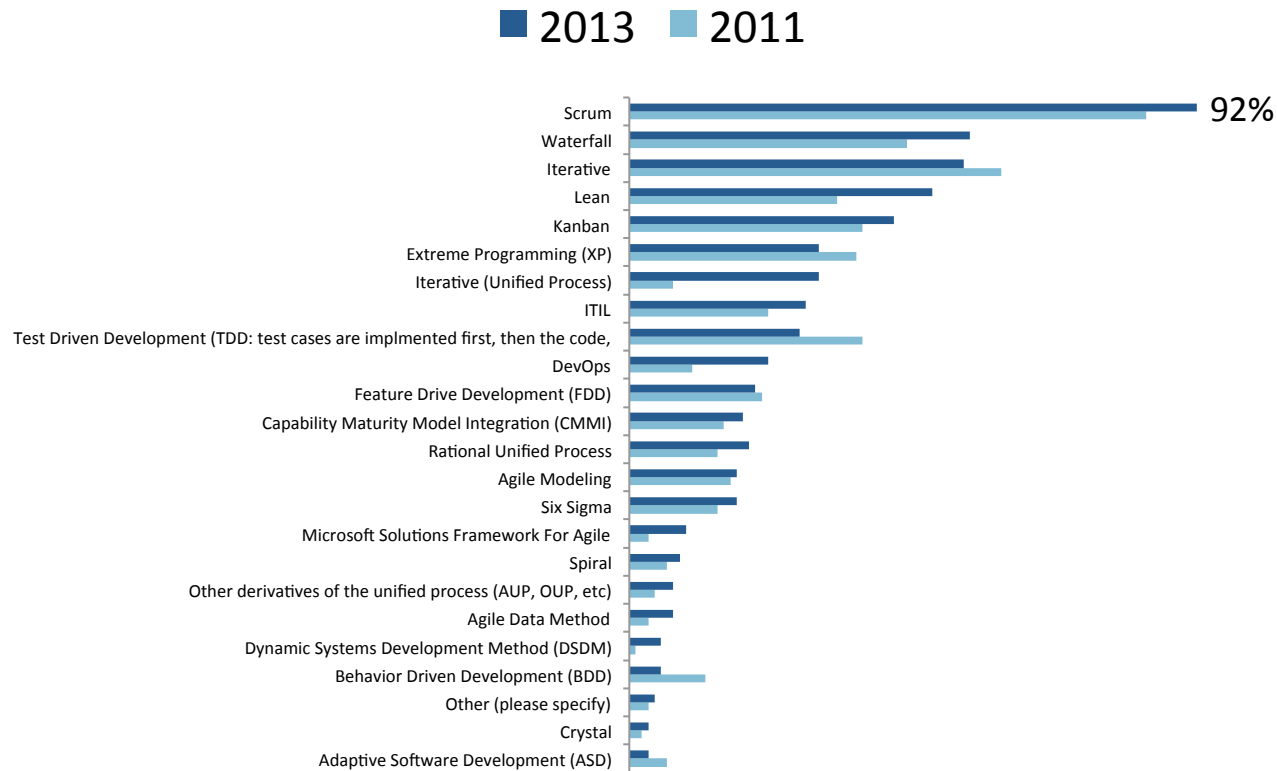

3
MIN

1. Who is doing Scrum?
 - Who is combining this with eXtreme Programming (or similar)?
2. Does Scrum make you and your organization 'Agile'?
 - Yes?
 - No?
3. What is so important about being 'Agile'?

Remember: 'Agile' refers to the mindset, the values and the principles expressed in the "Manifesto for Agile Software Development". *Now, that was a focus.*

Fact (1): The Ubiquitous Scrum

“Another finding compared to 2011 is that fewer teams are doing water-scrum-fall.”

Source: Forrester November 2011-2013 Global Agile Software Application Development Online Survey

Scrum Is A Journey

Scrum thrives on discovery, experimentation-based learning and collaboration via:

- Short, high value iterations.
- Self-organizing, cross-functional teams.
- High visibility.

With its distinct rules, Scrum is an actionable way to adopt the Agile paradigm in software development.

The House Of Scrum

- The house of Scrum is a warm house.
- It's a house where people are WELCOME.
- The house of Scrum is an inclusive house.

But... are we forgetting about management?

Burning Challenges

3
MIN

Share with your neighbor some experiences on Agile:

- The most burning challenges you run into at your company with the Agile transformation.
- Did you have a manager that stood out in understanding Agile and its mindset?

Some Thoughts On Scrum And Management

- People are NOT impediments.
- Prefer managing over managers.
- Prefer goal-oriented empiricism over predictive control attempts.
- Prefer learning over delivery.
- Prefer value over scope.

The Agile Paradigm

Where Are You On Your Journey?

3
MIN

Raise your hand if:

- You are agile?
- Becoming Agile?
- Have been told to be Agile and are going to start soon?
- Agile is not in your immediate horizon?

Fact (2): There Is Importance in Agility

In your view, how important is agility to your organisation's overall business success?

(% respondents)

Extremely important — it is a core differentiator for us

40

Somewhat important — it contributes to our business success

48

Neutral — many factors shape our business success

10

Somewhat unimportant — other factors play a more significant role

2

Not at all important — agility is not a relevant criterion for our business

0

How business can survive and thrive in turbulent times.*

Definition of Agility (n.)

- Agility is the organizational state envisioned by moving to Agile processes; a state of constant change, evolution, innovation, improvement and re-invention.
- Agility is an enterprise's capability to respond to challenges, change direction, take advantage of opportunities; to be quick and nimble.

Scrum Adoption Models

- Bottom up & stealth
- Critical project or release: PRN*
Scrum

-
- Contained area of organization:
the Scrum (software) Studio
 - Profound and persistent
change: Enterprise adoption

**Pro Re Nata, or 'Take as needed'*

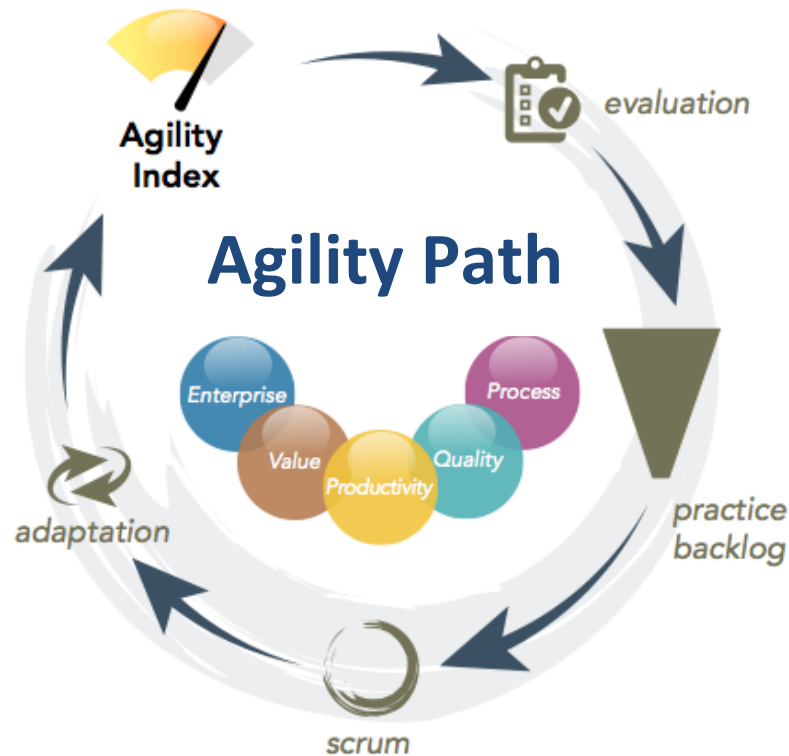

Assertions

- Organizations are desperate to *be Agile*.
- Scrum is a *foundation* for Agility.
- Agility is a *path*:
 - Agility can't be planned.
 - Agility can't be dictated.
 - Agility has no end-state.

Organizations can gain more Agility by progressively refocusing their business functions.

Agility Is A Path (Of Continuous Improvement)

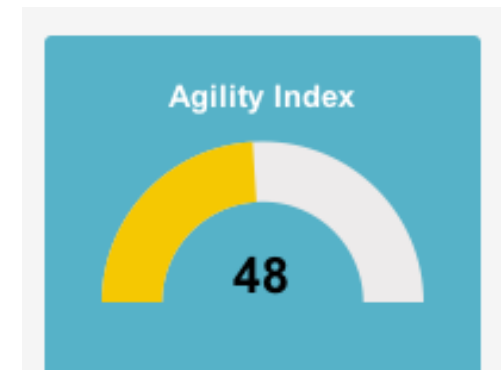

Organizations can gain more Agility by progressively refocusing their business functions.

- It implies organizational and cultural change.
- An organization's core operating system needs a complementary operating system to address the change.
- Scrum is a great fit to manage this change.
- Management inspects progress in groupings of business functions toward agility.

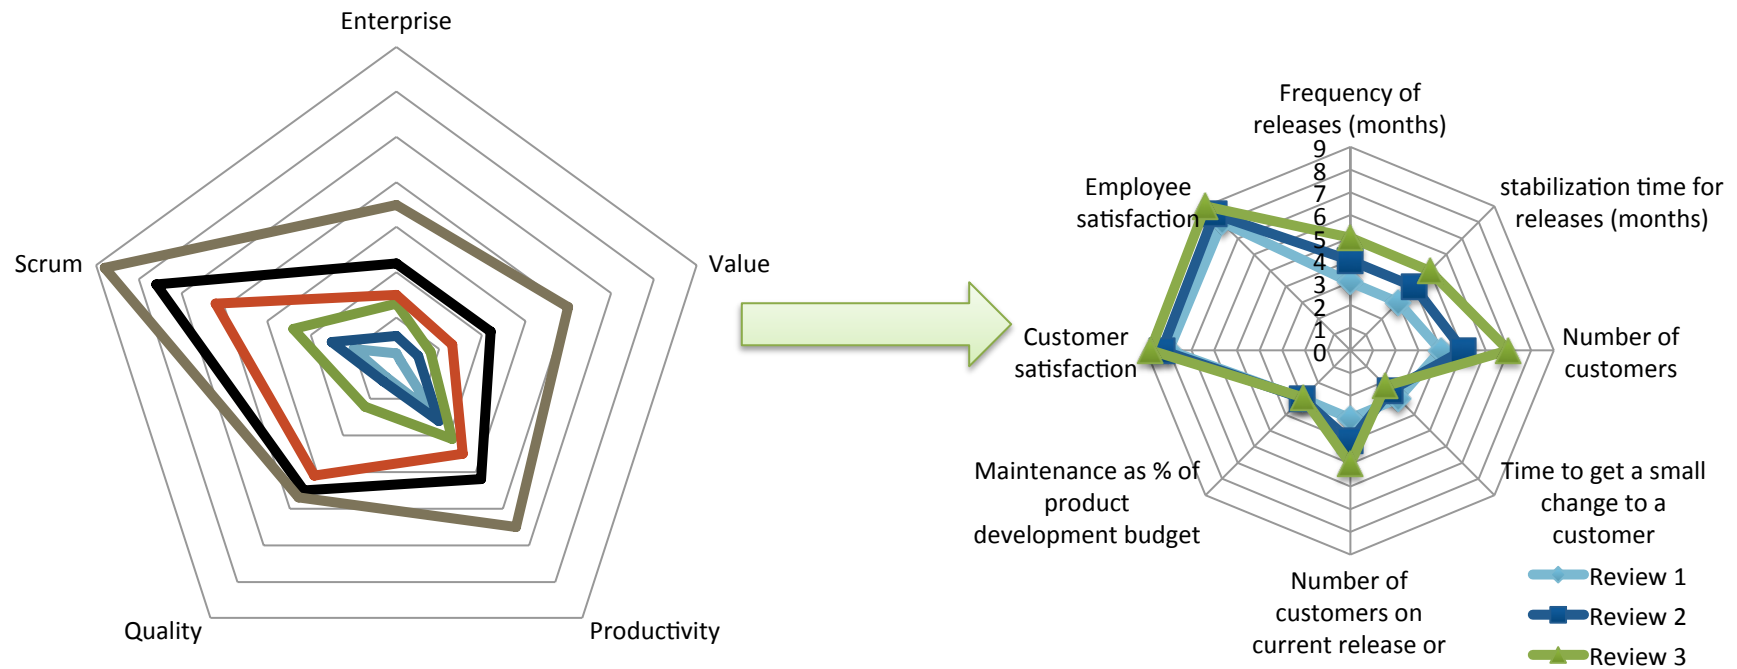

Improvement Becomes Transparent Through Measurements

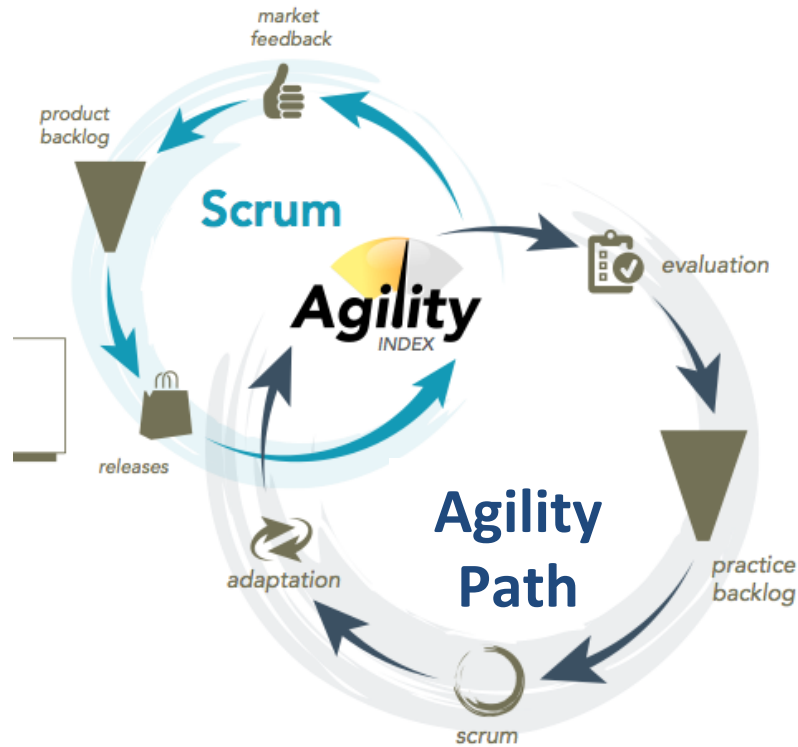

- Agility Index summarizes progress towards more Agility.
- Agility Index reflects the outcome from improved operational and development practices.

Adapting Practices Should Improve Domain Performance

Agility Path Provides Guidance, Not Prescriptions

Agility
PATH

Continuous Improvement
Competitive Advantage
