

See the AZEK Paver difference.

PAVERS MADE FROM UP TO
95% RECYCLED MATERIAL

PAVERS RE-INVENTED

Revolutionizing the paver industry through technology - simply a better paver.

Made from lightweight, durable material that cuts and handles like traditional decking materials.

No more heavy machinery and expensive tools or back breaking labor.

Easiest and fastest way to install pavers on the market.

Creating a new space for contractors to grow their business.

The AZEK Difference...

All photos contained in this brochure are for display purposes only and not for the purpose of validating the suitability or safety of any particular installation or application of the product. Always consult AZEK's Installation Instructions as well as local building codes to ensure proper installation.

What are
AZEKPavers?

WHY THE GRID?

Patented AZEK installation grid increases laying speed on average by three times.

Automatic alignment and spacing of pavers (no more string lines).

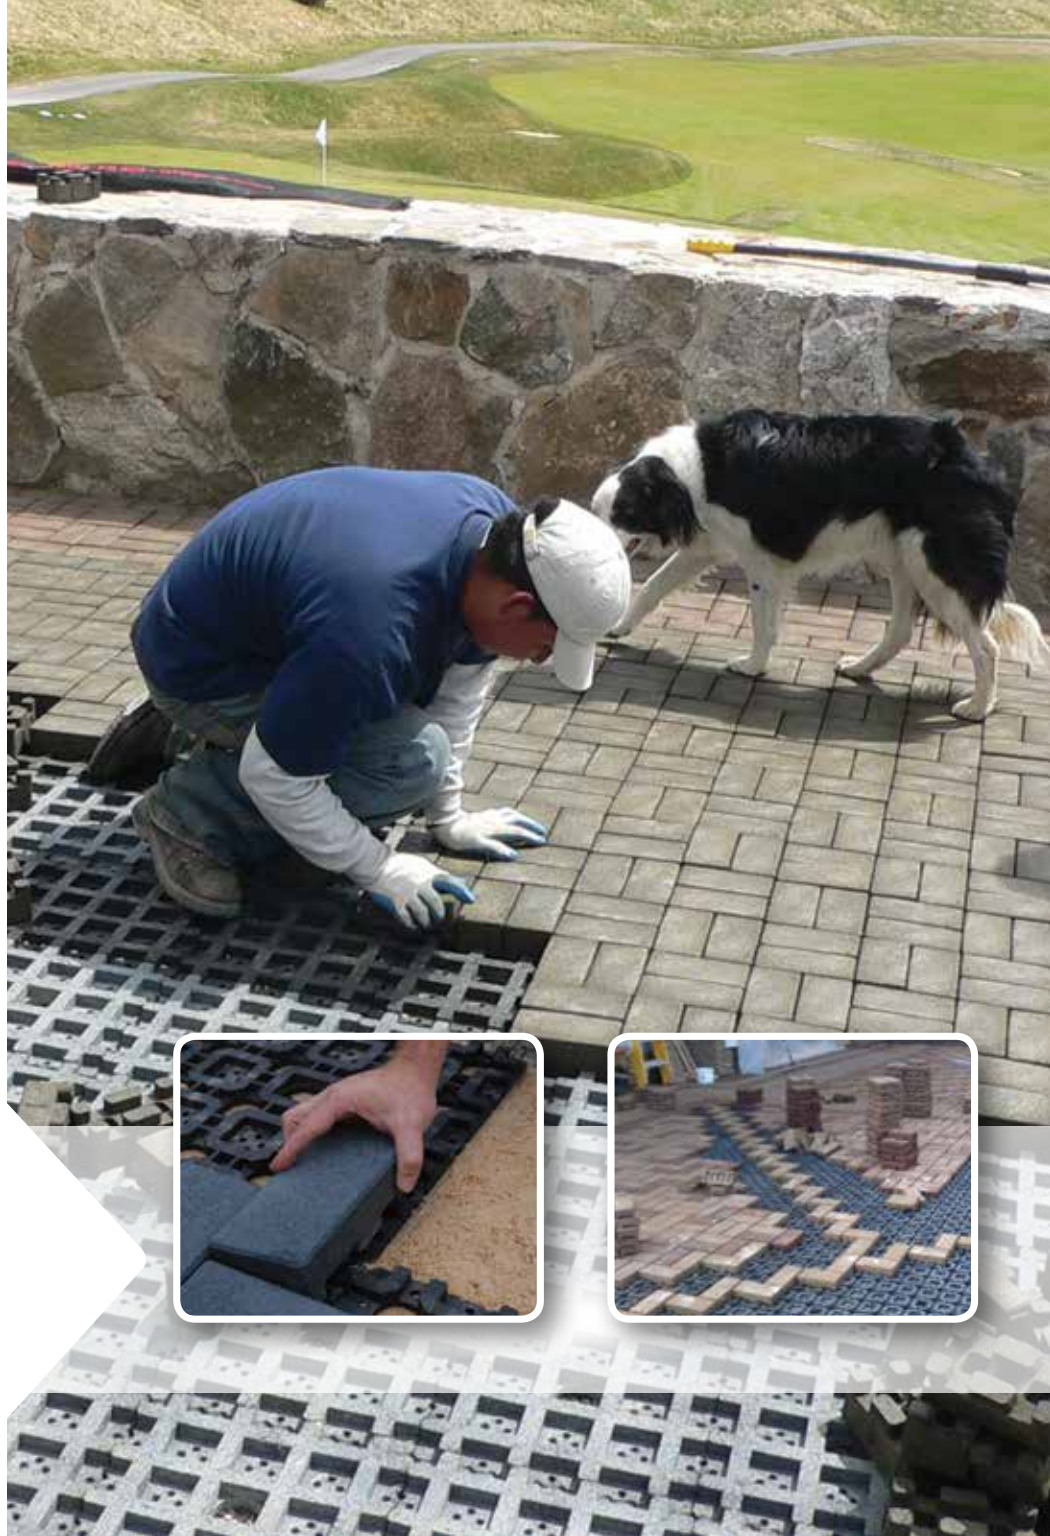

Pavers sit flat even without the use of a rubber mallet.

Multiple starting points and you can walk on the grids without disrupting the sand.

Overlapping the grids with pavers creates one interconnected system and prevents unsightly gaps over time.

Easily carry and maneuver product. Grid acts as a carrying tray.

The AZEK Difference...

WEIGHT MAKES A DIFFERENCE

Skip the skid steer and use a hand dolly to quickly maneuver product. No more tearing up the yard!

Instantly pick up 32 AZEK Pavers (over 7 square feet/0.66 square meters) vs. individually picking up 11 pavers (2.44 square feet/0.23 square meters). Same weight!

Significantly reduce fatigue and injury from working with heavy concrete.

Pavers on a deck?
It's now possible!

The AZEK Difference...

RADIUS & ARCHES

AZEK Pavers cut easily with a jigsaw or miter saw.

No more expensive diamond blades and wet saws.

No more concrete dust or deafening noise.

Use accessory pavers to quickly create soldier course borders. Just lay out and adhere to grid.

The AZEK Difference...

**ACCESSORY PAVERS
NO ADDITIONAL CUTTING
REQUIRED TO CREATE SOLDIER
COURSE BORDERS!**

COMMON USES & APPLICATIONS

AZEK Pavers are very versatile and have a long list of surface application options - everything from driveways to patios, rooftops to decks.

Combined with an open-graded base, AZEK Permeable Pavers also help reduce the rate and quantity of runoff in storm water management applications.

AZEK Permeable Pavers are often classified as open area and, therefore, do not count against the buildable area on a lot.

The AZEK Difference...

DARE TO COMPARE - IN THE GROUND

Installing concrete pavers requires a high capital investment, skilled labor, large crews, and back-breaking work. Start installing AZEK Pavers today without new tools and people, and offer customers a low-maintenance, premium product they will love - for the price of traditional pavers.

Faster completion.

Less startup investment.

Less overhead.

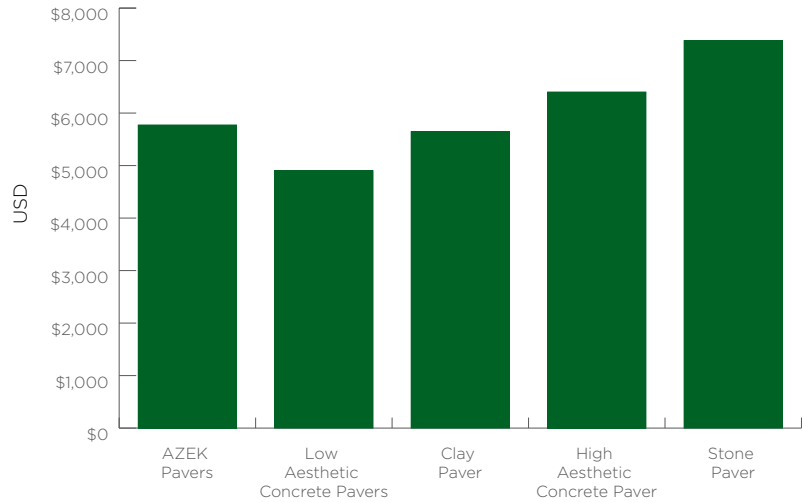

Lower learning curve.

More profit per hour.

The AZEK Difference...

TOTAL IN-GROUND COST COMPARISON

Based on a 20'x20' / 6.1m x 6.1m patio
(400 sq ft / 51.2 sq m) - includes labor and materials

AZEK Pavers

- 3 installers, 5 hours each (15 labor hours)
- Additional tools needed:
 - Jigsaw and blade
 - Hand dolly
- Labor skill & fatigue: **Low**

Traditional Pavers

- 5 installers, 8 hours each (40 labor hours)
- Additional tools needed:
 - Skid steer \$\$\$
 - Trailer \$\$
 - Diamond blade and wet saw \$
 - Rubber mallet
- Labor skill & fatigue: **High**

AZEK Pavers Testimonials

"AZEK Pavers are easy to handle, great to work with, and they cut with standard wood saws. We get great results, and the grids are really ingenious and save us a lot of time. This helps us offer an installed price equal to or less than using traditional concrete pavers".

- Paul Ramacher, Greenway Pavers

"I have more than 25 years of experience in landscaping and contracting. I've completed a lot of AZEK Paver installations. With AZEK Pavers, I reduce the average amount of time it takes to do projects by 40 percent, and my customers LOVE their finished patios, driveways and decks."

- Joe Lemmerman, Earthpavers, LLC

"AZEK Pavers are easy to use. The training videos were extremely helpful. Everything was very well described, right down to how to use blade cleaner on your chop saw."

- Richard Lyman, Construction Manager, Pound Ridge

"You can cut AZEK pavers with a regular miter saw, their light weight makes them easier to handle than concrete pavers, and they are automatically aligned by the AZEK Pavers' grid system. AZEK Pavers makes it easier to get the job done right — and faster."

- Marc Achterkirch, A&E All Green Pavers, LLC

"I was amazed how fast the pavers installed, and there was no need to go back and correct the spacing and alignment. The system does it for you. It truly is a user-friendly product."

- Mat Roderick, Evergreen Construction
