INSTALLATION KITS AND ADAPTER KITS FOR AIR UNITS TROUSSE D'INSTALLATION ET D'ADAPTATEUR POUR UNITÉS PNEUMATIQUES JUEGOS DE INSTALACIÓN Y DE ADAPTADORES PARA UNIDADES NEUMÁTICAS

AK-14

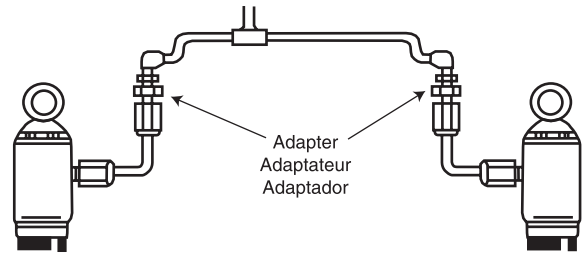

Includes/Contient/Incluye: 10540003 adapter/Adaptateur/Adaptador, 55265 Clip/Bride/Sujetador GM-9426105 Screw/Vis/Tornillo, Form Instruction Sheet/Feuillelet d'instructions/Hoja de instrucciones

For Ford Vehicles (1986 & newer). Equipped With Automatic Leveling System.

Pour véhicules Ford (1986 et après) équipés d'un circuit correcteur d'assiette automatique.

Para vehículos Ford (modelos 1986 y posteriores) equipados con un sistema automático de nivelación.

AK-23

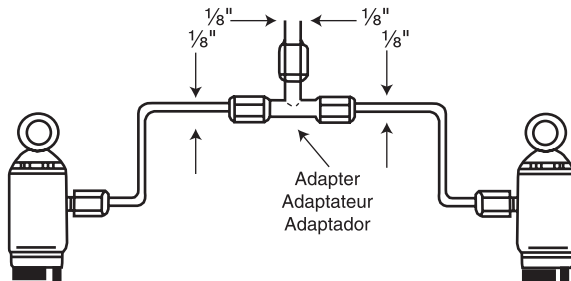

Includes/Contient/Incluye: 60265 (2) Adapter/Adaptateur/Adaptador, Form 00248 Instruction Sheet/Feuillelet d'instructions/Hoja de instrucciones

For Ford Vehicles. Equipped With Automatic Leveling System.

Pour véhicules Ford (jusqu'à 1985) équipés d'un circuit correcteur d'assiette automatique.

Para vehículos Ford equipados con un sistema automático de nivelación.

AK-16

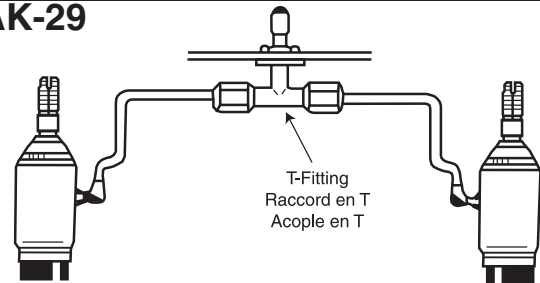

Includes/Contient/Incluye: 10540003 Adapter/Adaptateur/Adaptador, 55265 Clip/Bride/Sujetador, GM-9426105 Screw/Vis/Tornillo, Form Instruction Sheet/Feuillelet d'instructions/Hoja de instrucciones

For GM & Chrysler Vehicles. Equipped With Automatic Leveling System.

Pour véhicules GM et Chrysler équipés d'un circuit correcteur d'assiette automatique.

Para vehículos GM y Chrysler equipados con sistema automático de nivelación.

AK-29

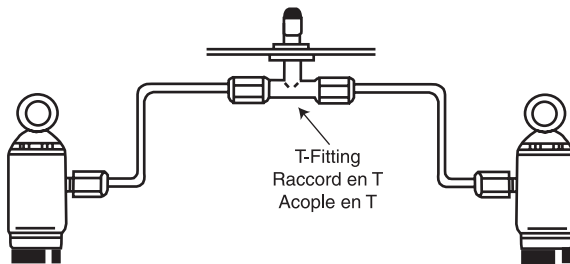

Includes/Contient/Incluye: 60165 Tee-Valve Kit/Trousse de soupage en T/Juego de válvulas en T, 12670002 (2) Tubing-Coiled/Flexible-Enroulé/Tubos espirales, Form 008691 Instruction Sheet/Feuillelet d'instructions/Hoja de instrucciones

Single Fill System (T-Fitting) For GM Air Shocks to Non-Air Leveling Vehicle, For Manual Fill System.

Circuit à remplissage unique (avec raccord en T) pour adaptation des jambes de suspension pneumatique GM à un véhicule non équipé d'un circuit correcteur d'assiette, pour un remplissage manuel.

Sistema de relleno individual (acople en T) desde amortiguadores neumáticos GM hasta vehículos con nivelación sin aire, para sistema de relleno manual.

AK-18

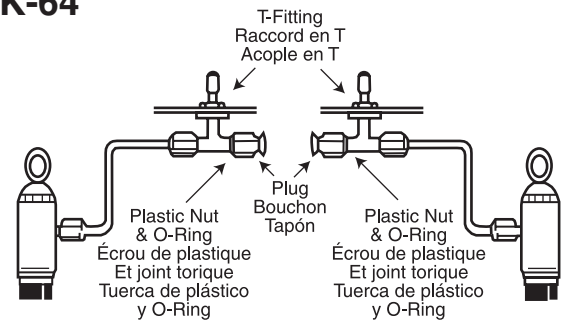

Includes/Contient/Incluye: 60165 Tee-Valve Kit/Trousse de soupage en T/Juego de válvulas en T, 45436 Tubing-Coiled/Flexible-Enroulé/Tubos espirales, Form 00162 Instruction Sheet/Feuillelet d'instructions/Hoja de instrucciones

Single Fill System (T-Fitting) Supplied with Air Shock Kits.

Circuit à remplissage unique (avec raccord en T) fourni avec les trousse de amortisseurs pneumatiques.

Sistema de relleno individual (acople en T) se ofrece con juegos de amortiguadores neumáticos.

AK-64

Includes/Contient/Incluye: 60265 (2) Adapter/Adaptateur/Adaptador, Form 00248 Instruction Sheet/Feuillelet d'instructions/Hoja de instrucciones

If a Separate Fill System is Desired an Additional Tee-Valve Kit #60165 May be Used as Illustrated.

Si l'on désire un circuit à remplissage séparé, une trousse de raccord en T supplémentaire numero 60165 peut être utilisée comme illustré.

Si desea un sistema de relleno separado, se puede usar un juego adicional de válvulas en T #60165 de acuerdo con la ilustración.

APPENDIX "A"

ELECTRONIC ADJUSTABLE SUSPENSION

Occasionally a customer will inquire if their vehicle's electronic suspension can be replaced with a non-adjustable product. The following is a list of vehicles and procedures for replacing adjustable products with non-adjustable products.

- A. Buick Park Avenue 1993-96 with CCR (Computer Command Ride)**
1. Remove strut actuators.
 2. Remove the CCR module located under the drivers seat. (Ref. Adm. Mes. #VSS20000025)
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71822 Front, 71798 Rear.
- B. Buick Skylark 1992-94 with CCR (Computer Command Ride)**
1. Remove strut & shock actuators.
 2. Remove the CCR module located on the backside of sound insulator panel on the right side. (Ref. Adm. Mes. #VSS20000025)
 3. Remove & install struts & shocks per instruction sheet supplied with units.
 4. Use the following units: 71921, 71922 Front, 5896 Rear.
- C. Cadillac Allante 1989-92 with SDD (Speed Dependent Damping)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual for adjustment to the system.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71854 Front, 71966 Rear.
- D. Cadillac Deville 1991-93 with CCR (Computer Command Ride)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual to disable the indicator lamp.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71822 Front, 71798 Rear.
- E. Cadillac Eldorado 1991 with CCR (Computer Command Ride)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual for adjustment to the system.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71854 Front, 71801 Rear.
- F. Cadillac Eldorado 1992 with SSS (Speed Sensitive Suspension)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual for adjustment to the system.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71854 Front, 71801 Rear.
- G. Cadillac Seville 1991 with CCR (Computer Command Ride)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual for adjustment to the system.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71854 Front, 71801 Rear.
- H. Cadillac Seville 1992 with SSS (Speed Sensitive Suspension)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual for adjustment to the system.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71854 Front, 71801 Rear.
- I. Chevrolet Corvette 1990-96 with ERC (Electronic Ride Control)**
1. Remove shock actuators.
 2. Unplug ERC module located in rear cargo area.
 3. Remove & install shocks per instruction sheet supplied with units.
 4. Use the following units: 5892 Front, 5939 Rear.
- J. Ford Probe GT 1989-91 with PRC (Programmed Ride Control)**
1. Remove strut actuators.
 2. Unplug PRC module located under the passenger seat.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71837 Front, 71631 Rear.
- K. Ford Thunderbird Super Coupe 1989-91 with PRC (Programmed Ride Control)**
- This system cannot be substituted without extensive vehicle modification.
- L. Ford Thunderbird Turbo Coupe 1987-88 with PRC (Programmed Ride Control)**
1. Remove strut & shock actuators.
 2. Unplug PRC module located in the trunk behind rear seat.
 3. Remove & install struts and shocks per instruction sheet supplied with units.
 4. Use the following units: 71803 Front, 5861 Rear.
- M. Mazda MX6 GT 1988-92 with AAS (Auto Adjust Suspension)**
1. Remove strut actuators.
 2. Unplug AAS module located in the trunk.
 3. Remove & install struts per instruction sheet supplied with unit.
 4. Use the following units: 71837 Front, 71631 Rear.
- N. Mazda RX7 Turbo 1989-90 & Mazda RX7 GXL 1986-88 with AAS (Auto Adjust Suspension)**
1. Remove strut & shock actuators.
 2. Unplug AAS module located in the trunk.
 3. Remove & install struts & shocks per instruction sheet supplied with units.
 4. Use the following units: 71804 Front, 71217 Rear.
- O. Mazda 323 1986-89 with ASA (Adjustable Shock Absorber)**
1. Remove strut actuators.
 2. Unplug control switch connector behind the dash.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71888 Front, 71889 Rear.
 5. Note: The front upper mount & spring seat must be replaced with a standard OE upper mount & spring seat.
- P. Mazda 626 1988-92 with AAS (Auto Adjust Suspension)**
1. Remove strut actuators.
 2. Unplug AAS module located under the dash.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71837 Front, 71631 Rear.
- Q. Mazda 626 1983-87 with AAS (Auto Adjust Suspension)**
- This system cannot be substituted without extensive vehicle modification.
- R. Mazda 929 1988-91 with AAS (Auto Adjust Suspension)**
1. Remove strut & shock actuators.
 2. Unplug AAS module located in the trunk.
 3. Remove & install struts & shocks per instruction sheet supplied with units.
 4. Use the following units: 71850 Front, 71237 Rear.
- S. Mercury Cougar XR7 1989-96 with PRC (Programmed Ride Control)**
- This system cannot be substituted without extensive vehicle modification.
- T. Mercury Cougar XR7 1987-88 with PRC (Programmed Ride Control)**
1. Remove strut & shock actuators.
 2. Unplug PRC module located in the trunk behind rear seat.
 3. Remove & install struts & shocks per instruction sheet supplied with unit.
 4. Use the following units: 71803 Front, 5861 Rear.
- U. Mitsubishi Montero 1992-2000 with VSA (Variable Shock Absorbers)**
1. Remove shock actuators.
 2. Unplug control module behind left rear trim panel.
 3. Remove & install shocks per instruction sheet supplied with units.
 4. Use the following units: 32273 Front, 32274 Rear.
- V. Nissan 300ZX Turbo 1984-89 with ECVSA (Electronically Controlled Variable Shock Absorber)**
- This system cannot be substituted without extensive vehicle modification.
- W. Nissan Maxima 1989-94 with Nissan Sonar Suspension II**
1. Remove strut actuators.
 2. Unplug NSS module located in the console.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71881, 71882, 73245 Rear.
- X. Nissan Maxima 1986-88 with ECVSA (Electronically Controlled Variable Shock Absorber)**
1. Remove strut actuators.
 2. Unplug ECVSA module located in the trunk.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Replace mounts with O.E. Standard mounts & spring seats.
 5. Use the following units: 801792 Front, 73226 Rear.
- Y. Nissan Maxima 1985 with ECVSA (Electronically Controlled Variable Shock Absorber)**
1. Remove strut actuators.
 2. Unplug ECVSA module located in the trunk.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Replace mounts with O.E. Standard mounts & spring seats.
 5. Use the following units: 71791 Front, 73226 Rear.

APPENDIX "A" ELECTRONIC ADJUSTABLE SUSPENSION

Occasionally a customer will inquire if their vehicle electronic suspension can be replaced with a non-adjustable product. The following is a list of vehicles and procedures for replacing adjustable products with non-adjustable products.

- A. Buick Park Avenue 1993-96 with CCR (Computer Command Ride)**
1. Remove strut actuators.
 2. Remove the CCR module located under the drivers seat. (Ref. Adm. Mes. #VSS20000025)
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71822 Front, 71798 Rear.
- B. Buick Skylark 1992-94 with CCR (Computer Command Ride)**
1. Remove strut & shock actuators.
 2. Remove the CCR module located on the backside of sound insulator panel on the right side. (Ref. Adm. Mes. #VSS20000025)
 3. Remove & install struts & shocks per instruction sheet supplied with units.
 4. Use the following units: 71921, 71922 Front, 5896 Rear.
- C. Cadillac Allante 1989-92 with SDD (Speed Dependent Damping)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual for adjustment to the system.
 3. Remove & install struts per instruction sheet supplied with units.
- D. Cadillac Deville 1991-93 with CCR (Computer Command Ride)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual to disable the indicator lamp.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71822 Front, 71798 Rear.
- E. Cadillac Eldorado 1991 with CCR (Computer Command Ride)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual for adjustment to the system.
 3. Remove & install struts per instruction sheet supplied with units.
 4. Use the following units: 71854 Front, 71801 Rear.
- F. Cadillac Eldorado 1992 with SSS (Speed Sensitive Suspension)**
1. Remove strut actuators.
 2. Reference Administrative Message #VSS20000025 and Service Manual for adjustment to the system.

ANNEXE «A» SUSPENSION À RÉGLAGE ÉLECTRONIQUE

De temps à autre, un client demandera si la suspension à réglage électronique de son véhicule peut être remplacée par un produit non ajustable. Ce qui suit est une liste des véhicules et des méthodes à utiliser pour remplacer un amortisseur réglable par un produit qui ne l'est pas.

- A. Buick Park Avenue 1993-96 avec SCO (Suspension contrôlée par ordinateur)**
1. Enlever les capteurs de jambes de suspension.
 2. Enlever le module placé sous le siège du conducteur. (Ref. Adm. Mes. #VSS20000025)
 3. Démonter et remplacer les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71822 à l'avant, 71798 à l'arrière.
- B. Buick Skylark 1992-94 avec SCO (Suspension contrôlée par ordinateur)**
1. Enlever les capteurs d'amortisseurs et de jambes de suspension.
 2. Enlever le module placé derrière le panneau d'isolation du côté droit (Ref. Adm. Mes. #VSS20000025).
 3. Démonter et remplacer les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71921, 71922 à l'avant, 5896 à l'arrière.
- C. Cadillac Allante 1989-92 avec AFV (Amortissement en fonction de la vitesse)**
1. Enlever les capteurs de jambes de suspension.
 2. Mettez en référence le message administratif # le VSS20000025 et le manuel d'entretien technique de réparation pour le réglage du système.
 3. Démonter et remplacer les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71854 à l'avant, 71966 à l'arrière.
- D. Cadillac Deville 1991-93 avec SCO (Suspension contrôlée par ordinateur)**
1. Enlever les capteurs de jambes de suspension.
 2. Mettez en référence le message administratif # le VSS20000025 et le manuel d'entretien technique de réparation pour le réglage du système.
 3. Démonter et remplacer les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71822 à l'avant, 71798 à l'arrière.
- E. Cadillac Eldorado 1991 avec SCO (Suspension contrôlée par ordinateur)**
1. Enlever les capteurs de jambes de suspension.
 2. Mettez en référence le message administratif # le VSS20000025 et le manuel d'entretien technique de réparation pour le réglage du système.
 3. Démonter et remplacer les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71854 à l'avant, 71966 à l'arrière.
- F. Cadillac Eldorado 1992 avec SSV (Suspension sensible à la vitesse)**
1. Enlever les capteurs de jambes de suspension.
 2. Mettez en référence le message administratif # le VSS20000025 et le manuel d'entretien technique de réparation pour le réglage du système.
 3. Démonter et remplacer les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71854 à l'avant, 71966 à l'arrière.
- G. Cadillac Seville 1991 avec SCO (Suspension contrôlée par ordinateur)**
1. Enlever les capteurs de jambes de suspension.
 2. Mettez en référence le message administratif # le VSS20000025 et le manuel d'entretien technique de réparation pour le réglage du système.
 3. Démonter et remplacer les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71854 à l'avant, 71966 à l'arrière.
- H. Cadillac Seville 1992 avec SSV (Suspension sensible à la vitesse)**
1. Enlever les capteurs de jambes de suspension.
 2. Mettez en référence le message administratif # le VSS20000025 et le manuel d'entretien technique de réparation pour le réglage du système.
 3. Démonter et remplacer les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71854 à l'avant, 71966 à l'arrière.
- I. Chevrolet Corvette 1990-96 avec ERC (Contrôle électronique de la suspension)**
1. Enlever les capteurs d'amortisseurs.
 2. Débrancher le module ERC situé dans le coffre arrière.
 3. Démonter et remplacer les amortisseurs en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 5892 à l'avant, 5939 à l'arrière.
- J. Ford Probe GT 1989-91 avec PRC (Contrôle programmé de la suspension)**
1. Enlever les capteurs de jambes de suspension.
 2. Débrancher le module PRC situé sous le siège du passager.
 3. Démonter et remplacer les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71837 à l'avant, 71631 à l'arrière.
- K. Ford Thunderbird Super Coupé 1989-91 avec PRC (Contrôle programmé de la suspension)**
- La substitution de ce système nécessite une modification excessive du véhicule.
- L. Ford Thunderbird Turbo Coupé 1987-88 avec PRC (Contrôle programmé de la suspension)**
1. Enlever les capteurs d'amortisseurs et de jambes de suspension.
 2. Débrancher le module PRC situé sous le siège du passager.
 3. Démonter et remplacer les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71803 à l'avant, 5861 à l'arrière.
- M. Mazda MX6 GT 1988-92 avec RAS (Réglage automatique de la suspension)**
1. Enlever les capteurs de jambes de suspension.
 2. Débrancher le module RAS situé dans le coffre arrière.
 3. Démonter et remplacer les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71837 à l'avant, 71631 à l'arrière.

ANNEXE «A»

SUSPENSION À RÉGLAGE ÉLECTRONIQUE

De temps à autre, un client demandera si la suspension à réglage électronique de son véhicule peut être remplacée par un produit non ajustable. Ce qui suit est une liste des véhicules et des méthodes à utiliser pour remplacer un amortisseur réglable par un produit qui ne l'est pas.

- N. Mazda RX7 Turbo 1989-90 & Mazda RX7 GXL 1986-88 avec RAS (Réglage automatique de la suspension)**
1. Enlever les capteurs d'amortisseurs et de jambes de suspension.
 2. Débrancher le module RAS situé dans le coffre arrière.
 3. Démontez et remplacez les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec le modèle de remplace.
 4. Utiliser les modèles suivants: 71804 à l'avant, 71217 à l'arrière.
- O. Mazda 323 1986-89 avec ARA (Amortisseur à réglage automatique)**
1. Enlever les capteurs de jambes de suspension.
 2. Débrancher le connecteur de la boîte de contrôle situé derrière le tableau de bord.
 3. Démontez et remplacez les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71888 à l'avant, 71889 à l'arrière.
 5. Nota: Le support de montage supérieur avant doit être remplacé par un support de montage supérieur avant, d'origine du constructeur.
- P. Mazda 626 1988-92 avec RAS (Réglage automatique de la suspension)**
1. Enlever les capteurs de jambes de suspension.
 2. Débrancher le module RAS situé sous le tableau de bord.
 3. Démontez et remplacez les jambes de suspension en suivant les directives données sur le feuillet fourni avec le modèle de remplacement.
 4. Utiliser les modèles suivants: 71837 à l'avant, 71631 à l'arrière.
- Q. Mazda 626 1983-87 avec RAS (Réglage automatique de la suspension)**
- La substitution de ce système nécessite une modification excessive du véhicule.
- R. Mazda 929 1988-91 avec RAS (Réglage automatique de la suspension)**
1. Enlever les capteurs d'amortisseurs et de jambes de suspension.
 2. Débrancher le module RAS situé dans le coffre arrière.
 3. Démontez et remplacez les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71850 à l'avant, 71237 à l'arrière.
- S. Mercury Cougar XR7 1989-96 avec PRC (Contrôle programmé de la suspension)**
- La substitution de ce système nécessite une modification excessive du véhicule.
- T. Mercury Cougar XR7 1987-88 avec PRC**
1. Enlever les capteurs d'amortisseurs et de jambes de suspension.
 2. Débrancher le module PRC situé dans le coffre arrière.
 3. Démontez et remplacez les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71803 à l'avant, 5861 à l'arrière.
- U. Mitsubishi Montero 1992-2000 avec VSA (Amortisseur réglable)**
1. Enlever les capteurs de jambes de suspension.
 2. Débrancher le module de contrôle situé derrière l'équilibre panneau gauche à l'arrière.
 3. Démontez et remplacez les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 32273 à l'avant, 32274 à l'arrière.
- V. Nissan 300ZX Turbo 1984-89 avec ECVSA (Amortisseur réglable à contrôle électronique)**
- La substitution de ce système nécessite une modification excessive du véhicule.
- W. Nissan Maxima 1989-94 avec suspension Nissan Sonar II**
1. Enlever les capteurs de jambes de suspension.
 2. Débrancher le module NSS situé dans le coffre arrière.
 3. Démontez et remplacez les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71881, 71882, 73245 à l'arrière.
- X. Nissan Maxima 1986-88 avec ECVSA (Amortisseur réglable à contrôle électronique)**
1. Enlever les capteurs de jambes de suspension.
 2. Débrancher le module ECVSA situé dans le coffre arrière.
 3. Démontez et remplacez les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Remplacer le montage avec un support de montage supérieur avant, d'origine du constructeur.
 5. Utiliser les modèles suivants: 801792 à l'avant, 73226 à l'arrière.
- Y. Nissan Maxima 1985 avec ECVSA (Amortisseur réglable à contrôle électronique)**
1. Enlever les capteurs de jambes de suspension.
 2. Débrancher le module ECVSA situé dans le coffre arrière.
 3. Démontez et remplacez les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Remplacer le montage avec un support de montage supérieur avant, d'origine du constructeur.
 5. Utiliser les modèles suivants: 71791 à l'avant, 73226 à l'arrière.
- Z. Nissan Pathfinder 1987-95 avec ARA (Amortisseur à réglage automatique)**
1. Enlever les capteurs d'amortisseurs.
 2. Débrancher le connecteur de la boîte de contrôle situé dans la console.
 3. Démontez et remplacez les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 37100 à l'avant, 37029 à l'arrière.
- AA. Oldsmobile Achieva 1992-94 avec SCO (Suspension Contrôlée par Ordinateur)**
1. Enlever les capteurs d'amortisseurs et de jambes de suspension.
 2. Débrancher le module placé derrière le panneau d'isolation du côté droit. (Ref. Adm. Mes. #VSS20000025)
 3. Démontez et remplacez les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71921, 71922 à l'avant, 5896 à l'arrière.
- BB. Oldsmobile Ninety Eight 1991-96 avec SCO (Suspension Contrôlée par Ordinateur)**
1. Enlever les capteurs d'amortisseurs.
 2. Enlever le module placé sous le siège de conducteur. (Ref. Adm. Mes. #VSS20000025)
 3. Démontez et remplacez les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71822 à l'avant, 71798 à l'arrière.
- CC. Pontiac Bonneville 1994-99 avec SCO (Suspension Contrôlée par Ordinateur)**
1. Enlever les capteurs d'amortisseurs.
 2. Enlever le module placé sous le siège du conducteur. (Ref. Adm. Mes. #VSS20000025)
 3. Démontez et remplacez les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71822 à l'avant, 71798 à l'arrière.
- DD. Toyota Supra Mar. 1986-93 avec TEMS (Suspension Toyota à contrôle électronique)**
1. Enlever les capteurs d'amortisseurs.
 2. Débrancher le module TEMS situé sous le contrôle de bord.
 3. Démontez et remplacez les amortisseurs et les jambes de suspension en suivant les directives données sur le feuillet fourni avec les modèles de remplacement.
 4. Utiliser les modèles suivants: 71214 à l'avant, 71215 à l'arrière.

ANEXO «A» SUSPENSIÓN DE AJUSTE ELECTRÓNICO

Ocasionalmente un cliente puede averiguar acerca de la posibilidad de reemplazar la suspensión electrónica de su vehículo por un producto no ajustable. Lo que sigue es una lista de vehículos y procedimientos para reemplazar productos ajustables por no ajustables.

- A. Buick Park Avenue 1993-96 con CCR
(Manejo Comandado por la Computadora)**
1. Quitar los actuadores de los struts.
 2. Quitar el módulo de CCR situado bajo asiento del conductor. (Refiérase al mensaje administrativo #VSS20000025)
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71822 delantero, 71798 trasero.
- B. Buick Skylark 1992-94 con CCR
(Manejo Comandado por la Computadora)**
1. Quitar los actuadores de los struts y de los amortiguadores.
 2. Quitar el módulo de CCR situado en la cara posterior del panel del aislador de sonidos a la derecha. (Refiérase al mensaje administrativo #VSS20000025)
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71921, 71922 delantero, 5896 trasero.
- C. Cadillac Allante 1989-92 con SDD
(Amortiguación dependiente de la velocidad)**
1. Quitar los actuadores del strut.
 2. Refiérase al mensaje administrativo #VSS20000025 y al Manual de reparaciones para ajustes al sistema.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71854 delantero, 71966 trasero.
- D. Cadillac Deville 1991-93 con CCR
(Manejo Comandado por la Computadora)**
1. Quitar los actuadores del strut.
 2. Refiérase al mensaje administrativo #VSS20000025 y al Manual de reparaciones para desconectar la lámpara indicadora.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71822 delantero, 71798 trasero.
- E. Cadillac Eldorado 1991 con CCR
(Manejo Comandado por la Computadora)**
1. Quitar los actuadores del strut.
 2. Refiérase al mensaje administrativo #VSS20000025 y al Manual de reparaciones para ajustes al sistema.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71854 delantero, 71801 trasero.
- F. Cadillac Eldorado 1992 con SSS
(Suspensión Sensible a la Velocidad)**
1. Quitar los actuadores del strut.
 2. Refiérase al mensaje administrativo #VSS20000025 y al Manual de reparaciones para ajustes al sistema.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71854 delantero, 71801 trasero.
- G. Cadillac Seville 1991 con CCR
(Manejo Comandado por la Computadora)**
1. Quitar los actuadores del strut.
 2. Refiérase al mensaje administrativo #VSS20000025 y al Manual de reparaciones para ajustes al sistema.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71854 delantero, 71801 trasero.
- H. Cadillac Seville 1992 con SSS
(Suspensión Sensible a la Velocidad)**
1. Quitar los actuadores del strut.
 2. Refiérase al mensaje administrativo #VSS20000025 y al Manual de reparaciones para ajustes al sistema.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71854 delantero, 71801 trasero.
- I. Chevrolet Corvette 1990-96 con ERC
(Control de suspensión electrónico)**
1. Quitar los actuadores de los amortiguadores.
 2. Desconectar el módulo ERC situado en el baúl.
 3. Desmontar e instalar los amortiguadores según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 5892 delantero, 5939 trasero.
- J. Ford Probe GT 1989-91 con PRC
(Control de suspensión programado)**
1. Quitar los actuadores del strut.
 2. Desconectar el módulo PRC situado bajo el asiento de pasajero.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71837 delantero, 71631 trasero.
- K. Ford Thunderbird Super Coupé 1989-91 con PRC
(Control de suspensión programado)**
- Este sistema no puede ser reemplazado sin una modificación extensiva del vehículo.
- L. Ford Thunderbird Turbo Coupé 1987-88 con PRC
(Control de suspensión programado)**
1. Quitar los actuadores de los struts y de los amortiguadores.
 2. Desconectar el módulo PRC situado en el baúl en la parte posterior del asiento trasero.
 3. Desmontar e instalar los struts y los amortiguadores según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71803 delantero, 5861 trasero.
- M. Mazda MX6 GT 1988-92 con AAS
(Suspensión de ajuste automático)**
1. Quitar los actuadores de los struts.
 2. Desconectar el módulo AAS situado en el baúl.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71837 delantero, 71631 trasero.
- N. Mazda RX7 Turbo 1989-90 y Mazda RX7 GXL 1986-88 con AAS
(Suspensión de ajuste automático)**
1. Quitar los actuadores de los struts y de los amortiguadores.
 2. Desconectar el módulo AAS situado en el baúl.
 3. Desmontar e instalar los struts y los amortiguadores según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades siguientes: 71804 Frente, 71217 Parte Posterior.
- O. Mazda 323 1986-89 con ASA
(Amortiguador ajustable)**
1. Quitar los actuadores de los struts.
 2. Desconectar el interruptor de la caja de control situada detrás de la consola de control.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71888 delantero, 71889 trasero.
5. NOTA: El soporte superior frontal y el del resorte deben ser reemplazados con piezas estándar de EO (Equipo Original).
- P. Mazda 626 1988-92 con AAS
(Suspensión de ajuste automático)**
1. Quitar los actuadores de los struts.
 2. Desconectar el módulo AAS situado debajo de la consola de control.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71837 delantero, 71631 trasero.
- Q. Mazda 626 1983-87 con AAS
(Suspensión de ajuste automático)**
- Este sistema no puede ser reemplazado sin una modificación extensiva del vehículo.
- R. Mazda 929 1988-91 con AAS
(Suspensión de ajuste automático)**
1. Quitar los actuadores de los struts y de los amortiguadores.
 2. Desconectar el módulo AAS situado en el baúl.
 3. Desmontar e instalar los struts y los amortiguadores según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71850 delantero, 71237 trasero.
- S. Mercury Cougar XR7 1989-96 con PRC
(Control de suspensión programado)**
- Este sistema no puede ser reemplazado sin una modificación extensiva del vehículo.

ANEXO «A»
SUSPENSIÓN DE AJUSTE ELECTRÓNICO

Ocasionalmente un cliente puede averiguar acerca de la posibilidad de reemplazar la suspensión electrónica de su vehículo por un producto no ajustable. Lo que sigue es una lista de vehículos y procedimientos para reemplazar productos ajustables por no ajustables.

- T. Mercury Cougar XR7 1987-88 con PRC (Control de suspensión programado)**
1. Quitar los actuadores de los struts y de los amortiguadores.
 2. Desconectar el módulo PRC situado en el baúl en la parte posterior del asiento trasero.
 3. Desmontar e instalar los struts y los amortiguadores según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71803 delantero, 5861 trasero.
- U. Mitsubishi Montero 1992-2000 con VSA (Amortiguador ajustable)**
1. Quitar los actuadores de los amortiguadores.
 2. Desconectar el módulo de control situado en la parte posterior del borde de panel trasero izquierdo.
 3. Desmontar e instalar los amortiguadores, según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 32273 delantero, 32274 trasero.
- V. Nissan 300ZX Turbo 1984-89 con ECVSA (Amortiguador electrónicamente ajustable)**
- Este sistema no puede ser reemplazado sin una modificación extensiva del vehículo.
- W. Nissan Maxima 1989-94 con Suspensión Nissan Sonar II**
1. Quitar los actuadores de los struts.
 2. Desconectar el módulo NSS situado en la consola de control.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71881, 71882, 73245 trasero.
- X. Nissan Maxima 1986-88 con ECVSA (Amortiguador electrónicamente ajustable)**
1. Quitar los actuadores de los struts.
 2. Desconectar el módulo ECVSA situado en el baúl.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Reemplazar el montaje con montaje y resortes estándar de EO (Equipo Original).
 5. Utilizar las siguientes unidades los modelos siguientes: 801792 delantero, 73226 trasero.
- Y. Nissan Maxima 1985 con ECVSA (Amortiguador electrónicamente ajustable)**
1. Quitar los actuadores de los struts.
 2. Desconectar el módulo ECVSA situado en el baúl.
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Reemplazar el montaje con montaje y resortes estándar de EO (Equipo Original).
 5. Utilizar las siguientes unidades los modelos siguientes: 71791 delantero, 73226 trasero.
- Z. Nissan Pathfinder 1987-95 con ASA (Amortiguador electrónicamente ajustable)**
1. Quitar los actuadores de los amortiguadores.
 2. Desconectar el interruptor de la caja de control situado en la consola de control.
 3. Desmontar e instalar los amortiguadores según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 37100 delantero, 37029 trasero.
- AA. Oldsmobile Achieva 1992-94 con CCR (Manejo Comandado por la Computadora)**
1. Quitar los actuadores de los struts y de los amortiguadores.
 2. Quitar el módulo de CCR situado en la cara posterior del panel del aislador de sonidos a la derecha. (Refiérase al mensaje administrativo #VSS20000025)
 3. Desmontar e instalar los struts y los amortiguadores según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71921, 71922 delantero, 5896 trasero.
- BB. Oldsmobile Ninety Eight 1991-96 con CCR (Manejo Comandado por la Computadora)**
1. Quitar los actuadores de los struts.
 2. Quitar el módulo de CCR situado bajo el asiento del conductor. (Refiérase al mensaje administrativo #VSS20000025)
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71822 delantero, 71798 trasero.
- CC. Pontiac Bonneville 1994-99 con CCR (Manejo Comandado por la Computadora)**
1. Quitar los actuadores de los struts.
 2. Quitar el módulo de CCR situado bajo el asiento del conductor. (Refiérase al mensaje administrativo #VSS20000025)
 3. Desmontar e instalar los struts según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71822 delantero, 71798 trasero.
- DD. Toyota Supra Mar 1986-93 con TEMS (Suspensión electrónicamente modulada Toyota)**
1. Quitar los actuadores de los amortiguadores.
 2. Desconectar el módulo TEMS situado debajo de la consola de control.
 3. Desmontar e instalar los amortiguadores según las instrucciones en la hoja que acompaña las unidades.
 4. Utilizar las siguientes unidades los modelos siguientes: 71214 delantero, 71215 trasero.

APPENDIX "C" / ANNEXE «C» / ANEXCO «C» 90001

Monroe® Coil Spring Conversion for 1988 through 1994 Lincoln Continentals Conversion des ressorts hélicoïdaux de Monroe® pour les Lincoln Continentals de 1988 à 1994 Conversión de resortes espirales Monroe® para modelos de Lincoln Continental de 1988 a 1994

Important Notes/ Notes importantes/ Notas importantes:

This kit is intended to completely replace the air suspension used on Lincoln Continentals from 1988 to 1994. This kit replaces all four air struts. WARNING: PARTIAL CONVERSION OF THE VEHICLE WILL LEAD TO DANGEROUS DRIVING CONDITIONS. This kit is fully engineered to be a complete and thorough conversion of the suspension structure. It has been engineered to not interfere with the vehicles other ECU's and not drain the electronics. It is necessary that instructions be followed to insure that no electronic warning signals result.

REFERENCE: It is recommended that an original equipment service manual be obtained prior to replacing these particular dampers. This instruction sheet is mainly a guideline and reference for the installation of the coil spring units. Due to the difficulty of this installation, proper sequence and methods are necessary to assure quality completion.

Some of the service procedures require the use of special tools designed for specific procedures. The following tools and supplies are recommended for proper installation of this system:

Cette trousse de pièce sert à remplacer complètement la suspension à air utilisée sur les Lincoln Continentals de 1988 à 1994. Cette trousse de pièce remplace les quatre amortisseurs à air. ATTENTION: UNE CONVERSION PARTIELLE DU VÉHICULE RÉSULTERA EN DES CONDITIONS DE CONDUITE DANGEREUSE. Cette trousse de pièce est entièrement conçue pour être une conversion complète et efficace de la structure de la suspension. Elle a été conçue pour ne pas interférer avec les autres ECU du véhicule et ne pas surcharger les composantes électroniques du véhicule. Il est nécessaire de suivre les instructions pour assurer qu'aucun signal d'avertissement électronique ne résulte.

REFERENCE: Il est recommandé d'obtenir le manuel d'instruction original avant de remplacer ces dampers. Cette feuille d'instruction est principalement une source de référence et de guide pour l'installation des coil spring. Dues a la difficulté de cette installation, une séquence et une méthode appropriée sont nécessaires pour assurer la qualité de l'installation.

Certaines de nos procédures de services nécessitent l'utilisation d'outils spéciaux fabriqués pour des procédures précises. Le matériel et les outils suivants sont recommandés pour l'installation de ce système.

Este juego tiene el propósito de sustituir completamente la suspensión de aire usada en los Lincoln Continentals modelos 1988 a 1994. Este juego reemplaza los cuatro struts de aire. PRECAUCION: LA CONVERSION PARCIAL DEL VEHICULO PUEDE OCASIONAR CONDICIONES PELIGROSAS DE MANEJO. Este juego está diseñado para hacer una conversión precisa y completa de la estructura de la suspensión. Ha sido diseñado para no interferir con los demás ECU'S de los vehículos y para no alterar los elementos electrónicos. Es necesario seguir las instrucciones para asegurar que no se presenten señales electrónicas de alerta.

REFERENCIA: Se recomienda conseguir un manual de servicio para equipo original antes de reemplazar estos amortiguadores en particular. Esta hoja de instrucciones es principalmente una guía y una referencia para la instalación de unidades de resorte espiral. Debido a la dificultad de esta instalación, es necesario seguir una secuencia y unos métodos apropiados para asegurar logros de calidad.

Algunos de los procedimientos de servicio requieren el uso de herramientas especiales diseñadas para procedimientos específicos. Los siguientes materiales y herramientas son recomendados para la instalación apropiada de este sistema:

- | | |

APPENDIX "C" / ANNEXE «C» / ANEXCO «C» 90003

**Conversion Kit for removal of Rear Air Spring System on 1992-2002 Ford Crown Victoria,
1990-2002 Lincoln Town Car, 1992-2003 Mercury Grand Marquis**

**Trousse de conversion pour dépose du système de ressorts pneumatiques arriere sur les
Ford Crown Victoria de 1992 à 2002, les Lincoln Town Car de 1990 à 2002 et les
Mercury Grand Marquis de 1992 à 2003**

**Juego de conversión para retirar el sistema de resortes de aire traseros en el
Ford Crown Victoria 1992-2002, el Lincoln Town Car 1990-2002 y el Mercury Grand Marquis 1992-2003**

Important Notes/ Notes importantes/ Notas importantes:

This kit is intended to replace the rear air springs on 1992-2002 Ford Crown Victoria, 1990-2002 Lincoln Town Car, 1992-2003 Mercury Grand Marquis vehicles. This kit ONLY replaces the REAR air suspension, converting to coil spring. This includes the shock absorber for the rear application; the front shock can be order separately.

This kit is designed to provide conversion of the suspension – as well as disengage the pump system. This system conversion kit also includes the necessary instructions to eliminate electronic warning signals.

This kit may be used for direct replacement on vehicles equipped with coil spring suspension, being standard equipment on certain models.

REFERENCE: If needed, you can refer to the original equipment service manual for servicing the air spring air solenoid valves and for removal of the particular shock absorbers. This installation instruction is to give a guideline and reference tools for the installation. Detailed instruction sheet is provided with the kit. Due to minor installation difficulty, it is necessary to follow the steps and methods detailed to ensure quality completion.

Cette trousse est conçue pour remplacer les ressorts pneumatiques arrière sur les Ford Crown Victoria de 1992 à 2002, les Lincoln Town Car de 1990 à 2002 et les véhicules Mercury Grand Marquis de 1992 à 2003. Cette trousse remplace QUE la suspension pneumatique ARRIÈRE, la convertissant en un ressort hélicoïdal. Elle comprend l'amortisseur pour application arrière et l'amortisseur avant peut être commandé séparément.

Cette trousse est conçue pour fournir la conversion de la suspension ainsi que pour désactiver le système de pompe. La trousse de conversion du système comprend aussi des directives nécessaires pour éliminer les signaux électroniques d'avertissement.

Cette trousse peut être utilisée pour remplacement direct sur les véhicules équipés d'une suspension à ressort hélicoïdal, qui est l'équipement standard sur certains modèles.

RÉFÉRENCE: Au besoin, vous pouvez consulter le manuel de service d'équipement d'origine pour l'entretien des électrovalves de ressorts pneumatiques et la dépose des amortisseurs particuliers. Cette directive d'installation est conçue pour offrir des directives et des outils de référence pour l'installation. Une feuille de directives détaillées est fournie avec la trousse. En raison de la difficulté mineure de l'installation, il est nécessaire de suivre les étapes et les méthodes détaillées pour assurer une installation de qualité.

Este juego está diseñado para reemplazar los resortes de aire traseros en los vehículos Ford Crown Victoria 1992-2002, Lincoln Town Car 1990-2002 y Mercury Grand Marquis 1992-2003. Este juego reemplaza SOLAMENTE la suspensión de aire TRASERA, convirtiéndola a resorte espiral. Esto incluye el amortiguador para la aplicación trasera; el amortiguador delantero se puede ordenar por separado.

Este juego está diseñado para permitir la conversión de la suspensión, así como para desacoplar el sistema de la bomba. Este juego de conversión del sistema también incluye las instrucciones necesarias para eliminar las señales electrónicas de advertencia.

Este juego se puede utilizar para el reemplazo directo en vehículos equipados con suspensión de resortes espirales y es equipo estándar en ciertos modelos.

REFERENCIA: Si es necesario, usted puede consultar el manual de servicio del equipo original para hacer servicio de mantenimiento de las válvulas de solenoide aire de los resortes de aire y para retirar los amortiguadores específicos. Estas instrucciones de instalación tienen como fin dar una pauta y referenciar las herramientas para la instalación. Con el juego se incluye una hoja de instrucciones detalladas. Debido a una dificultad menor en la instalación, es necesario seguir los pasos y métodos detallados para asegurar una terminación de calidad.

The following tools and supplies are recommended for proper installation of this system:

- | | |
|----------------------------------------------------------------|--------------------------------------------------------------------|
| <input type="checkbox"/> Ford Service Manual | <input type="checkbox"/> Assorted Combination Wrenches |
| <input type="checkbox"/> Torque Wrench (100 ft-lbs) | <input type="checkbox"/> Large Pliers and Wire Cutters |
| <input type="checkbox"/> Hydraulic Floor Jack | <input type="checkbox"/> Small plastic bag and PVC electrical tape |
| <input type="checkbox"/> Heavy Duty Floor Jack Stand | <input type="checkbox"/> Safety Glasses/Stands |
| <input type="checkbox"/> Assorted ½" Drive Ratchet and Sockets | |

90003 kit includes the following:

- Two (2) Rear Coil Springs
- Four (4) Isolators
- Two (2) Rear Shock Absorbers With Associated Parts Packages
- Instruction Sheet

APPENDIX "C" / ANNEXE «C» / ANEXCO «C» 90006

Conversion Kit for removal of Rear Air Spring System on 1997-2002 Ford Expedition 4WD and 1997-2002 Lincoln Navigator 4WD Trousse de conversion pour dépose du système de ressorts pneumatiques arrière sur les Ford Expedition à 4 RM de 1997 à 2002 et les Lincoln Navigator à 2 RM de 1997 à 2002 Juego de conversión para retirar el sistema de resortes de aire traseros en el Ford Expedition 4WD 1997-2002 y el Lincoln Navigator 4WD 1997-2002

Important Notes/ Notes importantes/ Notas importantes:

This kit is intended to replace the rear air springs on 1997-2002 Ford Expedition 4WD and 1997-2002 Lincoln Navigator 4WD vehicles. This kit replaces the REAR air suspension, converting to coil spring. Plus includes the shock absorbers for BOTH the front and rear.

This kit is designed to provide conversion of the suspension – as well as disengage the pump system. This system conversion kit also includes the necessary instructions to eliminate electronic warning signals.

This kit may be used for direct replacement on vehicles equipped with coil spring suspension, being standard equipment on certain models.

REFERENCE: If needed, you can refer to the original equipment service manual for servicing the air spring air solenoid valves and for removal of the particular shock absorbers. This installation instruction is to give a guideline and reference tools for the installation. Detailed instruction sheet is provided with the kit. Due to minor installation difficulty, it is necessary to follow the steps and methods detailed to ensure quality completion.

Cette trousse est conçue pour remplacer les ressorts pneumatiques arrière sur les Ford Expedition à 4 RM 1997 à 2002 et les véhicules Lincoln Navigator à 4 RM 1997 à 2002. Cette trousse remplace la suspension pneumatique ARRIÈRE, la convertissant en un ressort hélicoïdal. Elle comprend les amortisseurs pour l'avant et l'arrière.

Cette trousse est conçue pour fournir la conversion de la suspension ainsi que pour désactiver le système de pompe. La trousse de conversion du système comprend aussi des directives nécessaires pour éliminer les signaux électroniques d'avertissement.

Cette trousse peut être utilisée pour remplacement direct sur les véhicules équipés d'une suspension à ressort hélicoïdal, qui est l'équipement standard sur certains modèles.

RÉFÉRENCE: Au besoin, vous pouvez consulter le manuel de service d'équipement d'origine pour l'entretien des électrovalves de ressorts pneumatiques et la dépose des amortisseurs particuliers. Cette directive d'installation est conçue pour offrir des directives et des outils de référence pour l'installation. Une feuille de directives détaillées est fournie avec la trousse. En raison de la difficulté mineure de l'installation, il est nécessaire de suivre les étapes et les méthodes détaillées pour assurer une installation de qualité.

Este juego está diseñado para reemplazar los resortes de aire traseros en los vehículos Ford Expedition 4WD 1997-2002 y Lincoln Navigator 4WD 1997-2002. Este juego reemplaza la suspensión de aire TRASERA, convirtiéndola a resorte espiral. Y además incluye los amortiguadores TANTO para la parte delantera como para la trasera.

Este juego está diseñado para permitir la conversión de la suspensión, así como para desacoplar el sistema de la bomba. Este juego de conversión del sistema también incluye las instrucciones necesarias para eliminar las señales electrónicas de advertencia.

Ese juego se puede utilizar para el reemplazo directo en vehículos equipados con suspensión de resortes espirales y es equipo estándar en ciertos modelos.

REFERENCIA: Si es necesario, usted puede consultar el manual de servicio del equipo original para hacer servicio de mantenimiento de las válvulas de solenoide aire de los resortes de aire y para retirar los amortiguadores específicos. Estas instrucciones de instalación tienen como fin dar una pauta y referenciar las herramientas para la instalación. Con el juego se incluye una hoja de instrucciones detalladas. Debido a una dificultad menor en la instalación, es necesario seguir los pasos y métodos detallados para asegurar una terminación de calidad.

The following tools and supplies are recommended for proper installation of this system:

- | | |
|----------------------------------------------------------------|--------------------------------------------------------------------|
| <input type="checkbox"/> Ford Service Manual | <input type="checkbox"/> Assorted Combination Wrenches |
| <input type="checkbox"/> Torque Wrench (100 ft-lbs) | <input type="checkbox"/> Large Pliers and Wire Cutters |
| <input type="checkbox"/> Hydraulic Floor Jack | <input type="checkbox"/> Small plastic bag and PVC electrical tape |
| <input type="checkbox"/> Heavy Duty Floor Jack Stand | <input type="checkbox"/> Safety Glasses/Stands |
| <input type="checkbox"/> Assorted ½" Drive Ratchet and Sockets | |

90006 kit is shipped in two cartons (due to size and weight) which include the following:

Box 1 of 2

- Two (2) Front Shock Absorbers With Associated Parts Packages

Box 2 of 2

- Two (2) Rear Coil Springs
- Two (2) Isolators
- Two (2) Rear Shock Absorbers With Associated Parts Packages
- Instruction Sheet

APPENDIX "C" / ANNEXE «C» / ANEXCO «C» 90007

Conversion Kit for removal of Rear Air Leveling System on 1997-2005 Buick Electra, LeSabre and ParkAvenue, 2006-2010 Buick Lucerne, 1995-1999 Buick Riviera, 2000-2005 Cadillac Deville, 1998-2004 Cadillac Seville, 1995-2003 Oldsmobile Aurora, 2000-2005 Pontiac Bonneville
Trousse de conversion pour dépose du système de mise à niveau ajustable arrière sur les Buick Electra, les LeSabre et ParkAvenue de 1997 à 2005, les Buick Lucerne de 2006 à 2010, les Buick Riviera de 1995 à 1999, les Cadillac Deville de 2000 à 2005, les Cadillac Seville de 1998 à 2004, les Oldsmobile Aurora de 1995 à 2003 et les Pontiac Bonneville de 2000 à 2005
Juego de conversión para retirar el sistema de nivelación de aire trasero en el Buick Electra, LeSabre y ParkAvenue 1997-2005, el Buick Lucerne 2006-2010, el Buick Riviera 1995-1999, el Cadillac Deville 2000-2005, el Cadillac Seville 1998-2004, el Oldsmobile Aurora 1995-2003 y el Pontiac Bonneville 2000-2005

Important Notes/ Notes importantes/ Notas importantes:

This kit is intended to replace the rear air leveling shocks with a load assist shock. This applies to 1997-2005 Buick Electra, LeSabre and ParkAvenue, 2006-2010 Buick Lucerne, 1995-1999 Buick Riviera, 1998-2005 Cadillac Deville, 1998-2004 Cadillac Seville, 1995-2003 Oldsmobile Aurora, 2000-2005 Pontiac Bonneville vehicles. This kit replaces ONLY the REAR air shocks. The front strut for these vehicles is available separately; refer to the application section of the catalog for correct part number.

This kit is designed to provide conversion of the suspension and disengage the pump system. This system conversion kit also includes the necessary instructions to eliminate warning signals.

The replacement air shocks (or air leveling dampers) being part number MA822 should be used if the pump system is still operational. If this is not operation, the air shocks MA822 can still be used by purchasing the manual air fill lines being part number AK29. This will allow for air leveling by using a standard air fill chuck similar to inflating a tire valve.

REFERENCE: If needed, you can refer to the original equipment service manual for servicing the air spring air solenoid valves and for removal of the particular shock absorbers. This installation instruction is to give a guideline and reference tools for the installation. Detailed instruction sheet is provided with the kit. Due to minor installation difficulty, it is necessary to follow the steps and methods detailed to ensure quality completion.

Cette trousse est conçue pour remplacer le système de mise à niveau arrière avec amortisseur d'assistance de la charge. Ceci s'applique aux Buick Electra, les LeSabre et ParkAvenue de 1997 à 2005, les Buick Lucerne de 2006 à 2010, les Buick Riviera de 1995 à 1999, les Cadillac Deville de 2000 à 2005, les Cadillac Seville de 1998 à 2004, les Oldsmobile Aurora de 1995 à 2003 et les Pontiac Bonneville de 2000 à 2005. Cette trousse remplace UNIQUEMENT les amortisseurs pneumatiques ARRIÈRE. La jambe de suspension pour ces véhicules est disponible séparément. Consulter la section d'application de ce catalogue pour le bon numéro de pièce.

Cette trousse est conçue pour fournir la conversion de la suspension et pour désactiver le système de pompe. La trousse de conversion du système comprend aussi les directives nécessaires pour éliminer les signaux d'avertissement.

Il y a des amortisseurs de rechange (ou d'amortisseurs de mise à niveau) selon le numéro de pièce MA822 qui peuvent être utilisés si le système de pompe fonctionne encore. Si la pompe ne fonctionne plus, les amortisseurs pneumatiques MA822 peuvent cependant être utilisés en achetant les canalisations de remplissage d'air manuel sous le numéro AK29. Ceci permettra la mise à niveau pneumatique en utilisant un mandrin de remplissage d'air standard semblable au gonflage d'une valve de pneu.

RÉFÉRENCE: Au besoin, vous pouvez consulter le manuel de service d'équipement d'origine pour l'entretien des électrovalves de ressorts pneumatiques et la dépose des amortisseurs particuliers. Cette directive d'installation est conçue pour offrir des directives et des outils de référence pour l'installation. Une feuille de directives détaillées est fournie avec la trousse. En raison de la difficulté mineure de l'installation, il est nécessaire de suivre les étapes et les méthodes détaillées pour assurer une installation de qualité.

Este juego está diseñado para reemplazar los amortiguadores de nivelación de aire traseros con un amortiguador auxiliar de carga. Esto se aplica a los vehículos Buick Electra, LeSabre y ParkAvenue 1997-2005, Buick Lucerne 2006-2010, Buick Riviera 1995-1999, Cadillac Deville 1998-2005, Cadillac Seville 1998-2004, Oldsmobile Aurora 1995-2003 y Pontiac Bonneville 2000-2005. Este juego reemplaza SOLAMENTE los amortiguadores TRASEROS. El strut delantero para estos vehículos está disponible por separado; consulte la sección de aplicaciones del catálogo para obtener el número de pieza correcto.

Este juego está diseñado para permitir la conversión de la suspensión, así como para desacoplar el sistema de la bomba. Este juego de conversión del sistema también incluye las instrucciones necesarias para eliminar las señales electrónicas de advertencia.

Los amortiguadores de aire de repuesto (o amortiguadores de nivelación de aire) que tienen el número de pieza MA822 se deben usar si el sistema de la bomba sigue siendo operacional. Si no es operacional, los amortiguadores MA822 aún se pueden utilizar comprando las líneas de llenado de aire manuales que tienen el número de pieza AK29. Esto permitirá la nivelación del aire utilizando un mandril de llenado de aire similar a inflar la válvula de una llanta.

REFERENCIA: Si es necesario, usted puede consultar el manual de servicio del equipo original para hacer servicio de mantenimiento de las válvulas de solenoide aire de los resortes de aire y para retirar los amortiguadores específicos. Estas instrucciones de instalación tienen como fin dar una pauta y referenciar las herramientas para la instalación. Con el juego se incluye una hoja de instrucciones detalladas. Debido a una dificultad menor en la instalación, es necesario seguir los pasos y métodos detallados para asegurar una terminación de calidad.

| <input type="checkbox"/> Two (2) Rear Shock Absorbers With Associated Parts Packages | <input type="checkbox"/> Instruction Sheet |
|--------------------------------------------------------------------------------------|--------------------------------------------|

APPENDIX "C" / ANNEXE «C» / ANEXCO «C» 90008

Conversion Kit for removal of Front Electronic Strut Suspension on 1994-1999 Cadillac Deville, 1997-2002 Cadillac Eldorado, 1994-2002 Cadillac Seville/SLS

Trousse de conversion pour la dépose de la suspension à jambes de suspension électroniques sur les Cadillac Deville 1994-1999, Cadillac Eldorado 1997-2002, Cadillac Seville/SLS 1994-2002

Juego de conversión para retirar la suspensión electrónica de struts delanteros en el Cadillac Deville 1994-1999, el Cadillac Eldorado 1997-2002 y el Cadillac Seville/SLS 1994-2002

Important Notes/ Avis importants/ Notas importantes:

This kit is intended to replace the Front Electronic Strut Suspension on 1994-1999 Cadillac Deville, 1997-2002 Cadillac Eldorado, and 1994-2002 Cadillac Seville / SLS vehicles. The kit replaces ONLY the FRONT struts. The rear shocks for these vehicles are available separately; refer to the application section of the catalog for correct part number. Both Air Leveling and Conversion Kit items are available, depending upon the method of replacement desired. If the air leveling pump is still operational, replace the air shock only (see below). Replacement stabilizer bar links are recommended for this application. Due to the special end type, this is a dealer only item which should be ordered ahead.

This kit is designed to provide conversion of the suspension and disengage the pump system. This system conversion kit also includes the necessary instructions to eliminate warning signals.

If the pump system is still operational, there are replacement air shocks (or air leveling dampers) for this application being part number 40046 that can be used (sold as individual units, need two units per vehicle). These will not provide the electronic adjustable capability, but provide leveling.

If pump is not operational, the air shocks 40046 can still be used by purchasing the manual air fill lines being part number AK29. This will allow for air leveling by using a standard air fill chuck similar to inflating a tire valve.

REFERENCE: If needed, you can refer to the original equipment service manual for servicing the air spring air solenoid valves and for removal of the particular shock absorbers. This installation instruction is to give a guideline and reference tools for the installation. Detailed instruction sheet is provided with the kit. Due to minor installation difficulty, it is necessary to follow the steps and methods detailed to ensure quality completion.

Cette trousse est prévue pour le remplacement de la suspension à jambes de suspension électroniques des véhicules Cadillac Deville 1994-1999, Cadillac Eldorado 1997-2002 et Cadillac Seville / SLS 1994-2002. La trousse remplace UNIQUEMENT les jambes de suspension AVANT. Les amortisseurs arrière pour ces véhicules sont disponibles séparément; consulter la section « Application » du catalogue pour le bon numéro de pièce. Des articles de la trousse de conversion et de mise à niveau pneumatique sont disponibles, selon la méthode de remplacement voulue. Si la pompe de mise à niveau pneumatique fonctionne encore, ne remplacer que l'amortisseur pneumatique (voir ci-dessous) Des biellettes de barre stabilisatrice de remplacement sont recommandées pour cette application. En raison du type d'extrémité spéciale, c'est un article réservé pour les concessionnaires qui doit être commandé à l'avance.

Cette trousse est conçue pour fournir la conversion de la suspension et pour désengager le système de pompe. Cette trousse de conversion du système comporte aussi les directives nécessaires pour éliminer les signaux d'avertissement.

Si le système de pompe fonctionne encore, il y a des amortisseurs pneumatiques de rechange (ou des amortisseurs de mise à niveau pneumatiques) pour cette application, numéro de pièce 40046 qui peuvent être utilisés (vendus comme unités individuelles, deux unités sont nécessaires par véhicule). Ces articles ne fourniront pas la possibilité d'ajustement électronique mais ils fourniront la mise à niveau. Si la pompe ne fonctionne plus, les amortisseurs numéros 40046 peuvent cependant être utilisés en achetant les canalisations de remplissage manuel d'air numéros AK29. Ceci permettra la mise à niveau pneumatique en utilisant un raccordement standard de remplissage d'air similaire à celui d'une valve de pneu.

RÉFÉRENCES : Au besoin, vous pouvez consulter le manuel de service de l'équipement d'origine pour l'entretien des électrovalves des ressorts pneumatiques et pour la dépose des amortisseurs particuliers. Ces directives d'installation sont conçues pour fournir des instructions et des outils de référence pour l'installation. Une feuille de directives détaillées est fournie avec la trousse. En raison des difficultés mineures d'installation, il est important de suivre les étapes et les méthodes détaillées pour assurer une installation de qualité.

Este juego está diseñado para reemplazar la suspensión electrónica de struts delanteros en los vehículos Cadillac Deville 1994-1999, Cadillac Eldorado 1997-2002 y Cadillac Seville / SLS 1994-2002. El juego reemplaza SOLAMENTE los struts DELANTEROS. Los amortiguadores traseros para estos vehículos están disponibles por separado; consulte la sección de aplicaciones del catálogo para obtener el número de pieza correcto. Tanto el juego de nivelación de aire como de conversión de aire están disponibles, dependiendo del método de reemplazo deseado. Si la bomba niveladora de aire aún está operacional, reemplace solamente el amortiguador de aire (vea más adelante). Se recomiendan varillas de barra estabilizadora de repuesto para esta aplicación. Debido al tipo de extremo especial, éste es un artículo exclusivo del distribuidor que se debe ordenar con antelación.

Este juego está diseñado para permitir la conversión de la suspensión, así como para desacoplar el sistema de la bomba. Este juego de conversión del sistema también incluye las instrucciones necesarias para eliminar las señales de advertencia.

Si el sistema de la bomba aún es operacional, hay amortiguadores de aire de repuesto (o amortiguadores de nivelación de aire) para esta aplicación, que tienen el número de pieza 40046 y se pueden utilizar (vendidos como unidades individuales, se necesitan dos unidades por vehículo). Estos no proporcionarán la capacidad electrónica ajustable, pero brindarán nivelación.

Si la bomba no es operacional, los amortiguadores de aire 40046 aún se pueden utilizar comprando las líneas de llenado de aire manual que tienen el número de pieza AK29. Esto permitirá la nivelación del aire utilizando un mandril de llenado de aire estándar similar a inflar la válvula de una llanta.

REFERENCIA: Si es necesario, usted puede consultar el manual de servicio del equipo original para hacer servicio de mantenimiento de las válvulas de solenoide de aire de los resortes de aire y para retirar los amortiguadores específicos. Estas instrucciones de instalación tienen como fin dar una pauta y referenciar las herramientas para la instalación. Con el juego se incluye una hoja de instrucciones detalladas. Debido a una dificultad menor en la instalación, es necesario seguir los pasos y métodos detallados para asegurar una terminación de calidad.

NOTES EN BAS DE PAGE

1. La trousse de pièces AK27 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
2. La trousse de pièces AK28 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
3. La trousse de pièces AK30 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
4. La trousse de pièces adaptatrices AK16 est requise lors du remplacement des amortisseurs pneumatiques réglables sur les automobiles équipées d'un circuit correcteur automatique.
5. La trousse de pièces AK33 est requise pour l'installation de cette unité.
7. La trousse de pièces adaptatrices AK23 est requise lors du remplacement des amortisseurs pneumatiques réglables sur les automobiles équipées d'un circuit correcteur automatique.
8. Il n'est pas nécessaire d'utiliser un compresseur à ressort pour changer les jambes de suspension de ce véhicule.
11. Cette unité est une jambe de suspension pneumatique.
12. La trousse de pièces AK77 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
14. La trousse de pièces AK32 est requise pour l'installation de cette unité.
15. Sauf modèles équipés d'une suspension pneumatique arrière à ressort.
16. La trousse de pièces AK31 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
21. La trousse de pièces AK-37 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
22. La trousse de pièces AK38 est requise pour l'installation de cette unité.
24. Ceci est uniquement un roulement à billes et non un assemblage complet.
25. La trousse de pièces AK42 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
26. La trousse de pièces AK41 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
27. Pour les véhicules identifiés du VIN JM1...589236 et des VINs suivants, utiliser le 902935.
28. Le soufflet de jambe de suspension 63619 et l'entretoise Volvo #1229423-7 sont nécessaires au remplacement de la cartouche à gaz haute-pression (tige à grand diamètre).
29. Cette trousse de montage contient la trousse Strut Boot 63975.
30. La cartouche ne s'adaptera pas à un véhicule équipé d'une suspension sport M474.
31. La trousse de pièces AK43 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
32. Il est recommandé de changer le butoir de pare-chocs original pour les régions froides.
33. Les cylindres sont vendus comme cylindres de rechange pour stabilisateurs de direction.
34. Le soufflet de stabilisateur de direction SA-19XX (Voir la page de classification numériques pour les numéros de pièces par couleur). est disponible pour usage avec nos cylindres de stabilisateur de direction.
38. La trousse Strut-Mate® Boot 63622 est requise pour l'installation de cette unité.
40. La trousse de pièces AK49 est requise pour l'installation de cette unité.
41. La trousse de pièces AK50 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
42. La trousse de pièces AK51 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
43. La trousse de pièces AK52 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
44. La trousse de pièces AK53 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
45. La trousse de pièces AK54 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
46. La trousse de pièce AK79 est requise pour l'installation d'une paire de cette unité pour cette application.
50. Inspectez le produit et recherchez une rainure de découpage (à environ 20mm au-dessous du sommet de la jambe de suspension). S'il N'Y A PAS de rainure de découpage, NE PAS DÉCOUPER le tube pour l'ouvrir, car il N'Y A PAS de filets à l'intérieur. L'unité doit être remplacée par une jambe de suspension complète.
53. La trousse de pièces AK70 peut être requise pour remplacer le boulon de montage inférieure et bague d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
54. La trousse de pièces AK68 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
56. Le roulement à bille 901947 est nécessaire seul lorsque le roulement à bille doit être remplacé.
57. Des outils spéciaux sont nécessaires pour installer cette unité.
58. La trousse de pièces AK58 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
60. Application spéciale: ce modèle ne nécessite PAS de soufflet en raison des espaces libres.
62. Remplacez les ensembles de jambes de suspension avec support inférieur de siège de ressort (en forme de 'L').
63. Remplace les ensembles de jambes de suspension sans support inférieur de siège de ressort.
64. La trousse de pièces adaptatrices AK14 est requise lors du remplacement d'amortisseurs pneumatiques réglables sur les automobiles équipées de circuit correcteur automatique.

66. Consultez l'annexe A pour les méthodes de remplacement de suspension électronique réglable par un modèle non réglable.
67. La suspension Nivomat utilise un amortisseur auto-réglable à haute pression.
70. Le roulement à billes 901902 est nécessaire seul lorsque le roulement à billes doit être remplacé.
71. Le roulement à billes 901901 est nécessaire lorsque seul le roulement à billes doit être remplacé.
72. Le roulement à billes 901928 est disponible lorsque seul le roulement à billes doit être remplacé.
73. La trousse de pièces AK63 peut être requise pour remplacer le boulon de montage inférieur et la bague d'origine s'ils sont endommagés ou ne peuvent être réutilisés.
74. Les unités emballé/vendu en paires doivent être remplacées ensemble.
75. Une unité est requise pour chaque véhicule.
76. Sauf les modèles de 1985 avec les lettres KF moulées sur le dessus du support de montage, utilisez le numéro 901991.
77. La trousse de pièces AK29 est nécessaire à l'installation de cette unité lors de l'adaptation de jambes de suspension pneumatiques à une suspension non-pneumatique.
78. La trousse de pièces AK74 est requise pour les véhicules équipés de freins anti-blocage de type ABS.
89. La trousse de pièces AK-71 peut être requise pour le remplacement des boulons et écrous de la fixation inférieure d'origine, s'ils sont endommagés ou ne peuvent être réutilisés.
90. La trousse de pièces AK-75 est requise pour installer cette unité sur un véhicule équipé de freins anti-blocage de type ABS.
91. Ce véhicule est équipé d'une suspension électronique ajustable à l'usine. Cette pièce est remplaçable par le distributeur.
97. La trousse Strut-Mate® Boot peut être requise.
106. La trousse de pièces adaptatrices AK-29 est nécessaire à l'installation de cette unité lors de l'adaptation d'amortisseurs pneumatiques ajustables aux véhicules n'étant pas équipés d'un système de nivelage pneumatique.
107. Ceci est une jambe de suspension pneumatique. La trousse de montage 901953 est comprise avec cette unité.
108. Utilisez seulement avec des jambes de suspension de rechange de Monroe®.
111. Le kit AK62 peut être requis pour remplacer les boulons et les écrous de montage inférieurs d'origine s'ils sont endommagés ou s'ils ne peuvent être réutilisés.
114. Modèles avec 2 $\frac{3}{8}$ " interligne entre les boulons de fixation inférieurs.
115. Modèles avec 3 $\frac{1}{4}$ " interligne entre les boulons de fixation inférieurs.
116. Pour les plaques de support second design, les entretoises de l'écrou de la tige d'origine sont combinés en une seule pièce.
117. Une trousse de pièces AK-28 est nécessaire lors de l'installation sur un véhicule équipés d'une barre ant-roulement.
122. Cette unité en est une réglable et non-électrique. Cette unité a été conçue pour remplacer l'unité réglable.
123. La fixation inférieure est un coussinet avec manchon.
124. La fixation inférieure est un maillon d'attache.

NOTAS DE PIE DE PAGINA

1. Puede que se requiera el juego de piezas AK27 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.
2. Puede que se requiera el juego de piezas AK28 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.
3. Puede que se requiera el juego de piezas AK30 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.
4. Se requiere el juego de adaptadores AK16 para reemplazar amortiguadores neumáticos ajustables en los vehículos equipados con un sistema de nivelación automática.
5. Se requiere el juego de piezas AK33 para instalar ésta unidad.
7. Se requiere el juego de adaptadores AK23 para reemplazar amortiguadores neumáticos ajustables en los vehículos equipados con un sistema de nivelación automática.
8. El compresor de resorte NO ES necesario para reemplazar los struts en este vehículo.
11. Esto es un strut neumático.
12. Puede que se requiera el juego AK77 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.
14. Se requiere el juego AK32 para instalar esta unidad.
15. Excepto en los modelos equipados con una suspensión de resorte neumática trasera.
16. Puede que se requiera el juego de piezas AK31 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.
21. Puede que se requiera el juego de piezas AK37 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.
22. Se requiere el juego de piezas AK38 para instalar esta unidad.
24. Esto es solamente un rodamiento, NO un montaje completo.
25. Puede que se requiera el juego AK42 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.
26. Puede que se requiera el juego AK41 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.
27. Los vehículos que portan el número de identificación vehicular (VIN) JM1...589236 en adelante deben utilizar 902935.
28. Para reemplazar cartuchos de gas de alta presión (vara de diámetro amplio) son necesarios el juego de fuelle 63619 y el espaciador de Volvo #1229423-7.
29. Este juego de montaje contiene el juego del fuelle de amortiguador de strut 63975.
30. Si el vehículo está equipado de una suspensión deportiva M474, la unidad es un strut sellado de gas cargado, el cartucho no se ajustará.
31. Puede que se requiera el juego de piezas AK43 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no es posible reutilizarlos.
32. Se recomienda que el parachoque O.E. sea reemplazado en las regiones de bajas temperaturas.
33. Se venden los cilindros como cilindros de repuesto para los juegos de estabilizador de dirección.
34. Juego de fuelle de Shock-Mate SA-19XX (vea la clasificación numérica para los números de pieza por color en la página anterior) está disponible para el uso con nuestros cilindros de estabilizador de dirección.
38. Se requiere el juego de fuelle de Strut-Mate® 63622 para instalar esta unidad.
40. Se requiere el juego de piezas AK49 para la instalación de esta unidad.
41. Puede que se requiera el juego de piezas AK50 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no pueden ser reutilizados.
42. Puede que se requiera el juego de piezas AK51 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no pueden ser reutilizados.
43. Puede que se requiera el juego de piezas AK52 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no pueden ser reutilizados.
44. Puede que se requiera el juego de piezas AK53 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no pueden ser reutilizados.
45. Puede que se requiera el juego de piezas AK54 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no pueden ser reutilizados.
46. Se requiere el juego de piezas AK79 para instalar un PAR de estas unidades en esta aplicación.
50. Inspeccione el producto y busque la línea de corte (localizada a 20mm de la tapa de strut). Si NO encuentra ninguna línea del corte, NO CORTE el tubo para abrirlo porque NO contiene hilos en el interior. Se debe reemplazar la unidad por un strut completo.
53. Puede que se requiera el juego AK70 para reemplazar los tornillos del montaje inferior y el buje si están dañados o si no pueden ser reutilizados.
54. Puede que se requiera el juego AK68 para reemplazar los tornillos inferiores del montaje si están dañados o si no pueden ser reutilizados.
56. El rodamiento 901947 está disponible cuando se necesite reemplazar el rodamiento solamente.
57. Se necesitan herramientas especiales para instalar esta unidad.
58. Puede que se requiera el juego AK58 para reemplazar las piezas inferiores del montaje si están dañadas, si no pueden ser reutilizadas o si NO SON de diseño Cam.
60. Aplicación especial : Este modelo NO necesita una capa debido a los espacios libres.
62. Reemplaza el conjunto del strut equipado de un corchete de asiento de resorte inferior en forma de L.
63. Reemplaza el conjunto del strut que no tiene un corchete de asiento de resorte inferior.
64. Se requiere el juego de adaptadores AK14 para reemplazar el amortiguador neumático ajustable en los vehículos equipados con un sistema de nivelación automática.
66. Consulte los procedimientos para reemplazar la suspensión de ajuste electrónico por un modelo no ajustable en el Anexo A.

67. La suspensión Nivomat utiliza un amortiguador de nivelación automática de alta presión.
70. El rodamiento 901902 está disponible cuando se necesite reemplazar el rodamiento solamente.
71. El rodamiento 901901 está disponible cuando se necesite reemplazar el rodamiento solamente.
72. El rodamiento 901928 está disponible cuando se necesite reemplazar el rodamiento solamente.
73. Puede que se requiera el juego AK63 para reemplazar los tornillos y el buje original del montaje inferior si están dañados o si no pueden ser reutilizados.
74. Se debe hacer el reemplazo por pares.
75. Se requiere una sola unidad por vehículo.
76. Excepto los modelos de 1985 con las letras moldeadas KF en la parte superior del montaje en los que se usa el juego de montaje 901991.
77. Se requiere el juego de piezas AK29 para instalar esta unidad cuando es necesario adaptar struts neumáticos a una suspensión no neumática.
78. Se requiere el juego AK74 en vehículos equipados con frenos ABS.
89. Puede que se requiera el juego de piezas AK71 para reemplazar los tornillos y las tuercas originales del montaje inferior si están dañados o si no pueden ser reutilizados.
90. Se requiere el juego de piezas AK75 para instalar esta unidad en vehículos equipados con frenos ABS.
91. Esta aplicación viene equipada de la fábrica con una suspensión de ajuste electrónico. Este artículo es reemplazado por el distribuidor.
97. Puede ser que requiera el juego de fuelles Strut-Mate®.
106. El kit del adaptador AK-29 se requiere para instalar esta unidad al adaptar amortiguadores de choque ajustables del aire a los vehículos sin sistema de nivelación posterior.
107. Esto es un puntal del aire. El kit 901953 del montaje se incluye con esta unidad.
108. Utilice solamente con los puntales del reemplazo de Monroe®.
111. El kit AK62 se puede requerir para sustituir si los pernos de montaje más bajos originales y las tuercas están dañados o incapaces de ser reutilizados.
114. Modelos con 2^{3/4}" espaciado entre pernos de montaje más bajos.
115. Modelos con 3^{1/4}" espaciado entre pernos de montaje más bajos.
116. En la placa de rodamiento de segundo diseño, la tuerca de la vara y el espaciador de E.O. son integradas en un sólo componente.
117. Se requiere el juego AK28 para instalar en vehículos con barra de balanceo trasera.
122. Esta unidad ajustable no es electrónica. La misma se ha diseñado para reemplazar a la unidad ajustable.
123. El montaje inferior consiste en un soporte de buje y camisa.
124. El montaje inferior consiste en un soporte de horquilla.

FAQ'S: Frequently Asked Questions

Q: What is the difference between shock absorbers and struts?

A. Struts and shocks are very similar in function, but very different in design. The job of both is to control excessive spring motion; however, struts are also a structural component of the suspension. Struts can take the place of two or three conventional suspension components and are often used as a pivot point for steering and to adjust the position of the wheels for alignment purposes.

Q. How many miles do shocks and struts last?

A. It's hard to say how many miles a shock or strut will last since the amount of work they do (converting suspension motion to heat) varies by road conditions; however, Monroe® suggests that they should be inspected by your local Monroe® Expert Plus® dealer or any ASE Certified Technician once a year, or every 12,000 miles. As an example: Unlike a tire, which rotates a specific number of times per mile, a shock absorber or strut may compress and extend several times per mile on a smooth road, or several hundred times per mile on a very rough road. There are other factors that affect the life of a shock or strut, such as, regional weather conditions, amount and type of road contaminants, driving habits, loading of the vehicle, tire / wheel modifications, and the general mechanical condition of the suspension and tires. Experts recommend replacement of automotive shocks and struts at 50,000 miles. Testing has shown that original equipment gas-charged shocks and struts degrade measurably by 50,000 miles*. For many popular-selling vehicles, replacing these worn shocks and struts can improve the vehicle's handling characteristics and comfort.

Q. How do I know when my shocks or struts need to be replaced?

A. During a road test, a technician may notice an unusual noise originating from the suspension system. The technician may also notice that the vehicle exhibits excessive bounce, sway, or dive during braking. This could warrant additional inspection. If the shock or strut has lost a large amount of fluid, if it is bent or broken, or if it has damaged brackets or worn bushings, it should be repaired or replaced. Generally, replacement of parts will be required if a part no longer performs the intended purpose, if the part does not meet a design specification (regardless of performance), or if a part is missing. Replacement shocks may also be installed in order to improve the ride, for preventative reasons, or to meet a special requirement; for example, load-assisting shock absorbers can be installed for leveling a vehicle that is often used to carry additional weight.

Q: A technician pointed out that I have a light film of oil covering my shocks or struts, should they be replaced?

A. If the shocks or struts are functioning correctly, a light film of oil covering the top half of the working chamber does not warrant replacement. This light film of oil results when oil used to lubricate the rod gets wiped from the rod as it travels into the painted part of the shock or strut. (The rod is lubricated as it cycles in and out of the working chamber). When the shock / strut is manufactured, an extra amount of oil is added to the shock / strut to compensate for this slight loss. On the other hand, fluid leaking down the side of the shock / strut indicates a worn or damaged seal, and the unit should be replaced.

Q: I have replaced my shocks / struts several times within a few months due to excessive oil leakage. What is causing them to fail prematurely?

A. The main cause of oil leakage is seal damage. The cause of the damage should be identified and corrected prior to replacing shocks or struts. Most suspensions incorporate some type of rubber suspension stops called "jounce" and "rebound" bumpers. These bumpers protect the shock or strut from damage due to topping or bottoming. Most struts also utilize replaceable dust boots to keep contaminants from damaging the oil seals. To prolong the life of the replacement shocks or struts, these components should be replaced if they are worn, cracked, damaged or missing.

Q: What will happen if I don't replace worn shocks or struts?

A. Shocks and struts are an integral part of your suspension system. They work to prevent suspension parts and tires from wearing out prematurely. If worn, they could jeopardize your ability to stop, steer and maintain stability. They also work to maintain tire contact with the road and reduce the rate at which vehicle weight transfers among the wheels when negotiating corners or during braking.

*Actual mileage may vary, depending upon driver ability, vehicle type, and the type of driving and road conditions.

FAQ'S: Frequently Asked Questions

Q: My new tires are starting to wear unevenly. Is this due to the ride control parts?

A. There are many factors which affect tire wear. The five main items are:

1. Driving habits
2. Alignment settings
3. Tire pressure settings
4. Worn suspension or steering components
5. Worn shocks or struts

A “cupped” wear pattern is typically caused by worn steering / suspension components or by worn shocks / struts. Typically, worn suspension components (i.e. ball joints, control arm bushings, wheel bearings) will result in sporadic cupping patterns, whereas worn shocks / struts will generally leave a repeating cupping pattern. To prevent replacement of good components, all parts should be inspected for damage or excessive wear prior to replacement.

Q: A service technician said my struts had failed and were leaking oil; however, my vehicle has gas charged struts. Could this be true?

A. Yes, gas charged shocks / struts contain the same amount of oil as standard hydraulic units do. Gas pressure is added to the unit in order to control a condition referred to as “shock fade,” which occurs when the oil in a shock or strut foams due to agitation, excessive heat, and low pressure areas which develop behind the piston (aeration). The gas pressure compresses air bubbles trapped within the oil until they are so small that they do not affect the shock’s performance. This allows the unit to ride better and to perform more consistently.

Q: I’ve had my shocks / struts replaced; however, my vehicle still makes a metallic “clunking noise” when driving over bumps. Are my new struts / shocks bad?

A. There is most likely nothing wrong with the replacement units, but a metallic “clunking noise” typically indicates loose or worn mounting hardware. If the noise is present with a replacement shock absorber, check that the mountings are tightened securely, and look for other worn suspension parts. Some shock absorbers fit between a “clevis” type mount, which must squeeze the sides of the shock’s “mounting sleeve” very securely (like a vise would) in order to prevent noise. If the noise is present with a strut, then the upper bearing plate should be inspected and replaced if necessary. Old mounting bolts can stretch if over-torqued or if they have been loosened and retightened multiple times, resulting in a noise. If mounting bolts no longer hold their original torque, or if they have been stretched, they should be replaced.

Q: Are there any other parts I should consider replacing while having my struts / shocks serviced?

A. Definitely! Because removal, replacement and alignment of struts or shock absorbers can be labor intensive, it is a good idea to have the “bearing / mounting plate”, and mounting bolts inspected along with other parts that are designed to protect the strut / shock such as the “jounce bumper” and “dust boot”. You’ll not only be saving yourself from paying for the same labor charges again, but you will also be protecting the investment you made in new parts. If an inspection determines that many components are worn, you should consider installing Monroe® Quick-Strut® unit which consists of a complete ready-to-install strut assembly.

Q: Does my vehicle need to be aligned after I have my struts replaced?

A. Yes. Monroe® recommends alignments anytime replacement struts are installed. However, there are a few exceptions where the vehicle manufacturer does not provide alignment provisions, or where the alignment angles are not affected by a strut replacement. Examples include certain double wishbone, some modified type struts, and suspension systems which utilize shock absorbers. For more detailed information, contact your local Monroe® Expert Plus® Dealer or our Technical Assistance Team.

Q: I recently had the struts replaced on my vehicle and now the coil spring rubs on the inner fender well when I turn the wheels. What is causing this?

A. When installing existing components onto a replacement strut, care must be taken to insure the upper spring seat is installed with the correct orientation to the lower spring seat or mount. The orientation of the upper spring seat determines the direction that the coil spring is bowed to allow for inner fender clearance. If the orientation is off, the spring may rub on the inner fender well when the wheels are turned or when the suspension is compressed.

FAQ'S: Frequently Asked Questions

Q: The steering wheel on my strut-equipped vehicle does not return to center after negotiating a corner. What could be causing this?

A. The main cause for this is a strut bearing plate that will not rotate freely due to contaminants, over-torqued rod nut, or wear. Other causes can include: low tire pressure, incorrect alignment angles, and binding steering components such as ball joints, tie-rod ends, and steering rack.

Q: I am trying to install new shock absorbers on my vehicle; however, they are too short to install with the wheels hanging. Do I need longer shocks?

A. In most cases, no... many vehicles use shock absorber length to limit the suspension travel when the wheels are hanging in order to protect components from damage. For this reason, shocks should be installed with the vehicle suspension at normal ride height. Replacement could be performed on drive-on type ramps, over a mechanics pit, or on an alignment rack. Examples of components typically protected against damage from over-extension are: ball joints, tie-rod ends, 4WD half shafts / CV joints, U-joints, brake lines, ABS sensor lines, and height sensors. If the vehicle has been modified with an aftermarket suspension system, specially designed longer shocks are typically required.

Q: I have just had a snowplow installed on the front of my pick-up truck; can I adjust the tension of the torsion bars to level the truck without damaging the shock absorbers?

A. When a heavy snowplow is added to the front of a truck, the ride height must be set (raised) to fall within the vehicle manufacturers specifications. This will prevent premature failure of the shock absorbers, damage to other suspension parts and will ensure correct tire alignment. However, if the plow is removed (during the off-season), the ride height should be readjusted again (lowered) back to the manufacturer's specified ride height, or suspension/shock damage may occur.

Q: Can shock absorbers be mounted upside down (rod end down) and still function properly?

A. Most modern shock absorbers utilize a twin (dual) tube construction; in order to work properly the inner of the two tubes (working chamber) should stay completely filled with oil. The outer (reserve) tube contains an oil reserve along with air or a pressurized gas. If the unit is mounted inverted (rod side down), the air or gas in the outer chamber can enter the inner working chamber, resulting in poor damping performance. Therefore, twin tube shock absorbers should not be mounted upside down (or on their side), with the exception of specially designed units that incorporate a gas cell, or cellular gas material, designed to keep the gas retained in the outer reserve tube.

Q: My older vehicle originally came equipped with expensive electronically controlled adjustable struts. Can I replace these with less expensive non-adjustable struts?

A. Yes, certain vehicles can be modified to accept non-electronic replacement units if the owner desires to remove the O.E. electronic ride control system. Monroe® also manufactures conversion kit, part number 90001, designed to convert the air suspension used on the 1988-1994 Lincoln Continental to conventional coil spring struts.

Q: Why is the spring seat on the replacement strut much larger than on the original strut I'm replacing?

A. As a safety feature, some replacement struts are equipped with a large diameter lower spring seat. This seat is designed to prevent a broken coil spring from contacting the tire. Clearance should be checked if larger tires, tire chains, or replacement wheels are being used.

BUILD TO ORDER (BTO) SHOCK ABSORBERS

Listed below is the current list of repetitive part numbers that are available through our "BUILD-TO-ORDER" (BTO) PROGRAM. These part numbers are NOT stocked, but are currently priced and available for scheduling. Typical shipment is 6-8 weeks after receipt of an approved customer Purchase Order.

NOTES

NOTES

Tenneco, Inc. warrants qualifying Monroe® products against defects and wear-out when used on private passenger cars and light trucks under normal operating conditions for as long as such original purchaser owns the vehicle on which they were originally installed.

QUALIFYING PRODUCTS

- Monroe® Reflex® shocks and struts, Monroe® Sensa-Trac® shocks and struts, Monroe® Quick-Strut® replacement assemblies and Monroe® Gas-Magnum® shocks
- Rancho® RS9000XL™, Rancho® RS9000XL™ ProSeries Remote Reservoir, Rancho® RS9000XL™ ProSeries Coil-Over, Rancho® quickLIFT™, Rancho® RSX™ and Rancho® RS5000™ performance shock absorbers

Tenneco Inc. garantit les produits Monroe® admissibles contre les défauts et l'usure lorsqu'ils sont utilisés sur des automobiles et camions légers dans des conditions d'utilisation normales, tant et aussi longtemps que l'acheteur d'origine des produits est propriétaire du véhicule sur lequel ils ont été initialement installés.

PRODUITS ADMISSIBLES

- Amortisseurs et jambes de force Reflex® de Monroe®, Amortisseurs et jambes de force Sensa-Trac® de Monroe®, Ensembles de remplacement Quick-Strut® de Monroe®, Amortisseurs Gas-Magnum® de Monroe®,
- Rancho® RS9000XL™, Rancho® RS9000XL™ ProSeries à réservoir séparé, Rancho® RS9000XL ProSeries avec ressort hélicoïdal, Rancho® quickLIFT™, Rancho® RSX™ et amortisseurs de performance Rancho® RS5000™

Tenneco, Inc., garantiza los productos Monroe® que califiquen contra defectos y desgaste cuando se utilicen en automóviles de pasajeros privados y camiones ligeros en condiciones de operación normales durante todo el tiempo que dicho comprador original sea el dueño del vehículo en el cual se instalaron originalmente.

PRODUCTOS QUE CALIFICAN

- Amortiguadores y struts Monroe® Reflex®, amortiguadores y struts Monroe® Sensa-Trac®, ensamblajes de repuesto Monroe® Quick-Strut® y amortiguadores Monroe® Gas-Magnum®
- Rancho® RS9000XL™, Rancho® RS9000XL™ ProSeries Remote Reservoir, Rancho® RS9000XL™ ProSeries Coil-Over, Rancho® quickLIFT™, Rancho® RSX™ y amortiguadores de alto rendimiento Rancho® RS5000™

LIMITED LIFETIME WARRANTY GARANTIE LIMITÉE À VIE GARANTÍA LIMITADA DE POR VIDA

Tenneco's obligation under this warranty is limited to the replacement of the worn-out or defective product in accordance with this warranty. Cost of removal and installation are not included, and any incidental and consequential damages are excluded under this warranty, regardless of when the failure occurs. This warranty has no cash value. This warranty does not apply to products which have been modified, improperly applied or installed on vehicles used for commercial or racing purposes.

CONSUMER REQUIREMENTS

To make a claim under this warranty, return the worn-out or defective product with the dated original receipt to the dealer from whom it was purchased or to a Tenneco dealer for verification and exchange under this warranty. The installer / retailer needs to ensure that the consumer understands and can comply with the minimum requirements. The minimum requirements for a consumer to be eligible for warranty coverage are:

1. To be the original purchaser of the qualifying Tenneco products.
2. To present the Bill of Sale for the original purchase of the qualifying Tenneco products which clearly has part number and other customer information (a copy will need to be submitted with warranty claim documentation).

NOTE: Consumer retains Bill of Sale for original purchase as documentation on future warranty needs.

If the consumer cannot find and present this minimum proof of purchase, he or she does not have a valid warranty claim and the request should be denied. (Any claim for warranty submitted without copies of the two minimum supporting consumer documents will be denied.)

REQUIRED INFORMATION:

- Consumer Name
- Consumer Address
- Consumer City / State / Zip Code
- Consumer Phone Number
- Vehicle Make / Model / Year
- Vehicle Mileage
- Part Number
- Part Quality
- Date of Repair

This warranty gives consumers specific legal rights, and consumers may also have other rights, which vary from state to state. Any implied warranties consumers may have under state law are limited to the same duration as this warranty. Some states do not allow limitations on how long an implied warranty lasts, or do not allow the exclusion or limitation of incidental or consequential damages, so the above limitations and exclusion may not apply to all customers.

L'obligation de Tenneco en vertu de cette garantie est limitée au remplacement d'un produit usé ou défectueux. Les coûts d'enlèvement et d'installation ne sont pas couverts et tous dommages consécutifs sont exclus de cette garantie, sans égard au moment où la défaillance se produit. Cette garantie n'a aucune valeur monétaire et ne s'applique pas aux produits modifiés, mal utilisés ou installés sur des véhicules utilisés à des fins commerciales ou pour la course.

OBLIGATIONS DU CONSOMMATEUR

Pour faire une réclamation en vertu de cette garantie, veuillez retourner le produit usé ou défectueux avec la facture originale datée à l'installateur/détaillant qui vous a vendu le produit, pour confirmation de la défaillance et le remplacement en vertu des modalités de cette garantie. L'installateur/détaillant doit s'assurer que le consommateur comprend et peut se conformer aux exigences minimales. Les exigences minimales pour qu'un consommateur soit admissible à la couverture en vertu de la garantie sont :

1. Être l'acheteur original des produits Tenneco admissibles.
2. Présenter le contrat de vente des produits Tenneco admissibles comportant clairement le numéro de pièce et autres renseignements sur le client (une copie devra être envoyée avec les documents de réclamation en vertu de la garantie).

NOTE : Le consommateur conserve le contrat de vente de l'achat original comme documentation pour ses futurs besoins de garantie.

Si le consommateur ne peut trouver et présenter ce minimum de preuve d'achat, il ne peut faire de réclamation en vertu de la garantie et sa demande sera rejetée. (Toute réclamation en vertu de la garantie soumise sans les copies des deux documents justificatifs du consommateur sera rejetée.)

INFORMATION EXIGÉE :

- Nom du consommateur
- Adresse du consommateur
- Ville, province, code postal
- Numéro de téléphone du consommateur
- Marque, modèle, année du véhicule
- Kilométrage du véhicule
- Numéro de pièce
- Qualité de la pièce
- Date de la réparation

Cette garantie accorde aux consommateurs des droits spécifiques, et certains consommateurs pourraient aussi avoir d'autres droits, qui varient d'un État ou d'une province à l'autre. Toutes autres garanties implicites accordées aux consommateurs en vertu des lois de leur État ou province sont limitées à la même durée que cette garantie. Certains États ou provinces ne permettent pas de limite de durée d'une garantie, ou ne permettent pas l'exclusion ou la limitation des dommages consécutifs. Les limitations et exclusions ci-haut mentionnées ne s'appliquent donc pas à tous les consommateurs.

La obligación de Tenneco bajo esta garantía está limitada al reemplazo del producto desgastado o defectuoso de acuerdo con esta garantía. El costo de la remoción e instalación no está incluido, y todos los daños incidentales y emergentes están excluidos bajo esta garantía, independientemente de cuándo la falla ocurra. Esta garantía no tiene valor en dinero en efectivo. Esta garantía no se aplica a productos que hayan sido modificados, aplicados inapropiadamente o instalados incorrectamente en vehículos utilizados para propósitos comerciales o de carreras.

REQUISITOS PARA EL CONSUMIDOR

Para presentar un reclamo bajo esta garantía, devuelva el producto desgastado o defectuoso con el recibo original fechado al distribuidor al cual fue comprado o a un distribuidor de Tenneco para verificación e intercambio bajo esta garantía. El instalador / minorista necesita asegurar que el consumidor entiende y puede cumplir con los requisitos mínimos. Los requisitos mínimos para que un consumidor reúna las condiciones de cobertura bajo garantía son:

1. Ser el comprador original de los productos Tenneco que califiquen.
2. Presentar la factura de venta correspondiente a la compra original de los productos Tenneco que califiquen, la cual tenga claramente el número de pieza y otra información del cliente (será necesario presentar una copia con la documentación del reclamo bajo garantía).

NOTA: El consumidor retiene la factura de venta de la compra original como documentación para futuras necesidades de garantía.

Si el consumidor no puede encontrar y presentar este mínimo comprobante de compra, no tiene un reclamo de garantía válido y la solicitud debería ser denegada. (Cualquier reclamo de garantía presentado sin copias de los dos documentos mínimos de respaldo del consumidor será denegado.)

INFORMACIÓN REQUERIDA:

- Nombre del consumidor
- Dirección del consumidor
- Ciudad / Estado / Código postal del consumidor
- Número de teléfono del consumidor
- Marca / Modelo / Año del vehículo
- Kilometraje del vehículo
- Número de pieza
- Calidad de la pieza
- Fecha de reparación

Esta garantía confiere a los consumidores derechos legales específicos y es posible que los consumidores también tengan otros derechos que varían de un estado a otro. Todas las garantías implícitas que los consumidores tengan bajo la ley estatal están limitadas a la misma duración que esta garantía. Algunos estados no permiten limitaciones en cuanto a la duración de una garantía implícita o no permiten la exclusión ni la limitación de los daños incidentales o emergentes, por lo que es posible que las limitaciones y la exclusión que anteceden se apliquen a todos los clientes.
