REFRICENTER

AIR CONDITIONING & REFRIGERATION DISTRIBUTORS

Welcome to Refricenter. We are a single-source, full-line HVACR distributor serving residential and commercial contractors as well as other distributors within our export network. Our family-owned and operated business is rich in history and goes beyond the opening of our first warehouse in 1971.

Our ability to serve a vast base of English and Spanish-speaking customers with a reputation for excellence in service spans decades—with consistency. Because we are local and independent, Refricenter offers the care and flexibility larger conglomerates simply cannot compete with.

We appreciate the time you have taken to consider us as a valuable partner in your operation. Refricenter is eager to gain your trust through each contact and is committed to a long-term relationship.

Christian Hernandez, COO; Cirilo Hernandez, CEO; and Jose Hernandez, President

WELCOME

The One-Stop AC Shop

Refricenter maintains 10 convenient locations, serving south Florida, the Keys and throughout St. Lucie County. We continue to grow and invest in facilities as the demand for our products and services evolves. We are a third-generation entity and work hard to ensure your success.

 SOUTH FLORIDA

 DOMINICAN REPUBLIC
PUERTO RICO

Refricenter is a popular resource that goes beyond Florida. Our export department services the Caribbean, Central and South America. Our ability to consolidate mixed shipments affords our customers the opportunity to better manage your cash flow, compared to having to buy the large volumes that come with working directly with an OEM.

OUR LOCATIONS

A SINGLE SOURCE

All Your HVAC Needs at Competitive Prices

- 10 Convenient Locations
- 10,000+ Products...In Stock
- Top Manufacturers

Refricenter is a single-source, full-line distributor—carrying everything the HVACR technician requires, from equipment to parts, tools and supplies. We have more than \$15 million in inventory, stocking the spare parts needed to help keep your operation looking good.

- Expert Sales Team
- Quick & Accurate Quotes

Serving South Florida's Cooling Needs Since 1971

At Refrigcenter, our greatest asset has always been our outstanding workforce. Our employees are the heart of our success and the reason why we are able to build strong relationships with our valued customers and manufacturing partners.

Our team is tenacious in our efforts to ensure your success. Today's distribution chain is global and competitive. Refrigcenter is up against operations that slash pricing to simply gain your dollar. Our people are value-added and work hard to make sure you have all the right solutions that address your specific application—maximizing your success.

OUTSTANDING PEOPLE

VALUE-ADDED

We're Eager to Exceed Expectations

Refricenter is a value-added business. We believe our business is unsurpassed when it comes to the complete package—full-line products, expert staff, the right solutions—all at a competitive price that is consistent, spanning decades.

The HVACR industry is ever-changing and evolving as innovative products launch. We are always at the leading edge of change. With change, the demands of needed services increase. Refricenter is committed to offering services that help keep your operation competitive. Let us know if there is something we can do to help give your business the needed edge.

Fiberglass Insulation Cut Efficiently & Correctly

Refricenter is always looking for ways to support your operation and optimize efficiencies. One of the ways we do this is by providing insulation cutting equipment and an endless supply of product for our valued customers to use. You don't have to make space for it, invest in it or stock it.

Make your custom cuts at a clean and organized satellite extension of your business. Not to mention, you won't have to go very far for additional supplies. We stock them, so you don't have to!

SUPPORTING YOU

A PROUD HISTORY

Refricenter was originally founded in 1957 in Havana, Cuba under the name “Almacenes Refricentro” by Cirilo C. Hernandez. Due to the changing political climate in Cuba during the early 1960s, Cirilo left the place he’d always called home in the hopes of finding better opportunities for his business. Having left Cuba with nothing, he re-established Refricentro in Puerto Rico thanks to a small loan he received from a friend he knew at Citibank. Obviously, since he had nothing to his name, that was the most the bank was willing to offer him, yet that was the foundation for opening his first “Refricentro” branch in Hato Rey, San Juan, Puerto Rico in 1964.

Cirilo states that one of the main reasons he was able to get his business off the ground was because factories like Mueller Industries, Danfoss and Tecumseh had confidence in his character due to their experience working with him when he was still operating in Cuba. When the political situation took a turn for the worse, many companies in Cuba decided not to pay their bills and blamed it on the government. Cirilo always paid his debts, and that’s why reputable companies felt comfortable extending him credit to get his business going.

After its forced transition to Puerto Rico, and successfully turning Refricentro into a nine-employee, two-branch operation, Cirilo decided that it was time to expand the company. In 1971, the company acquired its first warehouse in the United States in Miami, Florida. Originally, the warehouse was used as a hub to consolidate orders from various vendors in an attempt to reduce freight costs to Puerto Rico.

Out of that very warehouse, Cirilo opened an export sales office that began serving customers in the Caribbean and Latin America. Once that business started moving more volume, it became logical to open the first local sales counter to the Miami market. Not too long after, Cirilo expanded the company’s operations into the Dominican Republic, founding the company “Refripartes S.A.”

Through the 80s, 90s and into the new millennium, Refricenter and its sister companies continued a consistent growth across the territories that we serve, building long-lasting relationships with local contractors. Between constantly expanding our product offerings and services, adding more locations and using the highest quality suppliers, Refricenter has long been driven by the idea of being the one-stop shop for all HVACR needs.

Today, Refricenter and its sister companies, Refricentro and Refripartes, have approximately 300 employees that span South Florida, Puerto Rico and the Dominican Republic. With 10 branches in the Florida market, 18 in Puerto Rico and 16 in the Dominican Republic, Refricenter has become a major influence in the air conditioning and refrigeration industry throughout Florida and the Caribbean. Hispanic Business, a California-based business magazine, named Refricenter the 59th largest Hispanic-owned company in the United States in 2013.

The Ideal Residential Drop-in Replacement for R-22

With no oil change or TXV change needed in most installations, an R-22 retrofit with Genetron® 422D is as easy as it gets. You can use AB, MO or POE lubricants, and it offers lower discharge temperatures than R-22. It all adds up to quick and simple changeouts.

The JPL flex duct advantage begins when you open the package.

Many already know that **JPL flex duct is the best in the business** because we match your exacting needs and provide consistent and reliable performance – all at a fair price.

On the jobsite, your installers will immediately see the difference: our unique mechanized packaging allows installers to use the duct right out of the package without the need to realign and position the inner core, insulation and vapor barrier flush to each other.

See for yourself how the JPL advantage can become your advantage.
