

Simulation Modeling and Arena

MANUEL D. ROSSETTI

University of Arkansas

John Wiley & Sons, Inc.

Table of Contents

1		1
<i>Simulation Modeling</i>		
1.1	Why Simulate?	2
1.2	Types of Computer Simulation	3
1.3	How the Discrete-Event Clock Works	5
1.4	Randomness in Simulation	9
1.5	Simulation Languages	9
1.6	Getting Started with Arena TM	10
1.6.1	A Drive-Through Pharmacy	12
1.6.2	Modeling the System	12
1.6.3	Implementing the Model in Arena TM	15
1.6.4	Specify the Arrival Process	16
1.6.5	Specify the Resources	17
1.6.6	Specify the Process	18
1.6.7	Specify Run Parameters	20
1.6.8	Analyze the Results	21
1.6.9	Augment the Animation	24
1.7	Getting Help in Arena TM	32
1.8	Simulation Methodology	33
1.9	Organization of the Book	38
	Exercises	39

2	Basic Process Modeling	42
2.1	Entities, Attributes, and Variables	43
2.2	Creating and Disposing of Entities	45
2.3	Defining Variables and Attributes	48
2.4	Processing Entities	52
2.5	Attributes, Variables, and some I/O	54
2.5.1	Modifying the Pharmacy Model	54
2.5.2	Using the ASSIGN Module	57
2.5.3	Using the READWRITE Module	59
2.5.4	Using the RECORD Module	62
2.5.5	Animating a Variable	63
2.5.6	Running the Model	65
2.6	Flow of Control in Arena TM	67
2.6.1	Logical and Probabilistic Conditions	68
2.6.2	Iterative Looping	72
2.6.3	Example: Iterative Looping, Expressions, and Submodels	73
2.6.3.1	Building the Model	74
2.6.3.2	VARIABLE Module	75
2.6.3.3	EXPRESSION Module	77
2.6.3.4	Hierarchical Submodels	79
2.6.3.5	WHILE-ENDWHILE Blocks	80
2.6.3.6	PROCESS Module Delay Option	82
2.7	Batching and Separating Entities	87
2.7.1	Conceptualizing the Model	88
2.7.2	Building the Model	88
2.8	SIMAN and Arena's Run Controller	97
2.8.1	An Arena TM Program	97
2.8.2	Using the Run Controller	101
2.9	Summary	108
	Exercises	110
3	Modeling Randomness in Simulation	113
3.1	Random Variables and Probability Distributions	114
3.2	Input Distribution Modeling	120
3.2.1	Input Modeling Example	122
3.2.2	Graphical and Statistical Analysis of the Data	122
3.2.3	Using Arena's Input Analyzer	137
3.2.4	Additional Input Modeling Concepts	153
3.3	Generating Random Numbers	155
3.3.1	Random Number Generators	157
3.3.1.1	Testing Random Number Generators	163
3.3.2	Generating Random Variates	164
3.3.3	Modeling Randomness in Arena TM	173
3.3.4	Non-Stationary Processes	186
3.4	Summary	193
	Exercises	193

Appendix 1: Using MINITAB and BestFit during Input Modeling	200
Appendix 2: Basic Spreadsheet Simulation Concepts	205

4**Analyzing Simulation Output****215**

4.1 Types of Statistical Variables	216
4.2 Types of Simulation with Respect to Output Analysis	220
4.3 Analysis of Finite-Horizon Simulations	222
4.3.1 Determining the Number of Replications	223
4.3.2 Finite-Horizon Example in Arena TM	226
4.3.3 Sequential Sampling for Finite-Horizon Simulations in Arena TM	233
4.3.4 Using the Arena-Generated Access File	235
4.4 Analysis of Infinite Horizon Simulations	240
4.4.1 Assessing the Effect of Initial Conditions	245
4.4.2 Performing the Method of Replication-Deletion in Arena TM	250
4.4.3 Looking for the Warm-up Period in the Output Analyzer	253
4.4.4 Batch Means Method	264
4.4.5 Performing the Method of Batch Means in Arena TM	267
4.5 Comparing System Configurations	270
4.5.1 Comparing Two Systems	271
4.5.1.1 Analyzing Two Independent Samples	272
4.5.1.2 Analyzing Two Dependent Samples	274
4.5.1.3 Example of CRN in Arena TM	275
4.5.1.4 Implementing Independent Sampling in Arena TM	284
4.5.2 Analyzing Multiple Systems	285
4.5.2.1 Sensitivity Analysis Using Arena's Process Analyzer	286
4.5.2.2 Multiple Comparisons with the Best in Arena TM	292
4.6 Summary	296
Exercises	296

5**Modeling Queueing and Inventory Systems****303**

5.1 Single-Line Queueing Stations	304
5.1.1 Deriving Formulas for Markovian Single-Queue Systems	309
5.1.2 Examples and Applications of Queueing Analysis	314
5.1.3 Non-Markovian Queues and Approximations	324
5.1.4 Simulating Single Queues in Arena TM	325
5.1.4.1 Example: Machine Interference Optimization Model	325
5.1.4.2 Using OptQuest on the Machine Interference Model	331
5.1.4.3 Example: Walk-in Health Care Clinic	333
5.2 Networks of Queueing Stations	340
5.2.1 Example: Testing and Repair Shop	341
5.2.2 STATION, ROUTE, and SEQUENCE Modules	343
5.3 Inventory Systems	351
5.3.1 Modeling an (r, Q) Inventory Control Policy	352
5.3.2 Modeling a Multiechelon Inventory System	361
5.4 Summary	367
Exercises	368

6	Entity Movement and Material Handling Constructs	379
6.1	Constrained Transfer with Resources	380
6.1.1	Implementing Resource-Constrained Transfer	381
6.1.2	Animating Resource-Constrained Transfer	388
6.2	Constrained Transfer with Transporters	391
6.2.1	Test-and-Repair Shop with Workers as Transporters	394
6.2.2	Animating Transporters	398
6.3	Modeling Systems with Conveyors	401
6.3.1	Test-and-Repair Shop with Conveyors	405
6.3.2	Animating Conveyors	409
6.3.3	Miscellaneous Issues in Conveyor Modeling	411
6.3.3.1	Accumulating Conveyors	411
6.3.3.2	Merging and Diverging Conveyors	413
6.3.3.3	Processing while on the Conveyor	416
6.3.3.4	Recirculation Conveyors	416
6.4	Modeling Guided-Path Transporters	417
6.5	Summary	425
	Exercises	426
7	Miscellaneous Topics in Arena™ Modeling	432
7.1	Advanced Resource Modeling	433
7.1.1	Ignore	437
7.1.2	Wait	438
7.1.3	Preempt	438
7.1.4	Running the Scheduled Capacity Change Model	439
7.1.5	Modeling Resource Failure	442
7.2	Tabulating Frequencies Using the STATISTIC Module	445
7.3	Entity and Resource Costing	447
7.4	Miscellaneous Modeling Concepts	454
7.4.1	Picking Stations	454
7.4.2	Generic Station Modeling	458
7.4.3	Picking Up and Dropping Off Entities	462
7.5	Programming Concepts in Arena™	470
7.5.1	Working with Files, Excel, and Access	470
7.5.2	Reading from a Text File	470
7.5.3	Reading a Two-Dimensional Array	473
7.5.4	Reading from an Excel Named Range	473
7.5.5	Reading Model Variables from Microsoft Access	477
7.5.6	Using Visual Basic for Applications	481
7.5.7	Using VBA	482
7.5.8	The VBA Module and User-Defined Functions	486
7.5.9	Generating Correlated Random Variates	494
7.6	Summary	497
	Exercises	497

8***Application of Simulation Modeling***

	502
8.1 Problem Description	503
8.1.1 Rockwell Software/IIE 7th Annual Contest Problem: SM Testing	504
8.2 Detailed Solution	509
8.2.1 Answering the Basic Modeling Questions	509
8.2.2 Detailed Modeling	513
8.2.2.1 Conveyor and Station Modeling	514
8.2.2.2 Modeling Samples and the Test Cells	516
8.2.2.3 Modeling Sample Holders and the Load/Unload Area	522
8.2.2.4 Performance Measure Modeling	524
8.2.2.5 Simulation Horizon and Run Parameters	526
8.2.3 Preliminary Experimental Analysis	529
8.2.4 Final Experimental Analysis and Results	530
8.2.4.1 Using the Process Analyzer on the Problem	531
8.2.4.2 Using OptQuest on the Problem	535
8.2.4.3 Investigating the New Logic Alternative	536
8.3 Sensitivity Analysis	538
8.4 Completing the Project	538
8.5 Some Final Thoughts	540
Exercises	542
Bibliography	543
Appendices	548
Index	567
