

MANUFACTURING IN AMERICA 19

**SINUMERIK CNC as part of a TIA Portal-based  
Manufacturing Cell**  
Presented by Tiansu Jing  
Manufacturing in America | March 20-21, 2019

# The complete product portfolio offers the highest possible of integration from Siemens

## Complete product portfolio for the Digital Enterprise

SINUMERIK	SIMATIC	SINAMICS	SIMOTICS
			
The perfect CNC solution for every machine tool	The Product family for Automation by Siemens	Low-voltage converters - the integrated drive family for every application	The right motor for every motion control task - the widest range of motors worldwide

The integrated product portfolio is the basis for highly productive machines and plants for the Digital Enterprise.

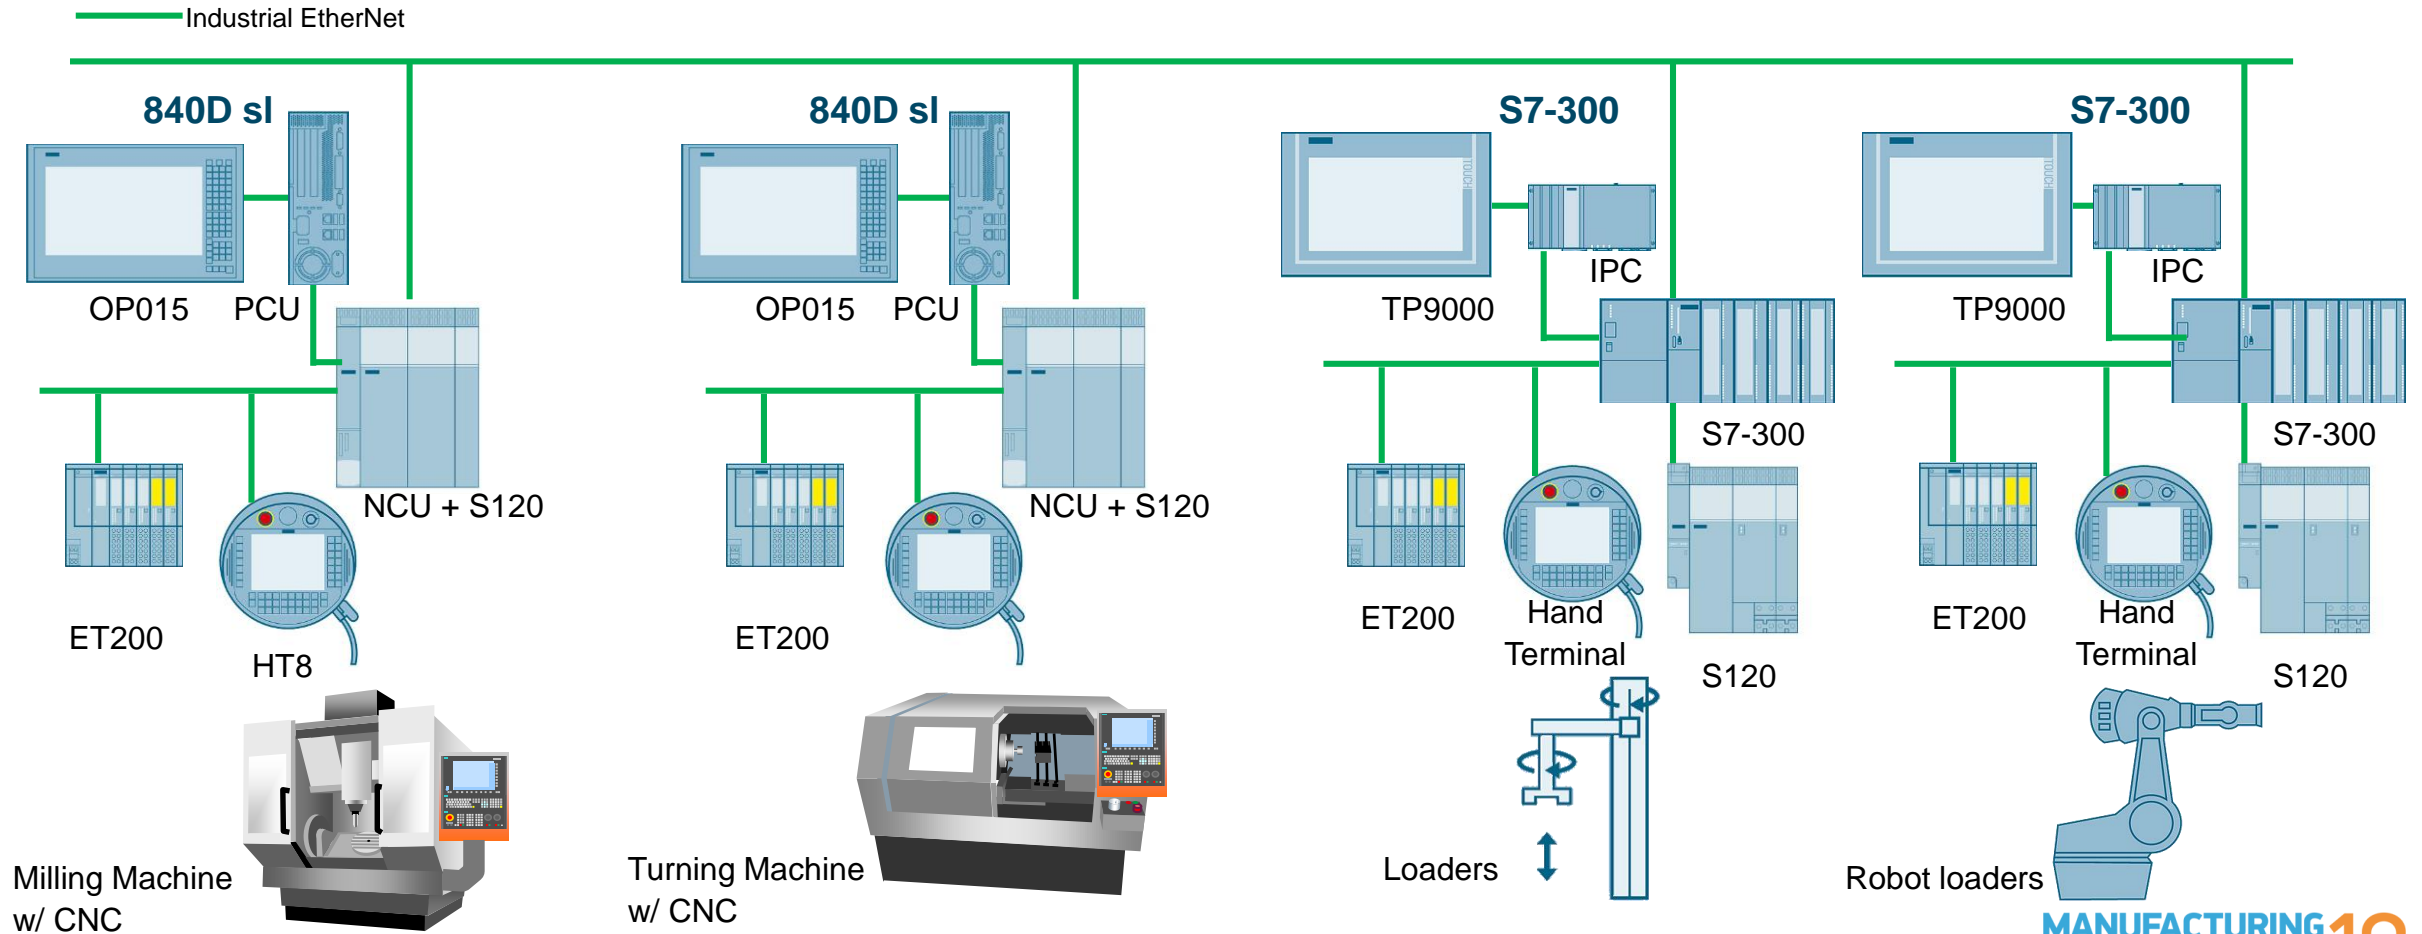

# The Siemens Motion Control Portfolio

- the perfect CNC solution for every machine concept

The **SINUMERIK** product family provides perfect solutions for all machine concepts – from attractively priced CNC entry-level machines to **standardized machine concepts** through to modular **premium-machine concepts**.

# Traditional way to design the automation cell is to make everything cooperate with each other

# SINUMERIK blackline plus Panel

Product families from SIMATIC for the machine tool market

ITC

## SIMATIC Integrated Thin-Client Unit

- With integrated thin client module
- Transfer of video and data via Ethernet
- Up to 100 m distance between NCU/IPC
- Low mounting depth
- For "embedded" and "Windows-based" architectures

IFP

## SIMATIC Industrial Flat Panels

- Transfer of video via the display port
- Transfer of data via USB
- Low mounting depth
- For use with "box" IPC such as IPC 427

IPC 477E

## SIMATIC Industrial PC (integrated panel PC)

- Integrated Panel PC concept
- Compact and rugged: SSD and passive cooling
- Dual Core & Quad Core / 64 bit architecture
- Improved performance due to the **Intel Skylake processors (6th Gen.)**
- Selected configurations for SINUMERIK

**MANUFACTURING  
IN AMERICA 19**

# Migration SINUMERIK PCU 50.5 to SIMATIC IPC 4x7E

## - Benefits

### SINUMERIK PCU 50.5 (C/P)

### SIMATIC IPC 4x7E

#### Storage

- 240 GB SSD mass storage

#### Processor technology

- Powerful Intel processors – scalable from Celeron to Core i5 of 6<sup>th</sup> generation

#### Interfaces

- 4 x USB 3.0 interfaces
- 3 x Gigabit Ethernet interfaces

#### Common hardware

- Same hardware as using w/ PLC

#### Benefits

- ▶ • Improvement in speed compared to classic HD hard drive
- Increased service life

- ▶ • Faster data processing

- ▶ • Powerful interfaces for faster data transfer

- ▶ • Simple maintenance

# PCU 50.5 compared to IPC 427E

## - Overview of technical details

	PCU 50.5-C	PCU 50.5-P	IPC 427E Standard Performance	IPC 427E High Performance
<b>Dimensions</b>	297 x 267 x 82 mm	297 x 267 x 82 mm	262 x 134 x 55,5 mm	262 x 134 x 55,5 mm
<b>Slots</b>	1x PCIe, 1x PCI	1x PCIe, 1x PCI	1x PCIe	1x PCIe
<b>Processor</b>	Celeron P4505	Core i5-520E	Celeron G3902E 6. Generation	Core i5-6442EQ 6. Generation
<b>RAM</b>	4 GB DDR3	8 GB DDR3	4 GB DDR4	8 GB DDR4
<b>COM</b>	1 x RS232C	1 x RS232C	-	-
<b>USB</b>	4 x USB 2.0	4 x USB 2.0	4 x USB 3.0	4x USB 3.0
<b>Ethernet</b>	2 x Ethernet 10/100/1000 Mbit/s	2 x Ethernet 10/100/1000 Mbit/s	3 x Gigabit Ethernet (IE/PN)	3x Gigabit Ethernet (IE/PN)
<b>Graphic</b>	LVDS/DVI	LVDS/DVI	DP	DP
<b>Operating system</b>	Win7 Pro EmbSys (64 Bit)	Win7 Pro EmbSys (64 Bit)	Win7 Ultimate or Win10 IoT Enterprise	Win7 Ultimate or Win10 IoT Enterprise
<b>Mass storage</b>	80 GB SSD	80 GB SSD	240 GB SSD	240 GB SSD

# TIA Portal engineering for SINUMERIK 840D sl

## The most important highlights for future-oriented engineering

**SIEMENS**  
*Ingenuity for life*

### Safety Integrated plus

- Drive-based Safety Integrated
- System-integrated failsafe logic programming (F-PLC)
- Simple configuration and acceptance

### Flexible libraries

- Easy creation, storage and re-use
- SINUMERIK STEP 7 Toolbox integrated
- Comprehensive version management

### Integrated engineering

- One engineering for all tasks
- Integrated and efficient from configuring through to testing and diagnosing
- Graphic and intuitive through Drag & Drop

### Modern HMI configuration

- A high degree of individualization supported by comprehensive libraries
- SINUMERIK Operate as own "control"
- Access protection, user administration, ...

### PLC programming

- Fully symbolic programming
- Powerful SCL High-level language with advanced editor
- Easy-to-use editors for LAD and FBD

# TIA Portal Engineering for SINUMERIK 840 D sl

Significant shortening of the engineering times for all applications by means of ...

**SIEMENS**  
*Ingenuity for life*

- ... support of structured and team-oriented working (libraries, versioning, ...)
- ... easy and intuitive configuration of HMI and the control up to the drive technology (usability, ...)
- ... powerful editors for programming/parameterization, test and diagnostics (PLC languages, trace, ...)

All technologies

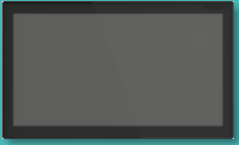

All industries

# Professional operation of machine tools

## The right engineering / runtime system for every customer requirement

		SINUMERIK 828	SINUMERIK 840				
		PPU	NCU	PCU / IPC 427E	3rd Party PC	IPC WIN 7 Embedded 3rd Party PC	Comfort Panel
HMI runs on:							
		SINUMERIK Operate					
Engineering	Create MyHMI /WinCC			WinCC Runtime			
	Create MyHMI /3GL	C++		Run MyHMI /3GL			
		.NET		Run MyHMI /3GL			
		QT		Run MyHMI /3GL			
	Create MyHMI /PRO		Run MyHMI /Pro				
ASCII Editor	Run MyScreens						
		Runtime					

SINUMERIK Integrate Create MyHMI /WinCC – easily and quickly to a highly individualized operating philosophy

# SINUMERIK Integrate Create MyHMI /WinCC

## The top highlights

**SIEMENS**  
*Ingenuity for life*

### Configuring instead of programming

- Make professional machine operation easy
- Easily configure data relationships

### SINUMERIK Operate integrated

- Easy integration of the proven SINUMERIK Operate operation
- Flexibly expandable by WinCC

### TIA - Uniformity

- Optimal system integration (with universal use of the TIA Portal)
- Ready for digitalization concepts within the context of Industrie 4.0 (technologies, etc.)

### High degree of individualization

- Comprehensive library of display elements and operator controls
- Integration of customer-specific controls

### Openness

- Integration of any contents (browser, live streams, PDF, etc.)
- Consistent support of standard technologies (e.g. SQL)

# Why do we have a new Safety Integrated concept for SINUMERIK 840D sl?

## Safety Integrated → since 1996

- Motion monitoring
  - Safety functions are distributed between **NCK** (SINUMERIK) and **drive** (SINAMICS)
- Safe programmable logic in **NCK** and **PLC**
  - Direct connection of safety-related actuators and sensors to the failsafe I/O from the SIMATIC ET200 range
    - No additional hardware relays required
    - Software-based processing of the digital signals from safety-related sensors and actuators
  - **Two** programs with crosswise data and result comparison
    - Asynchronous subprogram in the **NCK**
    - Standard STEP 7 program in the **PLC**

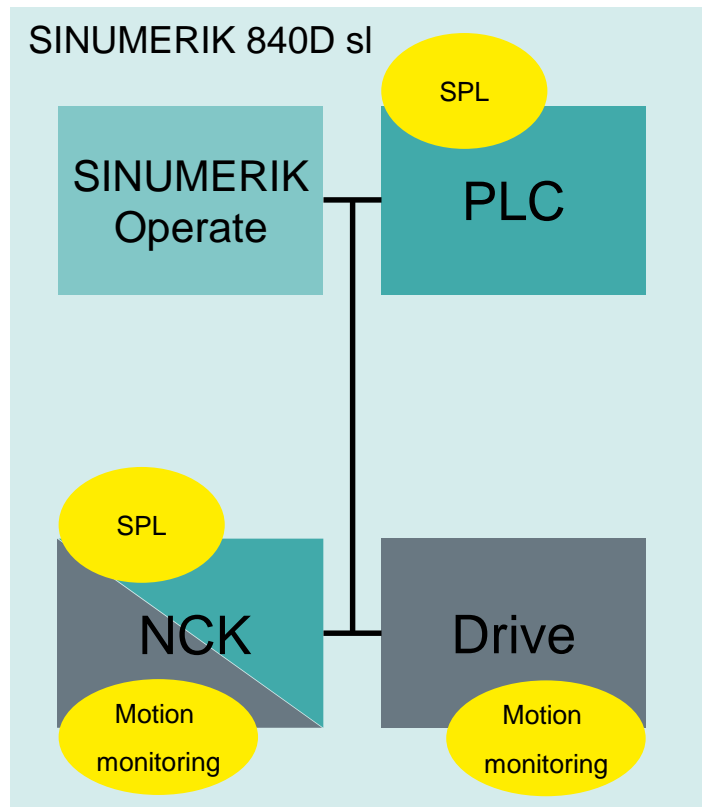

## Safety Integrated plus → from 2017

- Motion monitoring
  - Safety functions are integrated in the **drive** (SINAMICS)
- Safe programmable logic in the **integrated F-PLC**
  - Direct connection of safety-related actuators and sensors to the failsafe I/O from the SIMATIC ET200 range
    - No additional hardware relays required
    - Software-based processing of the digital and **analog** signals from the safety-related sensors and actuators
  - **One** failsafe program in the F-PLC
    - Failsafe program in **Step 7 TIA-Portal**

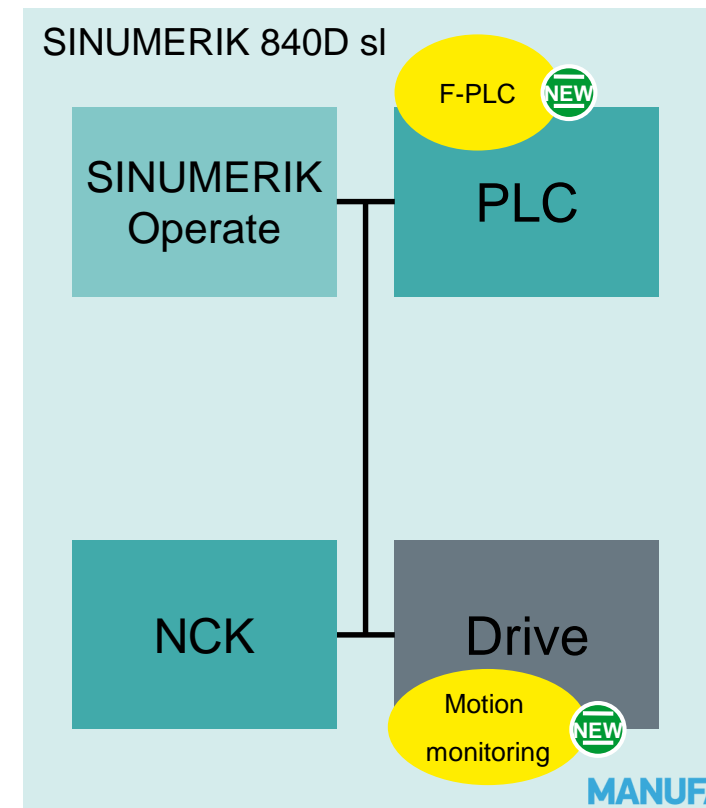

Both versions are offered in parallel. Safety Integrated is just as safe and reliable in the application as Safety Integrated plus

# Different concepts for Safety Integrated and Safety Integrated plus with SINUMERIK 840D sl

## Safety Integrated

## Safety Integrated plus

# SINUMERIK Safety Integrated plus

... the most important highlights for the "safe" machines

**SIEMENS**

*Ingenuity for life*

## F-PLC integrated

- Programming the safe logic in TIA Safety Advanced
- Certified F-blocks are available for the failsafe program

## Integrated in SINUMERIK Operate

- Graphical configuration of the safety functions
- Partially automated acceptance tests, including the required reporting

## Drive-based safety integrated

- Universal utilization of the SINAMICS Safety Integrated functions
- Safe monitoring of standstill, motion, and position

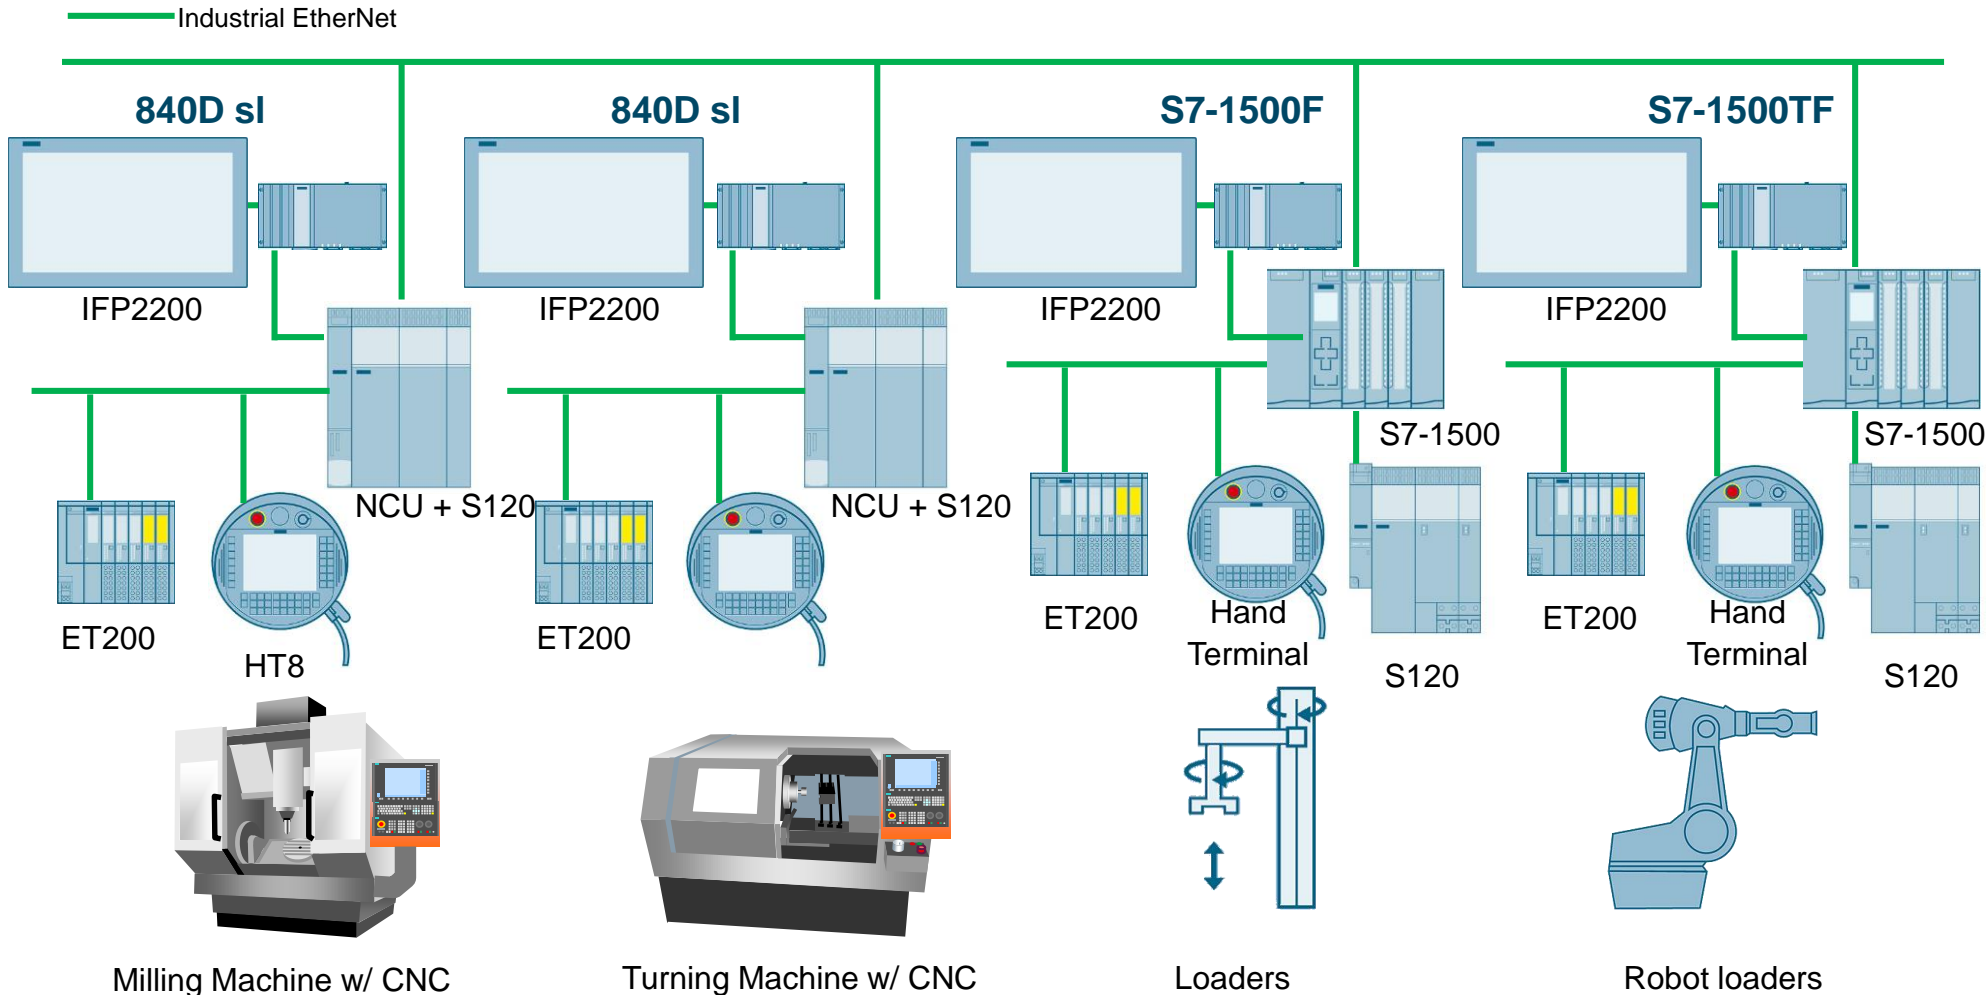

## Uncompromisingly reliable

- Fulfills the requirements according to Category 3 / SIL 2 / PL d
- Guaranteed safety for personnel and machinery with high machine productivity

# With TIA, we design a complicated automation cell as one unit

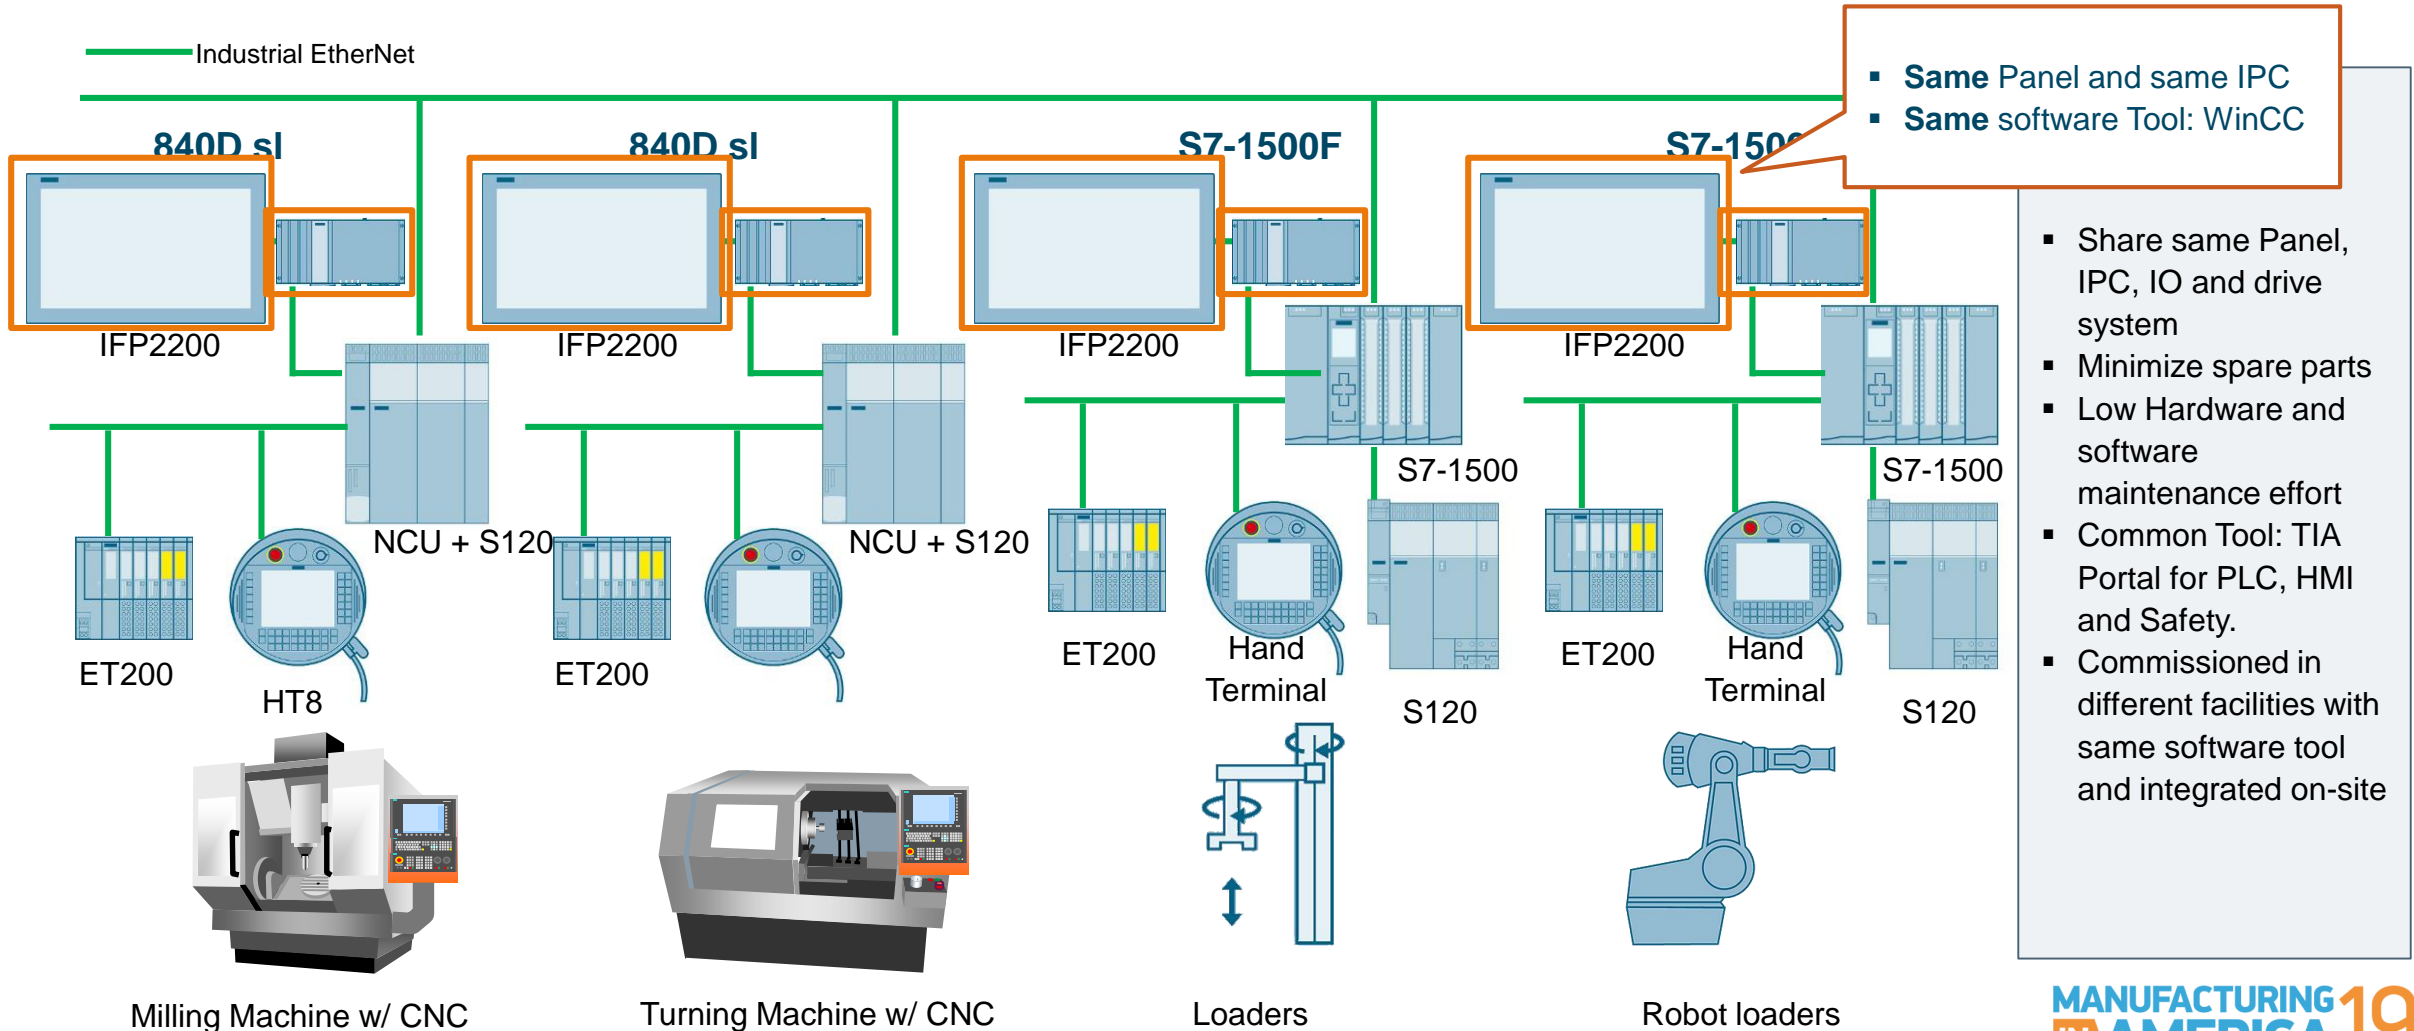

- Share same Panel, IPC, IO and drive system
- Minimize spare parts
- Low Hardware and software maintenance effort
- Common Tool: TIA Portal for PLC, HMI and Safety.
- Commissioned in different facilities with same software tool and integrated on-site
