Unaudited Actual Export Sample	65 - 66
QSS General Ledger Transaction Types	67 - 70

QSS: Quintessential School Systems (QSS) financial software is used by the Siskiyou County Office of Education and K-12 school districts. Each district was trained in usage and received a series of manuals. The manuals are quite extensive and are not written specifically for Siskiyou County Schools. To assist districts, we have put together this manual to provide assistance specific to Siskiyou County's financial system.

References to the *Enter* Key:

Log on to QSS use *only* the enter key on alpha portion of key board After entering system, use *only* the enter key on the numeric portion of key board

Year indicator

The QSS screens shown are meant to be generic (year is indicated with YY rather than a specific year)

Users will see the year resulting from by the log on year

Financial Activity Report (FAR110)

Use this report to review all transactions for a specific account string or line item (revenue and expenditure objects only). It is similar to the General Ledger detail Report (GLDSUB), however, this report cannot provide balance sheet Object numbers.

- A. Turn on Caps Lock
- B. Log On:
- C. Password: (your alphanumeric password)
- D. From the District Systems menu, select 13. REP Reports
- E. From the District Reporting System menu, select 7. *Financial Activity Report*
- F. The initial screen:

Financial Summary Report (FAR300)

This report is one of the most useful reports in the QSS system. Use this report to review activity for a specific account string, specific Resource, or for entire Funds. Sorting the General Fund by Resource provides an excellent report to monitor activity.

- A. Turn on Caps Lock
- B. Log On:
- C. Password: (your alphanumeric password)
- D. From the District Systems menu, select 13. *REP Reports*
- E. From the District Reporting System menu, select 7. *Financial Summary Report*
- F. The initial screen:

G. To isolate current month activity, enter the beginning and ending date of the particular month in the From and To fields (example used is January)

District: XX	Financial Summary F	Report Writer QSS/OASIS	Provides specific month
Select a Subse	Report Title: From Date: Report Format: t of Your Accounts:	<mark>Your Report Title</mark> 0101YY To Date: 0131YY (MMDDYY) 1 (H for Help) (Major Object Subtotal) Y (Y/N)	and year to date activity (January for this example)
Include Include Approved/Una Exclude I FARSB3 H.00.07 comp	Budget Type e Budget Transfers: approved GL Trans: Pre-encumbrances: biled 09/24/98 11:	W (A/R/W) Y (Y/N/U/A) B (A/U/B) N (Y/N) 03	W = vorking Budget, Y = Yes budget transfers, B = Both approved and unapproved

Financial Summary Report (FAR300) (continued)

H. Press *ENTER*, F7 to continue to next screen

District: XX	Financial Summary Report Writer QSS/OASIS

Screen Descriptions:

G.

Η.

een	Descriptions.	
	Budget \rightarrow	Working reflects most up to date budget in the QSS system (including
		revisions not yet board approved)
		Revised reflects most recent board-approved budget
		Approved reflects the original July 1 st adopted budget
	Actuals \rightarrow	Expense/Receipt: represents year to date cash expended or received
		<i>Pending</i> : represents payments entered in the QSS system not yet processed
		Encumbered: represents funds that have been committed for future
		expenditures through purchase orders and payroll encumbering
		<i>Committed Total</i> : represents the total budget amount that has been received,
		spent, or reserved for future purchases (this amount is the sum of
		Expense/Receipt, Pending, and Encumbered)
	Balance \rightarrow	For all three budgets, the <i>Balance</i> remaining is the <i>Budget</i> amount less the
		Committed Total (positive Balance means actual expenditures or receipts are
		less than the budget, negative Balance means actual expenditures or receipts
		exceed the budget)
	To print, click o	n <i>File</i> of Reflections control bar, then click on <i>Print</i> .
	Note: To look	up a group of accounts or search for an account string use the question mark
	(?) as a	a wildcard.

- K.
- L.

I.

Print Spool Instructions

Print Spool is QSS Financial Software's method to access reports generated.

- A. Turn on Caps Lock
- B. Log On:
- C. Password: (your alphanumeric password)
- D. From any system menu, enter "**P**" (for Print) in the Select an option box
- E. Report generating can take several minutes, the F2 key is used to update the screen as it rereads the files being generated.
- F. Status of your print job can be checked by entering a "J" in the *Option* box
- G. Once the requested report has been generated, the most commonly used options are:
 - B Browse (scroll through the report)
 - > P Print
 - > D Delete (Note: Reports should be deleted on a daily basis)
- H. For more Print Spool options, enter "H" (help) in the *Option* box.

Budget Process

Before beginning the budgeting process, consider compiling the following information:

- Budget Development Check List
- Attendance and enrollment information
 - 3rd prior year to 2nd subsequent year
 - Attendance: Include current year and budget year by grade level
- Budget Report (most recent)
- Capital Assets
 - Spread sheet from most recent audit
 - Printout of current year additions
 - Back for disposals
- > Ending Fund Balance Information for prior and out years
 - Restricted
 - Unrestricted
 - Economic Uncertainty requirement and actual for 3rd prior to 2nd subsequent year
 - Special Funds (budget and out years only)
- > Enrollment for budget and out years by grade level
- Interim Report (most recent)
- > Health and welfare cap information
- Long-term Debt
 - Spread sheet from most recent audit
 - Printout of current year payments and/or additions
- Revenue
 - Current year detail
 - Budget year detail
- Revenue Limit
 - Be sure budget, Revenue Limit and RL all have the same PERS reduction
 - Be sure Budget, Revenue Limit and RL all have the same Property Taxes

The QSS accounting system provides a great deal of flexibility that can result in more than one way to request reports or extract information. This information is general guidelines only. See the official QSS Budget Development Manual for complete information. Note: The System Manager must open a budget model 00 to open account strings for each district before budgeting begins.

- Α. Turn on Caps Lock
- Β. Log On: (Budgeting: Log on to subsequent year; Interims: Log on to current year)
- C. Password: (your alphanumeric password)
- D. From the District Systems menu, select 4. Budget Development System
- Ε. From the Budget Development System menu, select 1. Budget Development Module
 - Please see the QSS Budget Development Module Function Key (F Key) Summary in this \geq guide.
 - **Open Budget Model**

F.

- F4 Model Control \geq
- Budget Models (Open model 01 as a blank model and 00 or another for your data) \geq F5

```

- L. Budget Entry
 - Shift, Tab to go back a field (or to enter the correct Budget Model on first entry)
 - Enter the account string to add/modify
 - > Use Tab key to move through fields
 - > Enter key after data is complete
 - Use F6 Line Backward, or F7 Line Forward to view all entries if there are more than five lines of detail for the account string
 - > Descriptions entered in lower screen will print when detail reports are requested
 - > Deleting a data entry error:
 - Enter amount as negative and use "ALT K" to delete remaining data, or Enter "D" for delete in column 2
 - > Multiple entries for the same account string, be sure to enter on next lines to preserve detail
 - Enter payroll lines
 - > Enter each individual by program (calculate FTEs manually)
 - Example: 6 hour/day person into two programs at 45% and 55%
 - 6 divided by 8hrs = 75% employee
 - .75 x 45% = 33.75 FTE to program 1
 - .75 x 55% = 41.25 FTE to program 2
 - Enter 3401/3402s (calculate by program manually)
 - > After all account lines are entered, update the benefits
 - ➢ F3 Next Keys
 - F3 Next Keys
 - F4 Benefit Maps
 - > F3 Recalculate Benefits
- M. Select F7 *Comparative Budget Report*. To use a report format used by COE, select F3 Presets. Select *Meeting Report*, F7 to use this preset. This report can be used to check the data entry, pencil in revenues, Ending Fund Balance, Deferred Revenue. (Caution: Use Budgeted EFB and Deferred or you won't balance in SACS software.)
 - Use this report to compare with current year payroll to note changes that need to be addressed in the Payroll system July 1st or check for errors
 - > Run "Payroll Edit List" out of Payroll reports (shows payroll coding for current year)

- N. Comparisons:
 - Payroll/benefits to calculated payroll
 - Payroll/benefits to most recent current year activity
 - > Determine need to enter negative adjustments for individuals not members of PERS
 - > Enter negative adjustment for PERS Reduction in federal programs
- O. Other Information
 - Add in estimated revenue
 - > Add in as separate detail line for estimated Deferred Revenue
 - Develop list of estimated carryover
 - Review report sorted by Resource
 - Special reserves
 - Use P-2 ending balance as beginning balance
 - Enter revenue and expenditures based on district's intentions
 - Cafeteria Fund Process
 - Budget payroll in Fund 13
 - Estimate transfer out from General to Cafeteria to support salaries
 - Use Fund 13 total salaries, benefits, and other expenses less estimated revenue to calculate transfer.
 - PERS Reduction-eliminate in federal programs
 - Enter detail line as negative adjustment
 - Enter Carryover in budget model using object 9110
 - Print Projection Report (You can't see 9110 in Comp Bud Report)
 - Calculate and enter Encroachment (net to zero)
 - Calculate and enter Indirect Costs (net to zero)
 - Insure transfers in equal transfers out
 - > Account for additions or subtractions from 3801 and 3802 in Object 8092
 - > Account for 3801 and 3802 in Cafeteria, Adult Ed funds, etc., in Fund 01Object 8092
 - Rerun Reports (Projection and Comparative Budget Reports)
 - Audit

Ρ.

- Make corrections as needed
- Extracting Data for State SACS Software
 - > From *District Systems* menu, select **3**. Budget
 - > From *Budge*t menu, select **7. SACS** Export Menu
 - > From SACS Export menu, select 1. Request Export of Budget Data

- Re-Run Technical Review Check List
- Make necessary adjustments in QSS \triangleright
- Re-export/import as necessary
- Print/reprint as necessary
 Finalize Budget Assumptions/Narrative
- Create budget packet

Interim Reports

The QSS accounting system provides a great deal of flexibility that can result in more than one way to request reports or extract information. This information is **general** guidelines only. See the official QSS *Budget Development Manual* for complete information.

- A. Turn on Caps Lock
- B. Log On: (Budgeting: Log on to subsequent year; Interims: Log on to current year)
- C. Password: (your alphanumeric password)
- D. From District Systems menu, select 4. Budget Development
- E. From *Budget Development* menu, select **1. Budget Development Module (BDE000)**
- F. F keys provide the following Budget Development options (see QSS Budget Development Module Function Key (F Key) Summary section):
- G. Complete a QSS budget model with your projected year end budget. Refer to the Budget section for more detailed instructions
 - > Important Options:
 - Model 50: Beginning balances can be copied from Model 50 to include in Interim Models. Balance sheet objects don't show in Comparative Budget reports, but are included in Projection Reports. Copy Model 50, *Objects 9000-9699 only* to prevent 9791 from being doubled. Compare Budget Projection Report to prior year ending balances to verify.
 - P-1 Using Adopted Model: If no budget revisions have been processed, copy the adopted model to preserve the detail entered during budget development. Copy adopted model (Objects 1000-8999 to prevent doubling projected ending balances entered during budget preparation) to a new model, add all Interim changes. If budget revisions have been processed, proceed to P-1 or P-2 Using Working budget (next).
 - P-1 or P-2 Using Working Budget: Copy working budget to a new model and add all Interim changes (drawback is detail entered in the original budget model isn't available). Copying the Working Budget requires a special step needed to prevent benefits from doubling (see below)

District: XX Transfer Selected Budgets to Development Budget QSS/OASIS (Press F2 for expanded help)
Source: W D=Development,W=GL Working,R=GL Revised,A=GL Approved,X=Dev Actuals
Target FY: YY Target Model: XX the ever model you are going to use)
Select accounts? Y
Move account details? Y (Y,N) A = Add, S = Subtract
Transfer accounts if amount is zero? Y (Y,N)
Set dollars in target model to zero? N (Y,N)
If account exists in target model? N A=Erase, S=Erase selected, N=No erase
FTE: <mark>0</mark> 0 = FTE set to zero in target <mark>(0 if copying Working, 1 if copying a Model)</mark>
1 = Preserve FTE in target - FTE of new accounts will be zero
2 = Erase target FTE - Copy FTE values from source to target
3 = Preserve FTE in target - FTE of new accounts added from source
Rounding rule? N ('N'o rounding, 'D' nearest dollar,
'U'p to next dollar, 'T'runcate)
GLDSYS Accounts? 0 (Open/closed/both)

H. Press *Enter*, F7 to continue to next screen

- COE will update your budget

Interim Budget Development Module Function Key (F Key) Summary

F keys provide the following Budget Development options. Budget Development Module F Keys are listed below. See the official QSS *Budget Development Manual* for complete information.

Function Key Hierarchy:

- F1 Report Screen (rarely used)
- F2 Help Screen
- F3 Next Keys: Processes found in the next two levels of F keys:
 - F1 Percent Adjustment
 - ➢ F2 Help
 - ➢ F3 Next Keys
 - •F1 Account Field Mapping Maintenance (Acct Fld MapMaint)
 - •F2 Help
 - •F3 Next Keys (takes you back to the first set)
 - •F4 Benefit Maps
 - •F5 Transfer End Balances to Budget Development (TFR End Bals 2 Dev)
 - •F6 Transfer Beginning Balances to General Ledger (TFR Beg Bals 2 GL)
 - •F7 Blank
 - •F8 Return to Menu
 - F4 Resynchronize Models (Resynch Models)
 - F5 Transfer to Budget Development (TFR to Bud Dev)
 - F6 Transfer to General Ledger (TFR to Gen Ledg)
 - F7 Transfer to Development to Actual (TFR to Dev Actl)
 - F8 Return to Menu
 - ➢ F4 Model Control
 - •F1 Start Over
 - •F2 Help
 - •F3 Blank
 - •F4 Blank
 - •F5 Budget Models
 - •F6 Actual Models
 - •F7 Blank
 - •F8 Return to Menu
 - > F5 Budget/Actuals (enter budget line account strings and amounts)
 - F6 Budget Actions (rarely used)
 - F7 Comparative Budget Report
 - ➢ F8 Return to Menu

Unaudited Actual exports are basically the same as those for Budget or Interim.

- A. Turn on Caps Lock
- B. Log On: (Budgeting: Log on to subsequent year; Interims: Log on to current year)
- C. Password: (your alphanumeric password)
- D. Extracting data for State SACS software
 - > From District Systems menu, select 3. Budget
 - > From Budget menu, select 7. SACS Export Menu
 - > From SACS Export menu, select 2. Request Export of Unaudited Actual Values
 - > Enter the correct sources for the data

Note: Print this screen before selecting F7, to continue, it is what we use to trouble shoot problems.

- Accept all defaults on the next screen
- ► F7 to launch
- Browse to find the SACS20XXALL directory (XX being the year fiscal year just completed, 2003/04 software would be used for the 2004/05 Interims)
- > This file takes several minutes to build
- > Check the print the confirmation out of the print spool that the process is complete

E. From the SACS Export Menu, select 4. Download the export file

- > Change the "N" to a "Y" to replace any previous versions/attempts
- Select F7 to accept
- > Next screen takes you to the files on your hard drive
- > Browse hard drive to locate the directory you want to save the file in
- We recommend browsing to find the SACS20XXALL directory (where the 20XX is the year is the for the unaudited actuals you just finished)

Local File Name			<u>?×</u>

File name: EXXP1INT.EDJ251			
Save as type: All Files (*.*)	•		

- Name the file the same name you entered using menu item 3 Request Export of Interim Values E(district number)P1INT.EDJ251 or E(district number) P2INT.EDJ251 (P1 and P2 reflecting the first or second period interim).
- > Save the file
- F. State SACS Software
 - See the State's SACS Software User Guide and SACS Instruction Manual for complete information
 - Select Edit Preferences
 - Select correct Interim reporting period
 - Select File
 - Import
 - Browse your hard drive to find the file, if you save to the SACSYYYYALL directory, it should be the first one that comes up when you click Browse
 - Check box to:
 - Delete only those forms or
 - Delete all data
 - We typically select Delete all data, see the State's SACS Software User Guide and SACS Instruction Manual for more information
 - > Open Fund 01
 - > Verify against your QSS printouts that you have extracted the correct data
 - > Complete all Funds and Supplementals that apply to your district
 - Run Technical Review Check List
 - Make QSS corrections as needed
 - Re-export/import as necessary
 - See separate GASB 34 instructions for that process
 - Print/reprint as needed

General Ledger Transaction Types

The following table explains the 2-character transaction type codes used on financial reports. Each journal entry, budget transfer, cash deposit, and other such transaction has a 2-character transaction type. For example a cash deposit has a transaction type of **DC**. Thus, DC-900434 is a cash deposit number 900434.

Table of Transaction Type Codes

Туре	Explanation
AA	Accounts Payable . This type represents summarized postings to the G/L that are produced when a district updates the G/L after an Accounts Payable warrant production run. These postings update the control objects for cash and expenses in the G/L.
AB	Approved Budget . This type represents the budget created when you use Transfer Working Budget to Revised/Approved (BGRQST) to roll the working budget into the approved budget at the start of the fiscal year.
AR	Accounts Receivable Received. This type represents receipts against receivables against receivables.
BB	Beginning Balances. This type represents starting balances for a fiscal year set up with Update Beginning Balances (BBUPDT).
BG	Budgets. These transactions represent appropriations and estimated revenues. These transactions come from a variety of sources, such as budgets copied from the Budget Development System into the working budget with Transfer Development Budget to Financial System (BDE006). Other sources are budgets entered directly in the working budget with Working Budget Update (BGUPDT) and General Ledger Detail Maintenance (GLDDET).
BR	Budget Revisions. This type represents budget revisions approved by the governing board. These transactions are created when a district uses Transfer Working Budget to Revised/Approved (BFRQST) to roll from the working budget to the revised budget.
BT	Budget Transfers. These transactions represent adjustments to the budget made with budget transfers after the working budget is approved. You can enter transfers with Budget Transfer Maintenance (BD0002). Also there are two programs for automatic production of budget transfers: Create Budget Transfers from BDEVOL to GLDSYS (BTX110) and Create Budget Transfers from SAL/BEN Projections (PPS710).
В	Conversion. This transaction type is created when accounts are created by a data conversion process that takes financial accounts from another computerized financial system and places that information in the General Ledger database.

Explanation

CCW	CSSF Cancelled Warrants. This type represents cancelled warrants issued from CSSF district. The same transaction type is used for both machine-produced and hand warrants. At many districts, you can tell the difference between the types of warrants by their series numbers.
	CSSF stands for County School Services Fund, which is a clearing fund that a county uses for consolidating liabilities from one or more districts and for disbursing payments.
CHW	CSSF Hand Warrants. This transaction represents hand warrants paid from a CSSF district. A hand warrant is written out by hand or filled out on a typewriter. Later on, the warrant is recorded in the General Ledger database when you use an on-line program to transcribe the information on the warrant into the computerized records. There are two types of hand warrants: Payroll and accounts payable.
CL	Current Liability Payment.
СМ	Credit Memo. This transaction represents a credit memo that reduces the amount of money that a district owes to a vendor. These transactions are created with Credit Memo (CRMEMO).
CN	Conversion. This transaction type represents an entry placed by QSS/Oasis in the General Ledger database by a data conversion.
СТ	Conversion. This transaction type represents an entry placed by QSS/Oasis in the General Ledger database by a data conversion.
CW	Cancelled Warrants. This type represents hand warrants, payroll warrants, or A/P warrants that were issued from a fund other than the CSSF district, then cancelled.
DC	District Cash Receipts. This type represents cash receipts entered with Cash Deposit Maintenance (F102DC). When a district records these receipts, it records only the revenue accounts for credits in the transaction. The program automatically summarizes the cash transactions for the balance sheet account fields and creates the offsetting debits to cash.
EP	Estimated Payables. This type represents Payables from the prior fiscal year that were not created with purchase orders. Non-encumbered transactions (pay vouchers and travel claims) are usually set up and paid in the same fiscal year. When these payments are carried over to the next fiscal year, they become estimated payables. For more information, see the discussion of end-of-year processing for payables in the QSS/OASIS Accounts Payable Manual.
ER	Expected Accounts Receivable.
HW	Hand Warrants. This type represents payroll and A/P hand warrants paid from any district other than the CSSF district. A hand warrant is a warrant that is written out by hand or filled in with a typewriter. Later on, the warrant is recorded in the General Ledger database with an online program.

Туре
Туре	Explanation
JE	Journal Entries. This type represents journal entries created with Journal Maintenance (FI02JE). This transaction allows you to adjust the revenues and expenses for subsidiary accounts. However, you cannot change the cash balance of balance sheet fields in the General Ledger. To adjust cash balances, create a cash transfer (FT transactions) with Cash Transfer Maintenance (F102TF).
LB	Current Liability.
PB	Payroll Benefits. This type represents benefit expenses associated with payroll processing.
PE	Payroll Encumbering. This type represents encumbrances of estimated payroll expenses. At the start of each year, some districts encumber payroll expenses for the entire year, then liquidate the amount of actual payroll expenses each time they issue payroll warrants.
PO	Purchase Orders. This type represents purchase orders encumbered and paid through the QSS/OASIS Accounts Payable System. Encumbrances are created through two programs: Requisition Entry for Pos (PXENCM) and Purchase Order Encumbering (POENCM). After the goods ordered are received, payments to vendors are recorded with Purchase Order Payments (POPYMT). Each PO can have many partial payments. For more information, see the QSS/OASIS Accounts Payable Manual.
РХ	Payroll Benefit. This type represents benefit expenses associated with payroll processing.
PV	Pay Voucher. This type represents a transaction created with Pay Voucher Payments (PVPYMT). A pay voucher represents an expense that is made without first encumbering the budget, as is the case with a purchase order.
PY	Payroll. This type represents payroll expenses posted when a county updates the General Ledger at the end of a payroll run.
RC	Revolving Cash Warrants. This transaction reflects warrants issued to replenish the revolving cash, or petty cash, account. A revolving cash account is a separate checking account for immediate payment of small expenses that are not processed through the standard Accounts Payable processing. For more information, see the QSS/OASIS Accounts Payable Manual.
RQ	Pre-Encumbrances. This type represents purchase requisitions that have not been approved and given a purchase order number. A requisition is a request to purchase goods from a vendor. A requisition becomes a purchase order when it is assigned a PO number. For more information, see the discussion of Requisition Entry for Pos (PXENCM) in the QSS/OASIS Accounts Payable Manual.
RR	Current Year Accounts Receivable Receipts.
RV	Reversal. This type represents a reversal of a cancelled warrant, so that the warrant is reinstated.

Туре	Explanation
RW	Redeemed Warrant. A warrant that is recorded as redeemed, or cashed, with the warra subsystem of the Financial System.
ST	Stores. This type represents transactions for the QSS/OASIS Stores System, which allows a district to keep track of the value of a supplies inventory in a district warehouse. The value of these goods increase when the warehouse receives a shipment. The value decreases when supplies are issued to sites to fulfill stores requisitions. See the Stores Manual for more information.
тс	Travel Claim. This type represents reimbursement of travel expenses paid through the accounts Payable System. These transactions are created with Travel Claims (TCPYMT).
TF	Transfers. This type represents transfers of cash created with Cash Transfer Maintenance (F102TF). This transaction allows you to transfer cash between balance sheet fields, such funds, objects, and resources. If a transaction does not effect the cash balance, use Journal Maintenance (F102JE) to create a journal entry (type JE) to adjust revenues and expenses in the subsidiary accounts.
TW	Tax Warrant. This type represents payments for payroll expenses paid through the Vol-Ded Warrant System. A district can use this system to issue payments for income taxes, retirement, health and welfare benefits, and other such payroll benefit expenses.
XR	Received A/R. This type represents receipts against accounts receivable.
