SITELINE INSWING

GENERAL INFORMATION

DIMENSIONAL DOORS

Siteline Clad Inswing Patio Doors may be specified as "dimensional", by adjusting the desired rough opening width or height in 1/8" increments from standard.

Siteline Clad Inswing Patio Doors are available in single, twin, triple and quad panel doors. The standard size range includes sizes specifically designed for replacement of older patio door models in existing structures, as well as a full range of "true size" products for architectural consistency. Please consult our Quick Quote software for detailed product options and availability. OPERATION

Siteline Clad Inswing Patio Doors are available in a full range of operating styles. Single panel doors may be specified as stationary (non-venting) or can operate left or right. Center swing two-or three-panel doors are available with left or right operation.

ELEVATION NOTES

ELEVATION DRAWINGS UTILIZE A LIMITED NUMBER OF PROJECTED LINES TO PRODUCE A RUDIMENTARY DRAWING INTENDED TO BE USED IN A SMALL GRAPHICAL SCALE. ELEVATIONS ARE VIEWED PERPENDICULAR FROM THE EXTERIOR OF THE STRUCTURE. IF MORE DIMENSIONS ARE NEEDED, USE THE SECTION DRAWINGS FOR MORE COMPLETE DEPICTIONS.

LIGHT CUT INFORMATION

Siteline Clad Inswing Patio Doors are available with full surround removable grilles in 7/8", 1 1/8" and 1 3/8" widths, with grilles between the glass (GBG), or with simulated divided lites (SDL). Standard lite cuts are rectangular, and conform to the layouts noted in the charts on the next page. To use the chart, refer to the appropriate table by the type of patio door and type of bars or grilles the section drawings illustrate. Then simply cross reference the frame height and width to determine the standard lite cut.

LITE CUT OPTIONS

Special lite cut patterns can include a wide variety of straight line and radius patterns. The illustrations shown here represent just a few of the possibilities. Rectangular, horizontal, vertical and prairie lite patterns are available in all standard size clad swinging patio doors. Uneven, diamond, radius and gothic lite cuts are available, subject to approval. Approvals are based on the ability to fulfill the design requirement while maintaining the construction integrity of the finished product.
