# Contents

## Preface xi

## 1

### *An Introduction to Geology 1*

- The Science of Geology 2
- Historical Notes about Geology 2
  - Catastrophism 3
  - The Birth of Modern Geology 3
- Geologic Time 4
- The Nature of Scientific Inquiry 5
  - Collecting Facts 6
  - Hypothesis 6
  - Theory 6
  - Scientific Methods 8
- A View of Earth 8
  - Hydrosphere 9
  - Atmosphere 9
  - Lithosphere 9
  - Biosphere 10
- Dynamic Earth 11
  - Plate Tectonics 11
  - Plate Boundaries 12
    - Divergent Boundaries 12
    - Convergent Boundaries 13
    - Transform Fault Boundaries 13
- Earth as a System: The Rock Cycle 14
  - The Basic Cycle 14
  - Alternative Paths 17
- The Rock Cycle and Plate Tectonics 18

## 2

### *Minerals: Building Blocks of Rocks 23*

- Minerals Versus Rocks 24
- Composition and Structure of Minerals 25
- Atomic Structure 25
  - How Atoms Bond Together 26
  - Covalent Bonds 28
  - Isotopes and Radioactivity 28
- Properties of Minerals 29

## vi

- Crystal Form 29
- Luster 30
- Color 30
- Streak 30
- Hardness 30
- Cleavage 30
- Fracture 31
- Specific Gravity 31
- Other Properties of Minerals 31
- Mineral Groups 32
  - Silicate Structures 32
  - Common Silicate Minerals 34
  - Important Nonsilicate Minerals 37
- Mineral Resources 38

## 3

### *Igneous Rocks 44*

- Crystallization of Magma 45
- Igneous Rock Textures 47
- Igneous Rock Composition 49
  - Bowen's Reaction Series 49
  - Magmatic Differentiation 50
  - Assimilation and Magma Mixing 51
- Naming Igneous Rocks 51
  - Granitic Rocks 53
  - Andesitic Rocks 56
  - Basaltic Rocks 56
  - Pyroclastic Rocks 56
- Mineral Resources and Igneous Processes 57

## 4

### *Volcanoes and Other Igneous Activity 65*

- Anatomy of an Eruption 66
- Not All Volcanoes are Alike 68
- The Nature of Volcanic Eruptions 68
  - Factors Affecting Viscosity 68
  - Importance of Dissolved Gases in Magma 70
- What is Extruded During Eruptions? 70
  - Lava Flows 70

Gases	71
Pyroclastics	71
Volcano Types	72
Shield Volcanoes	72
Cinder Cones	73
Composite Cones	74
Nuée Ardente	75
Lahar	75
Volcanic Landforms	78
Volcanic Pipes and Necks	78
Craters and Calderas	78
Fissure Eruptions and Lava Plateaus	80
Pyroclastic Flows	80
Volcanoes and Climate	80
Intrusive Igneous Activity	82
Intrusive Igneous Bodies	83
Igneous Activity and Plate Tectonics	83
Origin of Magma	83
Distribution of Igneous Activity	86

---

## 5

### *Weathering and Soils* 93

Earth's External Processes	94
Weathering	94
Mechanical Weathering	94
Frost Wedging	96
Unloading	96
Thermal Expansion	97
Biological Activity	97
Chemical Weathering	98
Water and Carbonic Acid	98
How Granite Weathers	98
Weathering of Silicate Minerals	98
Spheroidal Weathering	99
Rates of Weathering	99
Mineral Makeup	99
Climate	100
Soil	100
An Interface in the Earth System	101
What Is Soil?	101
Controls of Soil Formation	102
Parent Material	102
Time	103
Climate	103
Plants and Animals	103
Slope	104
The Soil Profile	104
Soil Types	106
Pedalfer	106
Pedocal	106
Laterite	106

Soil Erosion	108
How Soil Is Eroded	108
Rates of Erosion	108
Sedimentation and Chemical Pollution	109
Weathering Creates Ore Deposits	109
Bauxite	110
Other Deposits	110

---

## 6

### *Sedimentary Rocks* 114

Types of Sedimentary Rocks	115
Detrital Sedimentary Rocks	115
Shale	116
Sandstone	117
Conglomerate and Breccia	119
Chemical Sedimentary Rocks	120
Limestone	120
Dolostone	122
Chert	122
Evaporites	123
Coal	123
Turning Sediment into Sedimentary Rock	124
Classification of Sedimentary Rocks	124
Sedimentary Structures	126
Nonmetallic Mineral Resources From Sedimentary Rocks	129
Energy Resources From Sedimentary Rocks	130
Coal	131
Oil and Natural Gas	132

---

## 7

### *Metamorphic Rocks* 137

Metamorphism	138
Where Does Metamorphism Occur?	138
Agents of Metamorphism	139
Heat as a Metamorphic Agent	139
Pressure as a Metamorphic Agent	140
Chemical Activity as a Metamorphic Agent	140
How Metamorphism Alters Rocks	141
Textural Changes	141
Mineralogical Changes	142
Common Metamorphic Rocks	143
Foliated Rocks	143
Nonfoliated Rocks	145
Environments That Metamorphose Rocks	146
Contact Metamorphism	146
Regional Metamorphism	147
Metamorphism Along Fault Zones	150
Metamorphism and Mineral Resources	150

## 8

***Mass Wasting 155***

- Mass Wasting and Landform Development 156
- Controls and Triggers of Mass Wasting 156
  - The Role of Water 156
  - Oversteepened Slopes 156
  - Vegetation 156
  - Earthquakes as Triggers 158
- Classification of Mass-Wasting Processes 158
  - Type of Material 158
  - Type of Motion 158
  - Rate of Movement 160
- Slump 160
- Rockslide 161
- Mudflow 161
  - Mudflows in Semiarid Regions 162
  - Lahars 163
- Earthflow 163
- Slow Movements 164
  - Creep 164
  - Solifluction 164

## 9

***Running Water 169***

- Earth as a System: The Hydrologic Cycle 170
- Running Water 171
  - Streamflow 172
    - Changes Downstream 173
- Base Level and Graded Streams 175
- Work of Streams 176
  - Erosion 176
  - Transportation 177
  - Deposition 178
- Stream Valleys 180
  - Narrow Valleys 180
  - Wide Valleys 182
- Drainage Basins and Patterns 183
- Stages of Valley Development 184

## 10

***Groundwater 191***

- Importance of Underground Water 192
- Distribution of Underground Water 192
- The Water Table 193
- How Groundwater Moves 195
  - Porosity 196
  - Permeability, Aquitards and Aquifers 196

- Springs 196
- Wells 197
  - Artesian Wells 198
- Environmental Problems of Groundwater 199
  - Groundwater as a Nonrenewable Resource 199
  - Land Subsidence Caused by Groundwater Withdrawal 199
  - Groundwater Contamination 200
- Hot Springs and Geysers 201
- Geothermal Energy 203
- The Geologic Work of Groundwater 204
  - Caverns 204
  - Karst Topography 205

## 11

***Glaciers and Glaciation 210***

- Glaciers: A Part of the Hydrologic Cycle 211
- How Glaciers Move 212
  - Rates of Glacial Movement 212
  - Budget of a Glacier 214
- Glacial Erosion 215
  - Landforms Created by Glacial Erosion 216
    - Glaciated Valleys 216
    - Arêtes and Horns 217
    - Roches Moutonnées 218
- Glacial Deposits 218
  - Types of Glacial Drift 218
  - Moraines, Outwash Plains, and Kettles 220
  - Drumlins, Eskers, and Kames 222
- Glaciers of the Past 223
- Some Indirect Effects of Ice Age Glaciers 223
- Causes of Glaciation 225
  - Plate Tectonics 225
  - Variations in Earth's Orbit 226

## 12

***Deserts and Wind 232***

- Common Misconceptions 233
- Distribution and Causes of Dry Lands 234
  - Low-Latitude Deserts 234
  - Middle-Latitude Deserts 234
- Geologic Processes in Arid Climates 234
  - Weathering 235
    - The Role of Water 236
- Transportation of Sediment by Wind 237
  - Bed Load 237
  - Suspended Load 238
- Wind Erosion 238

- Deflation, Blowouts, and Desert Pavement 239
- Wind Abrasion 240
- Wind Deposits 240
  - Sand Deposits 240
  - Types of Sand Dunes 241
  - Loess Deposits 243
- Basin and Range: The Evolution of a Desert Landscape 244

## 13

---

### *Shorelines 249*

- Waves 250
  - How Waves Form 251
  - How Waves Move 251
- Wave Erosion 252
- Wave Refraction 253
- Moving Sand Along the Beach 254
- Shoreline Features 255
  - Wave-Cut Cliffs and Platforms 255
  - Arches, Stacks, Spits, and Bars 255
  - Barrier Islands 256
  - The Evolving Shore 257
- Shoreline Erosion Problems 257
  - Groins 258
  - Breakwaters and Seawalls 259
  - Beach Nourishment 260
  - Contrasting the Atlantic and Pacific Coasts 260
- Emergent and Submergent Coasts 261
- Tides 261
  - Causes of Tides 263
  - Spring and Neap Tides 265

## 14

---

### *The Ocean Floor 269*

- The Vast World Ocean 270
- Earth Beneath the Sea 271
- Continental Margins 272
  - Continental Shelf 272
  - Continental Slope and Rise 273
- Submarine Canyons and Turbidity Currents 273
- The Ocean Basin Floor 276
  - Deep-Ocean Trenches 277
  - Abyssal Plains 277
  - Seamounts 279
- Mid-Ocean Ridges 279
- Coral Reefs and Atolls 280
- Seafloor Sediments 281
  - Terrigenous Sediment 282

- Biogenous Sediment 282
- Hydrogenous Sediment 283

## 15

---

### *Earthquakes and Earth's Interior 287*

- What Is an Earthquake? 289
  - Earthquakes and Faults 289
  - Elastic Rebound 291
  - Foreshocks and Aftershocks 292
  - Tectonic Forces and Earthquakes 293
- Earthquake Waves 293
- Finding Earthquake Epicenters 296
- Earthquake Intensity and Magnitude 298
- Destruction from Earthquakes 299
  - Destruction from Seismic Vibrations 300
  - Tsunami 301
  - Landslides and Ground Subsidence 302
  - Fire 303
- Can Earthquakes Be Predicted? 303
  - Short-Range Predictions 304
  - Long-Range Predictions 304
- Earthquakes Reveal Earth's Interior 306
  - Discovering Earth's Structure 306
  - Discovering Earth's Composition 307

## 16

---

### *Plate Tectonics 313*

- Continental Drift: An Idea Before Its Time 315
  - Evidence: The Continental Jigsaw Puzzle 315
  - Evidence: Fossils Match Across the Seas 315
  - Evidence: Rock Types and Structures Match 317
  - Evidence: Ancient Climates 317
- The Great Debate 318
- Plate Tectonics: A Modern Version of an Old Idea 319
- Plate Boundaries 322
  - Divergent Boundaries 322
  - Convergent Boundaries 326
  - Transform Boundaries 329
- Testing the Plate Tectonics Model 330
  - Evidence: Paleomagnetism 330
  - Evidence: Earthquake Patterns 334
  - Evidence: Ocean Drilling 334
  - Evidence: Hot Spots 335
- Pangaea: Before and After 336
  - Breakup of Pangaea 336

- Before Pangaea 337
- The Driving Mechanism 339
  - Convection Current Hypothesis 339
  - Slab-Push and Slab-Pull Hypotheses 340
  - Hot Plumes Hypothesis 340

---

## 17

---

### *Mountain Building* 345

- Crustal Uplift 346
  - Isostasy 347
  - Isostatic Adjustment 347
- Rock Deformation 348
  - Folds 349
  - Faults and Joints 350
- Mountain Types 353
  - Fault-Block Mountains 354
  - Upwarped Mountains 356
  - Folded Mountains 356
- Mountain Building 356
  - Mountain Building at Convergent Boundaries 358
  - Mountain Building and Continental Accretion 362

---

## 18

---

### *Geologic Time* 369

- Relative Dating—Key Principles 370
  - Law of Superposition 371
  - Principle of Original Horizontality 371
  - Principle of Cross-Cutting Relationships 371
  - Inclusions 373
  - Unconformities 373
  - Using Relative Dating Principles 374
- Correlation of Rock Layers 375
- Fossils: Evidence of Past Life 375
  - Types of Fossils 375
  - Conditions Favoring Preservation 379
  - Fossils and Correlation 379
- Absolute Dating with Radioactivity 380
  - Radioactivity 380
  - Half-Life 382
  - Radiometric Dating 382
  - Carbon-14 Dating 384
  - Importance of Radiometric Dating 385
- The Geologic Time Scale 385
- Difficulties in Dating the Geologic Time Scale 387

---

## 19

---

### *Earth History: A Brief Summary* 393

- Origin of Earth 394
- Earth's Atmosphere Evolves 396
- Precambrian Time: Vast and Enigmatic 396
  - Precambrian Rocks 397
  - Precambrian Fossils 398
- Paleozoic Era: Life Explodes 398
  - Early Paleozoic History 401
  - Early Paleozoic Life 401
  - Late Paleozoic History 402
  - Late Paleozoic Life 403
- Mesozoic Era: Age of the Dinosaurs 405
  - Mesozoic History 405
  - Mesozoic Life 407
- Cenozoic Era: Age of Mammals 409
  - Cenozoic North America 410
  - Cenozoic Life 412

### *Appendix A*

- Metric and English Units Compared* 421

### *Appendix B*

- Periodic Table of the Elements* 423

### *Appendix C*

- Mineral Identification Key* 424

### *Appendix D*

- Topographic Maps* 427

### *Glossary* 434

### *Index* 446
