SCOPE OF THE CONTEST

Knowledge Performance

A written knowledge test will be required. A sound knowledge of geometry, algebra, trigonometry and basic statistics will prepare the students to exhibit their problem-solving skills for this part of the contest.

Skill Performance

There is no skill performance component of this contest.

Contest Guidelines

1. The written knowledge test comprises 50 problems applicable to any career and technical field. It covers applications of the fundamental operations of whole numbers, fractions and decimals, including applications of percentages, ratio and proportion, averages, areas and volumes.
2. The written knowledge test will provide the student the opportunity to demonstrate his or her problem-solving skills, not just mathematical ability.
3. Students have two hours to complete the problems and check their answers.
4. Hand-held calculators may be used. Competitors need nothing more than a simple scientific calculator that can be purchased for about \$10–\$15. A graphing calculator is not necessary. The test is based on real-world mathematical applications and reasoning — not theoretical mathematics.
5. No bonus will be given for early completion of the written knowledge test.

Standards and Competencies RTM 1.0 — SkillsUSA Framework

For more, visit: www.skillsusa.org/about/skillsusa-framework/.

The remaining standards and competencies for this contest will be completed by the national technical committee in the next edition of the Technical Standards. In the meantime, visit: <http://updates.skillsusa.org/> for updates.
