# Solenoid/pneumatic valves, Tiger Classic

#### Key features

#### General

- Very sturdy poppet valve concept for all 3/2 and 5/2-way valves
- Pneumatic or electrical actuation with F solenoid coil
- With flow rates of up to 7500 l/min
- Pipe thread in sizes G1/8, G1/4, G1/2 and G3/4
- Tried-and-tested mounting using hollow bolt on PAL or PRS rail
- Optimised response times with patented U-ring and servo control

#### Solenoid coils

F solenoid coils

#### Voltage:

- 12 to 230 V DC
- 12 to 240 V AC (50 to 60 Hz)

Power consumption:

- 4.1 to 5.5 W DC
- 3.85 to 9 VA AC
- Selected types conform to the ATEX directive for potentially explosive atmospheres
- Solenoid coil can be easily exchanged later
- Solenoid coil not included in scope of delivery

#### Variants

VL/0-3-...

Depending on selected connections: Normally closed or normally open MFH-3-..., MOFH-3-...

• MFH-3-... Normally closed

MOFH-3-...

Normally open

These valves can be converted from one function to the other by rotating the seal under the cover.

#### MFH-3-...-S

This valve type can be used within a range of 0 to 8 bar and also as MOFH (through flow when not actuated) with a separate pilot line.

#### MFH-5-...-S

The external pilot air connection means that these valves can also be used with low operating pressures.

### Key features

#### Manifold assembly

With PAL manifold rail

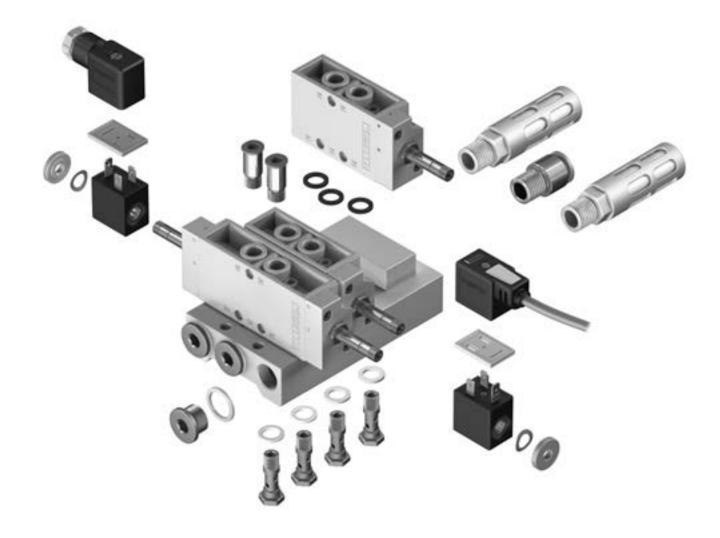

The Tiger Classic valves can be mounted on manifold rails PAL with common supply port or on manifold blocks PRS with common supply port and common exhausts. The valves are mounted on the rails and blocks with hollow bolts. The manifold rail and manifold block have 2 to 6 valve positions.

Vacant positions can be sealed on manifold rails PAL with cap nuts, or with cover plates on manifold blocks PRS.

A separate pressure level can be supplied to individual valves via hollow bolts with threaded connection.
