With six print heads capable of high quality 600 dpi, this printer can easily meet your addressing needs.

- » Print up to 39,000 DL envelopes /hour
- » Monochrome Printer

SOFTWARE SOLUTIONS

FlexMail Address Management

FlexMail lets you connect to your data, design any mail piece, merge/purge and de-duplicate files, make changes to a mailing list, clean and validate the address and sort mailings to meet postal requirements.

Flexmail greatly enhances and streamlines your address printing process.

DMS POSTman Address Validation

Designed specifically with the needs of small businesses in mind, POSTman is an easy to use solution that saves valuable time spent sending and processing returned mail and ultimately reduces the cost of your postage. POSTman accurately validates records and appends Australia Post-approved barcodes from its built in database of over 12 million addresses.

Neopost IM-16 Letter Opener

The Neopost IM-16 letter opener can operate at speeds of up to 300 letters per minute, so opened mail is delivered faster. Easy to use and ultra reliable, it can handle mixed mail without pre-sorting, and opens a wide range of envelope sizes. Its efficiency gives your staff more time to concentrate on more productive work.

» Open up to 300 envelopes /min

OPEX-2112 Letter Opener

For medium-sized mail processing operations. The Model 2112 offers proven technology for both offices and small mail-opening centres. This tabletop unit provides mail room automation for low volumes of incoming mail, and it is equipped with the same milling cutter technology as the higher speed Model 306.

» Open up to 400 envelopes /min

OPEX Model 306 Letter Opener

Equipped with Opex's unique high-speed milling cutter technology, the model 306 offers durable performance for small mail-opening operations. Opex's unique milling cutter produces a soft, feathered edge, providing content security. The Model 306 is ideal for mixed sizes of mail including large letters, as well as, oversized and thicker than normal envelopes.

» Open up to 670 envelopes /min

OPEX Falcon™ Mail Document Scanner

The all-new Falcon™ combines Opex's innovative one step drop feed scanning with the performance of a high-capacity production scanner, providing the only universal document scanning workstation on the market. Regardless of your document scanning needs, the Falcon is designed to meet the most difficult and daunting workflow challenges.

» Scan up to 110 pages /minute

OPEX M-72 Rapid Extraction Desk

Offering speed, efficiency and automatic adjustments to handle a variety of intermixed mail. The advanced design of the Opex Model 72 provides high-precision control for semi-automatic mail extraction, including fine adjustment settings for accurate cutting. Advanced ergonomic features include workstation hydraulics to adjust the work surface height, convenient desktop, customized soft configurations and easy accessibility.

» Extract up to 60 mail pieces /min

OPEX FalconRED™ Mail Extraction & Scanner

The OPEX FalconRED™ can scan mail as soon as it is opened - in a single pass. Engineered as a high-speed colour scanner with a unique drop feeder integrated into an Opex Rapid Extraction Desk. By combining mail extraction with image capture it is no longer necessary to route paper outside of the mail room to be processed. In just one step the OPEX FalconRED™ operator can open, extract, identify, scan, orient, sort, print an audit trail and output mail contents.

» Open & Scan up to 110 pages /minute

OMS-200

BY NEOPOST

Neopost OMS-200

Output Management Software

Get the best from your Folder & Inserter with this flexible web-based solution. Neopost's OMS-200 Output Management Software simplifies and automates the document creation process. Barcodes or OMR marks are added easily to your documents through an intuitive interface to ensure your documents reach their intended recipients. The same technology directs the system to collate, fold, insert and seal your communications using Neopost's wide range Folding & Inserting machines.

OMS-500

BY NEOPOST

Neopost OMS-500

Multichannel Communications Software

Today, large organizations and small and medium-sized businesses operate under competitive and economic pressure to improve customer experience while cutting costs and increasing efficiency. Neopost's OMS-500 enables you to face these challenges.

Whether you have a centralized production center or many distribution facilities, the OMS-500 gives you complete control over your customer communications processes. Create enriched, personalized and secure documents and deliver them to the right person, at the right time, through their preferred channel.

PSI: CAPTURE

PSI: Capture Enterprise

Advanced Document Capture & Management Software

Document Capture and Scanning is a challenge in any organization. With an array of scanning devices, capture needs and backend content management systems, it is ineffective to settle for multiple applications to accomplish one goal.

PSI: Capture provides a single capture platform that can meet all the needs of an organization: document scanning and import, forms processing, data capture, OCR/ICR, data extraction and the ability to migrate the information into a document repository. PSICapture advanced capture system enhances the capabilities of any scanning device, providing a powerful onramp to any Enterprise Content Management (ECM) or Document Management Systems (DMS).

FileBound Workflow

Document & Workflow Automation Software

FileBound is a cloud-native, end-to-end application that manages workflow throughout enterprises of all sizes. By focusing on the needs of today's knowledge worker, FileBound delivers document and workflow automation that is easy to implement, configure, use and modify. FileBound's automation capabilities increase productivity, shorten cycle times, improve compliance and control critical corporate content.

FileBound's secure content repository centralises documents and metadata from nearly any source and has all the components necessary to build a complete automation solution at a single cost.

SHIPPING SOLUTIONS

From shipment booking to the retrieval of proof of delivery over the internet, through parcel tracking, management of returns, online archiving of shipping documents and transportation monitoring.

Our Service Promise

At Neopost, we believe that our customers deserve more than just a great piece of equipment. That's why when you choose to work with Neopost you partner with a company that prides itself on customer service and attitude to customer support. No matter what solution you choose from Neopost, we guarantee that it will come with an exceptional level of service and support.

You see, we believe that if you are a happy customer, you're a loyal customer. We know that offering you the best service in the business is good for business. We know that our success depends on keeping you satisfied. That's why we're committed to providing you with an outstanding level of service each and every time.

This is how we guarantee to deliver on our promise to you:

Nationwide Account Managers

Wherever you are in Australia, we have an experienced, knowledgeable and professional account manager that will help you find the products and solutions that are perfect for your business.

Local Service Engineers

Partner with Neopost and get access to a team of expert service technicians located throughout Australia, with the skills, attitude and experience needed to ensure you get the most from your machine. When your service request requires more than a phone call, one of our expert technicians can be with you quickly to make sure your Neopost machine is running smoothly.

Regular Opening Hours

Our helpdesk is here when you need us. You can speak to a member of the team quickly, anytime from Monday to Friday, 8:00am - 5:30pm AEST.

Our Payment Solutions Offer

We arrange Payment Solutions for many private and public organisations that span SME to global enterprise, across a broad spectrum of industries. Our experience and capacity extends from solutions costing from as little as \$1,000 up to large intricate projects that involve Neopost's world class mailing, printing, presentation & software solutions.

The majority of Neopost customers choose Neopost Payment Solutions rather than purchasing equipment for many reasons:

Cash Flow

Neopost Payment Solutions allow you to invest in the latest technology with no cash outlay requirement.

Convenience & Speed

Minimal paperwork, simple processes and flexible repayment options. We tailor programs to suit our customers quickly and easily, and most of the time a program is approved and implemented the same day.

Full Service Solutions

When you use Neopost Payment Solutions all costs are included within the program. Service & maintenance, training, installation & delivery charges are all included in the standard program.

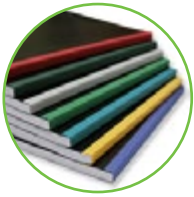

Tax & Accounting Benefits

Neopost Finance runs its programs on a rental (or operating lease) platform which ensures that all payments are 100% tax deductible providing the technology is used for business purposes. Payments are fixed and normally appear as an expense on the profit & loss statement only therefore no balance sheet depreciation of the equipment is required.

Equipment Life Cycle & Technology Management

All industries demand ongoing technology improvements. Neopost Payment Solutions are designed to allow for regular technology reviews in order to reduce obsolescence thus future proofing equipment investment in your business.

Fastback Innovative

Choose from three different strip widths to bind any document quickly and effectively. Strips are available in black, white, dark blue, purple, maroon, red and dark green; in narrow, medium and wide.

Capacity: 300+ sheets

CombBind Resilient & Affordable

Our most conventional and affordable binding option in a 20 and 21 ring format. The spine lets pages lie flat, and you can easily make edits. CombBind spines are available in black, white, clear, blue and red; in diameters from 6mm to 51mm.

Capacity: 400+ sheets

SpiralCoil Flexible & Stylish

For a professional appearance, this is your spine. SpiralCoil keeps its shape with bounce-back flexibility. The spine lets pages lie flat for 360° rotation. Coil spines are available in black, white, clear, navy and silver; in diameters from 6mm to 33mm.

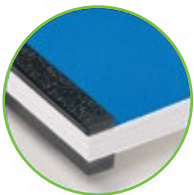

Capacity: 275 sheets

WireBind Contemporary Look

This high-tech spine takes any presentation to the next level. It lets pages lie flat for 360° rotation. Wire bound spines are available in black, white, blue, red, bronze and silver; in diameters from 6.3mm to 32mm.

Capacity: 210 sheets

SureBind Sleek & Secure

Get a smooth, book-like finish with this binding option. Lock in place, and great for filing, stacking and mailing. SureBind spines are available in black, white, navy and burgundy; in diameters from 25mm to 75mm.

Capacity: 750 sheets

Opus Metal Channel Customised Presentation

An innovation in hard cover binding, Opus Metal Channel is a secure and fast binding solution. Suitable for a wide variety of applications, including increasingly popular photobooks. Hardcover books can be customised with hot foil stamping. Metal Channels are available in black, navy, blue and red; in portrait and landscape formats.

Capacity: 300 sheets

*Maximum sheet capacity based on 80gsm and largest binding diameter available.

Fastback 20 Multi-Purpose Thermal Binding

The Fastback 20 is the ideal binding machine for anyone needing a full-featured solution in medium to large quantities. This multi-purpose machine handles tape binding, perfect binding and hard cover book binding. Binds up to 350 sheets in less than 20 secs.

Fastback 9 Compact Thermal Binding

The versatile Fastback 9 is the most compact and affordable binding machine in its class. A powerful machine despite its size, producing finished documents from 10 to 250 sheets. User-friendly interface makes choosing the correct strip settings fast and easy.

CW-4500

Dual Comb & Wire Binder

A powerful, multi-functional dual electric punch and bind system for the complete solution of both plastic comb and twin loop wire. User-friendly edge guide for adjusting the paper format easily. Manual punch, CW-350 also available.

WR-2500

Dual 2:1 & 3:1 Wire Binder

Practical and user-friendly interface, with electrical power. Equipped with two blades for both 2:1 and 3:1 twin loop wire punching. Individual system for punch and bind allows operating separately. Manual punch, WR-200 also available.

Surebind System 1/2

Strip Binding

The ultimate desktop strip binding system, with the ability to bind documents up to 500 sheets. Available in System 1 and System 2 (pictured) models; to suit various requirements of volume and thickness. Edge guides ensure accurate paper alignment. Utilises patented binding strip technology for secure binding.

ATLAS 300

Metal Bind & Foil System

An innovation in hard cover binding and hot foil stamping, specifically designed for the creation of personalised photobooks. Unique Metalbind binding and Goldcover hot stamping system in one, for stylish presentation. Securely bind A5, A4 & A3 books up to 300 pages and foil stamp the book's hardcover.

Opus Easy 120 binder

Channel Binder

The Opus Easy 120 binder is fantastic compact metal binder suitable for small runs of binding documents with a number of Pages (up 120 sheet).

Using the Opus easy 120 Binder takes 10 seconds and can take a variety of binding types; Fully padded cover, Traditional binding (bottom cardboard, PVC top) etc.

Duplo UP-240

Desktop Banding Machine

Bundle finished pieces such as business cards, postcards, and brochures with the UP-240 Desktop Banding Machine. The UP-240 wraps a strip of craft paper or film around the bundle, providing the same security, but at a lower cost, than a box or bag. Capable of banding up to 24 bundles per minute. Max. banding size of 240mm x 180mm (WxH).

BINDING MACHINES

GBC Magnapunch 2.0 Heavy Duty Punch

The higher capacity Magnapunch 2.0 sets the standard in electric binding; featuring revolutionary edge detection technology, eliminating mis-punches. Interchangeable die sets for different punch patterns simply slide in and automatically lock into place.

GBC MP2500ix Interchangeable Die Punch

The GBC MP2500ix is designed for those needing high volume punching with ease of use. Never has there been a punch as versatile as the MP2500ix. Simply slide the die sets in place - no tools or locking levers are required.

GBC PB2600

Plastic Comb Closer

The PB2600 electric comb closer is easy to operate with either the dual foot pedal or table-top button to activate the binding process. User-friendly adjustable binding knob and LED display help to easily set-up your system for each binding job.

GBC TL2900

Twin-Loop Wire Closer

Twin-loop binding has never been easier. The TL2900 presents a revolutionary design, with hassle-free operation. Twin-loop wire bound documents lie completely flat when opened, and pages wrap all the way around for easy handling.

GBC CC2700

Spiral Coil Closer

Produce attractive spiral bound documents with this versatile production system. With its exclusive "Spine Former", adjustable roller knobs and all metal construction, the CC2700 ensures quick, easy and reliable binding.

Duplo

Duplo DBM-150

Perfect Binding Machine

The DBM-150 is the world's smallest fully automatic bookletmaker and trimmer. Equipped with Duplo's superior engineering within a compact footprint. It can produce finish documents either sheet by sheet or set by set. The DBM-150 is designed to meet the challenges of today's offset and digital printer. Duplo has bundled the features of the big bookletmakers into this uniquely compact system.

The DBM-150 can finish wide range of applications. It can handle sheet sizes from 120mm x 210mm to 320mm x 460mm and paper weights from 64gsm to 300gsm.

NeoLam 1500 Desktop Pouch Laminator

Sleek and modern, designed for reliability and ease of use. This hot & cold laminator is capable of laminating up to A3 sheet size and features a 4-roller system, which provides a consistent, even speed to ensure high quality lamination. Includes visual and audible indicators.

NeoLam 3256 Desktop Pouch Laminator

User-friendly and efficient A3 pouch laminator. This 6-roller machine can operate at a speed of up to 1,460mm/minute, and can handle pouch thickness of up to 350mic. Minimal footprint and efficient warm-up time of less than 5 minutes.

GBC Catena 35 Roll Laminator

The Catena 35 roll laminator has been designed to give you the flexibility to laminate, encapsulate and mount; using a variety of hot and pressure sensitive (cold) lamination film. Features pre-set laminating functions with manual override. The perfect finish for your full colour digital output. Maximum laminating width: 330mm.

GBC Docuseal 3100 Roll Laminator

Low cost, high performance hot shoe roll laminator up to 800mm wide. Ideal for laminating posters, drawings, charts, graphs, educational material, plans, pamphlets and signs. Simple to operate, featuring silicon rollers for easy clean up and durability. Easy replacement of film using pre-slotted film shaft.

GBC 3500/4500 Pro Desktop Pouch Laminator

Transform simple pieces into special presentations with the GBC 3500/4500 laminators. The GBC 3500 laminates up to A3, while the GBC 4500 will laminate documents up to A2 size. Features adjustable speed and temperature control for bubble-free lamination.

Laminating Film Supplies

Neopost supplies a variety of lamination films ranging from laminating pouches in various sizes up to A3, roll laminates, large format hot & cold laminating films, as well as, celloglazing films.

EBA

EBA 4300M Desktop Guillotine

Extremely safe, manual desktop office guillotine with 430mm cutting length and 20mm cutting height. Hinged, transparent safety guard on the front table. Fast flick action clamp provides optimal clamp pressure. Side lay, lockable back gauge and measuring scale (mm/inches).

EBA 4305M Manual Guillotine

Solid all-metal construction, blade from high quality steel. 430mm cutting length for formats up to A3, and 435mm insertion depth. Backgauge and side lays allow for precise alignment of the paper stack for exact cutting. Safety guard locks in position while cutting.

EBA 5255 Electric Guillotine

Convenient & powerful cutting with electro-mechanical blade and clamp drive. Designed with an emphasis on safety and ergonomic use for effortless and fatigue-free operation. Optical cutting line with bright and durable LEDs for accurate cuts.

PC-360
Manual Creaser

The PC-360 is easy to operate and maintain, making it an ideal component in the binding process. Features durable steel upper and lower creasing moulds, that do not require replacement as often as rubber moulds. Maximum creasing width of 360mm, and paper thickness of 450gsm.

Duplo DF-980
Desktop Paper Folder

The fastest and quietest table-top folding solution in the market today, with a top speed of 260 sheets per minute. User-friendliness is key with functions like automatic plate setting to ensure fast setup and consistent folding accuracy. The efficiency and productivity of the DF-980 results in huge time and cost savings.

Max EH-70F
Electronic Stapler

Heavy duty electronic stapler provides flat clinch stapling of 2 to 70 sheets without changing the staple. Features a super quiet motor and a high capacity staple cartridge allowing you to staple up to 5,000 times without reloading. Flat clinch stapling allows papers to stack neatly & evenly.

Duplo

Duplo DC-616
Multifinisher

The DC-616 provides the short-run on-demand digital printer, multi-function finishing in one compact, easy to use solution. It cuts, creases and perforates printed sheets, producing finished applications in a single pass.

The DC-616 has been designed for higher return on investment by saving the costs of additional machines by reducing production times.

GD9630	A3	160 Pages

Duplo Duprinters High Speed Duplicators

Duplo offer the most cost-effective print duplicating method available today. Combining the convenience and simplicity of a copier, with the economy and versatility of offset printing. Users benefit from the age old 'economies of scale' principle. Put simply, as the copy run increases, the cost-per-copy rapidly decreases. Featured ink saving mode allows a cartridge to last a great deal longer whilst maintaining high quality prints - further reducing cost-per-copy. Ideal solution offering economy, versatility and productivity to spot colour printing. Typical applications: business stationery, forms, flyers etc.
