RE: NR-0469-S-113-S

Dear Tomas;

The FDA has classified the selectSeed I-125 as an IIL product (with product code KXK). Therefore, to meet UDI (Unique Device Identifier) compliance, the labelling is required to be modified slightly. To explain the changes, please see attached the new label template specification for the *selectSeed Shipment/Sales Box label (150158-02)*. Additionally, attached is the *Explanation of Symbols on Product Labels (777.00487 MAN)* that will be included in the selectSeed package to explain to the user the meaning of the UDI symbols.

Based on these changes, please amend the Sealed Source and Device Registry, NR-0469-S-113-S, with the updated labels as per the attached document *selectSeed labels with UDI implementation*.

The UDI implementation date for IIL products is October 24, 2015. Elekta appreciate the NRC's efforts to help achieve this goal.

Should you have any further questions or need additional information, please feel free to contact the undersigned at 770-670-2518 or via email at debra.bensen@elekta.com.

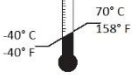

Sincerely,

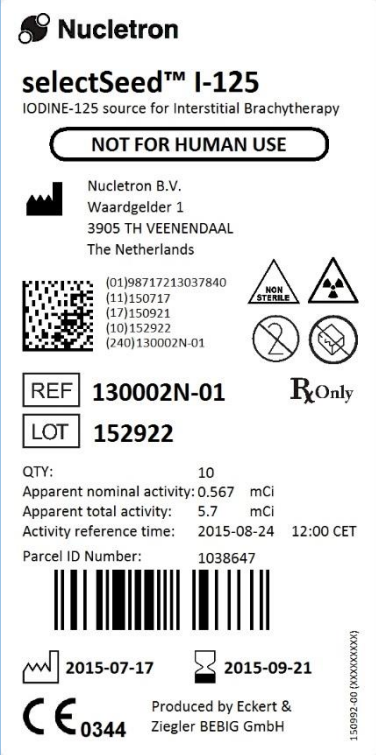

A handwritten signature in cursive script that reads "Debra L. Bensen".

English

On Elekta product labels the GS1 DataMatrix is introduced. This symbol represents the Unique Device Identification (UDI). It includes the unique product identification number (also known as Global Trade Item Number or GTIN). Depending on the product, other product data might be included. The use of the symbol and related product data is in compliance with the latest regulations (e.g. UDI rules issued by US FDA). See below an example:

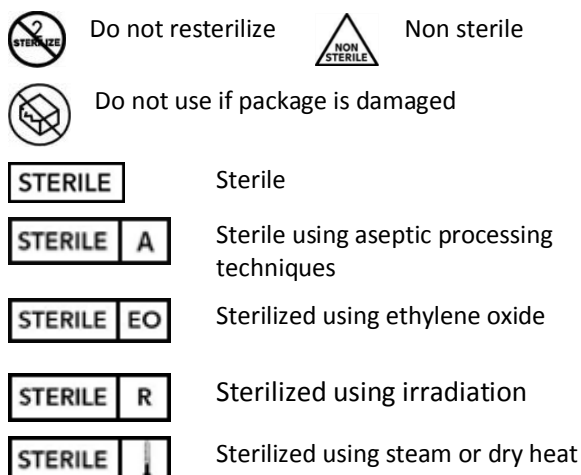

The following GS1 Application Identifiers (AI's) might be used:

- (01) - GTIN (Global Trade Item Number)
- (10) – Batch or Lot number
- (11) – Production date
- (17) - Use by (or Expiration) date
- (21) – Serial Number
- (240) – Add. item identification (e.g. technical part no.)
