

SPECIAL SECTION: AAA 2022 + HearTECH Expo

Meet us in St Louis! The American Academy of Audiology (AAA) 2020 Convention + HearTECH Expo will be held in St Louis on March 30-April 2, 2022. As the first in-person AAA convention in two years due to the pandemic, this year's convention returns to featuring all the excellent events AAA has become widely known for: great featured sessions, grand rounds, and educational seminars; engaging receptions, the honors dinner, and Foundation Happy Hour, as well as a Friday night event at the Anheuser Busch Biergarten; and many opportunities to network with old friends and colleagues, as well as to meet new important contacts for furthering your professional journey. You can also visit the new HearTECH Expo where you can meet up with industry representatives, partake in featured education, and enjoy fun activities.

Below is an abbreviated schedule taken from the AAA website in mid-February, followed by just a few of the new products and services being featured in the HearTECH Expo at the America's Center convention hall (Halls 3-5). Please note that the events, times, and venues may change, so be sure to check the updated schedule on the AAA website (www.audiology.org) and final program prior to making your plans. Some special events require advanced registration and/or an extra fee (\$). A full list of exhibitors is provided on page 53.

WEDNESDAY, MARCH 30

7 am-7:30 pm	Registration Open
8am-5 pm	Academy Research Conference (ARC): Age-Related Hearing and Balance Decline (\$) , Refreshment Breaks Sponsored by Phonak
8:30 am-12 pm:	Learning Labs (\$)

Blueprint
Solutions

CapTel

(800) 233-9130

<https://www.captel.com>

Help catch every word over the phone with a CapTel® captioned telephone! CapTel shows captions of every word the caller says over the phone. All CapTel phones feature a large easy-to-read display and a built-in answering machine that shows captions of your messages. CapTel offers several telephone models to choose from to fit your lifestyle. Help is available 24/7 at the touch of a button. Individuals with hearing loss may qualify for a no-cost CapTel phone based on certification from their hearing healthcare professional.

Cochlear Americas

Booth #509 (See us at the Cycle Booth)

(800) 523-5798

www.cochlear.us/THR or contact CPN@cochlear.com

Are you looking to expand and differentiate your practice? Implementing cochlear implants into your practice can not only benefit your patients, but it can also benefit your business. The Cochlear Provider Network (CPN) enables independent dispensing audiology/ENT practices to expand their services to include cochlear implants and become part of a medical network that helps people with hearing loss achieve optimal outcomes.

Cochlear
Hear now. And always

CaptionCall

Booth #621

(877) 557-2227

<https://captioncall.com/>

Communicate easier with advanced call captioning at no cost to people with hearing loss who need captions to use the phone. CaptionCall phones are optimized for individuals with hearing loss. The unit uses voice-to-text technology, assisted by captioning agents, and automated speech recognition, to transcribe your conversation so that other speakers' words appear on your CaptionCall screen. To get the no-cost CaptionCall phone and service for yourself, a patient, or loved one, just reach out to your local Account Manager. Visit us at <https://captioncall.com>, or call 877-557-2227.

Earlens

Booth #1800

(650) 366-9000

www.earlens.com

Unlike traditional hearing aids that just make sounds louder through a speaker, Earlens offers the world's only nonsurgical lens to gently vibrate the eardrum. The ear tip transmits high-fidelity audio signals directly to the lens, gently vibrating the eardrum across the full frequency range. The result? Rich, natural sound.

Hamilton CapTel

Booth #701

(800) 826-7111

<https://hamiltoncaptel.com>

Life-Changing Solutions. Since 2003, Hamilton® CapTel® has made more than 250 million captioned telephone conversations possible for people with hearing loss – connecting them with family, friends, and hearing healthcare professionals like you. Visit us at AAA 2022 to learn more about the solutions we offer:

- Hamilton® CapTel® Captioned Telephones
- Hamilton® Mobile CapTel® for iOS and Android™
- Hamilton CapTel for Business, Interconnected by Tenacity™

See how Hamilton CapTel can help keep your patients connected with what matters most in their lives.

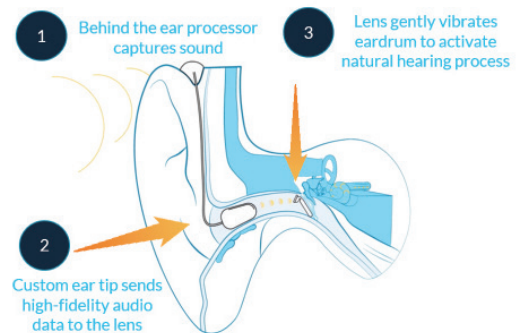

Interacoustics

Booth #515

(800) 947-6334

www.interacoustics.com/us

Interacoustics is the global leader in hearing instruments and vestibular solutions. Our devices are made future-proof, with flexible modules allowing you to purchase what you need now and upgrade later. We will be showcasing our Affinity Compact complete fitting system, the Eclipse (AEP, ASSR, VEMP & OAE) with mobile cart, and our Titan for pressurized OAEs and WBT. Take a try on our new TRV (BPPV) treatment chair or our Orion Rotary Chair with Micromedical by Interacoustics VisualEyes™ 525 VNG software. Also offered are in-booth Quick Solutions CEU courses, plus we have a cell phone charging station. Stop by for show specials!

Maico

Booth 815

(888) 941-4201

www.maico-diagnostics.com/us

MAICO Diagnostics celebrates 85 years as a leading manufacturer in hearing instruments. Our new MA 42 diagnostic 2-channel, air-bone-speech audiometer and our touchTym series feature icon-based technology, plus offer easy data transfer with MAICO Sessions software. Save time and money with these intuitive devices. On display at AAA + HearTech Booth #815. Show specials: Save \$200 on purchase of these devices. Offers expire 4/30/22.

Simply Reliable. Since 1937.

Lantos

(781) 443-7633

<https://www.lantostechnologies.com>

Lantos Technologies relaunched in 2021 with an industry-experienced leadership team. The Lantos 3D Ear Scanning System is the first and only ear scanning technology developed at MIT and is FDA 510(k) cleared. The patent-protected, membrane-based technology provides a safe and hygienic patient experience, while capturing the most precise digital image of the geometry of the ear. The proprietary system collects and stitches together over 1 million data points, enabling the creation of a variety of custom earpieces.

DELIVER THE EXPERIENCE PATIENTS PREFER

WITH THE NEW LANTOS EAR SCANNING SYSTEM

- EASY SUBSCRIPTION-BASED MODEL WITH NO EQUIPMENT COST
- IMPROVE PATIENT EXPERIENCE & INCREASE PROFITABILITY

MedRx

Booth #909

(888) 392-1234

www.medrx-diagnostics.com

MedRx Diagnostics is a US-based global manufacturer and developer of PC-based diagnostic and hearing instrument fitting technologies, specifically designed for the hearing care professional. At AAA 2022, MedRx will offer in-person demonstrations of bestselling products including the A2D+ Audiometer and Video Otoscope, as well as essentials for Best Practices such as the REM Speech+ and Hearing Instrument Test box. You can also stop by the MedRx booth to test out the MedRx Kiosk Hearing Screener or try the app-powered VRA system with NAL technology. Ask our Sales Executives about exclusive AAA Specials!

NanoClean

(888) 749-0550

<https://www.nanocleanglobal.com>

NanoClean® fine-instrument cleaners optimize the performance of hearing aids and other fine instruments by clearing away wax, debris, and moisture. NanoClean's patented technology features a stiff threader attached to a soft, spongy nylon yarn that safely and effectively sweeps away debris and absorbs moisture. A unique "thread-and-pull" cleaning action gets the job done quickly and easily. NanoClean's soft construction won't scratch or harm delicate hearing aids or other fine-instrument components.

Oticon

Booth #1601

(800) 526-3921

www.Oticon.com

Expanding the Potential of Polaris™ Platform: Oticon expands the potential of Polaris with two new miniBTE solutions to give hearing care professionals the ability to meet the diverse needs and preferences of more patients with the superior sound quality of Oticon More™. New Oticon Zircon brings the power of Polaris and the open sound experience to the essential hearing aid category for the first time. New Oticon Play PX is another first—the first pediatric hearing aid with an on-board Deep Neural Network that learned the way children learn, through experience. Oticon More, Zircon, and Play PX now support hands-free communication using select iPhone or iPad devices.*

*Hands-free communication is available with iPhone 11 or later running iOS 15.2 or later, and iPad running iOS 15.2 or later. See compatible devices at oticon.com/support/compatibility.

Redux

Booth #1820

844-Redux-It

<https://redux.com>

Redux is a professional in-office drying system to proactively treat and prevent moisture damage to hearing aids and implants. Redux provides complete drying in about 8 minutes with real-time verification of the moisture amount removed. Hearing care providers report removing moisture from 98% of treatments and improving function in 77% of aids. Adding Redux to a practice expands services provided, generates revenue, saves time, and improves the patient experience.

The best hearing requires a lens.

Differentiate your practice by offering your patients with hearing loss:

25x more complete sound than acoustic hearing aids

32% improvement in speech understanding in noise compared to conventional hearing aids

76x closer to normal hearing in the high frequencies

Tiny Lens. Huge Difference.

Unlike acoustic hearing aids which do not deliver sound directly to the ear, EarLens is a tiny lens that sits on the ear canal and focuses sound directly into the ear canal. This allows sound to be heard more clearly and more completely. EarLens is a tiny lens that sits on the ear canal and focuses sound directly into the ear canal. This allows sound to be heard more clearly and more completely. EarLens is a tiny lens that sits on the ear canal and focuses sound directly into the ear canal. This allows sound to be heard more clearly and more completely.
