COVID-19: Answers to FAQs for Kentucky's Schools and Districts

- Last updated Aug. 31, with 953 questions answered
- Will be converted into one FAQ document

2	Note: Responses provided herein are based on the best information available to the Kentucky Department of Education, Kentucky Board of Education and Commissioner of Education when published and do not constitute medical or legal advice. Responses are subject to change and are for general information purposes only. If you are seeking medical advice, please see https://govstatus.egov.com/kycovid19 and consult with a medical professional. If you are seeking legal advice, please consult with an attorney.				
3	What question(s) do you have about COVID-19? How can we help you?	KDE staff response	Available link for districts to use?	Date updated	
4	The word "recommendation" needs to be "order" and sent from the governor or KDE.	It has been a source of pride that education decisions have taken place through governor's recommendations, which are based on the best medical expertise Kentucky has. This practice recognizes local control. The Kentucky School Boards Association (KSBA) will hold a virtual meeting for local board members to explain the decision. Districts whichdo not follow the governor's recommendation will be asked to participate in a conference call to discuss concerns. Possible actions for defying the recommendation are the use of executive order by the governor, the Kentucky Department for Public Health's (DPH) authority to close buildings during a public health emergency, the Kentucky Board of Education's (KBE) authority to pass emergency regulations if they believe		8/31/2020

Overview of KDE Guidance Issued for Reopening Schools

In response to the COVID-19 crisis, KDE has been committed to providing guidance and solutions that focus on educating and feeding our children and providing support to our districts.

*Since May 15, we have been releasing **weekly** guidance documents to all of our superintendents and districts regarding reopening schools for the 2020-2021 year.*

We also created this "KDE Reopening Guidance" tab on our COVID-19 website, where you can find all of the guidance and our weekly Special Superintendents' Webcasts, which we have been holding since March.

KRS 158.160

CABINET FOR HEALTH AND FAMILY SERVICES

Department for Public Health

Division of Epidemiology and Health Planning

(New Emergency Administrative Regulation)

902 KAR 2:220E. School notification standards related to COVID-19.

RELATES TO: KRS 158.160, 214.010, 214.020

STATUTORY AUTHORITY: KRS 158.160(1), 194A.050(1), 211.025, 211.180(1)(e), 214.020

NECESSITY, FUNCTION, AND CONFORMITY: KRS 158.160(1) authorizes the Cabinet for Health and Family Services to promulgate an administrative regulation to define medical conditions that threaten the safety of students or others in a school setting. KRS 211.180(1)(e) authorizes the cabinet to formulate, promote, establish, and execute policies, plans, and comprehensive programs relating to all matters of public health, including the protection and improvement of the health of infants, preschool, and school-age children. This administrative regulation establishes the school notification standards for reporting students and staff diagnosed with Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) (the virus that causes COVID-19).

Section 1. Definitions. (1) “Instructional style” means the primary method of learning utilized by the school and includes in-person only, virtual only, or a hybrid of in-person and virtual.

(2) “Reported COVID-19 positive” means the school has received a report from:

CHFS KENTUCKY Cabinet for Health and Family Services

Kentucky Public Health
Prevent. Promote. Protect.

Pursuant to state law and regulation, parents and guardians are required to notify a student's school within 24 hours if the student tests positive for COVID-19. Each school will determine its own reporting process.
In turn, all public and private K-12 schools must report this data to inform communities as they make decisions during the pandemic. Schools must make good-faith determinations and there will be uncertainties outside their control.
Schools are only required to report persons quarantined due to exposure that has occurred through school related activities, including extracurricular and athletic activities.

Schools report this data Monday through Friday for every day their school is in session whether in-person, virtually, or hybrid in-person/virtually.
Due to varying lengths of quarantine periods, this data is likely to over-estimate the actual number of persons in quarantine, particularly for longer periods of time.

The Kentucky Department for Public Health (KDPH) also reports information here as compiled by epidemiologists communicating with schools; this data takes longer to collect and will differ from this dashboard report.

Kentucky Public Health
Prevent. Promote. Protect.

Positive cases of the novel coronavirus associated with schools are reported every week day by the schools to local health departments. Local health departments provide the collected information to the Kentucky Department for Public Health. The case numbers on the school public health report are being posted as quickly as possible after notification of cases is received. These cases may still be in the verification process at the state level. Therefore, the numbers may vary from local and other reported numbers and are subject to revision as the verification process is completed. This information is being provided out of transparency and as quickly as possible. The school self-reporting survey is pending and will be released in the
