## Core Values

### Building 360° Trust

Demonstrating care, honesty, fairness with all stakeholders

### Living TEAM Global - Global Teams

Working together for success without compromising the unique strength of each business unit

### Being People Pioneers

Supporting, developing and inspiring our people to succeed both personally and professionally

### Delivering Innovation, Quality and Service

Always delivering to the highest standard and going beyond stakeholder expectations

# Welcome

---

Rigfit Offshore Ltd has built its reputation by providing innovative managed solutions to organisations around the world.

We believe in working with our clients to provide the services that best suit their business needs. To do this we create a close working relationship to give our clients the full benefit of our resources and experience – an approach which allows them to focus on the key areas of their business.

Rigfit Offshore Ltd was established in March 2002 and has since carried out a wide variety of projects worldwide, from the supply of living quarters bespoke furniture to complete rig accommodation refurbishment and new build accommodation modules.

In August 2005 the company expanded and Rigfit International LLC (Dubai) was formed. With the formation of our Dubai branch we now have a very large pool of personnel which we can take either from the UK or UAE to carry out projects. This gives us the capacity to undertake

projects of all sizes at reasonably short notice.

In June 2009 our companies joined forces with the Global Energy Group and now benefits from the synergies of the group's business units and corporate support.

We have a steel fabrication capability in Dubai, where we carry out the majority of modular accommodation construction. Our fabrication and outfitting methods are continually changing to keep pace with industry developments and client requirements

At Rigfit Offshore we employ an across-the-board coverage of personnel – surveyors, engineers, architects, project management and all trade required for the projects we undertake. This enables us to carry out all scope of works in-house, from initial inquiries to contract completion.

Managing Director

# What we do

---

We have worked extensively on drilling rigs, production platforms, FPSOs and ships. Our workforce is one of the most experienced in the specialist niche industry.

Rigfit complies with all levels of international maritime regulations, including SOLAS, USCG, NORSOK and DCR, in conjunction with classification authorities such as DNV, Lloyds and ABS.

---

Rigfit has worked on accommodation projects in the UK and in countries throughout the world, including:

- Norway
  - Holland
  - the Faeroe Islands
  - the Canary Islands
  - Equatorial Guinea
  - the United States
  - Thailand
  - Cameroon
  - Nigeria
  - Angola
  - Ghana
  - Namibia
  - Dubai
  - Malta
  - Italy
-

# Services

---

Every year we deal with hundreds of projects ranging from single cabin and public area refurbishments to full accommodation renovations and new build accommodation modules.

We are confident there is no project, large or small, in any part of the world that we could not undertake.

---

Our skilled tradesmen include:

- HVAC engineers/fitters
  - piping engineers/fitters
  - architectural outfitters
  - insulators and ladders
  - electricians
  - plumbers
  - welders
  - painters
  - joiners
- 

# Engineering

---

As a backbone to the company Rigfit Offshore have many years of experience in the Oil & Gas and Marine industries.

From initial site surveying and analysis of pre-existing designs, to draughting, modeling, and final installation, our range of engineering services include but are not limited to:

- outline and detailed design engineering
- preparation of tender packages
- multi-disciplined engineering
- structural global analysis
- structural calculations
- project management
- procurement and installation
- conditional reports
- feasibility study
- offshore survey
- commissioning

Through our technical network and professional staff, we meet our clients' needs wherever they are, worldwide.

Our extensive client list includes:

- Universal Sodexo Catering

  - Pride International
  - Thai Nippon Steel
  - Aramark Catering
  - Diamond Drilling
  - British Petroleum
  - Dolphin Drilling
  - Amerada Hess
  - Noble Drilling
  - Atlantic Marine Offshore Services
  - Lamprell Shiyard
  - KCA Deutag
  - Transocean
  - Hess EG
  - Petrofac
  - Apache
  - Total
  - Shell
-

# Modules

---

With a full-time workforce of more than 50, Rigfit is in a position to carry out large orders on tight schedules as is often required in the offshore industry.

## Experience

Rigfit completed a 32-man accommodation unit which was sited on the roof of a major drilling contractor's North Sea operating semi-submersible with a stair link module allowing direct access to the existing accommodation below.

The unit was mounted entirely on anti-vibration mounts as the emergency generator room was directly below part of the module. The accommodation unit was built to the highest specifications as per HSE and ABS regulations and fully A60 rated.

We carry out a wide range of marine and offshore accommodation contracts from single room upgrade/ refurbishment to the supply and installation of all architectural outfitting materials of a new-build rig.

---

### Delivered services include:

- new build modular and monolithic
- maintenance, upgrade and refurbishment
- door maintenance
- classified and zoned modules – cabins, offices, freezers/cold rooms, workshops etc
- asbestos removal and containment
- accommodation duct cleaning
- in-house cabinet making facilities, providing low or high quantity bespoke fire-retardant furniture for marine and offshore use

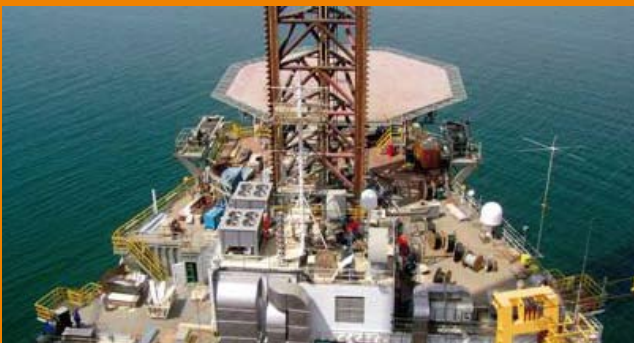

# Case study: Thule Power

---

Rigfit were contracted by QGM to carry out new build works on the rig Thule Power, a jack-up drilling unit capable of operating in water depths of up to 250ft and drilling depths up to 30,000ft.

On this contract Rigfit specified supplied/manufactured and fitted all materials required to carry out the scope of works including all insulation, floor screeds, floor coverings, wall cladding, ceilings, lighting, electrical cable supplies, new galley equipment, new mess hall furniture, wet units, doors, windows and custom made furniture for cabins and offices.

All procurement for this contract was done from our Dubai office, and all works were carried out while the rig was in for a rebuild at the Dubai quay side.

## Case study:

### Scope of works

- Waste piping
- A60 pins and insulation, B15 liner and partition panels
- Marine deck screed and vinyl/tiled floor coverings
- Internal and external doors & windows
- Single and shared wet units
- B15 ceiling system
- Galley & Mess Hall and all equipment and furniture
- F.R Grade custom made furniture for all cabins and general areas
- Passageways and stairwells

# Case study: Ocean Guardian

---

Rigfit was contracted directly by Diamond Offshore to carry out upgrade works on the Ocean Guardian.

On this contract Rigfit specified, supplied and fitted all materials required to carry out the scope of works including all floor screeds, floor coverings, wall cladding, ceilings, lighting and all furniture.

All of these works were carried out when the rig was in Invergordon bay.

The Ocean Guardian is an Earl & Wright Sedco 713 Series semi-submersible drilling unit capable of operating in water depths of up to 1,500ft.

## Case study:

### Scope of works

- New bond upgrade
- Smoking TV lounge upgrade
- Recreation room/Quiet room upgrade
- Locker room upgrade

# Case study: Hess Sendje Ceiba

---

Rigfit was contracted directly by Hess EG to carry out upgrade works on the Hess Sendje Ceiba Floating Production, Storage and Offloading vessel (FPSO).

On this contract Rigfit specified, supplied and fitted all materials required to carry out the scope of works, including all insulation, floor screeds, floor coverings, wall cladding, ceilings, lighting, electrical cable supplies. All furniture was designed and manufactured by our highly skilled cabinet makers.

The materials for this were supplied from both Aberdeen and Dubai offices. Also on this contract we had our own specialist team that carried out asbestos removal/containment and cleaning of all accommodation ductwork.

## Case study

### Scope of works

- West and east mess hall upgrade
- Sick bay upgrade
- Level 5 bridge upgrade
- Stairwell upgrade
- Passageways upgrade
- Engine room upgrade
- New laundry
- Convert old laundry to new construction office
- Total strip out and refurbishment of 24 man ALQ

# HSEQ Commitment

---

Rigfit and the Global Energy Group are committed to creating and maintaining a safe environment in all operations we are involved in.

Through dedicated HSEQ management we have developed highly effective, proactive health, safety, environmental and quality systems and practices.

These systems incorporate all aspects of HSEQ as well as competency and training and are based on the requirements of ISO 9001 and the UK Health and Safety Executive HS (G) guidelines for effective safety management and environmental standards.

#### **About the Global Energy Group**

The Global Energy Group is a leading service company supporting the international energy industry.

Working with major clients across the subsea, offshore, downstream, power generation, utilities and renewables sectors, our principal activities include inspecting, upgrading, maintaining, constructing and fabricating capital assets.

We also specialise in resource management, supply-chain solutions, vendor inspection, and construction and maintenance work for alternative industry sectors.

Our business is geared towards clients who value quality, time and delivery as key drivers of cost efficiency. Whether delivering new assets, or returning existing ones to production these factors are always central to our work.

Our proven track record of consistent delivery, even in the most challenging circumstances, clearly demonstrates the added value of our approach to every project, across the sectors we work in.
