

PERFECTION

SIGSAUER

Sports Catalog

Values. Progress.

From the very beginning, the combination of precision and speed when shooting has held a particular fascination. The establishment of J. P. Sauer & Sohn in 1751 marked a new era of target accuracy and marksmanship, when Johann Paul Sauer and his son Paul laid the foundation for manufacturing long gun and handgun technology in Germany. Today the gun factory meets the demanding needs of shooters throughout Europe and around the world with two distinct product lines: SAUER pistols and SAUER long guns. Sport and competition shooters appreciate the uncompromising performance of SIG SAUER sport guns, and security forces worldwide put their trust in SIG SAUER pistols and SAUER precision rifles.

Striking Tradition.

The act of shooting is the most dramatic proof that intuition is our driving force. When complemented with a strong focus and body control, it enables us to achieve peak performance. Modern pistol design plays upon this instinctive ability and features the latest advances in technology. The result is a valued piece of sports equipment. When using SIG SAUER pistols, ambitious marksmen shoot with confidence, backed by excellent know-how, patented technology, an international reputation and more than 250 years of experience.

No Compromise.

Success in competition clearly substantiates the performance of premium pistols. This in turn inspires us to set new targets. Our engineers work closely with experienced competition shooters to further develop promising concepts and innovative technology. SIG SAUER product manager

Ralf Vanicek is also a PPC world champion, and has the advantage of being skilled and knowledgeable in both competitions and production processes. The SIG SAUER shooting range is continually used to test how modifications in pistol design affect shooting behaviour and comfort.

World-renowned top shooters – Heribert Bettermann, Max Wiegand, Joachim von der Tann, Tino Schmidt, Marijan Loch and Andreas Köhler – are active members of the IPSC team and constantly contribute their experience to the future development of successful sport guns. They have won innumerable national and international titles as a team and in individual competitions. The team has been the reigning German Champion in the Production Class from 2001 to 2008.

Torben Rundqvist, Thomas Klix and Ralf Vanicek are members of the SIG SAUER PPC Team. Ranked among the best of world-class PPC marksmen, these multiple international and national record holders have been German, Swedish and World Champions in various disciplines of the PPC 1500.

High Standards.

We love guns just as you do. It is our passion. To ensure we never give away our patents and innovations, every part of the process – from construction to barrel manufacturing and finish – is done exclusively at J. P. Sauer & Sohn. This ensures premium quality. While we appreciate tradition, we prefer to uphold it through action.

SIG SAUER Worldwide.

The United States is SIG SAUER's most important market abroad. Since 1985, we have supplied this market through SIG SAUER Inc. in Exeter, New Hampshire. Sauer & Sohn supplies an additional 100 countries around the world through a reliable distributor network.

Concentration. In Balance.

Total concentration never misses the target. At SIG SAUER, concentration translates to precision. All pistols are ergonomically perfect, provide excellent weight distribution, and feature an extended slide with a 6-inch barrel. Your finger on the trigger represents the center of balance. Trigger stop, trigger pull weight and trigger distance are individually adjustable. Such outstanding trigger characteristics maximize target results in all disciplines.

Features:

- Extended slide for 6-inch barrel
- Completely adjustable trigger system, including adjustable trigger weight, trigger stop, and trigger distance
- Ergonomic frame with beaver tail
- Ergonomic wooden grip plates with integrated jet funnel
- Extended frame
- Manual safety on both sides
- Low integrated adjustable sport sights

P 220 X-SIX

Technical Data

Caliber: .45 ACP
 Sight base: 219 mm
 Barrel length: 153 mm
 Barrel diameter: 15 mm
 Rifling: 400 mm
 Number of grooves: 6
 Measurements (LxHxW): 252x146x43 mm
 Weight incl. magazine: 1,240 g
 Trigger pull weight (approx.): SA 1.0 -1.6 kp
 Magazine capacity: 8

A precision wonder among high-end premium pistols. The P 226 X-SIX features a perfect ergonomic design, ideal weight distribution, an extended slide with a 6-inch barrel, and excellent trigger characteristics. Now available with an aluminium frame.

Features:

- Extended slide for 6-inch-barrel
- Extended frame
- Manual safety on both sides
- Adjustable trigger pull weight
- Adjustable trigger distance
- Adjustable trigger stop
- Short trigger path
- Wide curved beaver tail
- Jet funnel
- Cross grooves on front of the frame and trigger
- Magazine extension made of light metal
- Low integrated adjustable sport sights
- Cross grooves on front of the frame
- Undercut front sight
- NILL wooden grip plates

Two Disciplines. Unlimited Precision.

The 9 mm Para Conversion Kit is now available to all ambitious marksmen who want to use the potential of their P 220 X-SIX to the fullest. The result: shooting two disciplines with just one pistol.

Features:

- Stainless steel slide
- Adjustable target sights

Scope of Delivery:

- Conversion kit
- Locking insert
- Two magazines
- Plastic case

9 mm Para Conversion Kit

NEW

Performance, high precision accuracy and safety are the key characteristics of the X-SIX AL. This innovative model with aluminium frames is the exact replica of the solid steel version but features only a fraction of the weight. Replacing solid steel by aluminium has also a favourable effect on the price. This lightweight aluminium frame pistol features an attractive two-toned design and has a sporty visual appeal.

Features:

- Like the P226 X-SIX with Picatinny rail and aluminium frame

X-FIVE

P 226 X-FIVE

Excellence. In Action.

To exceed expectations requires skill, sportsmanship and excellent equipment. The IPSC (International Practical Shooting Confederation) sets the standard for dynamic shooting and makes particular demands on precision, force and speed. The best pistols for this challenging sport feature a perfect trigger system for quick shooting sequences, and a sufficient weight to ensure a safe grip and optimum control in any shooting position. SIG SAUER pistols embody these characteristics and deliver a sophisticated performance.

Marksmen who demand top performance from themselves also expect the same from their equipment. The P 226 X-Five consistently meets the high expectations of the most ambitious IPSC marksmen. Now available with an aluminium frame.

Features:

- Extended slide for 5-inch-barrel
- Extended frame
- Manual safety on both sides
- Adjustable trigger pull weight
- Adjustable trigger distance
- Adjustable trigger stop
- Short trigger path
- Wide curved beaver tail
- Jet funnel
- Cross grooves on front of the frame and trigger
- Magazine extension made of light metal
- Low integrated adjustable sport sights
- Cross grooves on front of the frame

Magazine capacity: 17

Maximum Performance. Minimum Costs.

The brand new .22 LR conversion kit for the P 220, P 226, P 228 / 229 and P 228 / 229 SO is now available to all ambitious SIG SAUER marksmen who want to use the potential of their pistol to the fullest.

The result: you benefit from the familiar firearm in conjunction with your favourite small bore ammunition.

Conversion is straightforward and can be done without any adjustments. Each of the four conversion kits features an aluminium slide and thus fits every SIG SAUER pistol. The distinctive, high-contrast target sights allow for quick and precise aiming.

Features:

- Hard-coat anodized aluminium slide
- Adjustable target sights in combat style
- Compatible with standard, match and high-velocity ammunition

Scope of delivery:

- Conversion kit with one magazine and plastic case

Small bore at its best: the successful SIG SAUER pistols P 220, P 226 and the P 228 / 229 are now also available as complete pistols in caliber .22 LR.

Features:

- Hard-coat anodized aluminium slide
- Adjustable target sights in combat style
- Compatible with standard, match and high-velocity ammunition

Training. With Endurance.

A thousands rounds in practice shooting do not have to leave a hole in your wallet: With the SIG SAUER MOSQUITO, the new rimfire sports pistol from Sauer & Sohn. The MOSQUITO is 10% smaller than its role model, the SIG SAUER P 226, yet offers 100% of its function and accuracy. The rugged blowback system, fixed barrel and superior grip ensure top accuracy and allow the shooter to hit the target spot on.

Features:

- Decocking lever
- Automatic drop safety
- Manual safety
- Magazine safety
- Integrated lock for completely blocking the pistol
- Wear-resistant polymeric frame
- Integrated Picatinny rail
- Adjustable sights
- Rugged blowback system
- Superior ergonomic grip
- Threaded barrel (MOSQUITO SD)

Options:

- Point-Sight
- Bridge mount (see page 24)
- Silencer (for MOSQUITO SD)

Strength. Skill. Full Size.

When the going gets tough, reliability is crucial. But when it comes to service pistols, it is indispensable. SIG SAUER service weapons meet the diverse requirements of the professional and sporting sectors as well as personal defense. Features and functionality vary, and models range from full size to compact firearms for concealed carrying. What they all have in common is safety, easy handling and immediate firing readiness.

SIG SAUER full size service pistols combine outstanding shooting performance with innovative safety concepts. They equip the consummate professional with a perfect symbiosis of precision, firing power and rugged, reliable operation.

The P220-1 laid the foundation for the legendary classic SIG SAUER series, which is built to meet the most extreme demands. Over 100,000 times tried and tested as a service pistol, it performs safely under any condition.

Features:

- Caliber .45 ACP for maximum stopping effect
- Grip plates available in wood or plastic
- Full steel version available
- Perfect for competition shooting in service pistol disciplines
- Picatinny rail for attachment of laser/light modules
- DAO- and DAK trigger available

SIG SAUER Defense Concept

The basis for numerous innovations:

- The unique Defense Concept makes sure the pistol is in any case uncocked and completely safe
- Trigger pull weight is always constant
- Optimized DAO trigger system

Features:

- Exchangeable grip modules for optimum adaption to all hand sizes
- All parts are consistently optimized for demanding use
- Can be stripped down without any tools
- Hidden hammer
- Integrated Picatinny rail
- SIG SAUER drop and shooting safety
- Completely ambidextrous handling

The P 250 was developed in accordance with the German "Technical Guidelines for Pistols".

P 229

Technical Data

Master your Skill. Your Way.

Be unique. Take advantage of Sauer & Sohn's experience in top-class shooting sports and passion for technology. Let our experts create a masterpiece just for you. Individual creation is our most valuable skill. Our dedication to perfection is legendary, and our Mastershop takes it one step further. The pistols created here are fully customised to suit the needs and personality of their owner in terms of quality, precision and performance. Thanks to the most elaborate craftsmanship, a one-of-a-kind pistol is born. Distinctive and extraordinary modifications are made to the trigger, sights, barrel weights, grip plates, compensators and finish to create a top class, state-of-the-art, eye-catching firearm. One that is in a league of its own.

Superior. Under Pressure.

When ultimate precision is vital, there is no room for compromise. Innovative technology and high-quality manufacturing optimise functional safety and control. The possibilities for adjustment are as individual as the marksmen. Equipment is extensible by the wide selection of SIG SAUER accessories.

when it counts

SSG 3000

We have raised the bar for precision and functionality with the SSG 3000. Highlights include swift barrel interchange, an integral scope mount, match barrel with muzzle brake, an indestructible synthetic stock and an adjustable cheek piece. The highly accurate bolt thread and 60° bolt-opening angle ensure a swift and quiet repeating process.
