

SPRING LAKE SIMMENTALS

The Zimmers

BULL SALE

Wednesday March 4, 2020
Camrose Regional Exhibition
Camrose, AB *Sale Time 1:00 PM*

A new year and a new decade have arrived and with it brings great excitement and anticipation for a few changes for Spring Lake Simmentals. In the last decade, our family and farm have done some growing and to accommodate we felt it important for our bull sale to grow with it. With that, we are excited to welcome you to our first Spring Lake Simmentals Bull Sale. We will always look back with fond memories of the past 24 years with Maxwells and the last few years with the Ranciers in the Herd Master Bull Sale. We wish them all the best in the future.

That leads us to our present day. Our cow herd has grown to approximately 280-300 breeding females. Because of this we will be bringing you a top quality set of bull calves from the first one in the ring to the last. The bulls are raised on a SHUR GAIN TMR ration and go through a regiment of herd health shots designed to protect and enhance the longevity of the bulls. We continually strive to not only bring you bulls from sires that are tested and true, but new genetics through our bull purchases and AI sires that we feel will produce the type of cattle that we like.

Our goal is to raise the soft made, easy doing type of animal with calving ease for all age cows while maintaining the performance that the Simmental breed is well known for. We don't want to sell you just one good bull, we want to keep you coming back for many years because you like the type of bulls that we produce and have been happy with them and their calves.

We look forward to meeting new people but also want to thank our past customers for their support and confidence in our bulls and our program. Moving forward, we are excited to continue these same great relationships. We hope to see you at the sale, but also please know that you are welcome to stop in at the farm anytime. Good luck with calving.

Thanks,

Doug and Larene, Eric and Cristin and family

Spring Lake Simmental Bull Sale

Wednesday **MAR. 4, 2020 at 1:00 PM** Camrose, Alberta

Join us the night before the sale for bull viewing and refreshments.

On sale day join us for a complimentary lunch at 11:30 AM

From us at Transcon Livestock we congratulate the Zimmer Families of Spring Lake Simmentals on this bold but exciting venture to move on with their own bull sale. The cowherd numbers combined with the increasing quality over the last decade or more makes it very possible to create this many good bulls and host a stand alone event. We invite you to this event, on their behalf, and thank the Zimmers for the opportunity to work with them on this new marketing plan. We have a long standing quality relationship with this family and sincerely look forward to working closer than we ever have before.

We have admired from afar the results that breeders have had from their Spring Lake herdsires in recent years. We have viewed their bull pen, particularly Glenn Norton, for years now and have seen an obvious level of quality increase. To go back to the point, the quality in visually admiring the Spring Lake bulls has bred true to form for the many customers, registered and commercial alike. This program seems to have injected as much genetic quality heterosis into it as any and is ready to pass it on!

As you peruse the catalog, you will appreciate the strong sire groups immediately, as the catalog format is laid out in an order to show these strong fraternities. The red Simmental bulls presented are as strong as anywhere in the nation. Sysco, Sedona, 1st Edition, Easton and the influence of the great Rendezvous Farms herdsire, "Mandako" is noticeable through direct sons or grandsons! They have intentionally included, and bred into, this high quality sector, a deep, dark red colour and thick, wavy haircoats. This is a serious set of bulls!

The Fullblood bulls are ALL BROTHERS and feature the lone sire group of "Dempsey"! This bull has bred well, offers a strong consistent colour pattern in his sons with good, thick, beefy bulls in polled & horned options.

The black bulls are very uniform, but have a real standout contender within this colour group who comes complete with the "money stripe"! This guy is very, very thick topped with a big ole wide, square hip on him. I don't know how you could get more hair on one either, if you know, please let me know! Bonus in the pedigree, he's a "Mandako" grandson!

Join us for the Spring Lake Simmentals Bull Sale, the Zimmer's are ready to be your hosts. They welcome bull pen tours anytime prior to Mar. 1, following which the bulls will be in town for viewing. Please call any of our cell phones for any appraisals you may wish to have prior to your arrival on sale day. You may also call on us to assist with any absentee bidding/buying needs you may have.

For the Zimmers,

Oakley 64G is a son of MRL Sysco 14D and one that we really like. He will be a contender to lead off one of the most powerful sire group of bulls that we have ever offered. Smooth and deep in his makeup yet as stout as any in our offering while maintaining a sharp and stylish profile. We absolutely love the dam of this bull as she was sired by Black Canyon, who was Westways high selling bull in 2014, and out of a Buckeye female that we raised and who has already put several bull calves at the front of our sale. I believe that you will have to make a lot of miles to come across another bull with this guys potential.

Big ribbed, heavy quartered, easy doing herd-sire prospect out of the MRL Sysco bull that we are really happy with because of his consistency to produce the right kind, whether they be bulls or females. They are not the biggest bulls in the pen but they will darn sure catch your eye with their balance, eye appeal, and dark red color.

This homo polled calf might be of the most structurally sound bulls on offer. 21G is as dark red as we can make them, his hair coat is what I dream of having myself. He has exceptional length, spring of rib and moves like a cat. His mother is a fancy, attractive Big Time cow with a great udder and perfect feet under her. Last year her bull calf was one of our best to sell.

84G is another very good homozygous polled son of Sysco that shows excellent potential to become an above average herd sire. These bull calves, like their sire, are just plain beefy and sound. Look over all the calves in this sire group and you can't help but see what I mean. He is an excellent calving sire that produces moderate size cattle with exceptional performance. 84G's mother is a Wheatland Red Earth female with an absolutely perfect udder. If you buy this bull and you plan to keep replacement females then keep his.

Ryker 168G is another true herd sire in the making that is deep ribbed, wide topped and soft made. Add in his blood red color, thick hair coat and a really nice profile that will insure this bull to have many friends on sale day. His sire, MRL Sysco, doesn't only make the right kind of beef bull calves but his females are second to none. The open Sysco heifer that we sold last year to Maxwells and was our high seller was only one of many of his females that are just plain good. 168G's mother is a black cow that raised our high selling black bull 3 years ago to the Archers in Wetaskiwin.

Here's another powerhouse Sedona son who's heavy quartered, wide topped and moves around the pen as smooth as it gets. He's an easy doing, soft made bull that is sure to pass these traits along to his own calves. His mother is a heavy milking, bigger framed cow that has quite a few daughters working in our herd alongside her.

We can't make them more red than this. This homo polled Sedona son will be in the feature pen come sale day. You have to get behind him to really appreciate the thickness and top he brings. He's square in his hip, deep in his quarter and profiles really well. Phoenix was consistently the pick of the pasture for anyone that toured this summer however due to one short ear he didn't come when called upon...not sure what my kids excuses are.

This is a real top end performance oriented son of Sedona. He is big bodied, travels well and has lots of extension throughout. This homo polled tank weaned off at 1010 lbs which also has a lot to do with his mother being one of our best red cows who consistently weans off some of the heaviest calves year after year. Look for this guy to be early in the sale order.

We also bred Ranger to some mature cows to see how he would perform on them. He has not disappointed as on some of those bigger cows we saw a little bigger birth weight calves and more performance. 31G weaned off of his mother at 975 pounds. Not bad coming from a calving ease sire. Mind you his mother is no slouch either. Be sure to find him on sale day.

158G's Warden sired mother is one of the really strong cows in the herd. She is a nice uddered, pear shaped cow that has tons of volume and is colored the same as this bull calf. Great bulls are backed by great cows. If you're looking for a bull to give you a pen full of thick, stylish calves and you need to improve some color consistency, ZSL Lithium 158G will help you in all those categories.

Annex is the type of calving ease sire that we look for every year to use in our own herd. 66G is a soggy, powerful, hairy calf with great overall balance in a strong, sound footed package. These calving ease bulls, with this type of thickness and performance are hard to find and to me are worth their weight in gold. Annex 66G needs some serious consideration if you are looking for that special homo polled, calving ease sires. He will be one of the bulls that will have the most potential to fit that kind of a role in our sale offering.

A moderate framed bull out of a very exciting Westcott heifer that did a great job on this guy. Not all cattle are bred to be big yet we need them to be big enough to finish in desirable weight ranges in the feedlot. Easton, his sire, does that and we are confident that the breeding potential in this bull will fill that role in your herd also.

This Easton son is another bull that could very well be destined to walk in a pasture with your heifers. Easton, his sire, was also bought to do just that. He has passed on his own light birth weight to his calves yet they go on to become a moderate framed, thick, beefy type of cattle that give up very little to the bigger boys. His mother is a Mandako heifer that is the front pasture type and her genetics are also a big plus in this bull's potential.

A long bodied, smooth, stout, black blaze bull with a tremendous pedigree to back up his physical attributes. This pedigree definitely adds muscle shape and performance and that's exactly what you'll get from 127G. Many of the best bulls that we have ever used appear in this herd sire's pedigree. ZSL Mandako, Red Electric, Wolverine, and Red Label. On the bottom side, the Buckeye 14Z cow, who is the grandmother of what is going to be our lead off red bull appears again. The great cows produce the great bulls. This homozygous polled, hairy, black blaze faced bull has as much up side as any bull in our sale offering.

A really nice combination of full blood genetics are seen in this bull's pedigree. His Subaru mother is a thick and deep bodied heifer with plenty of milk allowing her to raise this kind of a bull calf on her first try. The presence of Dempsey, his polled Adonis sire, is seen in all his calves as he adds his performance, thickness and color pattern to his offspring.

I didn't really notice just how good this bull looked until picture day where I thought he really stood out. He is a thick, easy moving, good dispositioned bull out of the 6B cow who produced Cortez, our high selling bull a few years ago and who is now working at Robb Farms. The breeding potential in this bull to produce both top quality steers and females is a sure thing.

A moderate framed, big ribbed, dark red son of Dempsey with huge herd bull potential. This is the type of bull that has brought confidence in the commercial cattleman to breed more full blood genetics into their herd. He will provide moderate birth weights and above average performance to the calves he sires and put a smile on his new owners face.

An Easton son with an 88 pound birth weight that is extremely well balanced and thick in his makeup yet will be a bull that should work in anyone's heifer pen. Heifer bulls are not meant to be 1400 pounds as yearlings but you still want them to produce a calf that is born easily with enough weight in the fall to pay his way. Reagan 63G is one of those bulls.

A light birth weight calf off of a really nice young heifer that we feel will also work in anyone's heifer pen or on some young cows that you want to calve easily and cycle back in a hurry. We apologize for no pictures on these 3 Easton sons but we were approached by many breeders at Camrose Bull Congress looking for calving ease sires, we were going to keep these but here they are on offer. They are all deep bodied and thick with plenty of top in a moderate frame and will be easy to find on sale day.

A blood red and hairy Easton son with a slightly larger birth weight that is justified by his mother being a powerful heifer. We take recommending bulls for heifers very seriously as we don't want anyone having any more trouble than necessary. You could very easily put this guy with some heifers but you may also want to use him on second calvers just to try him out for the first year. Also if a really quiet disposition is important to you Sawyer 165G is just that.

We're going **OLD SCHOOL** and won't have online bidding available at our sale. We really want to promote a personal relationship with all of our customers and firstly, hope you can be with us on sale day. We want you to know how much it means to us for you to be with us personally on sale day and see our product firsthand. If attending just isn't in the cards, give us a call or stop by the farm prior to sale to see the bulls. We have also hired the most trusted sale staff we could think of to assist you with any purchasing requirements you may have in your absence. We use them ourselves to help with buying when we can't be there ourselves. Call any of the cell numbers listed in the front of this catalog.

Terms & Conditions

DELIVERY:

\$100 off per lot if picked up sale day. Bulls will be kept free of charge for a reasonable length of time, usually until you need them. In rare cases and for convenience reasons, you may be asked to receive your bull(s) when delivering other bulls to your area. All bulls must be insured if going back to the seller's farm unless arrangements have been made between the buyer and seller. Insurance will be available on sale day.

HEALTH OF BULLS:

Spring Lake Simmentals guarantee to sell you a bull that is structurally sound and has passed a semen test done by a licensed veterinarian. Our bulls are raised on a SHUR GAIN TMR ration and go through a regiment of herd health shots designed to protect and enhance the longevity of the bulls.

SIGHT UNSEEN PURCHASING:

Every year more and more bulls are purchased sight unseen because of the increasing number of repeat buyers. If you wish, contact Eric or Doug with the bulls of your choice and they will discuss them with you. They will then forward you on to one of our very knowledgeable Transcon sale staff members. Then you, the buyer, can get your bull buying done in a very confidential and professional manner.

TERMS & CONDITIONS:

The sale will be conducted under the standard Transcon Livestock Corp. terms and conditions. Copies will be available at the settlement desk.

SEMEN RESERVE:

Spring Lake Simmentals reserves the right to collect 100 straws of semen for in herd use only on any bull in our sale. Semen would be collected at our expense and the buyers convenience.

Thank you to all our bull buyers of 2019.
We are grateful for your continued confidence and support.
We look forward to seeing you at the sale.
