Spybot - Search & Destroy 1.62

Downloading Installing And First-Time Use Updating and Scanning

DOWNLOADING

Download the latest version of Spybot (currently 1.62) from http://www.download.com.

In the top search bar, type in the words "**spybot search & destroy**" and hit ENTER or click on the MAGNIFIER button to the right.

<u>NOTE</u>: Be VERY careful of the search results that may appear. You want to come down the page, below the "sponsored" links. There could be times where a "sponsored" link looks very close to what you are searching on. These are misleading programs and you do not want to download/install them. Click on the *Download Now* link on the right.

4 software results for "spybot search & destroy"

Related searches: spybot, ccleaner, malwarebytes, avg free, adaware

You should come up with the following screen. Click on *Save* and save it to a temporary folder or to your desktop by clicking *Save* on the next screen as well:

	Save As		? 🔀
File Download - Security Warning	Save n:	🞯 Desktop	🕑 Ø Ø 📂 🖽 -
Do you want to run or save this file?	D Recent	My Computer My Computer My Network Places	
Name: spybotsd160.exe Type: Application, 14.3MB From: software-files.download.com	Desktop		
Run Save Cancel	My Documents		
While files from the Internet can be useful, this file type can potentially harm your computer. If you do not trust the source, do not run or save this software. <u>What's the risk?</u>	My Computer	File name spybotsd160 exe	Save
	My Network	Save as type: Application	Cancel

The file will be saved and you should now have your downloaded file saved onto your desktop or into your temporary folder.

INSTALLING AND FIRST-TIME USE

Double-click on your downloaded file to begin the installation process.

Click on *Run* if you get the following window:

Name:	spybotsd160.exe
Publisher:	Safer Networking Ltd.
Type:	Application
From:	C:\Documents and Setungs\User\Desktop

Click Search & Destroy.

Click *Check for problems* to begin scanning your computer for adware/spyware.

Pay attention to the lower-left corner of the screen. It tells you where you are in the scanning process and what it is currently looking for (the adware/spyware name).

The results will be displayed at the end of the scanning process. Hopefully, the program found 0 problems. If there were problems found (summary will be displayed in the lower-left corner), follow the next steps.

If you click on the \blacksquare next to each item, you can see the area(s) where the problem resides. (Not necessary to do this.)

If you click (highlight) one of the problems and click on the blue arrows on the right side, you will see a family description of the problem found. (Not necessary to do this, but might give you a better idea of how the problem(s) got loaded onto your computer.)

	Threat:	Tracking cookie or cookie of tracking site.
	Company URL:	http://www.doubleclick.com
	Description:	Uses information about your web surfing that could include any information, like accounts and passwords.
	Privacy Statement:	No personal information is used by DoubleClick to delivery Internet ads. DoubleClick does not use your name, address, email address, or phone number to
		deliver Internet ads. DoubleClick does use information about your browser and web surfing to determine which ads to show your browser

Make sure that every problem found has a green check mark in front of it.

Click Fix selected problems.

You will receive a Confirmation box. Click Yes.

Confirm	nation 🛛 🔀
?	You are about to remove these entries. Do you want to continue?

Spybot - Search & Destroy will attempt to fix all the problems it found. If it is successful, you will receive another Confirmation box. Click *OK*.

There might be some instances where the problem detected is still in memory and Spybot is unable to do anything with it at the present time. Should this happen, you will be notified and asked if Spybot can run at the next system startup. Say **YES** to this message, should this happen to you.

At this point, you can click *File - Exit* or click the Red X in the upper-right-hand corner of the Spybot window.

That is it! Congratulations! It is a good idea to use Spybot - Search & Destroy about once per month. Just remember to always get updates before running your next full scan. Any questions, email me at <u>brian@bytesbacklv.com</u>.
