CONSTRUCTION DETAILS

- | | |
|------------------------------|--|
| 1. End (side) Panel Material | 3/4" hardwood plywood veneer core—Unfinished |
| Option | 3/4" hardwood plywood veneer core—Finished |
| Option | 3/4" hardwood plywood veneer core—Flushed Furniture End |
| Option | 3/4" hardwood plywood veneer core—Flushed & Finished |
| 2. Top/Bottom Material | 1/2" hardwood plywood veneer core |
| 3. Back Panel Material | 1/2" hardwood plywood |
| Option | 3/8" beaded back |
| Option | 3/4" flush back |
| 4. Interior Finish | Natural birch melamine |
| Option | Stained matching veneer |
| Option | Natural maple veneer |
| 5. Shelf Material | 3/4" hardwood plywood |
| 6. Base Cabinet Shelf | Two-Thirds Depth |
| Option | Full Depth |
| 7. Drawers & Roll Trays | 5/8" Birch, Dovetail Joinery |
| Glides | Soft close, full extension, under-mount |
| Option | Walnut drawer boxes and roll trays |
| 8. Face Frame | Beaded or Flush |
| 9. Door Hinges | Concealed hinge with soft close, or full wrap finial hinge in five colors: Dark Oil Rubbed Bronze, Pewter, Matte Nickel, Black and Copper Bronze |

FACE FRAME OPTIONS

All inset door styles are available with a Beaded or Flush face frame.

BEADED INSET FACE FRAME

Openings of face frame feature a bead.

FLUSH INSET FACE FRAME

Openings of face frame are square.

FINIAL HINGE COLORS

DRAWER HEADER OPTIONS

FIVE-PIECE DRAWER HEADER

Available on all inset door styles.

ROLLED PROFILED DRAWER HEADER

Available on the Allentown, Kingsberry, Laforest, Montico and Rock Elm inset door styles.

SCOOPED PROFILED DRAWER HEADER

Available on the Danburg, Merrimac and Woodlawn inset door styles.

FURNITURE PEGS

This option gives rustic character to doors and drawers. A 5/16" square wooden peg is driven into a 3/8" diameter drill hole. The gaps between the peg and the hole are visible and are not filled. Single pegs (illustrated below) and double pegs are available. Available on all inset door styles.

Our complete collection of Tinted Varnish cabinet colors is shown below.

This icon indicates that the color can receive Old World Distressing illustrated on page 23.

Our complete collection of Specialty Colors for Maple and Quarter Sawn Oak is shown below.

SPECIALTY COLORS are cabinetry finishes that take your room to a whole new level. Artistic effects are added to popular colors to add character and in some cases, a vintage feel.

VILLA

A specialty color for Maple cabinetry

The Villa finish results in a look that suggests brush strokes along the face of the doors and drawers, and any other finished part of the cabinetry. The color and brush stroke technique will vary from door to door and will blend throughout the cabinetry. Villa is available on Maple door styles.

Fairhaven door style in Maple finished in Villa Ivory.

DeWitt door style in Maple finished in Villa Mushroom.

AMARETTO & BORDEAUX

Specialty colors for Maple cabinetry

Amaretto and Bordeaux are Black finishes with rounded corners, worn edges and light chain distressing. Additional worn areas on center panels and door frames expose golden butterscotch tones on the Amaretto finish and beautiful burgundy tones on the Bordeaux finish. Amaretto and Bordeaux are available on Maple door styles. Amaretto and Bordeaux can receive Old World Distressing, illustrated on page 27.

Lafontaine door style in Maple finished in Amaretto.

Lafontaine door style in Maple finished in Bordeaux.

LICORICE

A specialty color for Maple and Quarter Sawn Oak cabinetry

Licorice is a Black finish with rounded corners, worn edges and light chain distressing. Nickel glaze is applied to accent the door profiles. Licorice is available on Maple and Quarter Sawn Oak door styles.

Alexandria door style in Maple finished in Licorice.

Rock Elm door style in Quarter Sawn Oak finished in Licorice.

Specialty Colors

CHATEAUX

A specialty color for Cherry cabinetry

Chateaux is created by randomly applying several distressing techniques, softening all edges, padding the edges to create shadowing, and adding speckling to accentuate the distressing. Patina is accomplished with rounded corners, worn edges, knife cuts, worm holes, rasping, dips and light chain distressing that we hand apply to drawers, doors and throughout the cabinetry. A protective topcoat completes the look. The finish is oven cured for durability. Chateaux colors are shown below. Chateaux is available on Cherry door styles.

Alexandria door style in Cherry finished in Chateaux Brittany. Shown in beaded inset with standard slab drawer headers.

Chateaux Cappuccino

Chateaux Nutmeg

Chateaux Oregano

Chateaux Toffee

ANTIQUITY

A specialty color for Alder and Rustic Alder cabinetry

To create Antiquity, our artisans apply the Ebony glaze by hand and brush it. The resulting look echoes a time-worn patina. Antiquity is available on Alder and Rustic Alder door styles.

Antiquity Driftwood

Antiquity Fog

Antiquity Oregano

Antiquity Peppercorn

Antiquity Slate

HOMESTEAD

A specialty color for Alder and Rustic Alder cabinetry

Several distressing techniques are applied randomly and heavily. Distressing marks are rounded corners, worn edges, knife cuts, abundant worm holes, rasping, dips, light chain distressing and chiseling. They are applied to drawers, doors and throughout the cabinetry. A protective topcoat completes the look. The finish is oven cured for durability. Homestead is available on Alder and Rustic Alder door styles.

Homestead Blueberry

Xenon door style in Alder finished in Homestead Fog. Shown in flush inset with optional five-piece drawer headers.

Cottage Distressing

Cottage Distressing is a sweet, welcoming look created with rounded corners and worn edges. A third technique, light chain distressing, is optional. Glaze brings out the wood's unique texture, and a durable topcoat completes the process, protecting both the color and the marks.

Cottage Distressing is available on:

- Any Stain with Glaze combination. See page 22.
- Any Tinted Varnish with Glaze combination. See page 23.

Kingsberry door style in Maple finished in Marshmallow Cream with Chocolate glaze and Cottage Distressing. Shown in flush inset with standard slab drawer header.

Old World Distressing

Old World Distressing blends your new cabinetry with today's popular distressed furniture pieces. Distressing techniques are randomly applied to the face of your cabinetry throughout the design. These techniques are:

1. rounded corners
2. rasping
3. dips
4. knife cuts
5. worm holes
6. worn edges
7. light chain distressing.

Look for this icon on pages 22-23 for colors that can receive Old World Distressing.

Danburg door style in Maple finished in Peppercorn with Chocolate glaze and Old World Distressing. Shown in flush inset with optional five-piece drawer header.

Distressing illustrated

StarMark Cabinetry uses several techniques to add character and appeal to cabinetry. They are illustrated on these two pages. All of our distressing marks are added by hand. There is no machine and there is no robot that can successfully duplicate what the eyes and hands of an artisan achieve through personal handling of the cabinetry.

CHISELING

Chiseling is used to create Homestead.

DIPS

Dips are used to create Chateaux and Homestead and they are included in Old World Distressing.

ROUNDED CORNERS

Rounded Corners are used to create Amaretto, Bordeaux, Chateaux, Homestead and Licorice. They are included in Cottage Distressing and Old World Distressing.

RUB THROUGH

Rub Through is used to create Amaretto and Bordeaux.

SPECKLING,
DARK BROWN

Speckling is used to create Chateaux.

Allentown door style in Maple finished in Bordeaux.

KNIFE CUTS

Knife Cuts are used to create Chateaux and Homestead and they are included in Old World Distressing.

PADDING

Padding is used to create Chateaux.

RASPING

Rasping is used to create Chateaux and Homestead and it is included in Old World Distressing.

ABUNDANT WORM HOLES

Abundant Worm Holes are used to create Homestead.

WORM HOLES

Worm Holes are used to create Chateaux and are included in Old World Distressing.

WORN EDGES

Worn Edges are used to create Amaretto, Bordeaux, Chateaux, Homestead and Licorice. They are included in Cottage Distressing and Old World Distressing.

A Light Touch

SPATTERING

Spattering is a dark stain, hand applied randomly to the cabinetry.

- Spattering on stain with glaze combinations is free of charge.
- Spattering on an unglazed stain is available on all species at an upcharge.

LIGHT CHAIN DISTRESSING

Light Chain Distressing is used to create Amaretto, Bordeaux, Chateaux, Homestead and Licorice. It is included in Cottage Distressing and Old World Distressing.

- Light chain distressing on Tinted Varnish with glaze combinations is free of charge.

Light chain distressing is available at an upcharge on:

- all stains on any wood type
- all stain with glaze combinations on any wood type
- all Tinted Varnish on Maple, Oak or Quarter Sawn Oak

Alexandria door style in Maple finished in Marshmallow Cream and the Alexandria door style in Cherry finished in Brittany. Shown in flush inset with standard slab drawer headers.

wood types

Alder is a softer wood with a fine straight grain and even texture. Color is light brown with yellow or reddish tinge, with little difference between heartwood and sapwood. Alder does not evolve in color or darken when exposed to light or heat as other woods do, and takes stains and finishes well. More than some of the other woods, care must be taken to avoid damage due to its softer nature. Some small tight knots can be found with standard Alder.

Rustic Alder refers to the Rustic version of this wood type. Rustic Alder is characterized by knots, burls and mineral streaks found on center panels, stiles and rails of the door, and on the drawer headers, which could impact hardware placement. Knots will be sound and will be closed, but certain angles could show light through the knots. Glazing Rustic Alder will enhance these unique characteristics.

Cherry displays a distinctive grain pattern and warm color. The color ranges from nearly white to dark reddish brown. Dark pockets, pin knots, and random streaks are common. More than most woods, Cherry will darken when exposed to light, especially in light stains. The more sun Cherry receives, the faster it will darken. This will be most evident in new wood and will slow as it ages.

Lyptus is a hard, fine-grain hardwood with a rich, warm tone. Lyptus comes from fast-growing eucalyptus trees that are ready to be harvested within 14 to 16 years of planting. These trees are grown on non-tropical, certified plantations. Color variations can be extreme, but they are minimized when you choose a darker stain. More than most woods, Lyptus mellows and darkens with exposure to light. When Lyptus is stained in a dark color, it looks very much like mahogany.

Maple is a versatile hardwood with a fine, smooth grain. It varies in color from nearly white to a slightly reddish brown. Mineral or sugar streaks occur naturally in Maple and can vary from piece to piece. Variations will be more noticeable in lighter stains.

Quarter Sawn Oak is milled at an angle of 60 to 90 degrees from the grain, allowing rays and flecks to become visible, giving the wood a unique, often vintage, character and dimension.

Walnut is a strong, stable American hardwood known for wide color variation. It ranges in color from creamy white to a medium purplish brown. Walnut cabinetry will have both flowing grain and straight grain. This combination is a treasured characteristic of Walnut, and is showcased when Walnut is finished in Natural. However, Walnut takes all available stains well. Walnut is a favorite choice for furniture and furniture grade cabinetry, such as StarMark Cabinetry.

Specialty Colors have characteristics that cannot be captured on a color chip, so color chips are not available in Amaretto, Antiquity, Bordeaux, Chateaux, Homestead, Licorice and Villa. Request a door sample to view these unique, beautiful colors.

Specialty Colors are cabinetry finishes that take your room to a whole new level. Artistic effects are added to popular colors to add character and in some cases, a vintage feel.

STAIN

A stain is a basic yet substantial finish that adds color to wood while revealing the beauty of the grain. The wood type affects the color of the stain, so the same stain will look different on each wood type. In some cases, the difference is dramatic. For the richest, most consistent color coverage, we apply the stain and then hand rub it into the wood. There are no machine shortcuts: elbow grease is the only way to coax the luster from stained wood.

TINTED VARNISH

The best way to describe Tinted Varnish is to say it gives cabinetry a paint-like finish. However, our Tinted Varnish is much more durable than paint. Throughout the country, this type of finish is also called "enamel" or "opaque". Tinted Varnish is available on Maple and Quarter Sawn Oak cabinetry, and each wood yields a different look. The grain of Maple wood is concealed by Tinted Varnish and the grain of Quarter Sawn Oak shows through Tinted Varnish.

GLAZE

StarMark Cabinetry has four glaze colors: Chocolate, Ebony, Latté and Nickel. Glazes are available to go over both stains and Tinted Varnishes. We apply the glaze by hand and then wipe it off by hand. When our craftsman wipes off the glaze, he or she can best use the glaze to define the details in that particular kitchen. The profiles on a door and drawer, and other details on cabinetry, such as corbels, rosettes or shells, are stunning when glazed. We glaze every part of your cabinetry by hand—doors, drawers, moulding and panels.

OPTIONS FOR STANDARD PALETTE COLORS

The standard palettes for Stain and Tinted Varnish are shown on pages 22–23.

StarMark Cabinetry's construction, materials and all finishes are covered by a Limited Lifetime Warranty.

CONSTRUCTION CONSIDERATIONS

Inset cabinetry has doors that are precisely “set into” the cabinet’s face frame. We manufacture inset cabinetry with tight reveals and take great care to create square, true cabinets. When adding inset cabinetry to your home, consider:

1. Quality installation is a must. If cabinets are not installed properly, doors may appear warped even though they are not. Every homeowner should expect their walls and floors to have variations; a well-qualified installer can properly shim inset cabinetry so it does not become out of square.
2. Homeowners should be prepared to adjust their doors seasonally as temperatures change.
3. Wall, utility wall and wall base inset cabinets are 12" deep. The standard inside storage dimension is 10¾". Unless the cabinet is modified to a greater depth, the cabinet will not accommodate oversized plates or dinnerware.
