**\*Requires Inset Rims**

Combination Buckets are not approved for use with the Tilt-Tatch.  
 Combination Buckets may interfere with tracks at extreme roll-back position on some loaders. Use of lift-arm stop is required if this occurs.  
 It is recommended that a port relief be installed for use with the Combination Buckets. Installation instructions are included in the Operation Manual.  
 Optional Open/Close Restrictor is available to slow down the open/close functions of the combination bucket.

Bobcat Rock Buckets work excellent for separating unwanted objects, such as rocks and other debris, from work areas while leaving finer material behind that can be cultivated or landscaped. Each tine tip is fully gusseted on each side, and connected to the tip next to it. This allows the Bobcat Rock Bucket to be used effectively as a tool to clear the soil surface of vegetation or other debris, as well as to be used to pull up objects from below the ground surface.

Note: Rear Stabilizers are required and counterweights are recommended when using the tree spade

### Convertible Tree Spades

Convertible Tree Spades can be equipped with either a pendant style (rocker switch) control panel or a 7-pin ACD control kit. Tree Spades with pendant control can be installed on all loader series; tree spades with 7-pin ACD control must be installed on G-Series and newer loaders. Must order a pendant control kit or 7-pin ACD conversion kit for tree spade with convertible control.
