

# Steam master

## 36 - 54 - 72 kW

INDUSTRIAL  
STEAM GENERATOR

- Food industry
- Beverage & wine making
- Transportations
- Industry

### Patented heating coil system

Water runs through the heating spiral and is heated up by a wire. Before leaving the heating spiral, the water turns to steam and is pumped to the consumer. This system optimizes the steam output with the minimum power consumption.

Designed to work with Tekno belt cleaner

For correct voltage and order code please contact our technical office.

**\*The Blue Cleaner Pad** is constructed of polyester fibers in a semi open texture nonwoven fabrication and is designed for medium scrubbing. Abrasive particles are dispersed throughout and bonded to the nonwoven construction with a durable adhesive. Use with a neutral floor cleaning solution to remove old soiled floor finish layers.

**\*\*Brown Strip Pad** is constructed of polyester fibers in a semi open texture nonwoven fabrication and is designed for medium duty stripping. Abrasive particles are distributed throughout and adhered to the nonwoven construction with a sturdy adhesive. This product is designed specifically for customers who want a more dense nonwoven pad.

**Green Initiative**

**a.** Polyester fiber used in our pads come from 100% post consumer and industrial recycled waste product.

**b.** Water Based Latex Resins are used in the manufacturing process. No phenol-formaldehyde resins are used in our binding process.

**c.** Shipping cartons contain at least 45% recycled material.
