Answer all the questions.
$5 \times 2=10$

## 1. Answer any two of the following:

(a) X has $60 \%$ interest in a joint venture with Y . X sold a plant with w.d.v. ₹60 lacs for ₹ 80 lacs. Calculate how much profit $X$ should recognize in its books as per AS-27 in case the joint venture is
(i) jointly controlled operation
(ii) jointly controlled asset
(iii) jointly controlled entity
(b) Jupiter Ltd. has an asset, which is carried in the Balance Sheet on 31.03 .2012 of $₹ 500$ lakhs. As of that date, the value in use is ₹ 400 lakhs and the net selling price is ₹ 375 lakhs.
From the above data:
(i) Calculate Impairment Loss
(ii) Prepare Journal Entries for adjustment of Impairment Loss
(iii) Show how the Impairment Loss will be shown in the Balance Sheet
(c) From the following information for Rishab Ltd. for the year ended 31.03.2013, calculate the deferred tax asset/liability as per AS-22.

| Accounting Profit | $₹ 10,00,000$ |
| :--- | ---: |
| Book Profit as per MAT (Minimum Alternate Tax) | $₹ 9,00,000$ |
| Profit as per Income Tax Act | $₹ 1,00,000$ |
| Tax Rate | $\mathbf{3 0 \%}$ |
| MAT Rate | $10 \%$ |

## Answer :

1. (a)

According to AS 27, in the case of Jointly Controlled Operations (JCO) and Jointly Controlled Assets (JCA), there are no separate financial statements for the Joint Venture. The venturer may prepare accounts for internal reporting purposes. In JCO, venturers' assets are used. In JCA, the assets are dedicated to the venture. In the case of Jointly Controlled Entity (JCE), there is a separate legal entity for the venture and it operates like any other enterprise.
When X sells the plant to the venture at a profit of 20 lacs, the following is the treatment according to AS 27 - transactions of the venture with the venture:

| X should consider in its Separate Financial Statements (SFS): <br> The extent of profit altributable to the other venturers, i.e. 40 <br> $\%$ of 20 Iacs | 8 | JCO/JCA |
| :--- | :---: | :---: |

## Suggested Answer_Syl12_Dec13_Paper 18

| X should consider the full amount of profit in its SFS |  | 20 |
| :--- | :---: | :---: |
| In the Consolidated Financial Statements (CFS) of X, its <br> share should be eliminated and hence, only the other <br> venturer's profit is considered | 8 | 8 |

If the candidate assumes that $X$ sells the plant to a third party, then,
(i) in the case of a JCO, X would have used its own asset for X 's own business and that of the venture's. Since it is $X$ 's own asset, all the profit of 20 lacs would be considered in the SFS of $X$ as well as in the CFS of $X$.
(ii) In the case of JCA, the asset would have been dedicated to the venture. Hence $X$ will recognize its share viz. $60 \%$ of 20 lacs $=12$ lacs in both the SFS and the CFS.
(iii) In the case of a JCE, the venture considers its interest in the JCE. Hence 12 lacs will be considered as 'income from investment', since the interest in a JCE is reported as an investment rather than a line item of the individual asset.

1. (b)
(i) Calculation of Impairment Loss

Recoverable amount is higher of value in use ₹400 and Net Selling Price ₹ 375
Thus, Recoverable Amount = ₹400
Impairment Loss $=$ Carried Amount - Recoverable Amount
= ₹ 500 lakhs -₹ 400 lakhs = ₹ 100 lakhs
(ii) Journal Entries.

| Particulars | Dr. (Rupees in lakhs) | Cr. (Rupees in lakhs) |
| :--- | :---: | :---: |
| a)Impairment Loss A/c <br> To, Asset <br> (Being the entry for accounting <br> for impairment loss) | 100 | 100 |
| b) | Profit and Loss A/c <br> To, Impairment Loss A/c Dr. <br> (Being the entry to transfer <br> impairment loss to P/L A/c) | 100 |

(iii)

Balance Sheet of Jupiter Ltd. as on 31.03.2012 (Extracts)

|  | Amt. in Lakhs |
| :--- | ---: |
| Asset less. Depreciation | 500 |
| Less: Impairment Loss | 100 |
|  | 400 |

1. (c)

Tax as per accounting profit: $\quad 10,00,000 \times 30 \%=$ ₹ $3,00,000$
Tax as per income tax profit: $\quad 1,00,000 \times 30 \% \quad=₹ 30,000$
Tax as per MAT:
$9,00,000 \times 10 \%=$ ₹ 90,000
Tax Expense = Current Tax + Deferred Tax
Therefore Deferred Tax Liability as on $31.03 .2013=$ ₹ $3,00,000$ - ₹ 30,000
= ₹ 2, 70,000

Amount of Tax to be debited in Profit and Loss $A / c$ for the year 31.03.2013:
= Current Tax + Deferred Amount of Tax liability + Excess of MAT over current tax
$=30,000+2,70,000+(90,000-30,000)$
$=$ ₹ $3,60,000$

## Alternative answer for second part of the answer

Amount of tax to be debited in Profit and Loss A/c for the year 31.03.2013:

## Suggested Answer_Syl12_Dec13_Paper 18

= Current Tax (MAT) + Deferred Tax
$=90,000+2,70,000$
$=3,60,000$
Both the options can be considered favorably.

A Ltd. holds $\mathbf{7 5 \%}$ of the paid-up capital of B Ltd. and the balance is held by a foreign company.
A memorandum of understanding has been entered into with the foreign company by A Ltd. to the following effect:
(i) The shares held by the foreign company will be sold to A Ltd. at a price per share to be calculated by capitalizing the yield at $25 \%$. Yield for this purpose would mean $60 \%$ of the average pre-tax profits for the last 4 years, which were ₹ 14 lacs, 20 lacs, 22 lacs and 24 lacs respectively.
(ii) The actual cost of shares to the foreign company was $₹ 2,00,000$ only. Gains accruing to the foreign company are taxable at $20 \%$. The tax payable will be deducted from the sale proceeds and paid to the Government by A Ltd. $60 \%$ of the consideration (after payment of tax) will be remitted by A Ltd. to the foreign company.
(iii) A Ltd. will issue its shares at their intrinsic value for the balance consideration. Cash will be paid for any fractional shares in the computation.
(iv) It was also then decided that A Ltd. would absorb B Ltd. by simultaneously writing down the fixed assets of B Ltd. by $10 \%$. Stock of A Ltd. included stock of ₹ $1,00,000$ purchased from B Ltd., which sold it at cost + $25 \%$.
The entire arrangement was approved and made effective from 1.4.2013.

## Suggested Answer_Syl12_Dec13_Paper 18

You are required to show the Balance Sheet of A Ltd. after the arrangement was made effective as at 1.4.2013. Present the Balance Sheet in the revised Schedule VI format. Fill in the figures to the extent available. Workings should form part of your answer.

Loan Funds included Bank Loans of ₹ 20 lacs specially taken for B Division and Debentures of paid up value of ₹120 lacs redeemable at any time between October 1st 2011 and 30th September 2012. On 1st April 2012, the company sold all of its investments for ₹ 120 lacs and redeemed all the debentures at par, the cash transactions being recorded in the Bank A/c pertaining to Division A.
Then, a new company T Ltd. was incorporated with an authorized capital of $₹ 1,000$ lacs divided into shares of $₹ 10$ each. All the assets and liabilities pertaining to Division B were transferred to the newly formed company, with T Ltd. allotting to S Ldd's shareholders its fully paid equity shares of ₹10 each at par for every fully paid equity share of ₹ 10 each held in S Ltd. as discharge of consideration for the division taken over.
T Ltd. recorded in its books the fixed assets at ₹ 225 lacs and all the other assets and liabilities at the same values at which they appeared in the books of $S$ Ltd.
You are required to:
(i) Show the journal entries in the books of $S$ Ltd.
(ii) Prepare the Balance Sheet of $S$ Ltd. immediately after the demerger.
(iii) Prepare the initial Balance Sheet of T Ltd.

## Answer:

5. (a)As per AS-19 on Leases, Unearned Finance Income is the difference between (a) the gross investment in the lease and (b) the present value of minimum lease payments

## Suggested Answer_Syl12_Dec13_Paper 18

under a finance lease from the standpoint of the lessor, and any unguaranteed residual value accruing to the lessor, at the interest rate implicit in the lease.
Gross Investment in the lease is the aggregate of
(a) minimum lease payments from the standpoint of the lessor, and
(b) any unguaranteed residual value according to the lessor.

Gross Investment= Minimum Lease Payments + Unguaranteed residual value

$$
\begin{aligned}
& =(\text { Total lease rent }+ \text { Guaranteed Residual Value) + Unguaranteed } \\
& \text { Residual Value } \\
& =[(₹ 1,00,000 \times 5 \text { years) }+(₹ 20,000)]+₹ 20,000 \\

## Answer: <br> 6.(a) (i)

| EVA $=$ NO | = NOPAT - COCE |
| :---: | :---: |
| NOPAT = Net | = Net Operating Profit after Tax |
| COCE $=\cos$ | of capital Employed |
| Debt Capital | = ₹2,000 crores |
| Equity Capital | = ₹ (500 + 7,500) crores $=$ ₹ 8,000 crores |
| Capital employed | = ₹ $(2,000+8,000)$ crores $=₹ 10,000$ crores |
| Debt to Capital Employed | $=2,000 / 10,000=0.20$ |
| Equity to capital employed | $=8,000 / 10,000=0.80$ |
| Debt cost before tax | = $12 \%$ |
| Less: Tax (30\% of 12\%) | = $3.6 \%$ |
| Debt cost after tax | = $8.4 \%$ |

As per capital Asset Pricing Model (CAPM):
Cost of equity capital = Risk Free rate + beta Equity Risk Premium OR
= Risk Free rate + Beta (Market rate - Risk Free rate)
$=9+1.05 \times(19-9)$
$=9+1.05 \times 10=19.5 \%$
WACC $\quad=$ Equity to $C E \times$ cost of Equity capital + debt to $C E x$
cost of debt
$=0.8 \times 19.5 \%+0.20 \times 8.40 \%$
$=15.60 \%+1.68 \%=17.28 \%$
COCE $=$ WACC $\times$ Capital employed
$=17.28 \times 10,000$ crores $=1,728$ crores .
= ₹ 2,100 - ₹ 1,728
= ₹ 372.00

The value will change depending on the number of decimal places that the student has used. There should be no penalty for a variation by a few thousands due to the decimals in the pv factor.
If he student does not show the annuity factor, but has correctly worked out the figures, full credit up to the stage may be given.
Instead of annuity factor, students may also take the factors shown on the last column and do extra calculations for the same figures.

7. (a) Srihari Ltd. granted 500 options to each of its 2,500 employees in 2005 at an exercise price of ₹50 when the market price was the same. The constructual life (vesting and exercise period) of the options granted is 6 years with the vesting period and exercise period being 3 years each. The expected life is 5 years and the annual forfeitures are expected at $3 \%$. The fair value per option is arrived at ₹ 15 . During 2006, the management decides to revise its estimated forfeiture rate at $10 \%$ per annum. Of the 2,500 employees, 1,900 employees have completed the 3 year vesting period. 1,000 employees exercise their right to obtain shares vested in them in pursuance of ESOP at the end of 2009 and 500 employees exercise their right at the end of 2010. The rights of the remaining employees expire unexercised at the end of 2010. The face value per share is ₹ 10 .

## 7) b) Working principle and features of XBRL

Working principle:
XBRL is a member of the family of languages based on XML- Extensible Markup Language, which is the standard for the electronic interchange of data between

businesses and the internet. Under XML, 'identifying tags' are applied to items of data so that they can be more efficiently processed by computer software.
XBRL is a more powerful and flexible version of XML and more suited specifically for business and financial information. It enables unique identifying tags to items of financial data. For example, 'asset' is tagged as a numerical value, the characteristic of having a normal debit balance, its relationship with other items such as equity or liabilities, etc. The items are also tagged as whether monetary, or a fraction or a percentage. XBRL allows labels in any language for an item. XBRL provides efficient grouping, easier consolidation and comparison among companies, supports standard tasks involved in compiling, storing and using business data. Data is converted into XBRL by mapping process or generated by XBRL software. Then the data can be searched, selected, exchanged, analysed by the computer or published for ordinary viewing.

## Main Features:

(i) Specifications: they provide the fundamental technical definition of how XBRL works. New specifications are developed from requirements statements. They are initially discussed as Internal Working Drafts within the consortium and then released as Public Working Drafts. After careful review, they are released as official XBRL Recommendations.
(ii) Taxonomies: These refer to classification of the different items. The items are also given hierarchical structures and therefore taxonomies also represent relationships. Taxonomies have further components:
(a) Schema: These store information like names, ids and other characteristics of the taxonomy elements. The schema functions to show the computer how it should process and represent accounting terms.
(b) Elements: These are defined in the schema and are business concepts- like 'asset' is the element name, type is monetary, balance is 'debit', etc.
(c) Link bases: These are a collection of links, which themselves are a collection of locators (that reference a concept and provide its label), arcs (that link concepts) and resources.
(iii) Instance documents: These are business reports in electronic format containing facts defined by the taxonomies, values and the context. These are created according to the rules of XBRL.
These instant documents in turn contain business facts, which are either item facts (holding a single value) or tuples (facts with multiple values).

financial statements to ensure adequate disclosure, accurate, realistic and uniform accounting practices consistent with the best international practices.

The Government of India has been empowered under proviso (2) of Article 293 of the Constitution of India to make loans to the States, subject to such conditions as may be laid down by or under any law made by Parliament.

The sums required for making such loans are chargeable to the Consolidated Fund of India.

The Union Government provides financial assistance to State Governments in the form of plan and non-plan assistance, for both developmental and non-developmental purposes.

The Union Government also provides loans to Foreign Governments, Government Companies and Corporations, Non-Government Institutions and Local Bodies and also recoverable advances to Government servants.

The State Governments disburse loans to Government Companies, Corporations, Local Bodies Autonomous Bodies, Co-operative Institutions, Statutory Corporations, quasipublic bodies and other Non-Government/ private institutions for development and socio-economic purposes. The State Governments also disburse recoverable advances to government servants.

## 8)b)(i)

IGAS - 3 - Indian Government Accounting Standard - 3 relating to cash flow statements of the Government.

The cash flow statement identifies the sources of cash inflows- whether from taxes, fines, fees, borrowings or sale of capital assets and the ways it has been expended- whether operating costs, acquisition of capital asset, retirement of debt, etc.

These details are disclosed by appropriate classification of changes in cash and cash equivalents during the period into operating, investing and financing activities.

The Cash Flow Statement should be presented as an integral part of the Financial Statements of the State and Union Governments and should comply with the requirements of this Standard.

Transactions that do not require the use of cash or cash equivalent should be excluded from this statement.

Some activities that do not have a direct impact on the cash flows- for example- interest payable on provident fund deposits of employees or conversion of debt into equity of an entity. These are to be excluded from the cash flow statements, but their impact should be disclosed in the notes to the Cash Flow Statement in a way that provides all relevant information about these activities.

Information about cash flows may be useful to users of the Government Financial Statements in assessing its cash flows, compliance with legislation, regulations and authority from budgets where appropriate.

Cash flow statements are used to predict the future cash requirements, give information about the Government's ability to generate cash flows and also determine the changes in the nature and scope of its activities. It also is a means for the government to discharge its accountability for the cash inflows and outflows during the reporting period.

Cash Flow Statements, when used along with the other financial statements enable users to study and evaluate the changes in financial structure in terms of liquidity and sustainability and also the Government's ability to adapt to changing circumstances and opportunities.

Historical cash flows are used as an indicator of the timing and certainty of future cash flow expectations.
